

treatments do not eradicate the target species but reduce invasive plant cover to an acceptable level. Biological control release sites would be monitored to determine the success of the treatments.

Invasive plant prevention measures have been adopted with the Pacific Northwest Region Invasive Plant Program Preventing and Managing Invasive Plants Record of Decision and FEIS and will be implemented with this action as required.

### **Responsible Official**

The Forest Supervisor, Steven A. Ellis, will be the responsible official for making the decision and providing direction for the analysis. He may be contacted at the address listed above.

### **Nature of Decision To Be Made**

The responsible official will decide what type of methods and how they will be used to control invasive plants on the Wallowa-Whitman National Forest.

### **Scoping Process**

The public is asked to provide the responsible official with written comments describing their concerns about this project.

### **Comment Requested**

This notice of intent begins the scoping process in the development of the environmental impact statement. The most useful comments to developing or refining the proposed action would be site specific concerns and those that can help us develop treatments that would be responsive to our goal to control, contain, or eradicate invasive plants as well as being cost effective.

### **Early Notice of Importance of Public Participation in Subsequent Environmental Review**

A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will commence 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also,

environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.
