Full Text of Announcement**I. Funding Opportunity Description**

Purpose of Program: The purpose of the program is to: (1) Improve results for children with disabilities by promoting the development, demonstration, and use of technology, (2) support educational media services activities designed to be of educational value in the classroom setting to children with disabilities, and (3) provide support for captioning and video description that is appropriate for use in the classroom setting.

Priorities: This competition contains one absolute priority and one competitive preference priority. In accordance with 34 CFR 75.105(b)(2)(iv) and (v), these priorities are from allowable activities specified in the statute, or otherwise authorized in the statute (see sections 674 and 681(d) of

the Individuals with Disabilities Education Act (IDEA)).

Absolute Priority: For FY 2006 this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is: Technology and Media Services for Individuals with Disabilities—Access to Emerging Technologies.

Background: The Individuals with Disabilities Education Act (IDEA) supports captioning and video description appropriate for use in the classroom setting of: Television programs; videos; and other materials, including programs and materials associated with new and emerging technologies, such as CDs, DVDs, video streaming, and other forms of multimedia.

The purpose of this priority is to support the use of technology in the areas of captioning and video description to promote the accessibility of educational programs in order to enhance learning opportunities for children with disabilities. The following are examples of advances in technology that could be utilized to enhance access: (1) Digital freeze-frame technologies that allow time for expanded descriptions for the blind; (2) Avatars (computer animated characters) using sign language incorporated into videos; (3) Digital video recording technologies that enable users to capture television programming to the computer hard disk storage for later viewing, thereby merging television and computer technologies; and (4) "Hot links" that are embedded in a television program and that link to Web pages where background information, clarification of terms, or other additional information may be accessed.

Priority: The purpose of this priority is to enhance learning opportunities for children with disabilities and support the development and demonstration of advances in technology to promote the accessibility of educational programs. All projects must ensure that the programming or material contains descriptions and/or captions. New technologies may be used, for example, to provide enhanced Web, CD, or DVD delivery of programming to the student or classroom by utilizing expanded descriptions, definitions of captioned material, real-time simulations, clarification of program content, or other enhancements that may benefit students with disabilities.

In its application, each applicant must:

(a) Identify new and emerging technology (or technologies) to be developed and demonstrated, and

identify how they will promote the accessibility of educational materials to the student or classroom.

(b) Present a justification, based on scientifically rigorous research or theory, that supports the potential effectiveness of the new and emerging technology in promoting the accessibility of educational materials to students in the classroom.

(c) Identify the total number of program or material hours the project will make accessible and the total cost per hour for the program or material, if the project is developing or demonstrating a technology that involves captioning or video description of program or material that has not already been captioned or video described.

(d) Identify the extent to which the technological application will be widely available and discuss the shelf-life and range of distribution of the new technology.

(e) Demonstrate the willingness of program providers or owners of materials to permit and facilitate the use of their program or material.

In addition, projects funded under this priority must—

(a) Identify and support a consumer advisory group, including parents and educators, which must meet at least annually. Use the expertise of this consumer advisory group to provide feedback regarding the extent to which the technological devices are appropriate for use in the classroom setting, focusing on the educational needs of students, including intellectual/cognitive or social/emotional needs.

(b) Monitor the extent to which full accessibility is provided and use this information to make refinements in project operations.

(c) Budget for a two-day Project Directors' meeting in Washington, DC during each year of the project.

(d) If a project maintains a Web site, include relevant information and documents in a format that meets a government or industry-recognized standard for accessibility.

Competitive Preference Priority: Within this absolute priority, we give competitive preference to applications that address the following priority. Under 34 CFR 75.105(c)(2)(i), we award up to an additional 10 points to an application from a small business. Applicants must document their status as a small business according to the definition for their business category as provided by the Small Business Administration (SBA) (for more information see SBA Web site at: <http://www.sba.gov/size/index.html>).

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (APA) (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed priorities. However, section 681(d) of IDEA makes the public comment requirements of the APA inapplicable to the priorities in this notice.

Program Authority: 20 U.S.C. 1474 and 1481.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 84, 85, 86, 97, 98, and 99.

You may not e-mail an electronic copy of a grant application to us.

You may access the electronic grant application for the Access to Emerging Technologies—CFDA Number 84.327C competition at: <http://www.grants.gov>. You must search for the downloadable application package for this program by

the CFDA number. Do not include the CFDA number's alpha suffix in your search.

Please note the following:

- When you enter the Grants.gov site, you will find information about submitting an application electronically through the site, as well as the hours of operation.
- Applications received by Grants.gov are time and date stamped. Your application must be fully uploaded and submitted, and must be date/time stamped by the Grants.gov system no later than 4:30 p.m., Washington, DC time, on the application deadline date. Except as otherwise noted in this section, we will not consider your application if it is date/time stamped by the Grants.gov system later than 4:30 p.m., Washington, DC time, on the application deadline date. When we retrieve your application from Grants.gov, we will notify you if we are rejecting your application because it was date/time stamped by the Grants.gov system after 4:30 p.m., Washington, DC time, on the application deadline date.
- The amount of time it can take to upload an application will vary depending on a variety of factors including the size of the application and the speed of your Internet connection.
