

Opinion Research Corporation at the University of Chicago disseminates a free interagency report entitled "Doctorate Recipients from U.S. Universities: Summary Report." These reports are available in print and electronically on the World Wide Web.

The survey will be collected in conformance with the Privacy Act of 1974. Responses from individuals are voluntary. NSF will ensure that all information collected will be kept strictly confidential and will be used for research and statistical purposes, analyzing data, and preparing scientific reports and articles.

2. *Expected Respondents:* A total response rate of 90.8% of the total 42,155 persons who earned a research doctorate was obtained in the 2004 SED. This level of response rate has been consistent for several years. The respondents will be individuals and the estimated number of respondents annually is 47,787 with a response rate of 92%.

3. *Estimate of Burden:* The Foundation estimates that, on average, 19 minutes per respondent will be required to complete the survey, for a total of 12,465 hours for all respondents (based on the 2004 SED numbers). Also, for the approximately 3,000 respondents in the field test on a salary question, there would be approximately another 50 hours of response time. The total response burden is therefore estimated at 12,171 hours for the 2007 SED. This is slightly higher than the last annual estimate approved by OMB due primarily to an increased number of respondents since the last clearance request.

Dated: March 15, 2006.
