Forest Service

Title: Forest Industries Data Collection System.

OMB Control Number: 0596-0010.

Summary of Collection: The Forest and Range Renewable Resources Planning Act of 1974 and the Forest and Rangeland Renewable Resources Research Act of 1978 require the Forest Service (FS) to evaluate trends in the use of logs and wood chips, to forecast anticipated levels of logs and wood chips, and to analyze changes in the harvest of the resources. Forest product and other wood-using industries are important to state, regional, and national economies. In most southern states, the value of rounded timber products is ranked either first or second in relation to other major agricultural crops. The importance and value of the timber products industry is significant in other regions of the United States as well. The FS will collect information using questionnaires.

Need and Use of the Information: FS will collect information to monitor the types, species, volumes, sources, and prices of the timber products harvested throughout the Nation. The data will be used to develop specific economic development plans for a new forest-related industry in a State and to assist existing industries in identifying raw material problems and opportunities. If the information were not collected, data would not be available for sub-state, state, regional, and national policy makers and program developers to make decisions related to the forestland on a scientific basis.

Description of Respondents: Business or other for-profit; Not-for-profit institutions.

Number of Respondents: 1,816.

Frequency of Responses: Reporting: On occasion; Annually.

Total Burden Hours: 1,462.

Forest Service

Title: Application for Permit, Non-Federal Commercial Use of Roads Restricted by Order.

OMB Control Number: 0596-0016.

Summary of Collection: The Forest Service (FS) transportation system includes approximately 380,000 miles

of roads. These roads are grouped into five maintenance levels. Level one includes roads, which are closed and maintained only to protect the environment. Level of maintenance increase to level five, which is maintained for safe passenger car use. The roads usually provide the only access to commercial products including timber and minerals found on both Federal and private lands within and adjacent to National Forests. Annual maintenance not performed becomes a backlog that creates a financial burden for the FS. To remedy the backlog and pay for needed maintenance the FS requires commercial users to apply and pay for a permit to use the FS Road System. Maintenance resulting from commercial use is accomplished through collection of funds or requiring the commercial users to perform the maintenance. The vehicle for this is the Road Use Permit. The authority for the Road Use Permit process comes from 36 CFR 212.5, 36 CFR 212.9 and 36 CFR 261.54 Section 212.9 authorizes the FS to develop a road system with private in holders that is mutually beneficial to both parties.

Need and Use of the Information: Persons wishing to haul commercial will use form, FS 7700-40. The form provides identifying information about the applicant such as, the name; address; and telephone number; description of mileage of roads; purpose of use; use schedule; and plans for future use. FS will use the information to prepare the applicant's permit, to identify the road maintenance that is the direct result of the applicant's traffic, to calculate any applicable collections for recovery of past Federal investments in roads and assure that the requirements are met. Without the Road Use Permit, the backlog of maintenance would increase and the FS would have great difficulty providing the transportation system necessary to meet our mission.

Description of Respondents: Business or other for-profit; Individuals or households; State, Local or Tribal Government; Not-for-profit institutions.

Number of Respondents: 2000.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 500.
