**SUPPLEMENTARY INFORMATION:** Section 303(d) of the Clean Water Act (CWA) requires that each state identify those waters for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards. For those water quality-limited waters, states are required to establish TMDLs for one or more of its designated uses, for example fishing or swimming, according to a priority ranking.

The TMDLs are designed to identify needed reductions of pollutant loads to the impaired waters, so that the appropriate designated uses are achieved, and State Water Quality Standards are met.

In the case of the Stillwell and Squaw Creek TMDLs, both of the impaired segments are located within the boundaries of the Fort McCoy Military Training Facility. EPA Region 5 developed this TMDL, rather than the State of Wisconsin, at the request of Wisconsin because Squaw and Stillwell Creek are located on a federal military facility.
