INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-851 (Review)]

Synthetic Indigo From China

Determination

On the basis of the record¹ developed in the subject five-year review, the United States International Trade Commission (Commission) determines, pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)) (the Act), that revocation of the antidumping duty order on synthetic indigo from China would not be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

Background

The Commission instituted this review on May 2, 2005 (70 FR 22701) and determined on August 5, 2005 that it would conduct a full review (70 FR 48588, August 18, 2005). Notice of the scheduling of the Commission's review and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on September 27, 2005 (70 FR 56489). The hearing was held in Washington, DC, on February 9, 2006, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on April 27, 2006. The views of the Commission are contained in USITC Publication 3846 (April 2006), entitled *Synthetic Indigo from China: Investigation No. 731-TA-851 (Review)*.

By order of the Commission.

Issued: April 27, 2006.

Marilyn R. Abbott,

Secretary to the Commission.

DEPARTMENT OF JUSTICE

Notice of Lodging of Partial Consent Decree Pursuant to the Clean Air Act

Under 28 CFR 50.7, notice is hereby given that on April 24, 2006, the United States lodged a proposed partial

¹ The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

Consent Decree (“Consent Decree”) in the United States District Court for the Northern District of Alabama in the matter captioned *United States, et al. v. Alabama Power Company*, (Civil Action No. 2:01-cv-00152-VEH).

The Consent Decree would resolve the liability of Alabama Power Company (“APC”) relating to the Fifth Claim for Relief included in the United States’ Amended Complaint in this action, which the United States brought pursuant to Sections 113 and 167 of the Clean Air Act (“the Act”), 42 U.S.C. 7413, 7477. The United States’ Fifth Claim for Relief concerned the construction of Units 3 and 4 at Alabama Power Company’s James H. Miller, Jr. coal-fired electric power plant, located near the town of West Jefferson, in Jefferson County, Alabama (“Plant Miller”). The United States alleged in its Fifth Claim for Relief that APC violated the Prevention of Significant Deterioration (“PSD”) requirements of the Act, 42 U.S.C. 7470-92, and regulations promulgated thereunder, including the State Implementation Plan (“SIP”) approved under the Act for the State of Alabama, by failing to obtain a PSD permit from EPA for Plant Miller Unit 3, or the appropriate PSD permit for Plant Miller Unit 4, incorporating Best Available Control Technology (“BACT”) requirements. The United States alleged that these PSD permit requirements became applicable, *inter alia*, by virtue of APC’s failure to undertake and implement a continuous program of on-site construction and/or to complete construction of Plant Miller Units 3 and 4 within a reasonable time. In the alternative, the United States alleged that APC violated Section 111(e) of the Act by operating Plant Miller Units 3 and 4 without complying with an applicable standard of performance—40 CFR part 60, Subpart Da—promulgated by EPA pursuant to the New Source Performance Standards (“NSPS”) provisions of the Act. The United States alleged that the NSPS Subpart Da regulations became applicable by virtue of APC’s failure to commence a continuous program of on-site construction of the boilers for Plant Miller Units 3 and 4 until after September 19, 1978.

Plaintiff-Intervenor Alabama Environmental Council, Inc., which is also a party to the Consent Decree, alleged similar PSD violations concerning the Plant Miller Units 3 and 4 in its Ninth and Tenth Claims for Relief included in its complaint in intervention in this action.

Under the terms of the proposed Consent Decree, the civil claims for

relief concerning Plant Miller alleged by the United States and Alabama Environmental Council, Inc. in their respective complaints would be resolved, and APC would be required to (1) Commence continuous year-round operation of Selective Catalytic Reduction ("SCR") technology at each of Plant Miller Units 3 and 4 for control of nitrogen oxide ("NO_x") emissions on a year-round basis beginning in 2008, and thereafter achieve and maintain specified NO_x emission rates from those units; (2) install and begin year-round operation of Flue Gas Desulfurization ("FGD" or "scrubber") technology at each of Plant Miller Units 3 and 4 for control of sulfur dioxide ("SO₂") emissions by December 31, 2011, and thereafter maintain a specified SO₂ emission removal efficiency for those units; (3) achieve by December 31, 2006, and thereafter maintain a specified emission rate for particulate matter ("PM") emissions from Plant Miller Units 3 and 4; and (4) install and operate by December 31, 2008, and thereafter report to EPA data collected from, a mercury continuous emissions monitoring system ("Mercury CEMS") at Plant Miller Units 3 and 4. In addition, the Consent Decree would require APC to purchase and permanently retire \$4.9 million worth of vintage 2007 SO₂ emissions allowances, restrict APC's right to transfer any surplus SO₂ emissions allowances it may generate from Plant Miller Units 3 and 4 after the year 2020, and require APC to pay a civil penalty of \$100,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the above-described Consent Decree.
