Integrated Risk Information System (IRIS); Announcement of 2006 Program

AGENCY: Environmental Protection Agency.

ACTION: Notice; correction.

SUMMARY: The U.S. Environmental Protection Agency (EPA) published a document in the **Federal Register** of February 23, 2006 (71 FR 9333), announcing the IRIS 2006 program agenda. EPA is correcting errors in the list of substances.

The Integrated Risk Information System (IRIS) is an EPA database that contains the Agency's scientific positions on human health effects that may result from exposure to chemical substances in the environment. On March 4, 2005, EPA announced the 2005 IRIS agenda (70 FR 10616), with solicitation of scientific information from the public for consideration in assessing health effects from specific chemical substances. All assessments currently in progress are listed in this notice. EPA is not initiating new assessments in 2006 in order to focus on completion of existing assessments. This notice also provides an update on EPA's efforts to improve the IRIS health assessment development and review processes.

DATES: While EPA is not expressly soliciting comments on this notice, the Agency will accept information related to the substances included herein. Please submit any information in accordance with the instructions provided at the end of this notice.

ADDRESSES: Please submit relevant scientific information identified by docket ID number EPA-HQ-ORD-2003-0016, online at <http://www.regulations.gov> (EPA's preferred method); by e-mail to ord.docket@epa.gov; mailed to EPA Docket Center, Environmental Protection Agency, Mail Code: 2822T, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; or by hand delivery or courier to EPA Docket Center, EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC, between 8:30 a.m. and 4:30 p.m. Monday through Friday, excluding legal holidays. SUPPLEMENTARY INFORMATION:

Background

IRIS is an EPA database containing Agency scientific positions on potential adverse human health effects that may result from exposure to chemical substances found in the environment. (EPA notes that information in the IRIS database has no preclusive effect and does not predetermine the outcome of any rulemaking. When EPA uses such information to support a rulemaking, the scientific basis for, and the application of, that information are subject to comment.) IRIS currently provides information on health effects associated with more than 500 chemical substances.

The database includes chemical-specific summaries of qualitative and quantitative health information in support of the first two steps of the risk assessment process, i.e., hazard identification and dose-response evaluation. Combined with specific situational exposure assessment information, the information in IRIS is an important source in evaluating potential public health risks from environmental contaminants.

EPA's overall process for developing IRIS assessments consists of: (1) An annual **Federal Register** announcement of EPA's IRIS agenda and call for scientific information from the public on selected chemical substances; (2) a search of the scientific literature; (3) development of IRIS Summaries and support documents; (4) EPA-wide review; (5) external peer review; (6) management review and approval; and (7) entry of IRIS Summaries and support documents into the IRIS database (<http://www.epa.gov/iris>).

The IRIS Annual Agenda

Each year, EPA develops an annual agenda for the IRIS program and announces new assessments under review. A focus of the IRIS Program for 2006 is to move forward the 75
