On March 20, 2006, the Office of Electricity Delivery and Energy Reliability (OE) of the Department of Energy (DOE) received an application from Evergreen to transmit electric energy from the United States to Canada. Evergreen is a limited liability company incorporated under the laws of the State of Delaware. Evergreen is indirectly owned and controlled by UPC Wind Partners, LLC. UPS Wind Partners, LLC is involved in the development, ownership, operation, and acquisition of wind generation in the United States. Evergreen has requested that an export authorization be issued with a 10-year term.

Evergreen is developing a 28-turbine wind generation facility, the Mars Hill Project, in Aroostook, Maine. The facility will be capable of producing 42 megawatts (MW), with a possible future expansion to 49.5 MW. Evergreen is in the process of negotiating power purchase agreements with several potential buyers; one is a Canadian entity in New Brunswick Province.

Evergreen proposes to arrange for the delivery of electric energy to Canada over the existing international transmission facilities owned by Maine Public Service Company. The construction, operation, maintenance, and connection of the international transmission facilities to be utilized by Evergreen as more fully described in the application, has previously been authorized by a Presidential permit issued pursuant to Executive Order 10485, as amended.
