SUPPLEMENTARY INFORMATION: The supplemental information provides additional documentation regarding the disposition of ACEC nominations, provides a description of the four additional potential ACECs, and analyzes any potential impacts relating to the inclusion of these ACECs in Alternative C of the Price Draft RMP/EIS. The original notice of availability for the Price Draft RMP/EIS for the Price Field Office planning area in Carbon and Emery Counties, Utah was published in the **Federal Register**, volume 69, number 136, Friday, July 16, 2004. A supplement to that Notice with information on existing and potential ACECs considered within the Price Draft RMP/EIS was published in the **Federal Register**, volume 70, number 238, Tuesday, December 13, 2005.

The Price Field Office planning area encompasses all of the public land managed by the Price Field Office in Carbon and Emery Counties, Utah. This area includes approximately 2.5 million acres of BLM-administered surface lands and 2.8 million acres of Federal mineral lands underlying Federal, State, and private surface ownership in the area. The decisions of the Price RMP will apply only to BLM-administered public lands, including Federal mineral estate.

The Price Draft RMP/EIS addresses five alternatives of proposed management decisions and analyzes the impacts of each. There are presently 13 existing designated ACECs (289,629 total acres) in the Price Field Office, which were established by the San Rafael RMP (1991). These are reflected in the No Action Alternative of the Draft RMP/EIS.

Nine potential ACECs (286,416 total acres) were considered in at least one action alternative in the Draft RMP/EIS. In some cases, the number and acres and the resource use limitations applied to the nine potential ACECs also varied by alternative. These nine potential ACECs were described in the Notice published in the **Federal Register**, volume 70, number 238, Tuesday, December 13, 2005.

In addition to the nine potential ACECs, four potential ACECs were inadvertently omitted from the Price Draft RMP/EIS released July, 2004. The four additional potential ACECs described and analyzed in the supplemental information include:

- Desolation Canyon Area—(159,246 acres) Values of concern include outstanding scenery, Fremont, Archaic and Ute cultural sites, and fisheries and wildlife habitats;
