

and/or development of wildlife habitat. In particular, at the request of landowners, TPWD prepares written WMPs that incorporate recommendations for specific areas and address the conservation goals and objectives of each landowner. In conjunction with the development of landowner-specific WMPs, TPWD proposes to issue Certificates of Inclusion (CI) that provide coverage to individual landowners under the terms of its section 10(a)(1)(A) permit, should one be issued in the future. Each CI will be issued with Service oversight, and will be subject to revocation if the terms of the WMP are not fulfilled. TPWD and the Service feel that this process may preclude or remove any need to list the lesser prairie-chicken, if it is assumed that conservation measures were also to be implemented on other necessary properties, by encouraging private landowners to enroll in the WMP program and undertake the conservation practices prescribed in the CCAA. The proposed CCAA represents a significant milestone in the cooperative conservation efforts for the LPC and is consistent with section 2(a)(5) of the Act, which encourages creative partnerships among public, private, and government entities to conserve imperiled species and their habitats. Consistent with the Service CCAA policy, the proposed CCAA is intended to facilitate conservation actions for the LPC that will remove or reduce the threats to the species. The CCAA is also intended to provide TPWD and those private landowners receiving CIs, under the auspices of TPWD's permit, regulatory certainty related to normal agricultural practices should the LPC become federally listed as threatened or endangered in the future.

The conservation measures in the CCAA would be implemented by individual non-Federal landowners, under the auspices of a TPWD and Service-approved WMP. These measures will generally consist of prescribed grazing, prescribed burning, rangeland deferment, brush management, CRP and cropland management, range planting, other upland wildlife habitat management practices, and population management techniques. TPWD has committed to guide the implementation of these conservation measures and requests issuance of the permit in order to address the take prohibitions of Section 9 of the Act should the species become listed in the future.

We provide this notice under section 10(c) of the Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22), and the National

Environmental Policy Act (42 U.S.C. 4371 *et seq.*) and its implementing regulations (40 CFR part 1506.6).
