

EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: As required by the Clean Air Act, EPA has regulations establishing emission standards and other requirements for various classes of vehicles and engines. These regulations require that compliance be demonstrated prior to EPA granting a "Certificate of Conformity". EPA charges fees for administering this certification program; in 2004 the fees program was expanded to include non-road categories of vehicles and engines, such as several categories of marine engines, locomotives, non-road recreational vehicles, and many non-road compression-ignition and spark-ignition engines. Manufacturers and importers of covered vehicles and engines are required to pay the applicable certification fees prior to their certification applications being reviewed. This ICR estimates the paperwork burden of complying with this fees requirement.

Burden Statement

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 290.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 7.35.

Estimated total annual burden hours: 2,132 hours.

Estimated total annual costs: \$85,541. This includes an estimated burden cost of \$76,840 and an estimated cost of \$8,701 for maintenance and operational costs.

Dated: September 6, 2006.

Janet Cohen,

Acting Director, Compliance and Innovative Strategies Division.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the National Coordinator for Health Information Technology; American Health Information Community Confidentiality, Privacy, and Security Workgroup Meeting

ACTION: Announcement of meeting.

SUMMARY: This notice announces the second meeting of the American Health Information Community ("the Community") Confidentiality, Privacy, and Security Workgroup in accordance with the Federal Advisory Committee Act (Pub. L. No. 92-463, 5 U.S.C., App.)

DATES: September 29, 2006 from 10 a.m. to 4:30 p.m.

Place: Hubert H. Humphrey Building (200 Independence Avenue, SW., Washington, DC 20201), Conference room 800 (you will need a photo ID to enter a Federal building).

Status: Open.

Purpose: At this meeting, the Community Confidentiality, Privacy, and Security Workgroup will receive information on identity proofing and user authentication as it relates to the breakthroughs currently being discussed by the Community's Consumer Empowerment, Chronic Care, and Electronic Health Record Workgroups.

The meeting will be conducted in hearing format, and the Workgroup will invite representatives who can provide information relevant to identity proofing and user authentication as it relates to the breakthroughs currently being discussed by the Community's Consumer Empowerment, Chronic Care, and Electronic Health Record Workgroups. The format for the meeting

will include multiple invited panels and time for questions and discussion. The meeting will include a time period during which members of the public may deliver brief (3 minutes or less) oral public comment. Slots for oral comments by the public will be filled on the day of the meeting as time permits. To submit comments via e-mail, please send them to *Michele.Rollins@hhs.gov* (to ensure that your e-mail is received and appropriately filed, we ask that you explicitly put "CPS Public Comment" in the subject line of your e-mail) or mail your comments to Michele Rollins, Office of the National Coordinator (ONC), 330 C Street, SW., Suite 4090, Washington, DC 20201.

SUPPLEMENTARY INFORMATION: The Community's Confidentiality, Privacy, and Security (CPS) Workgroup will undertake steps to evaluate instances where health information technology (health IT) has shifted the CPS paradigm, as well as where policy (due to evolving technology) have become unclear or allow for varied interpretation.

The first two issues before the CPS workgroup (identity proofing and user authentication) were chosen because of their foundational importance to any security initiative. Inextricably linked, both issues need discussion in order to determine how authorized entry is governed to a new technology product, service, or infrastructure. In typical workflows, identity proofing and user authentication are the first of many processes completed in health care environments, followed shortly thereafter by other more complex activities such as access control, data management, information matching and transmission, and information assurance (data integrity, business continuity, etc.).

There is no one solution for identity proofing and user authentication. As health IT evolves, we expect that methods for identity proofing and user authentication will evolve as well. Certain types of health IT products may require more stringent methods while others may not, and understanding these tradeoffs will be critical to determining CPS policies. Deciding how to prove (with some degree of confidence) that someone is who they claim to be, followed by a repeatable authentication process, are necessary steps to ensure that an authorized person or entity can access a health IT product or service in a private and secure manner.

In an effort to inform members of the public responding to the questions posed for testimony, we are defining
