**Final Fair Market Rents for the Housing Choice Voucher Program and Moderate Rehabilitation Single Room Occupancy Program for Fiscal Year 2006; Additional Revision**

**AGENCY:** Office of the Assistant Secretary for Policy Development and Research, HUD.

**ACTION:** Notice of Final Fair Market Rents (FMRs) for Fiscal Year 2006, Additional Revision.

**SUMMARY:** This notice updates the FMRs for the metropolitan areas of Aquadilla, Arecibo, Barranquitas, Caguas, Fajardo, Guayama, Ponce, and San Juan, PR.

**DATES:** *Effective Date:* June 2, 2006.

**FOR FURTHER INFORMATION:** For technical information on the methodology used to develop FMRs or a listing of all FMRs, please call the HUD USER information line at (800) 245-2691 or access the information on the HUD Web site, <http://www.huduser.org/datasets/fmr.html>. FMRs are listed at the 40th or 50th percentile in Schedule B. For informational purposes, a table of 40th

percentile recent mover rents for those areas currently at the 50th percentile FMRs will be provided on the same website noted above. Any questions related to use of FMRs or voucher payment standards should be directed to the respective local HUD program staff. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Information Relay Service at (800) 877-8339. (Other than the HUD USER information line and TTY numbers, telephone numbers are not toll-free.)

**Update**

In response to numerous public comments about Puerto Rico's FY2006 FMRs, HUD conducted a detailed analysis of the Random Digit Dialing rent surveys (RDDs) that were used in setting Puerto Rico's FY2006 FMRs. According to the RDD surveys, 57 percent of all Puerto Rico rental units lacked hot and cold piped water in the kitchen, which makes them substandard units that would be ineligible for inclusion in the voucher program. HUD also compared the housing characteristics of the RDD sample with detailed information from the 2000 Census to correct for sampling bias. The bias occurs because HUD can only survey land-line telephones and yet, in Puerto Rico, there is a greater percentage of households using cell-phones instead of land-line telephones compared to the United States. A detailed analysis of the RDD surveys and weighting corrections to compensate for these factors produces changes in the FY2006 FMR estimates that HUD is implementing with this notice.

FMRs for the affected areas are increased as follows:

2006 Fair market rent area	Number of bedrooms				
	0 BR	1 BR	2 BR	3 BR	4 BR
Aguadilla-Isabela-San Sebastian, PR MSA .....	\$300	\$325	\$361	\$464	\$519

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### Endangered and Threatened Wildlife and Plants; Initiation of a 5-Year Review of the Northern Distinct Population Segment of the Copperbelly Water Snake

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of review.

**SUMMARY:** The U.S. Fish and Wildlife Service (Service, we), announces a 5-year review of the northern distinct population segment (DPS) (*i.e.*, in Michigan, Ohio, and Indiana north of 40 degrees north latitude) of the copperbelly water snake (*Nerodia erythrogaster neglecta*) under section 4(c)(2)(A) of the Endangered Species Act of 1973 (Act) (16 U.S.C. 1531 *et seq.*). We request any information on the snake that has become available since its original listing in 1997 (62 FR 4183) that has a bearing on its classification as threatened.

A 5-year review is a periodic process conducted to ensure that the classification of a listed species is appropriate. It is based on the best scientific and commercial data available at the time of the review. Based on the results of this 5-year review, we will make a finding of whether this species is properly classified under section 4(c)(2)(B) of the Act.

**DATES:** Information must be received no later than August 1, 2006.

**ADDRESSES:** Submit information to the U.S. Fish and Wildlife Service, Ecological Services Field Supervisor, 2651 Coolidge Road, Suite 101, East Lansing, Michigan 48823-6316, or electronic information to: [fw3copperbellywatersnake5year@fws.gov](mailto:fw3copperbellywatersnake5year@fws.gov). See **SUPPLEMENTARY INFORMATION** for file formats and other information.

**FOR FURTHER INFORMATION CONTACT:** Ms. Carrie Tansy, East Lansing Ecological Services Field Office (see **ADDRESSES**); telephone (517) 351-6289; facsimile (517) 351-1443. Individuals who are hearing impaired or speech impaired may call the Federal Relay Service at (800) 877-8337 for TTY assistance.

**SUPPLEMENTARY INFORMATION:** Under the Act, the Service maintains a list of

endangered and threatened wildlife and plant species (List) at 50 CFR 17.11 and 17.12. Amendments to the List through final rules are published in the **Federal Register**. The Lists of wildlife and plants are available on our Internet site at <http://www.fws.gov/endangered/wildlife/html#species>. Section 4(c)(2)(A) of the Act requires that we conduct a review of listed species at least once every five years. Section 4(c)(2)(B) requires that we determine (1) whether a species no longer meets the definition of threatened or endangered and should be removed from the List (delisted); (2) whether a species more properly meets the definition of threatened and should be reclassified from endangered to threatened; or (3) whether a species more properly meets the definition of endangered and should be reclassified from threatened to endangered. Using the best scientific and commercial data available, a species will be considered for delisting if the data substantiate that the species is neither endangered nor threatened for one or more of the following reasons: (1) The species is considered extinct; (2) the species is considered to be recovered; and/or (3) the original data available when the species was listed, or the interpretation of such data, were in error. Any change in Federal classification requires a separate rulemaking process. The regulations in 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species currently under active review. This announces our active review of the northern DPS of the copperbelly water snake.

#### Public Solicitation of New Information

To ensure that the 5-year review is complete and based on the best scientific and commercial data available, we are soliciting new information from the public, concerned governmental agencies, tribes, the scientific community, industry, environmental entities, and any other interested parties concerning the status of the northern DPS of the copperbelly water snake. A 5-year review considers the best scientific and commercial data and all new information that has become available since the listing determination or most recent status review. Requested information includes (A) species biology, including but not limited to population trends, distribution, abundance, demographics, and genetics; (B) habitat conditions, including but not limited to amount, distribution, and suitability; (C) conservation measures that have been implemented that benefit the species; (D) threat status and trends; and (E)

other new information, data, or corrections, including but not limited to taxonomic or nomenclature changes, identification of erroneous information contained in the List, and improved analytical methods.

The copperbelly water snake was listed as a distinct population segment of a vertebrate taxon. The listed DPS occurs in Michigan, Ohio, and Indiana north of 40 degrees north latitude (approximately Indianapolis, Indiana). A distinct vertebrate population segment is defined in the February 7, 1996, Policy Regarding the Recognition of Distinct Vertebrate Population Segments (61 FR 4722). For a population to be listed under the Act as a DPS, three elements are considered: (1) The discreteness of the population segment in relation to the remainder of the species to which it belongs; (2) the significance of the population segment to the species to which it belongs; and (3) the population segment's conservation status in relation to the Act's standards for listing (*i.e.*, is the population segment endangered or threatened?). Distinct population segments of vertebrate species, as well as subspecies of all listed species, may be proposed for separate reclassification or for removal from the List. As required by the DPS policy, we will assess the validity of the current DPS designation during the 5-year review. The southern population (*i.e.*, in Illinois, Kentucky, and Indiana south of 40 degrees north latitude) is not listed as a threatened species at this time and is not part of this 5-year review.

#### Electronic Access and Filing

You must submit electronic information (see **ADDRESSES**) in MS Word, Rich Text format, or Plain Text format, and include "Copperbelly Water Snake 5-Year Review Comments" in the title line.

You may submit your comments and materials to the U.S. Fish and Wildlife Service, Ecological Services Field Supervisor (see **ADDRESSES**) no later than the close of the comment period (see **DATES**) to allow us adequate time to conduct this 5-year review. If you do not respond to this request for information but subsequently possess information on the status of this species, we are eager to receive new information regarding federally listed species at any time.

Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Respondents may request that we withhold a respondent's identity, as allowable by law. If you wish us to
