I. Abstract

The NOAA Coastal Services Center (CSC) conducts the Coastal Management Fellowship, which provides on-the-job education and training opportunities in coastal resource management and policy for postgraduate students as well as

project assistance to state coastal zone management programs. CSC is seeking a new clearance to conduct data collection activities associated with the evaluation of the fellowship program. The evaluation is designed to assess the effectiveness of the fellowship and its impact on state coastal zone programs to address high priority coastal issues. The results of the evaluation will provide information on the success of the Coastal Management Fellowship Program in meeting its goals to train young professionals entering the coastal management field and to help states address high priority coastal issues.

Four types of respondents are included in the evaluation: Fellows (past and current), finalists to the fellowship (past and current), state coastal zone program mentors, and partner organizations. Current and past fellows will complete an electronic survey that assesses both their fellowship experience and subsequent professional goals/experiences. Also, current and past finalists will complete a telephone interview that evaluates both their experiences applying to the fellowship program and subsequent professional goals/experiences. State coastal zone program mentors will complete an electronic survey that assesses their experiences with the fellowship program and the impact of the program on their state coastal zone program. In addition, partner organizations will complete an electronic survey that assesses their experiences with the fellowship and how the fellowship has impacted CSC.
