The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation regulations (14 CFR part 71) to establish Class E airspace at Williamsburg, KY. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9P, dated September 16, 2006, and effective September 16, 2006, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated effect is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9P, Airspace Designations and Reporting Points, dated September 16, 2006, and effective September 16, 2006 is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

Background

Section 121.383(c) of Title 14 of the United States Code (the Age 60 Rule) prohibits any air carrier from using the services of any person as a pilot, and prohibits any person from serving as a pilot, on an airplane engaged in operations under part 121 if that person has reached his or her 60th birthday. The FAA adopted the Age 60 Rule in 1959. Part 121 covers operations of large commercial passenger aircraft, smaller propeller aircraft with 10 or more passenger seats, and common carriage operations of all-cargo aircraft with a payload capacity of 7500 pounds.

In November 2006, the International Civil Aviation Organization (ICAO) will adopt Amendment 167 to increase the “upper age limit” for airline pilots up to age 65 provided another crewmember pilot is under age 60. The Age 60 ARC provides a forum for the U.S. aviation community to discuss the new ICAO standard, make recommendations as to whether the United States should adopt that standard, and determine what actions would be necessary if FAA were to change the regulation to meet the new ICAO standard. As part of the ARC’s review and recommendation, it and the FAA are soliciting comments from the public on whether the FAA should adopt the ICAO standard and any issues surrounding adopting or not adopting the standard.

Issued in Washington, DC, on October 19, 2006.

Acting Federal Air Surgeon.
