[Docket No. S-051A]

RIN 1218-AC16

Updating National Consensus Standards in OSHA's Standard for Fire Protection in Shipyard Employment.

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Proposed rule.

SUMMARY: On September 15, 2004, the Occupational Safety and Health Administration (OSHA) issued a new fire protection final rule for shipyards that incorporated by reference 19 National Fire Protection Association (NFPA) standards. Ten of those NFPA standards had been updated by NFPA since the fire protection rule was proposed and an additional NFPA standard has been updated since the final rule was published. In today's **Federal Register**, OSHA is publishing a direct final rule (DFR) replacing the references to the 11 older NFPA standards in OSHA's fire protection standard for shipyards with their most recent versions.

If OSHA does not receive significant adverse comment on the DFR, the updated versions of the NFPA standards will replace their older versions in OSHA's fire protection standard for shipyards on the effective date stated in the DFR. If significant adverse comment on the updated versions is received, OSHA will withdraw the DFR and proceed with rulemaking on this proposed rule. However, if significant adverse comments are received regarding certain provisions included in the DFR, but not others, OSHA may finalize those changes that did not receive significant adverse comment, and conduct further rulemaking under the proposed rule for the changes that did receive significant adverse comment. A subsequent **Federal Register** document will be published to announce OSHA's action.

DATES: Comments and requests for a hearing on this proposed rule must be submitted by the following dates:

Hard copy: Your comments must be submitted (postmarked or sent) by November 16, 2006. Electronic transmission and facsimile: Your comments must be sent by November 16, 2006.

SUPPLEMENTARY INFORMATION:

I. Background

This proposal applies to shipyard employment. It updates NFPA standards incorporated by reference in the shipyard fire protection standard issued by OSHA on September 15, 2004 by replacing the older versions of NFPA consensus standards with the most current versions (69 FR 55668). A complete discussion of the NFPA standards, a comparison of the older standards and the newer standards, along with the economic analysis, and paperwork and state plan discussions are published in the preamble to the DFR, which is also published in the final rule section of today's **Federal Register**.

II. Public Participation

OSHA requests comments on all issues related to this action. OSHA also welcomes comments on the Agency's findings that there are not negative economic or other regulatory impacts of

this action on the regulated community. If OSHA receives no significant adverse comment, OSHA will publish a **Federal Register** document confirming the effective date contained in the companion DFR published in today's **Federal Register** and withdrawing this proposed rule. Such confirmation may include minor stylistic or technical changes to the document. A full discussion of the nature of a significant adverse comment is contained in the companion DFR.

If OSHA receives significant adverse comment on the changes contained in the companion DFR, OSHA will withdraw the DFR and proceed with this proposed rule by addressing comments and publishing a new final rule. If a significant adverse comment is received regarding certain revisions included in the DFR, but not others, OSHA may (1) Finalize those changes that did not receive significant adverse comment, and (2) conduct further rulemaking under this proposed rule for the changes that did receive significant adverse comment.

Comments received will be posted without change to <http://dockets.osha.gov>, including any personal information provided. OSHA cautions you about submitting personal information such as social security numbers and birth dates.
