Abstract: We collect information from individuals or organizations that apply for a special use permit required to conduct economic or other privileged or specialized uses on National Wildlife Refuge System lands in Alaska. We use the information to:

- (1) Determine if the applicant is qualified or eligible for a permit.
- (2) Evaluate the impacts of the proposed activity on refuge resources and other users.
- (3) Determine if the proposed activity is compatible with refuge purposes and the mission of the refuge system.

Comments: On May 26, 2006, we published in the **Federal Register** (71 FR 30439) a notice of our intent to request that OMB renew approval for this information collection. In that notice, we solicited comments for 60 days, ending on July 25, 2006. We received two comments from the same individual. The comments did not address issues surrounding the proposed collection of information or the cost and hour burden estimates, but instead objected to our issuing permits for guided hunting. The commenter also questioned who verified the information submitted in the application, and suggested requesting additional information for two of the application items. If we include the suggested additional information on our application, we would collect information in excess of the minimum necessary to fulfill our statutory and regulatory requirements and responsibilities. Therefore, we have not

made any changes to FWS Form 3-2001 as a result of these comments.

We again invite comments concerning this information collection on:

- (1) Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- (2) the accuracy of our estimate of the burden for this collection of information;
- (3) ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) ways to minimize the burden of the collection of information on respondents. Comments submitted in response to this notice are a matter of public record.

Dated: August 10, 2006.

Hope Grey,
Information Collection Clearance Officer,
Fish and Wildlife Service.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Cedar Island National Wildlife Refuge

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of the Final Comprehensive Conservation Plan and Finding of No Significant Impact for Cedar Island National Wildlife Refuge on Cedar Island National Wildlife

Refuge in Carteret County, North Carolina.

SUMMARY: The Fish and Wildlife Service announces that a Final Comprehensive Conservation Plan and Finding of No Significant Impact for Cedar Island National Wildlife Refuge are available for distribution. The plan was prepared pursuant to the National Wildlife Refuge System Improvement Act of 1997 and in accordance with the National Environmental Policy Act of 1969. The compatibility determinations for hunting, fishing, wildlife observation, wildlife photography, environmental education and interpretation, trapping of selected furbearers, forest management, and resource research studies are also available within the plan.

ADDRESSES: A copy of the plan may be obtained by writing to: Mattamuskeet National Wildlife Refuge, 38 Mattamuskeet Road, Swan Quarter, North Carolina 27885. The plan may also be accessed and downloaded from the Service's Web site: <http://southeast.fws.gov/planning/>.

SUPPLEMENTARY INFORMATION: The availability of the Draft Comprehensive Conservation Plan and Environmental Assessment for a 30-day public review and comment period was announced in the **Federal Register** on February 14, 2006 (71 FR 7794). The draft plan and environmental assessment identified and evaluated three alternatives for managing the refuge over the next 15 years. Based on the environmental

assessment and the comments received, the Service adopted alternative 2 as its preferred alternative. Alternative 2 emphasizes management of the refuge's priority wildlife species. The staff will survey waterfowl from the air on a routine basis. The refuge will continue to allow the six priority public use activities, but will have the capacity to increase the number of opportunities. The staff will conduct environmental education programs and establish an interpretive and observation trail with a brochure and a photo blind. The staff will control dominant pest plants and animals. There will be four staff members stationed at Cedar Island National Wildlife Refuge.

Cedar Island National Wildlife Refuge covers a total of 14,480 acres within a 16,887-acre acquisition boundary on Cedar Island in Pamlico Sound. The refuge is comprised of 11,000 acres of brackish marsh, 1,500 acres of longleaf pine savanna, 150 acres of brackish shrub, 125 acres of pond pine woodland, 100 acres of bay forest, 100 acres of low pocosin, and 50 acres of cypress-gum swamp. These habitats support a variety of wildlife species, including waterfowl, shorebirds, wading birds, marsh birds, and neotropical migratory songbirds.

Authority: This action is published under the authority of the National Wildlife Refuge System Improvement Act of 1997, Public Law 105-57.

Dated: June 21, 2006.

Cynthia K. Dohner,
Acting Regional Director.
