system information that is releasable under the Freedom of Information Act (FOIA) may be directed to the Federal Procurement Data Center Program Manager through the FOIA Requestor Service Center, 1800 F St. NW, Room 7126, Washington DC 20405.

Record access procedures: Any individual may register with FPDS-NG as a public user and use one or more of the various search capabilities to search for federal contracts after they have been awarded and entered into FPDS-NG. Individuals also may request access to their information from the system manager. The public may obtain releasable information by submitting a FOIA request to the Federal Procurement Data Center Program Manager through the FOIA Requestor Service Center.

Contesting record procedures: GSA establishes the rules for access to federal contracts. Individuals may contest the contents of a contract by contacting the contracting office in the department or agency that awarded the contract.

Record source categories: Information is obtained from federal agencies who report federal contracts after award according to the reporting requirements included in the Federal Acquisition Regulation Subpart 4.6—Contract Reporting. These records may contain the names of individuals, their DUNs number, and Taxpayer Identification Number (TIN).

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639–5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 295–6974. Written comments should be received within 30 days of this notice.

Proposed Project

The Continuous Miner Tramming Study Interviews—NEW—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Federal Mine Safety & Health Act of 1977, section 501, enables CDC/NIOSH to carry out research relevant to the health and safety of workers in the mining industry. NIOSH is undertaking this project to investigate the hazards in underground mines associated with the work environment and mobile face equipment. This project will show how to reduce the likelihood of these hazards through human factors design considerations and/or engineering interventions. The specific aims are to (1) determine face equipment risk to the operator, (2) define the information cues operators need to perform their job tasks, (3) identify the types of changes operators could make to reduce their exposure from each of the environmental hazards that affect their safety.

The purpose of this study is to determine which mechanisms cause injuries to operators of mobile face equipment and find new ways to reduce injuries, work-related musculoskeletal disorders, and accidents. Industry participation will help researchers in their study to improve the health and safety of employees in the mining industry, specifically those who operate and maintain mobile face mining equipment. The information for this study will be collected by conducting one-on-one structured interviews with approximately 5 managers and 15 continuous miner operators at each of 10 mines located throughout the major coal producing regions of the US. This survey will last less than 1 year.

There are no costs to the respondents other than their time. The total estimated annualized burden hours are 250.

ESTIMATED ANNUALIZED BURDEN TABLE

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

National Institute for Occupational Safety and Health

ACTION: Notice.

SUMMARY: The National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control and Prevention (CDC) announces the following: Availability of opportunity for the public to enter into a Cooperative Research and Development Agreement (CRADA) to reduce noise emissions from powered hand tools.

Notice: This notice invites manufacturers of electric and pneumatic-powered hand tools to enter into a cooperative research and development agreement (CRADA) with NIOSH and some of the leading technical experts on noise control engineering in the United States to reduce noise emissions from powered hand tools. By reducing the noise emissions of electric and pneumatic powered hand tools, the risk of noise-induced hearing loss among construction workers may be lowered.

Dated: March 6, 2006.

Joan F. Karr,
Acting Reports Clearance Officer, Centers for Disease Control and Prevention.
