Office of the Secretary

Forest Land Recovery Program; Determination of Primary Purpose of Certain Payments for Federal Tax Purposes

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of determination.

SUMMARY: The Secretary of Agriculture has determined that cost-share payments made to individuals under the Forest Land Recovery Program (FLRP) are made primarily for the purpose of conserving soil and water resources, restoring the environment, restoring and improving forests, or restoring and providing a habitat for wildlife. This determination permits recipients to exclude certain payments under the FLRP from gross income for Federal income tax purposes to the extent allowed by the Internal Revenue Service.

DATES: The Secretary's determination was signed on June 21, 2006.

ADDRESSES: Questions may be addressed to Karl R. Dalla Rosa, Cooperative Forestry Staff, Forest Service, USDA, 1400 Independence Avenue, SW., Mail Stop 1123, Washington, DC 20250-1123. A copy of the determination is available upon request.

FOR FURTHER INFORMATION CONTACT: Karl R. Dalla Rosa, Cooperative Forestry Staff, USDA Forest Service, 202-205-6206.

SUPPLEMENTARY INFORMATION: Section 126 of the Internal Revenue Code (26 U.S.C. 126, as amended) provides that all or part of payments made to persons under certain cost-sharing programs in 26 U.S.C. (a)(1) through (10) may be excluded from the recipient's gross income for Federal income tax purposes under two conditions: (1) If the Secretary of Agriculture determines that the payments are made primarily for the

purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife (the criteria for making such a determination are set forth in 7 CFR part 14, Determining the Primary Purpose of Certain Payments for Federal Tax Purposes), and (2) If the payments are determined by the Secretary of the Treasury as not increasing substantially the annual income derived from the property.

To make such a determination, the Secretary of Agriculture evaluates a cost-share conservation program based on the criteria set out in 7 CFR part 14. Following a primary purpose determination by the Secretary of Agriculture, the Secretary of the Treasury must determine that payments made under the cost-share conservation program do not substantially increase the annual income derived from the property benefited by the payments.

Therefore, having carefully examined the authorizing legislation for the Forest Land Recovery Program (FLRP) (Section 110 of the The Military Construction Appropriations and Emergency Hurricane Supplemental Appropriations Act of 2005; Pub. L. 108-324) and the planned operating procedures, the Secretary of Agriculture has determined, according to the criteria set forth in 7 CFR part 14, that the cost-share payments for implementing approved practices under the FLRP are made primarily for the purpose of conserving soil and water resources, improving forests, protecting and restoring the environment, and providing a habitat for wildlife.

Subject to further determination by the Secretary of the Treasury that payments made under the FLRP do not substantially increase the annual income derived from the property benefited by these payments, this determination by the Secretary of Agriculture permits payment recipients to exclude from gross income for Federal income tax purposes, all or part of the cost-share payments made under this program to the extent allowed by the Internal Revenue Service.

Dated: June 21, 2006.

Mike Johanns,
Secretary.

SUPPLEMENTARY INFORMATION:

Title: Worksheet for Food Stamp Program Quality Control Reviews.

OMB Number: 0584-0074.

Form Number: FNS-380.

Expiration Date: November 30, 2006.

Type of Request: Revision of a currently approved collection.

Abstract: The Form FNS-380 is a worksheet used in the Food Stamp Program to determine eligibility and benefits for households selected for review in the quality control (QC) sample of active cases. We estimate the reporting burden for this collection of information averages 8.9764 hours per each State agency's response. This includes the time for analyzing the household case record; planning and carrying out the field investigation; gathering, comparing, analyzing and evaluating the review data and forwarding selected cases to the Food and Nutrition Service for Federal validation. In addition to the State agency's burden, we also estimate the average burden on each household to be 0.50 hours for each of the estimated 57,146 households being interviewed. This includes a face-to-face interview with the QC reviewer to verify the identity and existence of the household and to explore the household circumstances affecting the eligibility and benefit level. This is an increase of 2,443 State and household responses from the estimate made to substantiate the currently approved collection. The increase in responses is a result of an augmented participation rate that resulted in an increase in the number of cases being sampled. We estimate that the total reporting burden associated with this information collection for both State agencies and households is 541,432 hours. This is a 23,044 increase in hours from the currently approved burden of 518,388. The recordkeeping burden for the State agency is 0.0236 hours per record. There was a corresponding increase in the recordkeeping burden from 1,291 hours to 1,349 hours based on the increase in sample size. The aggregate of the reporting (541,432 hours) and recordkeeping (1,349 hours) resulted in a total annual burden of 542,781 hours.

Affected Public: Individuals or households; State or local governments.

Estimated Number of Responses Per Respondent: 1.00.

Estimated Number of Respondents: 57,199.

Estimated Total Annual Responses: 57,199 Responses.

Estimated Hours Per Response: 9.47 Hours.

Total Annual Reporting Burden: 541,432 Hours.

Estimated Number of Recordkeepers: 53.

Estimated Hours Per Recordkeeper: .0236 Hours.

Diet has a significant impact on the health of citizens and is linked to four leading causes of disease, which can reduce the quality of life and cause premature death. While these diet-related problems affect all Americans, they have a greater impact on the disadvantaged populations served by many FNS programs. One of FNS' goals includes improving the nutrition of children and low-income families by
