Department of Defense military personnel (active and reserve) and their family members; DoD civilian personnel deploying with the Armed Forces; applicants for military service; and individuals who participate in DoD health surveys.

CATEGORIES OF RECORDS IN THE SYSTEM:

The Defense Medical Surveillance System contains up-to-date and historical data on diseases and medical events (e.g., hospitalizations, ambulatory visits, reportable diseases, HIV tests, acute respiratory diseases, and health risk appraisals) and longitudinal data on personnel and deployments.

Information in this system of records originates from personnel systems, medical records, health surveys (e.g., Pentagon Post Disaster Health Assessment) and/or health assessments made from specimen collections

(remaining serum from blood samples) from which serologic tests can be performed (serum number, specimen locator information, collection date, place of collection).

Records being maintained include individual's name, Social Security Number, date of birth, sex, branch of service, home address, age, medical treatment facility, condition of medical and physical health and capabilities, responses to survey questions, register number assigned, and similar records, information and reports, relevant to the various registries; and specimen collections (remaining serum from blood samples) from which serologic tests can be performed (serum number, specimen locator information, collection date, place of collection).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations; 10 U.S.C. 136, Under Secretary of Defense for Personnel and Readiness; 10 U.S.C. 3013, Secretary of the Army, 10 U.S.C. 8013, Secretary of the Air Force, 10 U.S.C. 5013, Secretary of the Navy; DoD Instruction 1100.13, Surveys of DoD Personnel; DoD Directive 6490.2, Joint Medical Surveillance; DoD Directive 6490.3, Implementation and Application of Joint Medical Surveillance for Deployments; and E.O. 9397 (SSN).

PURPOSE(S):

The Defense Medical Surveillance System (DMSS) supports a systematic collection, analysis, interpretation, and reporting of standardized, population based data for the purposes of characterizing and countering medical threats to a population's health, well being, and performance. The Army Medical Surveillance Activity, which operates the DMSS, routinely publishes summaries of notifiable diseases, trends of illnesses of special surveillance interest and field reports describing outbreaks and case occurrences in the Medical Surveillance Monthly Report, the principal vehicles for disseminating medical surveillance information of broad interest. Through DMSS, The Army Medical Surveillance Activity provides the sole link between the DoD Serum Repository and other databases. This repository contains over 32 million frozen serum specimens and is the largest of its kind in the world.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may

specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

The DoD 'Blanket Routine Uses' set forth at the beginning of the Army's compilation of systems of records notices also apply to this system, except that these routine uses do not apply to the Serum Repository.

Note: This system of records contains individually identifiable health information. The DoD Health Information Privacy Regulation (DoD) 6025.18-R issued pursuant to the Health Insurance Portability and Accountability Act of 1996, applies to most such health information. DoD 6025.18-R may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974 or mentioned in this system of records notice.
