**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

The Bureau of Economic Analysis (BEA) is responsible for the compilation of the U.S. international transactions

accounts (ITA), which it publishes quarterly in news releases, on its Web site, and in its monthly journal, the *Survey of Current Business*. These accounts provide a statistical summary of all U.S. international transactions and, as such, are one of the major statistical products of BEA. They are used extensively by both government and private organizations for national and international economic policy formulation and for analytical purposes. The information collected in this survey is used to develop the "transportation" portion of the ITA. Without this information, an integral component of the ITA would be omitted. No other Government agency collects comprehensive quarterly data on foreign airline operators' revenues and expenses in the United States.

The survey requests information from U.S. agents of foreign air carriers operating in the United States. The information is collected on a quarterly basis from foreign air carriers with annual total covered revenues or annual total covered expenses incurred in the United States of \$5,000,000 or more. Foreign air carriers with annual total covered revenues and annual total covered expenses each below \$5,000,000 are exempt from reporting. There are no changes proposed to the form or instructions.

**II. Method of Collection**

Form BE-9 is a quarterly report that must be filed within 50 days after the end of each quarter. Potential respondents are U.S. offices, agents, or other representatives of foreign airline operators that transport passengers or freight and express to or from the United States, and that have total covered revenues or total covered expenses incurred in the United States of \$5 million or more during the previous year, or are expected to have total covered revenues or total covered expenses of \$5 million or more during the current year.
