SUPPLEMENTARY INFORMATION:

I. Background

The Consumer Price Index (CPI) is the timeliest instrument compiled by the U.S. Government that is designed to measure changes in the purchasing power of the urban consumer's dollar. The CPI is used most widely as a measure of inflation, and is used in the formulation of economic policy. It also is used as a deflator of other economic series, that is, to adjust other series for price changes and to translate these series into inflation-free dollars.

II. Current Action

Office of Management and Budget clearance is being sought for the CPI Housing Survey. This request addresses both the ongoing collection activities associated with compilation of the shelter component of the Consumer Price Index and the beginning of a project to revise and update the CPI sample of rental units for which rents are collected over time.

The CPI continues to utilize electronic technology in the collection of data. Field representatives use hand-held pen computers and electronically collect and transmit data back to Washington, DC.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
