Title: NSPS for Fossil-Fuel-Fired Steam Generating Units (Renewal).

ICR Numbers: EPA ICR Number 1052.08, OMB Control Number 2060–0026.

ICR Status: This is a request to renew an existing approved collection that will expire on November 30, 2006. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for

EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Owners or operators of steam generating units subject to Subpart D must make one-time-only notifications of construction/reconstruction, anticipated and actual startup, initial performance test, physical or operational changes, and demonstration of a continuous monitoring system. They must also submit reports on initial performance test results, monitoring system performance, and excess emissions. Records must be maintained of startups, shutdowns, malfunctions, and periods when the continuous monitoring system is inoperative.

The required notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. Performance test reports are needed as these are the Agency's record of a source's initial capability to comply with the emission standard, and serve as a record of the operating conditions under which compliance was achieved. The monitoring and excess emissions reports (which are semiannual) are used for problem identification, as a check on source operation and maintenance, and for compliance determinations. The information collected from recordkeeping and reporting requirements are used for targeting inspections, and for other uses in compliance and enforcement programs.

Responses to this information collection are deemed to be mandatory, per section 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information (CBI) (see 40 CFR part 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 46.6 hours per response. Burden means the total time,

effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of fossil-fuel-fired steam generating units.

Estimated Number of Respondents: 660.

Frequency of Response: Semiannual.
Estimated Total Annual Hour Burden: 61,545 hours.

Estimated Total Annual Cost: \$13,415,450, which includes \$0 annualized capital start up costs, \$9,900,000 Operations & Maintenance (O & M) annual costs, and \$3,515,450 annual labor costs.

Changes in Estimates: There is no change of hours in the total estimated burden currently identified in the OMB inventory of Approved ICR Burdens.

Dated: October 25, 2006.

Oscar Morales,

Director, Collection Strategies Division.
