

determined in this case that the requirements of section 246 have been met.

A significant number of workers at the firm are age 50 or over and possess skills that are not easily transferable. Competitive conditions within the industry are adverse.

Conclusion

After careful review of the additional facts obtained on reconsideration, I conclude that increased imports of articles like or directly competitive with those produced at Nanston, Inc., Dental Lab, Norcross, Georgia, contributed importantly to the declines in sales or production and to the total or partial separation of workers at the subject firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Nanston, Inc., Dental Lab, Norcross, Georgia who became totally or partially separated from employment on or after March 6, 2005 through two years from the date of this certification, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974, and are eligible to apply for alternative trade adjustment assistance under section 246 of the Trade Act of 1974.

Signed in Washington, DC this 16th day of May 2006.

Certifying Officer, Division of Trade Adjustment Assistance.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-220 and 50-410]

Nine Mile Point Nuclear Station, LLC; Nine Mile Point Nuclear Station, Units 1 and 2; Notice of Availability of the Final Supplement 24 to the Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Regarding the License Renewal of Nine Mile Point Nuclear Station

Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC, or the Commission) has published a final plant-specific supplement to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants (GEIS)," NUREG-1437, regarding the renewal of operating licenses DPR-63 and NPF-69 for an additional 20 years of operation for the Nine Mile Point Nuclear Station, Units 1 and 2 (Nine Mile Point). Nine Mile Point is located in northern New York on the shore of Lake Ontario, approximately five miles northeast of Oswego, New York, 36 miles north-northwest of Syracuse, New York, and 65 miles east of Rochester, New York. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

As discussed in Section 9.3 of the final Supplement 24, based on: (1) The analysis and findings in the GEIS; (2) the Environmental Report submitted by Nine Mile Point Nuclear Station, LLC; (3) consultation with Federal, State, and local agencies; (4) the staff's own independent review; and (5) the staff's consideration of public comments, the recommendation of the staff is that the Commission determine that the adverse environmental impacts of license renewal for Nine Mile Point are not so great that preserving the option of license renewal for energy-planning decision makers would be unreasonable.

The final Supplement 24 to the GEIS is publicly available at the NRC Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike, Rockville, Maryland, 20852, or from the NRC's Agencywide Documents Access and Management System (ADAMS). The ADAMS Public Electronic Reading Room is accessible at <http://adamswebsearch.nrc.gov/dologin.htm>. The Accession Number for the final Supplement 24 to the GEIS is ML061290310. Persons who do not have access to ADAMS, or who encounter problems in accessing the documents located in ADAMS, should contact the NRC's PDR reference staff by telephone at 1-800-397-4209, or 301-415-4737,

or by e-mail at pdr@nrc.gov. In addition, the Penfield Library, located at State University of New York, Oswego, New York, 13126, has agreed to make the final Supplement 24 to the GEIS available for public inspection.

FOR FURTHER INFORMATION, CONTACT: Mr. Samuel Hernandez, Environmental Branch B, Division of License Renewal, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.
