

this final rule is administrative in content, involving only procedural changes addressing time constraints. This final rule does not impede facilitating cooperative conservation; takes appropriate account of and considers the interests of persons with ownership or other legally recognized interests in land or other natural resources; properly accommodates local participation in the Federal decision-making process; and provides that the programs, projects, and activities are consistent with protecting public health and safety.

Executive Order 13211, Effects on the Nation's Energy Supply (Executive Order 13211)

This final rule is a purely administrative regulatory action and has no implications under Executive Order 13211.

Executive Order 12866, Clarity of the Regulations

Executive Order 12866 requires each agency to write regulations that are simple and easy to understand. The BLM invites your comments on how to make these regulations easier to understand, including answers to questions such as the following:

1. Are the requirements in the final regulations clearly stated?
2. Do the final regulations contain technical language or jargon that interferes with clarity?
3. Does the format of the final regulations (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce their clarity?
4. Would the final regulations be easier to understand if they were divided into more (but shorter) sections?
5. Is the description of the final regulation in the **SUPPLEMENTARY INFORMATION** section of this preamble helpful in making the final regulation easier to understand?

Please send any written comments you have on the clarity of these regulations to the address specified above in the **ADDRESSES** section.
