DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Proposed Project: National Evaluation of the Comprehensive Community Mental Health Services for Children and Their Families Program: Phase V—New

The Substance Abuse and Mental Health Services Administration (SAMHSA), Center of Mental Health is responsible for the national evaluation of the Comprehensive Community Mental Health Services for Children and Their Families Program that will collect data on child mental health outcomes, family life, and service system development and performance. Data will be collected on 25 service systems, and roughly 7,864 children and families.

The data collection for this evaluation will be conducted over a 5-year period. The core of service system data will be collected every 18 to 24 months throughout the 5-year evaluation period, with a sustainability survey conducted in selected years. Service delivery and system variables of interest include the following: maturity of system of care development, adherence to the system of care program model, and client service experience. The length of time that individual families will participate in the study ranges from 18 to 36

months depending on when they enter the evaluation. Child and family outcomes of interest will be collected at intake and during subsequent follow-up interviews at 6-month intervals. Client service experience information is collected at these follow-up interviews. Measures included in an outcome interview are determined by the type of assessment (intake or follow-up), child's age, and whether the respondent is the caregiver or a youth.

The outcome measures include the following: child symptomatology and functioning, family functioning, material resources, and caregiver strain. The caregiver interview package includes the Caregiver Information Questionnaire, Child Behavior Checklist, Behavioral and Emotional Rating Scale (BERS), Education Questionnaire, Columbia Impairment Questionnaire, Living Situations Questionnaire, Family Life Questionnaire, and Caregiver Strain Questionnaire (caregivers of children under age 6 complete the Vineland Screener to assess development, and do not complete the BERS) at intake, and also complete the Multi-service Sector Contacts Form, Culturally Competence and Service Provision Questionnaire and the Youth Services Survey (a national outcome measurement tool). The Youth Interview package includes the Youth Information Questionnaire, Revised Children's Manifest Anxiety Scale, Reynolds Depression Scale, BERS (youth version), Delinquency Survey, Substance Use Survey, GAIN-Quick: Substance Dependence Scale, and Youth Services Survey (youth version).

In addition, the evaluation will include two special studies: (1) An evidence-based practices study will examine provider use of evidence-based practices, community readiness and implementation of evidence-based practices, and consumer experience with these practices; (2) A cultural and linguistic competence study will examine the extent to which the cultural and linguistic characteristics of communities influence program implementation and provider adaptation of evidence-based treatments, and provider service delivery decisions based on provider culture and language. The national evaluation measures address the national outcome measures for mental health programs as currently established by SAMHSA.

Internet-based technology will be used for data entry and management, and for collecting data using Web-based surveys. The average annual respondent burden with detail provided about burden contributed by specific measures

is estimated below. The estimate reflects the expected number of respondents in each respondent category, the total average number of responses per

respondent over 5 years, the average length time it will take for each response, and the total average annual burden for each category of respondent

and for all categories of respondents combined.

Public Meeting

Due to the scope and complexity of this project, we have decided to hold a joint public meeting with FERC to allow the public the opportunity to comment on the proposed LNG facility. FERC will issue a separate notice for the public meeting listed under **DATES** above, regarding the public's opportunity to comment on the environmental aspects of the facility siting.

Organizations and members of the public may provide oral statements regarding the suitability of Coos Bay for LNG vessel traffic. In the interest of time and use of the public meeting facility, oral statements should be limited to five minutes. Written comments may be submitted at the meeting or to the Docket up to July 21, 2006.

Background and Purpose

In accordance with the requirements of 33 CFR 127.007, Jordan Cove submitted a Letter of Intent (LOI) on April 10, 2006, to operate an LNG facility on the North Spit of Coos Bay, Coos County, Oregon. The Letter of Recommendation (LOR) is in response to this LOI submitted by Jordan Cove. In preparation for issuance of an LOR and the completion of certain other regulatory mandates, the COTP Portland, OR will consider comments received from the public as input into a formalized risk assessment process.

Because the proposed LNG facility would be located in State waters, the Federal Energy Regulatory Commission (FERC) is the lead Federal agency for this proposed project and will prepare the Environmental Impact Statement (EIS) mandated by the National Environmental Policy Act (NEPA). To help FERC make sure that the EIS covers
