

also required to be inspected for hazards.

§ 77.1901 also requires that records be kept of the results of the inspections. The record includes a description of any hazardous condition found and the corrective action taken to abate it. These records are necessary to ensure that the inspections and tests are conducted in a timely fashion and that corrective action is taken when hazardous conditions are identified, thereby ensuring a safe working environment for the slope and shaft sinking employees. The record is maintained at the mine site for the duration of the operation.

## II. Desired Focus of Comments

MSHA is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the For Further Information Contact section of this notice, or viewed on the Internet by accessing the MSHA home page (<http://www.msha.gov>) and then choosing "Statutory and Regulatory Information" and "Federal Register Documents."

## III. Current Actions
