SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to request clearance for the collection of data concerning the School Enrollment Supplement to be conducted in conjunction with the October 2006 CPS. The Census Bureau and the Bureau of Labor Statistics sponsor the basic annual school enrollment questions, which have been collected annually in the CPS for 40 years.

This survey provides information on public/private elementary school, secondary school, and college enrollment, and on characteristics of private school students and their families, which is used for tracking historical trends, policy planning, and support.

This survey is the only source of national data on the age distribution and family characteristics of college students and the only source of demographic data on pre-primary school enrollment. As part of the Federal Government's efforts to collect data and provide timely information to local governments for policymaking decisions, the survey provides national trends in enrollment and progress in school.

The school enrollment information will be collected by both personal visit and telephone interviews in conjunction with the regular October CPS interviewing. All interviews are conducted using computer-assisted interviewing.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau conducts the annual Company Organization Survey (COS) to update and maintain a central, multipurpose Business Register (BR). In particular, the COS supplies critical information on the composition, organizational structure, and operating characteristics of multi-location companies.

The BR serves two fundamental purposes:

- First and most important, it provides sampling populations and enumeration lists for the Census Bureau's economic surveys and censuses, and it serves as an integral part of the statistical foundation underlying those programs. Essential for this purpose is the BR's ability to identify all known United States business establishments and their parent companies. Further, the BR must accurately record basic business attributes needed to control sampling and enumeration. These attributes include industrial and geographic classifications, and name and address information.

- Second, it provides establishment data that serve as the basis for the annual County Business Patterns (CBP) statistical series. The CBP reports present data on number of establishments, first quarter payroll, annual payroll, and mid-March employment summarized by industry and employment size class for the United States, the District of Columbia, Puerto Rico, counties, and county-equivalents. No other annual or more frequent series of industry statistics provides comparable detail, particularly for small geographic areas.

II. Method of Collection

The Census Bureau will conduct the 2007 COS in conjunction with the 2007 Economic Census and will coordinate these collections so as to minimize response burden. The consolidated

COS/census mail canvass will direct inquiries to the entire universe of multi-location enterprises, which comprises some 182,000 parent companies and more than 1.6 million establishments. The primary collection medium for the COS and Economic Census is a paper questionnaire; however, many enterprises will submit automated/electronic COS and Economic Census reports. For 2007, electronic reporting will be available to all COS and Economic Census respondents. Companies will receive and return responses by secure Internet transmission. Companies that cannot use the Internet will receive a CD-ROM containing their electronic data. All respondents will be allowed to mail the data via diskette or CD-ROM or submit their response data via the Internet. COS data content is identical for all of the reporting modes.

The 2007 COS will include company-level questions to approximately 75,000 multi-location enterprises—those with 50 or more employees or with industrial activities out-of-scope of the 2007 Economic Census. The company-level portion will include inquiries on ownership or control by domestic or foreign parents, ownership of foreign affiliates, leased employment, and off-shoring activities. Additional COS inquiries will apply to the 21,000 multi-unit establishments classified in industries that are out-of-scope of the economic census. The additional inquiries will list an inventory of those out-of-scope establishments and request updates to these inventories, including additions, deletions, and changes to information on EIN, name and address, and industrial classification, end-of-year operating status, mid-March employment, first quarter payroll, and annual payroll. The economic census will collect data for all other establishments of multi-establishment enterprises, including those items listed above.
