

(3) an assessment of the tribal self-determination and sovereignty interests implicated by applications for the grant, expansion, or renewal of energy rights-of-way on tribal land; and

(4) an analysis of relevant national energy transportation policies relating to grants, expansions, and renewals of energy rights-of-way on tribal land.

At the April meetings, the Departments seek the public's input on the types of information related to the historic rates of compensation paid for energy rights-of-way on tribal land that are important for the Departments to consider in the study. While the Departments are making good progress in this regard, we continue to seek factual information from the public to support specific case studies that members of the public regard as relevant to one or more elements of the study.

The overall purpose of the April meeting is to advance the dialogue that took place at the scoping meetings in Denver, March 7–8, 2006, and provide an additional opportunity for the public to supply oral and/or written comments about each of the four elements of the study. The April meetings will also provide an opportunity for the Departments to present preliminary progress made with respect to each of the study elements.

Issued in Washington, DC, on March 27, 2006.

Director, Office of Electricity Delivery and Energy Reliability, U.S. Department of Energy.
