

anchoring, and require VMS on all vessels, among other management measures. Regulations implementing these provisions were published in the **Federal Register** on August 29, 2006.

To date, NOAA has not conducted any environmental review to assess the biological or social impacts of the monument designation. However, NWHI fishermen affected by the Monument regulations have expressed concern that while they allow commercial fishing for bottomfish and pelagic species to continue for five years, the prohibition on fishing within Ecological Reserves and Special Preservation Areas, combined with the no-anchoring provision, will make it virtually impossible to catch bottomfish fish within the Monument. Currently, the impacts of these provisions primarily affect fishers in NWHI Hoomalu zone as the two Ecological Reserves, and seven of the nine Special Preservation Areas are located in this zone. However, among the individual Hoomalu Zone fishers, the restrictions affect catches and revenues differently as each fisher have different fishing areas within the zone.

In addition, Monument regulations do not allow for commercial pelagic troll and handline fishermen licensed by the State of Hawaii to continue despite their long history of fishing in the area. However, these fishermen have expressed interest in continuing to fish commercially for pelagic species seaward of the outer boundary of the Monument. These fishermen have also expressed interest in retaining uku (*Aprion virescens*), a bottomfish management unit species which is incidentally caught when trolling for ono (*Acanthocybium solandri*) and other pelagic species around NWHI banks. Currently, federal regulations prohibit harvesting bottomfish management unit species in the NWHI without a permit issued by the PIRO Regional Administrator, making uku a regulatory discard for fishermen who do not have a federal NWHI bottomfish permit.

At its 135th Meeting, the Council may consider taking action to alleviate these "unintended consequences" of the Monument designation by considering options to alter the zoning structure of the NWHI permit areas and address fishing opportunities for Hawaii's troll and handline fishermen seaward of the outer boundary of the Monument, and eliminate regulatory discarding of uku by this fishery.
