#### SUPPLEMENTARY INFORMATION:

##### I. Background

The ETA 538 and ETA 539 reports are weekly reports which contain information on initial claims and continued weeks claimed. These figures are important economic indicators. The ETA 538 provides information that allows national unemployment claims information to be released to the public five days after the close of the reference period. The ETA 539 contains more refined weekly claims detail and the state's 13-week insured unemployment rate which is used to determine eligibility for the Extended Benefits program.

##### II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
