Taking of Marine Mammals Incidental to Commercial Fishing Operations; Bottlenose Dolphin Take Reduction Plan (BDTRP) Regulations; Sea Turtle Conservation; Restrictions to Fishing Activities

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of workshops.

SUMMARY: NMFS published a final rule on April 24, 2006, to implement the Bottlenose Dolphin Take Reduction Plan (BDTRP) and amend the Mid-Atlantic large mesh gillnet rule. NMFS is announcing workshops on these new regulations. The purpose of the workshops is to provide opportunities for commercial fishermen who are affected by the new regulations to learn about and understand any new requirements. The workshops will consist of presentations on the components of the final rule and gear research related to the BDTRP, as well as an opportunity to ask questions. Eleven workshops are planned from New Jersey through the east coast of Florida, which is the geographic scope of the BDTRP.

DATES: See **SUPPLEMENTARY INFORMATION** under the heading "Workshop Dates, Times, and Locations" for the dates and locations of the workshops.

ADDRESSES: Copies of the final rule, Environmental Assessment, Final Regulatory Flexibility Analysis, the Bottlenose Dolphin Take Reduction Team meeting summaries, and the complete citations for all references used in this rulemaking may be obtained from the persons listed under **FOR FURTHER INFORMATION CONTACT** or

SUPPLEMENTARY INFORMATION: NMFS issued the final rule (71 FR 24776, April 24, 2006) to implement the regulatory management measures of the BDTRP to reduce the incidental mortality and serious injury (bycatch) of the western North Atlantic coastal bottlenose dolphin stock (dolphin) (*Tursiops truncatus*) in the Mid-Atlantic coastal gillnet fishery and eight other coastal fisheries operating within the dolphin's range. The final rule also revises the large mesh size restriction under the Mid-Atlantic large mesh gillnet rule for conservation of endangered and threatened sea turtles to provide consistency among Federal and state management measures. The measures contained in the final rule will implement gillnet effort reduction, gear proximity requirements, and gear or gear deployment modifications to reduce dolphin bycatch below the marine mammal stock's potential biological removal level. In addition to the regulatory measures contained in the final rule, the BDTRP includes non-regulatory aspects, such as outreach and education measures.
