**SUPPLEMENTARY INFORMATION:** EKPC proposes to construct and operate two nominal 278-megawatt coal-based electric generating units at the Smith site, southeast of Winchester, Kentucky, in Clark County. Fuel will be supplied to the plant site by rail or truck. The construction of a substation and approximately 1 mile of 345-kV transmission line would be required to connect the new plant to EKPC's transmission system. The line would go northwest from the CFB substation to the existing Combustion Turbine substation. EKPC's schedule calls for the first of these facilities to be in commercial operation by June 2010 and the second by November 2012.

Alternatives to be considered by RUS include no action, purchased power, renewable energy sources, distributed generation, and alternative site locations. Comments regarding the proposed project may be submitted (orally or in writing) at the public scoping meetings or in writing no later than November 20, 2006 to RUS at the address provided in this notice.

RUS will use input provided by government agencies, private organizations, and the public in the preparation of a Draft SEIS. The Draft SEIS will be available for review and comment for 45 days. A Final SEIS will then be prepared that considers all comments received. The Final Supplemental EIS will be available for review and comment for 30 days. Following the 30-day comment period, RUS will prepare a Record of Decision (ROD). Notices announcing the availability of the Draft and Final SEIS and the ROD will be published in the **Federal Register** and in local newspapers.

Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant Federal, State and local environmental laws and regulations and completion of the environmental review requirements as prescribed in the RUS Environmental Policies and Procedures (7 CFR part 1794).
