Title, Associated Form; and OMB Number: Industrial Capabilities Questionnaire; DD Form 2737; OMB Number 0704–0377.

Needs and Uses: As part of its responsibilities to facilitate a diverse, responsive, and competitive industrial base, the Department of Defense (DoD) requires accurate, pertinent, and up to date information as to industry's ability to satisfy defense needs. The Industrial Capabilities Questionnaire will be used by all Services and the Defense Logistics Agency to gather business, industrial capability (employment, skills, facilities, equipment, processes, and technologies), and manufactured end item information to conduct required industrial assessments and to support DoD strategic planning and decisions. Such data is essential to the Department of Defense for peacetime and wartime industrial base planning. All DD Form 2737 data submitted to the Department

of Defense, Military Services or Defense Agencies are treated as Proprietary Company Confidential information and protected from release to other parties.

Affected Public: Business or other for-profit.

Annual Burden Hours: 12,800.

Number of Respondents: 153,600.

Responses Per Respondent: 1.

Average Burden Per Response: 12 hours.

Frequency: Annually.

SUPPLEMENTARY INFORMATION:

Summary of Information Collection

Respondents are industry professionals who provide information to the requesting DoD agency on the industrial capabilities associated with the subject facility being reviewed. The DoD agencies were directed to solicit only those data elements within this form necessary to conduct the particular planning or assessment task at hand. This approach is used to minimize the burden for data requests on industry and limit the retention of in-house data to that essential to supporting defense decisions and plans. A significant portion of this information will be collected electronically and, with appropriate measures to protect sensitive data, will be made available to authorized users in the Department to support a wide variety of industrial capability analyses. These analyses are used to support cost effective acquisition of defense systems and key troop support/consumable items, assess the implications of changes in defense spending on industry, development of responsive logistics support efforts, and industrial preparedness planning and readiness analyses. The lack of accurate, current and relevant industry capability information will adversely impact the integrity of the Department's decisions and planning efforts.
