Orchard Coal Company, 214 Vaux Road, Tremont, Pennsylvania 17981 has filed a petition to modify the application of 30 CFR 75.1714-2(c) (Self-rescue devices; use and location requirements) to its Orchard Slope Mine (MSHA I.D. The petitioner requests a modification of the existing standard to permit self-contained self-rescue (SCSR) devices to be stored within 200 feet of the working face. The petitioner states that in steeply pitching, conventional anthracite mines, entries are advanced as far as 200 feet vertically, which exposes the miner to trip and fall hazards. The petitioner further states that the necessity of carrying supplies up narrow entries while wearing the SCSRs may result in damage to the SCSR and also may result in a diminution of safety to the miner. The petitioner asserts that modification of the standard would provide at least the same measure of protection as the existing standard.
