BILLING CODE 6820-MA-P

NUCLEAR REGULATORY COMMISSION

[IA-06-046]

In the Matter of Mr. Nicholas A. Chaimov; Order Prohibiting Involvement in NRC-Licensed Activities (Effective Immediately)

I

Mr. Nicholas A. Chaimov was employed as a Senior Reactor Operator at the Reed College Reactor (the facility). Reed College (the licensee) is the holder of License No. R-112 issued by the U.S. Nuclear Regulatory Commission (NRC or Commission) pursuant to Part 50 of Title 10 of the Code of Federal Regulations (10 CFR) on July 2, 1968, for the facility. The license authorizes the operation of the facility in accordance with the conditions specified therein. The facility is located on the licensee's site in Portland, Oregon.

II

On May 31, 2005, an inspection of licensed activities was initiated at the licensee's facility in response to allegations received at the NRC Headquarters on May 19, 2005, that Mr. Nicholas A. Chaimov had engaged in deliberate misconduct. Specifically, it was alleged that Mr. Nicholas A. Chaimov had deliberately removed a jumper on the control rod drive circuit of the reactor without the licensee's authorization or approval. Removal of that jumper prevented the shim rod from being withdrawn, so that the reactor could not be taken to the critical startup condition. That jumper had been properly installed, in accordance with the Reed College Reactor Safety

Analysis Report (SAR), until Mr. Nicholas A. Chaimov deliberately removed it. The allegation was unresolved by the inspection and was subsequently referred to the NRC Office of Investigations (OI). OI completed its investigation and substantiated that on May 10, 2005, Mr. Nicholas A. Chaimov deliberately removed a jumper on the control rod drive circuit of the reactor without the licensee's authorization or approval. Although this unauthorized facility modification did not adversely impact reactor safety nor was the health and safety of the public affected because the facility's startup checklist detected a malfunction in the rod control system and the problem was corrected by the licensee before operation was allowed, conduct of this nature by an individual raises serious doubt as to whether the individual can be relied upon to comply with NRC requirements.

III

Based on the information obtained during the OI investigation, the NRC concludes that Mr. Nicholas A. Chaimov, an employee of the licensee, made changes to the facility so that it was not as described in the SAR. These changes caused the licensee to be in violation of 10 CFR 50.59, "Changes, test, and experiments." It was further found that Mr. Chaimov's actions were willful such that he had engaged in deliberate misconduct in violation of 10 CFR 50.5, "Deliberate misconduct." The NRC must be able to rely on the licensee and its employees to comply with NRC requirements in all material respects. Mr. Nicholas A. Chaimov's action has raised serious doubt as to whether he can be relied upon to comply with NRC requirements.

Consequently, I lack the requisite reasonable assurance that licensed activities can be conducted in compliance with the Commission's requirements and that the health and safety of the public will be protected if Mr. Nicholas A. Chaimov is permitted at this time to be involved in NRC-licensed activities. Therefore, the public's health, safety, and interest require that Mr. Nicholas A. Chaimov be prohibited from any involvement in NRC-licensed activities for a period of three years from the date of this Order. Furthermore, pursuant to 10 CFR 2.202, "Orders," the NRC finds that the significance of Mr. Nicholas A. Chaimov's conduct described above is such that the public's health, safety, and interest require that this Order be immediately effective.

IV

Accordingly, pursuant to Sections 104c, 161b, 161i, 161o, 182 and 186 of
