

information is also used to improve the accuracy of universe estimates derived from BEA's ongoing annual and quarterly sample surveys of foreign direct investment.

Representatives of many State and local governments take active steps to attract new foreign direct investment to their localities. To make informed policy decisions concerning such investment, it is essential that government entities, including the U.S. Government, have the means to measure foreign direct investment in the United States, monitor changes in it, and assess its economic impact. Data from the survey are intended to be general purpose statistics on foreign direct investment that are readily available to answer any number of research and policy questions when they arise.
