

Council's work on Amendment 13, which contained a broad range of actions to define management reference points, end overfishing and rebuild overfished stocks, consider a multispecies approach to management, address bycatch, modify permit renewal and transferability requirements, and address the scheduled sunset of regulations protecting the Oculina Experimental Closed Area. NMFS published a notice of intent (NOI) to prepare an EIS in association with Amendment 13 in the **Federal Register** on January 31, 2002 (67 FR 4696), then later supplemented that notice on September 12, 2003 (68 FR 53706) and, again, on July 26, 2005 (70 FR 46126).

The first NOI supplement announced the Council's intent to transfer the Oculina Experimental Closed Area action from Amendment 13 to Snapper Grouper FMP Amendment 13A, and the remaining actions in Amendment 13 to Snapper Grouper FMP Amendment 13B. This decision was intended to ensure the Council adequate time to fully evaluate a range of actions to address overfishing, rebuilding, and other issues in the snapper grouper fishery without compromising the Council's ability to act on the Oculina Experimental Closed Area before its scheduled sunset date of June 27, 2004.

The second NOI supplement announced the Council's intent to address overfishing and a few other priority actions in a regulatory amendment, which later became Amendment 13C. This decision was intended to ensure extended debate about multispecies management and other actions in Amendment 13B did not delay Council action to effectively address overfishing of snowy grouper, golden tilefish, vermilion snapper, and black sea bass.

During its December 2005 meeting, the Council decided to transfer from Amendment 13B to Amendment 15 actions to define management reference points and rebuilding plans, as needed, for the select stocks addressed in Amendment 13C. This action is intended to ensure the timely implementation of biological reference points, status determination criteria, and rebuilding schedules and strategies for these stocks before the Southeast Data Assessment and Review assessments describing their status become outdated.

The Council also will consider in Amendment 15: establishing a strategy to ensure stock rebuilding stays on schedule should the total allowable catch levels specified in rebuilding plans be exceeded; adjusting the golden tilefish fishing year and trip limit

strategy; eliminating the 12-inch (30.5-cm) total length minimum size limit regulation for the queen snapper and silk snapper; requiring a Federal commercial snapper grouper permit to sell snapper grouper species harvested in Federal waters of the South Atlantic and limiting sales to only those fish captured on commercial trips; establishing a deep-water grouper unit to further minimize bycatch of deep-water grouper species; implementing measures to minimize bycatch mortality of sea turtles and smalltooth sawfish; establishing a method to monitor and assess bycatch in the snapper grouper fishery; and modifying commercial snapper grouper permit renewal and transferability requirements. All other actions referenced above and not evaluated in Amendments 13A, 13B, 13C, or 15 continue to remain in Amendment 13B.

This NOI supplement announces the Council's intent to prepare a DEIS in association with Amendment 15. A **Federal Register** notice will announce the availability of the DEIS, as well as a 45-day public comment period, pursuant to regulations issued by the Council on Environmental Quality for implementing the National Environmental Policy Act and to NOAA's Administrative Order 216-6. The Council will consider public comments received on the DEIS in developing the Final Environmental Impact Statement (FEIS), and before voting to submit the final amendment to NMFS for Secretarial consideration. NMFS will announce in the **Federal Register** the availability of the final amendment and FEIS during the Secretarial review period, and will consider all public comments prior to agency action to approve, disapprove, or partially approve the final amendment.

SUPPLEMENTARY INFORMATION:

A. Background

Section 5(a) of the Consumer Product Safety Act, 15 U.S.C. 2054(a), requires the Commission to collect information related to the causes and prevention of death, injury, and illness associated with consumer products. That legislation also requires the Commission to conduct continuing studies and investigations of deaths, injuries, diseases, other health impairments, and economic losses resulting from accidents involving consumer products. The Commission uses this information to support development and improvement of voluntary standards, rulemaking proceedings, information and education campaigns, and administrative and judicial proceedings. These safety efforts are vitally important to help make consumer products safer and to remove unsafe products from the channels of distribution and from consumers' homes.

Persons who have sustained injuries or who have witnessed safety-related incidents associated with consumer products are an important source of safety information. From consumer complaints, newspaper accounts, death certificates, hospital emergency room reports, and other sources, the Commission investigates a limited number of incidents. These investigations may involve face-to-face or telephone interviews with accident victims or witnesses, as well as contact with state and local officials, including police, coroners, and fire investigators. The Commission also receives information about product-related injuries from persons who provide written information by using forms displayed on the Commission's Internet Web site or printed in the *Consumer Product Safety Review* and other Commission publications.

The Office of Management and Budget (OMB) approved the collection of information concerning product-related injuries under control number 3041-0029. OMB's most recent extension of
