Title: NMFS Alaska Region Vessel Monitoring System (VMS) Program.

Form Number(s): None.

OMB Approval Number: 0648-0445.

Type of Request: Regular submission.

Burden Hours: 23,838.

Number of Respondents: 1,854.

Average Hours per Response: VMS transmission, 5 seconds; VMS installation, 6 hours; VMS maintenance, 4 hours annually; one-time VMS check-in report, 12 minutes; notification of VMS malfunction, 2 minutes.

Needs and Uses: The National Marine Fisheries Service (NMFS) Alaska Region requires use of the VMS when fishing under certain conditions in the following fisheries: Atka Mackerel, Pollock, Pacific Cod, Bering Sea and Aleutian Islands (BSAI) Management Area Crab, essential fish habitat (EFH) and habitat areas of particular concern (HAPC) in the Aleutian Islands and Gulf of Alaska. The Vessel Monitoring System (VMS) transmitter automatically determines the vessel's position several times per hour using a Global Positioning System satellite. A communications service provider

receives the transmission and relays it to NMFS, Office for Enforcement. The VMS transmitters are designed to be tamper-resistant and automatic. In most cases, the vessel owner is unaware of exactly when the unit is transmitting and is unable to alter the signal or the time of transmission. The VMS unit is passive and automatic, requiring no reporting effort of the vessel operator.

Affected Public: Business or other for-profit.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

SUPPLEMENTARY INFORMATION

I. Abstract

The Census Bureau plans to request clearance for the collection of data concerning the Annual Social and Economic Supplement (ASEC), formerly known as the Annual Demographic Survey, to be conducted in conjunction with the February, March, and April CPS. The Census Bureau has conducted this supplement annually for over 50 years. The Census Bureau, the Bureau of Labor Statistics, and the Department of Health and Human Services sponsor this supplement.

In the ASEC, we collect information on work experience, personal income, noncash benefits, health insurance coverage, and migration. The work experience items in the ASEC provide a unique measure of the dynamic nature of the labor force as viewed over a one-year period. These items produce statistics that show movements in and out of the labor force by measuring the number of periods of unemployment experienced by people, the number of different employers worked for during the year, the principal reasons for unemployment, and part-/full-time attachment to the labor force. We can make indirect measurements of discouraged workers and others with a casual attachment to the labor market.

The income data from the ASEC are used by social planners, economists, government officials, and market researchers to gauge the economic well-being of the country as a whole and selected population groups of interest. Government planners and researchers use these data to monitor and evaluate the effectiveness of various assistance programs. Market researchers use these data to identify and isolate potential customers. Social planners use these data to forecast economic conditions and to identify special groups that seem to be especially sensitive to economic fluctuations. Economists use ASEC data to determine the effects of various economic forces, such as inflation, recession, recovery, and so on, and their differential effects on various population groups.

A prime statistic of interest is the classification of people in poverty and

how this measurement has changed over time for various groups. Researchers evaluate ASEC income data not only to determine poverty levels but also to determine whether government programs are reaching eligible households.

Congressional passage of the State Children's Health Insurance Program (SCHIP), or Title XXI, led to a mandate from Congress, in 1999, that the sample size for the CPS, and specifically the ASEC, be increased to a level whereby more reliable estimates can be derived for the number of individuals participating in this program at the state level. By administering the ASEC in February, March, and April, rather than only in March as in the past, we have been able to achieve this goal. The total number of respondents has not been upwardly affected by this change.

II. Method of Collection

The ASEC information will be collected by both personal visit and telephone interviews in conjunction with the regular February, March and April CPS interviewing. All interviews are conducted using computer-assisted interviewing.

III. Data

OMB Number: 0607-0354.

Form Number: There are no forms. We conduct all interviewing on computers.

Type of Review: Regular.

Affected Public: Individuals or households.

Estimated Number of Respondents: 78,000.

Estimated Time Per Response: 25 minutes.

Estimated Total Annual Burden Hours: 32,500.

Estimated Total Annual Cost: There are no costs to the respondents other than their time to answer the CPS questions.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13, United States Code, Section 182; and Title 29, United States Code, Sections 1-9.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information

on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 1, 2006.

Management Analyst, Office of the Chief Information Officer.
