In addition, these codes were compared with other RUC-reviewed codes to show that the recommended values and times placed the codes in proper rank order. The RUC-recommended values are further supported when compared to other procedures within the associated families. The commenters urged us to reconsider our position and accept the RUC recommendations.

Response: The commenters are correct that we based our rejection of the RUC-recommended work RVU for these services (CPT codes 27130, 27236, and 27447) on the August workgroup presentation and had inadvertently overlooked the surveys that were presented at the October meeting. After reviewing the more recent survey data, we now agree that the RUC recommendations appear reasonable. Therefore, based on a review of the information provided by the commenters, we have decided to accept the RUC recommendation to maintain the current work RVUs of 20.09 for CPT code 27130, 15.58 work RVUs for CPT code 27236 and 21.45 work RVUs for CPT code 27447.

3. Gynecology, Urology, Pain Medicine, and Neurosurgery

We received comments disagreeing with our proposed work RVUs on the following two services: CPT code 22612, *Arthrodesis, posterior or posterolateral technique, single level; lumbar (with or without lateral transverse technique)*; and CPT code 63048, *Laminectomy, facetectomy and foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root(s), (e.g., spinal or lateral recess stenosis)), single vertebral segment; each additional segment, cervical, thoracic, or lumbar (List separately in addition to code for primary procedure.)*. The RUC had recommended increases in work RVUs for these two codes, but less than the increases requested by the specialty society. The RUC agreed that these procedures were undervalued due to increases in length of stay and the incorrect assumptions made in the

previous valuation of the service. The specific RUC-recommended work RVUs were 22.00 work RVUs for CPT code 22612 and 3.55 work RVUs for CPT code 63048.

CMS Proposed Valuation

We had technical concerns with the recommendations for CPT codes 22612 and 63048. The workgroup had recommended the survey's 25th percentile for CPT code 22612 to keep the appropriate rank order with the reference service, CPT code 22595, that the RUC stated is a more complex procedure. However, there was a typographical error in the information presented by the specialty society that listed the work RVUs for the reference code as 23.36, rather than the correct value of 19.36 work RVUs. Therefore, the recommended work value of 22.00 RVUs appeared appropriate and we proposed to maintain the current work RVUs of 20.97 for this service.

There was what we believed to be an additional typographical error in the specialty society survey data for CPT code 63048. The summary information presented to the RUC lists the reference code as also being CPT code 63048. Therefore, there is no information submitted that compares the respondents' estimates of complexity and intensity between CPT code 63048 and a reference code. Because we do not have sufficient information to decide if the recommended work RVUs are appropriate, we proposed to maintain the current work RVUs of 3.26 for CPT code 63048.

Comment: We received comments from the North American Spine Society, the American Association of Orthopaedic Surgeons, the American Association of Neurological Surgeons (AANS), and the RUC requesting that we do not implement our proposed RVUs for these services (CPT codes 22612 and 63048), but rather accept the RUC-recommended work RVUs. The commenters stated that we had misunderstood the process used by the presenting societies to develop the suggested RVUs for both codes. The commenters stated that the survey respondents did not notice the values for a reference service, but rather were asked to compare the current work and intensity with the work and intensity of furnishing the procedure in 2000. Therefore, the societies contend, the misprint of the value for what was listed as a "reference" code had no effect on the valuation of CPT code 22595, nor did the absence of a separate reference code for CPT code 63048 negatively affect its valuation. According to the commenters, they believe that the

workgroup based its recommendation on the validity of the survey data and the building block methodology presented as additional rationale. The specialty society representing spine surgeons also commented that when the respondents were asked to rate how the complexity and intensity of these services had changed in the past 5 years, the ratings showed that the survey respondents believed that the intensity and complexity for both codes had increased.

The AAFP questioned why we would propose a value for CPT code 22612 that, though equal to the current value, was still higher than a more complex reference code. According to the AAFP, the RUC appeared to be recommending that the ratio of work between CPT codes 22612 and 22595 was 0.942 work RVUs; therefore, we should have recommended a work value of 18.23 work RVUs for CPT code 22612.

Response: We thank the commenters for clarifying the process used in surveying for these services. However, we still have concerns regarding the RUC recommendations for these services. First, though the survey respondents did not see the erroneous work RVUs listed for CPT code 22595, the reference code used for CPT code 22612, the workgroup did account for these errors. As a result, the RUC recommendation for CPT code 22612 was higher than the current work RVUs for CPT code 22595, a procedure the workgroup considered more complex. Second, although the survey respondents may have indicated on the rating scale that CPT codes 22612 and 63048 were more complex procedures in 2005 than they were in 2000, when they were asked simply whether the work for these services had changed in the last 5 years, 80 percent disagreed for CPT code 22612 and 50 percent disagreed for CPT code 63048. Therefore, based on the comments received, we referred this code to a multi-specialty refinement panel for review.

Final Decision: As a result of our analysis of the refinement panel ratings, we have assigned 21.79 work RVUs to CPT code 22612 and 3.47 work RVUs to CPT code 63048.

For CPT code 61697 *Surgery of complex intracranial aneurysm, intracranial approach; carotid circulation*; CPT code 61700 *Surgery of simple intracranial aneurysm, intracranial approach; carotid circulation*; and CPT code 61702 *Surgery of simple intracranial aneurysm, intracranial approach; vertebrobasilar circulation*), we received the following comments.

Comment: The AANS disagreed with the RUC recommendations that we proposed to accept for CPT codes 61697, 61700 and 61702 because of changes made by the workgroup to "standardize the pre-service and post-service times." The commenter stated that the standard 60 minutes of pre-service time was not adequate for such complex neurological procedures and stated reasons for the need for extended times. AANS also objected to the adjustments made by the workgroup to the level and number of post-operative visits by changing each post-operative critical care visit to a single high level subsequent hospital care visit. The society stated its belief that this change "significantly understates the post-operative time and intensity of the work that was described by survey respondents," and urged us to add the time and work RVUs of an additional critical care code, CPT code 99233, to all three services.

Response: We do not believe that, based on this comment, we have sufficient information to make the requested change. Therefore, we referred this code to a multi-specialty refinement panel for review.

Final Decision: As a result of our analysis of the refinement panel ratings, we have assigned 57.31 work RVUs to CPT code 61697.

4. Radiology, Pathology, and Other Miscellaneous Services

In addition to comments received in support of our proposed work RVUs for services reviewed by the RUC's Workgroup 4, we received the following comments.

For CPT code 76075, *Dual energy x-ray absorptiometry (DXA), bone density study, one or more sites; axial skeleton (e.g., hips, pelvis, spine)*, the RUC recommended a reduction from the current 0.30 work RVUs for the DXA service because the workgroup believed that the actual work is less intense and more mechanical than the specialty society's description of the work. The RUC-recommended work RVUs for this code were 0.20 and we agreed with this recommendation.

Comment: Many commenters, including individual providers, national and State organizations, specialty societies, manufacturers, and Congressional and State legislators, wrote expressing concern about the proposed reduction in payments for this service, some of which is attributable to the proposed work RVUs. These commenters expressed concern that the proposed reduction in payment would have a detrimental impact on beneficiary health and is contrary to a Surgeon General's Report that

emphasized the importance of such testing.

The ACR commented that, while they participated in the survey process that resulted in the RUC-recommended work RVU for this service, other specialties that provide this service such as family medicine, internal medicine and rheumatology were not represented. ACR encouraged us to consider comments from other specialty societies and organizations furnishing this service, including those that do not participate in the RUC process (such as the International Society for Clinical Densitometry (ISCD)), so that their views may be considered. ACR indicated that it would like to participate should it be determined that this will be addressed through a refinement panel. Other commenters, including specialty organizations and the ISCD, provided additional information regarding this service. Many of the commenters also expressed concern about the payment for CPT code 76077, although this code was not included in the 5-Year Review of work. Changes in payment for this code are attributed to the changes in PE methodology discussed in section II.A. of this final rule with comment period.

Response: We proposed to accept the RUC-recommended work RVU of 0.20 for CPT code 76075, which was lower than the requested 0.30 work RVUs requested by the specialty. Therefore, based on the comments received, we referred this code to a multi-specialty refinement panel for review.

Final Decision: As a result of our analysis of the refinement panel ratings, we have assigned 0.20 work RVUs to 76075. (Note: For 2007, CPT code 76075 has been renumbered to 77080.)

For CPT code 95872, *Needle electromyography using single fiber electrode, with quantitative measurement of jitter, blocking and/or fiber density, any/all sites of each muscle studied*, the RUC agreed that there was compelling evidence that CPT code 95872 was undervalued and recommended increasing the existing work RVUs from 1.50 to 3.00 work RVUs.

CMS Proposed Valuation

We had concerns that the work recommendation for 95872, which was based on the survey's 75th percentile for work, is inappropriate for this service. To determine our proposed valuation for CPT code 95872, we utilized a multi-tiered approach. First, we calculated the pre-service and post-service work RVUs using the surveyed physician time data. Then, to determine an intra-service work RVU, we subtracted the surveyed

intra-service time from the current time and multiplied this difference in time by the calculated IWPUT using the specialty recommended total work RVUs. Adding these calculated work RVUs resulted in a work valuation of slightly less than 2.00 work RVUs, which is approximately the same value as the survey median work RVU. In accordance with this analysis and the survey median, we proposed a work RVU of 2.00.

Comment: The RUC believes, and specialty societies for neurology agree, that the RUC's justification to increase the work of CPT code 95872 to 3.00 work RVUs is reasonable and outweighs our proposed valuation of 2.00 work RVUs, which is solely based on IWPUT. Commenters provided additional information concerning the activities associated with this procedure and requested acceptance of the RUC-recommended work RVUs.

Response: Based on the comments received, we referred this code to a multi-specialty refinement panel for review.

Final Decision: As a result of our analysis of the refinement panel ratings, we have assigned 2.88 work RVUs to CPT code 95872.

5. Evaluation and Management (E/M) Services

Comment: There was strong support for the proposal to increase work RVUs for E/M services from many commenters, including specialty societies, the RUC, MedPAC and individual physicians. For example, specialty societies or organizations representing internal medicine, family physicians, thoracic medicine, rheumatology, endocrinology, neurology, HIV medicine, clinical oncology, group practice, infectious disease, critical care, physical medicine, emergency medicine, geriatrics, geriatric psychiatry, osteopathy, urology, gastroenterology, pediatrics, renal medicine, as well as the RUC, all expressed their appreciation for our acceptance of the RUC recommendations for E/M services. The American College of Physicians stated that our proposed E/M work RVUs are supported by data from the annual National Ambulatory Medical Care Survey which show that patients now have more chronic conditions, are older, and have more diagnoses per encounter. In addition, the commenter contended that the proposed increased values for E/M services would provide an incentive for appropriate E/M service utilization and would also ensure a sufficient supply of primary care physicians. Another commenter

applauded the E/M proposals because "they correct the dramatic erosion of the relative weight accorded to E/M services over the past 14 years."

However, an umbrella specialty society for surgery raised several objections to our proposal. First, the commenter contended that the compelling evidence standard was not met because any false assumptions involved in the original valuation of the codes were corrected in the first 5-Year Review and because any increase in work for E/M services has been compensated by the billing of higher-level office visits. Second, the commenter expressed concern that the proposal will lead to rank order anomalies because of the disproportionate distribution of values within the E/M family and suggested that we spread out the increases more proportionately by increasing the values of lower E/M codes and decreasing the proposed increases to CPT codes 99213 and 99214. These concerns were also echoed in the comments from the specialty societies representing colon and rectal surgery, vascular surgery, orthopaedic surgery, hand surgery, prosthetic urology and from other commenters.

The specialty society representing otolaryngology submitted a similar comment that also stated that the proposed increases are excessive and unsupported by a careful analysis of the data, including an analysis of the IWPUT. In addition, the commenter stated that the IWPUTs that result from our proposal are illogical within families of codes and exceed the levels of many complex surgical procedures. The society recommended that we either maintain the 2006 work RVUs or transition the new work RVUs over several years.

The society representing social workers, as well as individual social workers and other NPPs, commented that clinical social workers and other NPPs are unable to use the E/M codes and requested that we withdraw the proposed increase for E/M services until all Medicare providers can receive fair and adequate increases. The society representing psychologists recommended that we reduce the increase for E/M services because it is inequitable to reward some at the expense of others or that they be permitted to bill for E/M services.

Response: We appreciate the strong support shown for our proposed work RVUs for E/M services and are appreciative of the thoughtful concerns raised by other commenters. We certainly understand how contentious this issue has been, particularly in light

of the large BN adjustment that our acceptance of the RUC recommendations for these services would require. The concerns surrounding the valuation of E/M services were discussed during at least three RUC meetings before consensus was finally reached. We believe the final RUC recommendations represented acceptable relative values for the E/M services in question. After reviewing the comments, we believe that the RUC recommendations for the E/M services should be implemented in full beginning January 1, 2007.

With regard to the question of compelling evidence of the need for a change to the work RVUs, we believe that the rationale for revision of these RVUs did not rest solely on previous false assumptions, but also on the claim that there has been a change in the complexity of the patient population resulting in more diagnoses per encounter and more ambitious management goals. In reviewing the RUC's recommendations for the 5-Year Review, we found the evidence in support of a change in the work for E/M services as compelling as the evidence presented for most of the codes that we proposed to revise in this 5-Year Review. As to the comments regarding the IWPUTs of the E/M services, we are not yet convinced about the validity of the IWPUT analysis when applied to such "cognitive" services, particularly if such an analysis were to be used to negate the findings of acceptable surveys. In addition, even if there might be merit to the contention that the RUC recommendations will cause some rank order anomalies, we do not have the information that would be needed to rectify this; this is an issue that might be better handled by the RUC and the specialties involved.

Though we are sympathetic to the concerns of those who would not benefit from an increase to E/M services, but would face potential reductions in payment as a result of the BN adjustment, we do not believe that the appropriate answer would be to deprive primary care physicians, and other practitioners who provide these services, of an increase that the commenters otherwise appeared to consider reasonable and commenters did not suggest other viable alternatives. We would be happy to work with any group or individual that believes they have been unfairly impacted by this change to determine if there is any other appropriate other measure that might address their concerns.

We also do not believe that it would be either equitable or appropriate to transition the E/M increases, as

suggested by some commenters. The work RVUs for E/M services were accepted by a RUC consensus and we believe them to be reasonable. We have never before transitioned changes in work RVUs that we accept based on RUC recommendations, and we believe it would be unfair in this case to single out these increases for transition when other services that received even greater increases would benefit immediately.

We did not propose to make any changes in our policy regarding the types of suppliers that can bill for E/M services, and are not making any changes at this time. Our Internet Only Manual 100-02 Chapter 15 Section 160 continues to state that "any therapeutic services that are billed by clinical psychologists (CPs) under CPT psychotherapy codes that include medical evaluation and management services are not covered."

Comment: Several commenters representing renal physicians and patients, as well as the RUC, requested that we make an adjustment for the ESRD-related services, which have been valued using the E/M codes as building blocks, by adding the increase in the E/M RVUs to these services.

Response: Since the G-codes now used for these ESRD-related services have markedly different descriptors than the previously valued CPT codes, we are unable to determine at this time which levels of E/M visits are most appropriately associated with these G-codes. As explained in the CY 2004 PFS final rule (68 FR 63218), we established RVUs for these G-codes to equal the aggregate payments for the services provided under the CPT codes that had been previously recognized for these services. Because we based our payment of the G-codes on the aggregate payments for CPT codes 90918-90921, the specific CPT codes that are building-blocks of this payment system cannot be directly correlated. We suggest that the specialty could request that the CPT panel consider revising the CPT codes for these ESRD-related services to mirror our current G-codes; these could then be reviewed by the RUC to determine the level of E/M services that are typically associated with each code.

Comment: An organization representing long term care providers commented that we stated incorrectly at the end of the discussion concerning the RUC recommendations for the E/M services that nursing facility codes are not part of the 5-Year Review process. The commenter clarified that the RUC requested that these codes not be surveyed until after the 5-Year Review, when there could be appropriately valued codes to use as reference

services. Though the surveys will be conducted after the RVUs for E/M services are published, the commenter requested that we review the recommendations and update the nursing facility E/M RVUs to become effective in January 2008.

Response: The commenter is correct. The RUC recommended delaying the survey of these services pending RUC recommendations on E/M codes that could be used as reference services. If we receive the RUC's recommendations in time, we will review the recommendations for the work RVUs for nursing facility E/M services and publish our proposals in next year's proposed rule and will consider this part of the third 5-Year Review.

Comment: The specialty society representing home care physicians stated that the home care visit and domiciliary care visit codes were not included in the 5-Year Review; the domiciliary codes so that they could be valued through the RUC and, the home visits so that they could be used as reference codes. The society recommended that we adjust the work RVUs for these codes to reflect the revalued comparable office E/M codes for new and established patients. The commenter contended that the home visit and domiciliary care codes have been "referenced" to the office visit codes in the past and the changes proposed through the 5-Year Review process should be reflected in these derivative code families.

Response: It is unfortunate that these services were not included in the recent 5-Year Review and that the specialty did not propose them for review. We believe that it would be inappropriate to apply increases to these codes without a multi-specialty review of the work involved in these services. However, we would be willing to consider any RUC recommendations that might be forthcoming for revised work RVUs for the home visit and domiciliary care codes. Such a RUC review could be completed at the same time that the RUC is reviewing the nursing facility E/M services previously discussed in this section. As we indicated for the nursing facility E/M codes in the prior response, we would consider forthcoming RUC recommendations for the home care and domiciliary care E/M codes as part of the third 5-Year Review because of the similarity to the other E/M services considered in this review.

We continue to believe acceptance of the RUC recommendations for E/M services is appropriate and will implement the proposed work RVUs for E/M services beginning January 1, 2007.

6. Cardiothoracic Surgery

We received a number of comments concerning the cardiothoracic surgery proposals.

Comment: Commenters were supportive of the proposed valuation of the congenital cardiac surgery services and CPT code 32020, *Tube thoracostomy with or without water seal (e.g., for abscess, hemothorax, empyema) (separate procedure)*. However, commenters did not agree with the proposed work RVUs for the general thoracic and adult cardiac surgery codes. One commenter questioned why the work RVUs had not been maintained at the current levels. Commenters representing surgical specialties, including thoracic and cardiac surgery, questioned the methodology we used to arrive at the proposed work RVUs. They believe the proposed work values create rank order anomalies and disturb the relativity within the cardiothoracic family. Additionally, the commenters stated that we failed to include pre- and post-service work in the add-on codes, contrary to a policy stated in the CY 2002 physician fee schedule final rule (67 FR 79966). The commenters provided additional detailed information concerning the STS database, as well as their use of mean values for the intra-service time and the intensity survey methods used to estimate IWPUR.

Response: As we discussed in the June 29, 2006 proposed notice, the general thoracic and adult cardiac surgery codes submitted to the RUC for review did not undergo the standard RUC survey methodology (71 FR 37218). Rather, the data pertaining to these codes were derived from the STS database, a voluntary registry developed by the STS that has reportedly captured data on approximately 70 percent of all cardiac surgical procedures in the United States.

We believe the STS database represents a significant advance in the effort to improve the quality of patient care and we hope that this kind of data collection will be emulated by other specialties. We also believe that the time and visit data contained in this database could be a useful adjunct to the RUC's validation of the standard RUC survey results.

We appreciate the detailed information provided by the commenters in response to the concerns we had outlined in the June 29, 2006 proposed notice. Based upon a review of the specific information provided by the commenters concerning the STS database, as well as the information

provided specifically addressing the use of the mean values for the intra-service time and methodology used to estimate IWPUR, we will accept the RUC-recommended work RVUs for these services.

We note that it is our responsibility to assure all medical specialties that we will review and evaluate their services using an approach that is accepted by the RUC and CMS. We will continue to work with the RUC to better determine how to use the alternative data sources such as the STS data to compare the relativity of services. Unless an alternative approach can be found that can be applied to all services, we would not want to see the RUC abandon its survey methodology. We understand that the standard RUC survey process is not flawless, but it does provide an even playing field for all specialties and we would be concerned if each specialty was allowed to develop its own unique method for estimating work RVUs. Therefore, we will work with the RUC and continue to review this issue to determine the appropriate use of data sources other than the RUC survey.

Comment: The STS and the American Association for Thoracic Surgery (AATS) requested that we approve the RUC-recommended work RVUs of 49.41 for CPT code 33548, indicating that this was submitted as part of the 5-Year Review process since the valuation of this service was based on a reference code (CPT code 33542) that was in the refinement process. The commenter also stated that this was part of the RUC recommendations forwarded in September 2005.

Response: We did not receive CPT code 33548 as part of the 5-Year Review process, and therefore, we will maintain the current value for this service.

7. General, Colorectal and Vascular Surgery

For the following services, we received comments that disagreed with our proposed work RVUs.

a. Vascular Surgery

For CPT code 33877, *Repair of thoracoabdominal aortic aneurysm with graft, with or without cardiopulmonary bypass*; CPT code 34201, *Embolectomy or thrombectomy, with or without catheter; femoropopliteal, aortoiliac artery, by leg incision*; CPT code 35081, *Direct repair of aneurysm, pseudoaneurysm, or excision (partial or total) and graft insertion, with or without patch graft; for aneurysm, pseudoaneurysm, and associated occlusive disease, abdominal aorta*; CPT code 35102 *Direct repair of aneurysm, pseudoaneurysm, or excision (partial or*

total) and graft insertion, with or without patch graft; for aneurysm, pseudoaneurysm, and associated occlusive disease, abdominal aorta involving iliac vessels (common, hypogastric, external); CPT code 35556 *Bypass graft, with vein; femoral-popliteal*; CPT code 35566 *Bypass graft, with vein; femoral-anterior tibial, posterior tibial*; CPT code 35583 *In-situ vein bypass; femoral-popliteal*; and CPT code 35585, *In-situ vein bypass; femoral-anterior tibial, posterior tibial, or peroneal artery*, the RUC reviewed both the survey data and the NSQIP data for these services.

For these codes, the RUC believed that physicians responding to the survey underestimated the intra-service time and that the NSQIP data more accurately reflected the actual intra-service times for these procedures. For CPT code 33877, the RUC accepted a work value greater than the survey's 75th percentile that was derived from a building block approach using the NSQIP data for the service. For CPT codes 34201, 35102, 35556, 35566, and 35585, the RUC used the same methodology and accepted work values greater than the survey's median percentile. However, for CPT codes 35081 and 35583, the recommended increase was no greater than the surveyed median work RVUs.

The RUC-recommended work RVUs for these services were: 33877 = 64.04 work RVUs; 34201 = 18.31 work RVUs; 35081 = 31.00 work RVUs; 35102 = 36.28 work RVUs; 35556 = 27.25 work RVUs; 35566 = 32.00 work RVUs; 35583 = 26.00 work RVUs; and 35585 = 32.00 work RVUs.

CMS Proposed Valuation

We agreed with the RUC-recommended work RVUs for CPT codes 35081 and 35583. We disagreed with the RUC recommendations for CPT codes 33877, 34201, 35102, 35556, 35566, and 35585. For these services, the RUC used the NSQIP time data to increase the work values above the survey median, and for several codes above the 75th percentile. We rejected this use of the NSQIP data and proposed to use the survey median work RVUs for these CPT codes: 33877 = 53.00 work RVUs; 34201 = 17.00 work RVUs; 35102 = 34.00 work RVUs; 35556 = 25.00 work RVUs; 35566 = 30.00 work RVUs; and 35585 = 30.00 work RVUs. All of these proposed work RVUs are higher than the current values.

Comment: We received comments from the American College of Surgeons (ACS) and Society for Vascular Surgery (SVS) concerning these CPT codes. The ACS and the SVS, as well as the RUC,

stated that our proposed work RVUs would undervalue several of the vascular surgery procedures. Both the ACS and the RUC maintained that we should accept the RUC recommendations for all these services.

For CPT code 33877, the commenters contended that the proposed value would create a rank order anomaly with the partial esophagectomy service, CPT code 43118, for which we proposed 61.08 work RVUs, even though it is a less intense procedure. The ACS also maintained that, under our proposal, the IWPUT of this service would be too low.

For CPT code 34201, the commenters disagreed with our proposal to reject the NSQIP-derived increase with one noting that we accepted the NSQIP-derived reduction in length of stay for CPT code 34201. The RUC commented that the presenting specialty assumed NSQIP time to be more accurate than RUC survey time and used NSQIP time when available, whether it increased or reduced the RUC survey times.

For CPT code 35102, the commenters asserted that we proposed work RVUs that would decrease the IWPUT to 0.075, which is inconsistent with other similar surgical procedures. Therefore, they urged us to accept the RUC recommendation of 36.28 work RVUs for this service.

For CPT codes 35556, 35566, 35583 and 35585, the commenters maintained that the NSQIP data demonstrated that survey respondents consistently underestimated their intra-service time. The ACS commented that our proposals would lead to low IWPUTs that are considerably less than similar surgical procedures. The RUC commented that we would be creating rank order anomalies between these codes and the total colectomy services, CPT codes 44150 and 44151.

The SVS also disagreed with our proposed work RVUs for seven of its specialty's services, and disagreed with the RUC recommendations for all but one of the codes. In the extensive and detailed comments we received, the society defended the use of the NSQIP data to deviate from the survey median, stating that NSQIP intra-service time and hospital length of stay were used even when it reduced the recommendation compared to the RUC survey.

The commenter also offered additional rationale to support their requested work RVUs for CPT codes 33877, 35101, 35081, 35556, 35566, 35583 and 35585. In each case, the SVS presented the building block components for each service, a comparison with other vascular codes by IWPUT analysis, and a detailed

comparison to other selected procedures. The commenters also provided an additional discussion asserting that the number of hospital visits assigned by the RUC, and accepted by us, was underestimated for these services (with the exception of CPT code 33877.)

Response: We appreciate the comments that were submitted on our proposed work RVUs for these vascular surgery services. However, we note that there is disagreement among the commenters, with ACS and the RUC requesting that we accept the RUC recommendations for these codes and the SVS requesting acceptance of yet higher values for all the services (with the exception of CPT code 33877.) In addition, we have concerns that the SVS-recommended IWPUTs, for all but CPT code 33877, might be overstated. Therefore, based on the comments, we are accepting the RUC-recommended work RVUs of 64.04 for CPT code 33877, but referred the other seven codes to a multi-specialty refinement panel for review.

Final Decision: As a result of our analysis of the refinement panel ratings, we have assigned 17.94 work RVUs to CPT code 34201, 31.00 work RVUs to CPT code 35081, 34.00 work RVUs to CPT code 35102, 25.00 work RVUs to CPT code 35556, 30.00 work RVUs to CPT code 35566, 26.00 work RVUs to CPT code 35583, and 30.00 work RVUs to CPT code 35585.

b. Colorectal Surgery

For CPT code 44120, *Enterectomy, resection of small intestine; single resection and anastomosis*; CPT code 44130, *Enteroenterostomy, anastomosis of intestine, with or without cutaneous enterostomy (separate procedure)*; and CPT code 47600, *Cholecystectomy*, the RUC believed the physicians responding to the survey underestimated their intra-service time. Therefore, the RUC applied what was believed to be an appropriate IWPUT to the additional NSQIP time and added the resulting work RVUs to the survey median. The RUC-recommended work values for these CPT codes were as follows: 44120 = 20.11 work RVUs; 44130 = 20.87 work RVUs; and 47600 = 15.88 work RVUs.

CMS Proposed Valuation

We had concerns with the RUC recommendation to use the NSQIP data to increase the work RVUs, for CPT codes 44120, 44130 and 47600, above the survey median, and, for 47600, above the 75th percentile. While we support the use of such a database as validation for survey results, we believe that the application of the NSQIP

IWPUT to the difference in intra-time between the survey and NSQIP is questionable for the following reasons.

It is still not clear whether the NSQIP data is truly representative and the IWPUT applied to the additional time is higher than the IWPUT for the rest of the intra-time. In addition, this methodology assumes, without evidence, that there is a linear relationship between the survey respondents' estimate of time and estimate of work RVUs; however, even if the survey time estimates had matched the NSQIP data, it is not clear whether or by how much the respondents would have increased their work value estimate. Finally, until we have available valid and representative data such as the NSQIP for all procedures, there is the risk that applying the data randomly could distort the relativity between services. Therefore, we proposed to use the median survey values of 18.00, 20.00 and 14.00 as the work RVUs for CPT codes 44120, 44130 and 47600, respectively.

Comment: We received comments from the ACS and the American Society of Colon and Rectal Surgeons (ASCRS), as well as the RUC, urging us to accept the RUC recommendations for these 3 services. These commenters stated that the median work value that we proposed in the June 29, 2006 proposed notice for CPT code 44120 was incorrect; CPT code 44120 should be 19.00 work RVUs, not 18.00 work RVUs (71 FR 37228).

The ACS presented a lengthy defense of the NSQIP data that was echoed in the ASCRS comments. For example, ACS contended that the NSQIP data on intra-service skin-to-skin time is verified through operating room logs and is the "absolute gold standard" for estimating surgeon intra-service time. The commenters also disagreed that this data cannot be used until it is available for all services, since the best data should always be used rather than relying on "the lowest common denominator." The ACS further stated that a variety of different methodologies have been used to evaluate physician services and we have not, until now, required that one methodology be used for all codes. Finally, the ACS disputed our concerns that the NSQIP might not be representative, though it did agree that the number of Veterans Administration hospitals currently reporting is greater than the number of community and academic hospitals.

For CPT codes 44120 and 44130, ASCRS and ACS, as well as the RUC, contended that two reference codes were considered by the workgroup that

led the RUC to agree that the survey median work RVUs underestimated the total work of these procedures and would create rank order anomalies.

For CPT code 47600, the ACS maintained that the RUC's recommendation was based on a belief that the survey's median work RVU underestimated the total work for this procedure because the survey respondents were not considering the correct patient demographics. The commenters stated that, if we did not accept the recommendations where the use of NSQIP resulted in a value greater than the survey median, we should also do the same for those recommendations that were lower than the median. The commenters emphasized that the RUC also used a comparison with a reference code to develop the recommendation for this procedure.

Conversely, the American College of Physicians (ACP) expressed support for our decision to reject the RUC recommendations that were based on extraction of time information from the NSQIP database rather than the survey

median. The ACP questioned the representative nature of the data in the database and stated that allowing work values to be adjusted from the survey median, based on dubious relationships between work and time, would hurt the integrity of the RBRVS and should not be allowed.

Response: We appreciate the comments regarding the use of NSQIP data in the valuation of physician work. However, we would consider this the beginning of the discussion, not the end. There are still many issues that need to be fully explored (for example: what the criteria should be for the acceptance of a given database; whether databases can take the place of surveys; whether IWP/UT should be used to create work RVUs, rather than to validate them; and, whether there is a linear relationship between survey respondents' estimate of work and time.)

In the case of these three services, CPT codes 44120, 44130 and 47600, although the commenters offered some valid points regarding the use of NSQIP, not all the concerns discussed in the

proposed notice and summarized in this section of this final rule with comment period have been thoroughly discussed. Therefore, based on the comments received, we referred this code to a multi-specialty refinement panel for review.

Final Decision: As a result of our analysis of the refinement panel ratings, we have assigned 18.00 work RVUs to CPT code 44120, 20.00 work RVUs to CPT code 44130, and 15.85 work RVUs to CPT code 47600.

For the proctoscopy-anoscopy family of codes in Table 13, the RUC agreed that the surveyed median work RVUs, and often even the 25th percentile, were inconsistent with the reference code. Therefore, the RUC did not reference the surveyed RVUs in arriving at the recommendations. Rather, the RUC used the surveyed times for each service and applied what the workgroup considered an appropriate IWP/UT to these times to arrive at the recommended work RVUs for this family.

TABLE 13.—PROCTOSCOPY-ANOSCOPY FAMILY OF CODES

| CPT Code | Descriptor |
|----------|--|
| 45300 | Proctosigmoidoscopy, rigid; diagnostic, with or without collection of specimen(s) by brushing or washing (separate procedure). |
| 45303 | Proctosigmoidoscopy, rigid; with dilation (e.g., balloon, guide wire, bougie). |
| 45305 | Proctosigmoidoscopy, rigid; with biopsy, single or multiple. |
| 45307 | Proctosigmoidoscopy, rigid; with removal of foreign body. |
| 45308 | Proctosigmoidoscopy, rigid; with removal of single tumor, polyp, or other lesion by hot biopsy forceps or bipolar cautery. |
| 45309 | Proctosigmoidoscopy, rigid; with removal of single tumor, polyp, or other lesion by snare technique. |
| 45315 | Proctosigmoidoscopy, rigid; with removal of multiple tumors, polyps, or other lesions by hot biopsy forceps, bipolar cautery or snare technique. |
| 45317 | Proctosigmoidoscopy, rigid; with control of bleeding (e.g., injection, bipolar cautery, unipolar cautery, laser, heater probe, stapler, plasma coagulator). |
| 45320 | Proctosigmoidoscopy, rigid; with ablation of tumor(s), polyp(s), or other lesion(s) not amenable to removal by hot biopsy forceps, bipolar cautery or snare technique (e.g., laser). |
| 45321 | Proctosigmoidoscopy, rigid; with decompression of volvulus. |
| 45327 | Proctosigmoidoscopy, rigid; with transendoscopic stent placement (includes predilation). |
| 46600 | Anoscopy; diagnostic, with or without collection of specimen(s) by brushing or washing (separate procedure). |
| 46604 | Anoscopy; with dilation (e.g., balloon, guide wire, bougie). |
| 46606 | Anoscopy; with biopsy, single or multiple. |
| 46608 | Anoscopy; with removal of foreign body. |
| 46610 | Anoscopy; with removal of single tumor, polyp, or other lesion by hot biopsy forceps or bipolar cautery. |
| 46611 | Anoscopy; with removal of single tumor, polyp, or other lesion by snare technique. |
| 46612 | Anoscopy; with removal of multiple tumors, polyps, or other lesions by hot biopsy forceps, bipolar cautery or snare technique. |
| 46614 | Anoscopy; with control of bleeding (e.g., injection, bipolar cautery, unipolar cautery, laser, heater probe, stapler, plasma coagulator). |
| 46615 | Anoscopy; with ablation of tumor(s), polyp(s), or other lesion(s) not amenable to removal by hot biopsy forceps, bipolar cautery or snare technique. |

The specific RUC work RVU recommendations for these colon and rectal surgery CPT codes were as follows: 45300 = 0.91 work RVUs; 45303 = 2.22 work RVUs; 45305 = 2.01 work RVUs; 45307 = 2.22 work RVUs; 45308 = 2.01 work RVUs; 45309 = 2.22 work RVUs; 45315 = 2.22 work RVUs; 45317

= 1.08 work RVUs; 45320 = 2.43 work RVUs; 45321 = 2.76 work RVUs; 45327 = 3.63 work RVUs; 46600 = 0.49 work RVUs; 46604 = 1.08 work RVUs; 46606 = 1.76 work RVUs; 46608 = 1.95 work RVUs; 46610 = 1.95 work RVUs; 46611 = 1.08 work RVUs; 46612 = 2.14 work

RVUs; 46614 = 1.08 work RVUs; and 46615 = 1.18 work RVUs.

CMS Proposed Valuation

We proposed not to accept the RUC recommendations for all the presented codes in the proctoscopy-anoscopy family. We proposed to maintain the

current work RVUs for CPT codes 45300, 45303, 45305, 45307, 45308, 45309, 45315, 45317, 45320, 45321, 45327, 46600, 46604, 46606, 46608, 46610, 46611, 46612, 46614 and 46615.

As we stated in the June 29, 2006 proposed notice, we believe that the method used by the RUC to obtain work values for these services was flawed (71 FR 37229). The calculation of the recommended work RVUs depended solely on applying a workgroup-derived IWP/UT to the surveyed physician time from surveys that were considered otherwise unusable. We also stated that we do not believe that the use of IWP/UT, in the absence of other supporting data, has been previously accepted by the RUC. We believe the RUC has established rules that state that IWP/UT cannot be the sole rationale for valuation and it appears that this workgroup might not have adhered to that standard. However, we stated that, if the specialty society wishes to resurvey these codes and the RUC submits work RVU recommendations to us, we would certainly be willing to consider them.

Comment: The ASCRS expressed their appreciation for the opportunity to again present survey data to the RUC for these services and the ACS stated that it will be working with ASCRS to facilitate this process. The RUC commented that the specialty society recommendations for these services were presented at the October 2006 RUC meeting.

Response: At the October 2006 RUC meeting, the Society presented the original surveys with additional rationales to support the requested work RVUs. After much discussion, the RUC decided that the original surveys were still not usable and that new surveys would be needed before a recommendation for revised work RVUs could be made. Therefore, we are maintaining the current work RVUs for this series of codes, as proposed.

Other Issues

Comment: A few commenters, while agreeing with the increase in work RVUs for CPT code 19180 (total mastectomy), expressed concern that the work RVUs for CPT code 19160 (partial mastectomy) were not reviewed. These commenters believed that the work RVUs for CPT code 19160 should be addressed in a similar fashion and the work RVUs should be adjusted to avoid a potentially adverse impact on patient treatment for breast cancer. One of these commenters suggested that this disparity in work RVUs needed to be addressed before the next 5-year review,

as this disparity could impact on medical decision-making.

Response: As part of the 5-year review process, the specialty societies were asked to identify whether the RUC-recommended changes in the work RVUs created anomalies within a family of codes. Any such potential anomalies identified by the specialty societies were then reviewed at subsequent RUC meetings. Unfortunately, this potential anomaly was not identified or reviewed. However, we will ask the RUC to review this code (CPT code 19160) and will consider this RUC recommendation as part of the third 5-Year Review.

8. Otolaryngology and Ophthalmology

In addition to comments received in support of the proposed work RVUs for services reviewed by the RUC's workgroup 8, we received the following comments.

For CPT code 31360, *Laryngectomy; total, without radical neck dissection*; CPT code 31365, *Laryngectomy; total, with radical neck dissection*; CPT code 31390, *Pharyngolaryngectomy, with radical neck dissection*; without reconstruction; and CPT code 31395, *Pharyngolaryngectomy, with radical neck dissection; with reconstruction*, the specialty society presented survey data with the rationale that the current work RVUs create rank order anomalies, and that there also has been a change in the patient population. The RUC agreed that increasing the work RVUs of these procedures by accepting the 75th percentile of survey results corrected the specific rank order anomalies and also accounted for the change in the patient population. The RUC-recommended work RVUs for these CPT codes are as follows: 31360 = 28.00 work RVUs; 31365 = 37.00 work RVUs; 31390 = 40.00 work RVUs; and 31395 = 44.00 work RVUs.

For CPT code 31367, *Laryngectomy; subtotal supraglottic, without radical neck dissection* and CPT code 31368, *Laryngectomy; subtotal supraglottic, with radical neck dissection*, the specialty society presented survey data with the rationale that the current work values are based on a flawed methodology that creates rank order anomalies, and that there also has been a change in patient population. The RUC agreed with the specialty society and recommended increasing the work RVUs for these services to maintain rank order between the codes in the family and to establish the correct intensity of the procedure based on the change in patient population. The RUC-recommended work RVUs for these CPT codes are as follows: 31367 = 27.36

work RVUs; and 31368 = 36.00 work RVUs.

For CPT code 41155, *Glossectomy; composite procedure with resection floor of mouth, mandibular resection, and radical neck dissection (Commando type)*, the specialty society presented survey data, noting that the current work RVUs create a rank order anomaly. The RUC agreed that increasing the work RVUs would correct these rank order anomalies and that these increases were justified by the survey results. The RUC-recommended 40.00 work RVUs for CPT code 41155.

For CPT code 42845, *Radical resection of tonsil, tonsillar pillars, and/or retromolar trigone; closure with other flap*, the specialty society's survey data demonstrated that the code was currently undervalued due to a previous flawed methodology. The RUC believed that the survey results reflected the appropriate physician work and time necessary in performing this procedure and recommended the 32.00 work RVUs for CPT code 42845.

CMS Proposed Valuation

For the laryngopharyngectomy procedures, including CPT codes 31360, 31365, 31367, 31368, 31390 and 31395, the number of hospital days decreased by at least 2 days and the post-operative outpatient visits increased by 1 day. However, in one instance the number of outpatient visits decreased (CPT code 31395). The median values for intra-service times were accepted by the RUC for these services, which is an indication that a lower value than the 75th percentile for work also may be appropriate. Therefore, we proposed using median values for these services resulting in the following work RVUs for these CPT codes: 31360 = 24.00 work RVUs; 31365 = 31.50 work RVUs; 31367 = 24.00 work RVUs; 31368 = 30.50 work RVUs; 31390 = 35.00 work RVUs; and 31395 = 39.50 work RVUs.

CPT code 41155 was valued by the RUC at the 75th percentile for work, but CPT code 41150 was valued based on the median work value. The median values for intra-service times were accepted by the RUC for these services, which is an indication that a value other than the 75th percentile for work also may be appropriate. Therefore, we proposed 36.00 work RVUs of for CPT code 41155.

CPT code 42845 was valued by the RUC at the 75th percentile for work rather than the median as the RUC recommended for the other procedures in this family (CPT codes 42842 and 42844). Therefore, we proposed 29.00 work RVUs for CPT code 42845.

Comment: The RUC and several specialty societies, including the American Head and Neck Society (AHNS) and the American Academy of Otolaryngology-Head and Neck Surgery (AAO-HNS), disagree with the proposed work RVUs for CPT codes 31360, 31365, 31367, 31368, 31390, 31395, 41135, 42845. They provided information, data, and rationales concerning the valuation of these services and, recommended that we accept the RUC recommendations. The specialty societies objected to our proposed RVUs on the grounds that they created rank order anomalies; they believe the reference codes used were a poor choice that resulted in an underestimation of work by the survey respondents; and they believe the codes had been undervalued for years.

Response: Based on the comments received, we referred these codes to a multi-specialty refinement panel for review. Panel review is appropriate for reasons including the RUC acceptance of the median values for intra-service times, which is an indication that a value other than the 75th percentile for work may be appropriate, and the need for further discussion regarding the appropriateness of the reference codes chosen by the survey respondents as comparable services to the codes being valued.

Final Decision: As a result of our analysis of the refinement panel ratings, we have assigned 26.22 work RVUs to CPT code 31360, 35.00 work RVUs to CPT code 31365, 27.00 work RVUs to CPT code 31367, 30.50 work RVUs to CPT code 31368, 38.33 work RVUs to CPT code 31390, 39.50 work RVUs to CPT code 31395, 40.00 work RVUs to CPT code 41155, and 29.00 work RVUs to CPT code 42845.

Miscellaneous Issues

Comment: The American Academy of Ophthalmology (AAO) stated its belief that the 5-Year Review process was fair in its consideration of the ophthalmic codes. However, the AAO expressed disappointment in the decrease in value for cataract surgery (CPT code 66984) and its hope that this “downward reimbursement reward” does not lead to a decrease in research and innovation in medical care. The AAO also expressed disappointment in our decision to unlink the long-standing relationship of the Ophthalmology Examination codes (92002–92014) to the E/M codes. The AAO urged us to reaffirm this linkage and increase those values to reflect the proposed increases in E/M services. If this is not possible, AAO suggested that the work values prior to the linkage in 1996 be restored since they were

lowered during the first 5-Year Review to facilitate the linkage process.

Response: We acknowledge that currently the work RVUs for ophthalmology examination services are linked to the work RVUs for certain E/M codes. However, the work RVUs for the E/M codes are being increased based on our acceptance of the rationale that the work required to furnish these services has itself changed. This increase in work RVUs also implies that the E/M services today are not exactly the same services to which we initially linked the eye examination services. Unfortunately, because the specialty did not bring the ophthalmology examination codes to the 5-Year review for evaluation of any change in the work of furnishing these services, it is not known to what extent, if at all, the work for the ophthalmology examination codes would have mirrored the change in the work of the E/M codes. We note that the E/M increases have been added to other services only when the E/M codes were clearly used as the building blocks for valuing the services, for example, for global surgical services with post-operative visits. Therefore, we will implement the work RVUs for CPT codes 92002–92014 as proposed. However, if received in time for next year’s proposed rule, we would be willing to consider any RUC recommendations for work RVUs for these services for implementation in FY 2008 and would consider this as part of the third 5-Year Review.

Comment: For CPT code 69210 *Removal impacted cerumen (separate procedure), one or both ears*, while we accepted the RUC-recommended work RVUs for this service, in the June 29, 2006 proposed notice we had expressed concern about the valuation of this service for the use of this code for routine removal of ear wax and indicated we would monitor the use of this code for the appropriate circumstances (71 FR 37233). The RUC and other specialty societies provided additional information to address our concern with this valuation for the use of this code for routine removal of ear wax during a physical examination of a patient. One commenter believes that there is the potential for misuse of this code due to a lack of understanding by other specialties of the physician work included in this procedure. The commenter recommends that we issue clarifying instructions or an educational article so that this code will be used in a manner consistent with the criteria outlined by AAO-HNS and contained in the July 2005 issue of the AMA’s CPT Assistant.

Response: We appreciate these comments and will consider the suggestions made by the commenters.

9. HCPAC codes

In addition to comments received in support of the proposed work RVUs for services reviewed by the HCPAC, we received the following comments.

For CPT code 10060, *Incision and drainage of abscess (e.g., carbuncle, suppurative hidradenitis, cutaneous or subcutaneous abscess, cyst, furuncle, or paronychia); simple or single*; CPT code 11040, *Debridement; skin, partial thickness*; CPT code 11041 *Debridement; skin, full thickness*; CPT code 11042 *Debridement; skin, and subcutaneous tissue*; and CPT code 29580 *Strapping; Unna boot*, the HCPAC agreed with the specialty society that there was compelling evidence that the valuation of these services was incorrect due to a flawed methodology used in the previous Harvard valuation for the podiatric codes considered under the 5-Year Review.

For CPT codes 10060 and 29580, the HCPAC supported an increase in the existing work values for these codes and recommended work RVUs of 1.50 for CPT code 10060 and 0.60 work RVUs for CPT code 29580, both of which represent the median of the survey data for these services.

For CPT code 11040, the HCPAC did not support the work RVU increase recommended by the specialty society, but instead recommended 0.55 work RVUs, which represented the 25th percentile work RVU from the survey data.

For CPT code 11041, the HCPAC recommended a decrease in the work RVUs and, based on the median from the survey data, recommended 0.80 work RVUs.

For CPT code 11042, the HCPAC did not agree with the specialty society that the work RVUs should be increased to 1.20 work RVUs. The HCPAC recommended maintaining the current work RVUs of 1.12 for this CPT code, which was slightly higher than the survey’s 25th percentile work value of 1.10 work RVUs.

The HCPAC-recommended work values for these services were as follows: 10060 = 1.50 work RVUs; 11040 = 0.55 work RVUs; 11041 = 0.80 work RVUs; 11042 = 1.12 work RVUs; and 29580 = 0.60 work RVUs.

CMS Proposed Valuation

For CPT code 10060, we compared the survey times with the current Harvard-based times used to value this service. These times are comparable

and, therefore, we proposed maintaining the current work RVUs of 1.17 for this code.

For CPT codes 11040, 11041 and 11042, the survey times all reflect significant reductions from current Harvard-based times used to value these services. Based on this comparison, which shows decreases in time ranging from 47 percent to 68 percent, we believe that the low values from the surveys more accurately represent the valuation of these services. Therefore, we proposed to assign work RVUs as follows: 11040 = 0.48 work RVUs; 11041 = 0.60 work RVUs; and 11042 = 0.80 work RVUs. In addition, to ensure that the other codes in this family are properly valued, we recommended the RUC review the valuation of CPT codes 11043 and 11044.

For CPT code 29580, we compared the current Harvard-based times with the survey times. For this code, there was a small reduction in survey time as compared to the current Harvard-based time used to value this service, and, therefore, we do not believe the recommended increase in work RVUs is supported. We proposed to assign 0.55 work RVUs to this service, which represents the 25th percentile of the survey and more accurately reflects the time associated with this service.

Comment: The American Podiatric Medical Association (APMA) and the HCPAC disagreed with the rationale we provided to explain our disagreement with the HCPAC-recommended work RVUs for 5 CPT codes (11060, 11040, 11041, 11042, and 29580) that are predominantly provided by the podiatry specialty. The commenters noted that our proposed valuation of these services was based solely on a comparison of the RUC-surveyed times to the Harvard-based times, despite the HCPAC's concurrence with the specialty that the current Harvard work values were incorrect due to a flawed methodology. In addition, the commenters noted that our proposed valuation fails to address the intensity measures inherent to each service. The specialty presented recent literature abstracts to demonstrate that the treatment of diabetic ulcers has become more complicated in recent years and also supports that the diabetic ulcer is the primary cause of infections and, ultimately, leads to amputations in this population. The APMA and the HCPAC urged us to consider these inherent risks in treating this population and to accept the HCPAC-recommended work RVUs.

For CPT codes 11040, 11041 and 11042, the HCPAC recommended an increased work RVU for CPT 11040, a slight decrease in work RVUs for 11041,

and the same work RVUs for 11042. Based on their belief that there is increased complexity and inherent risks in treating the diabetic patient, the APMA and the HCPAC in their comments urged us to accept the HCPAC-recommended work RVUs for this family of codes at 0.55 work RVUs, 0.80 work RVUs and 1.2 work RVUs, respectively. The commenters also strongly object to our reliance on a time-based comparison from the RUC surveys and the Harvard data (which the HCPAC and APMA agreed was based on a flawed methodology) to derive the work RVUs for these debridement codes.

For CPT code 11060, the APMA and the HCPAC requested that we accept the HCPAC recommendations for this 10-day global service based on the lack of intensity measures in our valuation that relied on a comparison of the RUC surveyed time to the Harvard-based time which, as mentioned previously, had been determined to be based on a flawed methodology. The APMA believes that by using this time-based comparison and maintaining the current RVUs at 1.17 work RVUs, we are proposing to distort the relativity of CPT 10060 with other comparable services (for example, CPT codes 10140 and 11421) and results in an unreasonably low IWPOT, at 0.009. The HCPAC and the APMA urged us to accept the recommended work value at 1.5 work RVUs that represents an IWPOT of 0.031.

For CPT code 29580, the specialty society indicated that the typical patient requiring the application of an Unna boot is a diabetic with lower extremity edema, often with the presence of an ulcer. The typical patient requires repetitive applications of this Unna boot strapping, so most applications will also require the removal of the Unna boot, a thorough cleansing of the area, physical examination, and a careful reapplication of the strapping material. The APMA believes that our valuation of 0.55 work RVUs—using just the surveyed time, without specifically addressing the intensity measures inherent to the care of the diabetic patient—undervalues this service. The HCPAC and the APMA urged us to adopt the recommended value (survey median) of 0.60 work RVUs.

Response: We appreciate the comments and information forwarded by the HCPAC and the APMA. However, based on our review of the data and literature contained in their comments, we are not convinced that the complexity and intensity measures inherent to the treatment of the diabetic patient have changed significantly over the past 5 years. In addition, we

understand the specialty's concern that the Harvard time data was flawed. However, we believe that the lower times presented from the survey do not warrant the recommended work RVUs. Nonetheless, we believe that the HCPAC and the APMA should have the opportunity to present their evidence relative to the work RVUs for these five codes to a multi-specialty panel for review. As such, we have referred CPT codes 10060, 11040, 11041, 11042, and 29580 for refinement.

Final Decision: As a result of our analysis of the refinement panel ratings, we have assigned 1.17 work RVUs to CPT code 10060, 0.50 work RVUs to CPT code 11040, 0.60 work RVUs to CPT code 11041, 0.80 work RVUs to CPT code 11042, and 0.55 work RVUs to CPT code 29580.

Other Issues

Other commenters representing nutritionists and dietitians referenced the medical nutrition codes that were referred to the CPT Editorial Panel, indicating that these services should be assigned work RVUs. This issue is discussed in section II.B.4.c. of this final rule with comment period, as it was specifically addressed in the CY 2007 PFS proposed rule (71 FR 48982).

D. Other Issues Under the 5-Year Review

1. Anesthesia Services

Although anesthesia services are paid under the PFS, they are paid on the basis of an anesthesia code-specific base unit and time units that vary based on the anesthesia time of the case. Since anesthesia services do not have a work value per code as do other medical and surgical services, a work value must be imputed for each anesthesia code.

As a result of its relationship with the RUC and the past recommendations for valuing anesthesia services, which were discussed in detail in the June 29, 2006 proposed notice (71 FR 37237), the American Society of Anesthesiologists (ASA) requested that we address the valuation of anesthesia services reported under CPT codes 00100 through 01999. The ASA furnished an analysis that builds on the methodology used in the last 5-Year Review for the valuation of work for anesthesia services. We recommended that the valuation of anesthesia services, namely the proposed valuation of the post-induction time, be referred to the AMA RUC for review and consideration.

Comment: The RUC indicated that it will consider any specific CMS request and asked that we clarify the scope of review and elements of the anesthesia

relativity that is supposed to be addressed. Many commenters, including individuals and a specialty group, expressed concern that the proposed reductions in payment for anesthesia services may lead to future manpower shortages and could affect the provision of surgical services. They asked us to work with the ASA and the RUC to appropriately value the work of anesthesia services.

Response: We understand that the ASA and the RUC will be reviewing this issue in an upcoming meeting and will make a recommendation to CMS in 2007.

A second issue concerning anesthesia services pertains to the impact of the revised work values for E/M services and their relationship to the valuation of pre- and post-anesthesia services, components of the building-block approach. The pre- and post-anesthesia services derive their work values from the lower level E/M codes for new patients, the subsequent hospital care codes, and the initial inpatient consultation codes.

In the June 29, 2006 proposed notice, we proposed to increase the work of the pre- and post-anesthesia components of the 19 anesthesia codes, previously reviewed by the AMA RUC in the last 5-Year Review of work. Specifically, we proposed to increase the anesthesia work to reflect the increased work values for the E/M codes where there were increases in the work of those E/M codes.

Comment: One specialty group noted that we should refer the valuation of pre- and post-anesthesia issues to the RUC for its review and consideration, and should not make any changes in the value of pre- and post-anesthesia services at this time. The ASA requested that we increase the work of all anesthesia services, not just the 19 anesthesia codes, to account for the increase in work values for E/M codes. They noted that all anesthesia services have E/M services included in the pre- and post-anesthesia components and the work of all anesthesia services should be increased.

Response: We disagree with the comment asking us to defer action on re-valuing the work of anesthesia services to account for the increased work of certain E/M codes. We are making the adjustment, but will ask the RUC and the ASA to review the E/M codes assigned to the pre- and post-anesthesia periods to ensure that they are still clinically relevant. While we understand the concerns of the ASA, we are unable to make that type of adjustment across all anesthesia services. The pre- and post-anesthesia

components of the anesthesia service are not uniformly linked to the same E/M code. Rather, the E/M code can vary based on the complexity of the anesthesia service. For example, for cataract anesthesia, the pre-anesthesia service is linked to a blend of CPT codes 99201 and 99202 and the post-anesthesia service is linked to CPT code 99211. The work values for each of these E/M codes did not change in this 5-Year Review of work. Conversely, for anesthesia for coronary bypass surgery, the pre-anesthesia service is linked to CPT code 99232 and the post-anesthesia service is linked to a blend of CPT codes 99231 and 99232. The work value for each of these E/M services increased in this 5-Year Review of work. Thus, in the June 29, 2006 proposed notice, we proposed to increase the work for E/M services in anesthesia for coronary bypass surgery but made no adjustment in the work for cataract anesthesia (71 FR 37237).

It is not clear how the pre- and post-anesthesia services of the non-surveyed anesthesia codes would be tied to the 19 surveyed codes and whether the work of the proposed linked E/M services are increased. We will look at this issue in context of any proposed changes that may be made to anesthesia work next year.

2. Discussion of Post-Operative Visits included in the Global Surgical Packages

We have established a national definition for a global surgical package so that payment is made consistently for the same set of services across all contractor jurisdictions. In constructing the RVUs for a global surgery service, all services that are believed to be typically included in the defined global period are built into the final resource-based RVUs and are not separately billable within the defined global period as reflected in the proposed work RVUs in Addenda B and C. This includes pre-surgery work, the intra-service time of actually furnishing the surgical procedure, and the post-operative (follow-up) visits associated with the monitoring and recovery of the patient.

As stated above in this section, we proposed to apply the RUC-recommended new values for the E/M services to all surgical services with a 10- or 90-day global period. However, because of variations in the patient population and in practice patterns, there is some question whether the assumptions about the number and level of visits within the global period reflect the actual post-operative work furnished. Some surgeons have commented that they furnish more visits

than are included in the global period for their services. It is also likely that some patients require fewer than the "typical" number of follow-up visits included in the global period.

Although we are not proposing any changes to our global policy at this time, we solicited comments concerning our current policy of including these post-operative visits in the global surgical packages and what advantages or disadvantages might be associated with proposing a change to this policy in the future.

We received several comments concerning incorporating the new E/M values into all surgical services with a 10- or 90-day global period. With respect to our request for comments concerning our current policy of including these post-operative visits in the global surgical packages, we also received many suggestions. These comments and suggestions are addressed in this section.

Comment: Many commenters, including specialties representing primary care physicians and surgeons, as well as the RUC, supported the incorporation of the revised E/M work RVUs into the surgical global periods for each CPT code with a global of 010 and 090 as recommended by the RUC. Commenters, including the RUC, noted that we may have incorrectly implemented the RUC recommendation. They indicated that in implementing this proposal, we used discounted work RVUs, developed for pricing post services under the first 5-Year Review, rather than the undiscounted work RVUs that reflect the actual RVUs accepted by us for the E/M services. This resulted in incorrect, and lower, work RVUs being added to all of the services with post-operative visits in the 010 and 090 global periods and was contrary to the RUC recommendation that the full increase of the E/M be incorporated. The RUC requested that we review the calculations and implement the correct work RVUs for all procedures that have a 010 and 090 global period to reflect their recommendation. Other commenters stated that we should verify the accuracy of the data to ensure that the values, as recommended by the RUC, are appropriately implemented.

A few commenters also suggested that, should changes be made to the valuation of the E/M services, these changes would need to be carried through to the global package revisions.

Response: We have discussed this issue with the RUC and will ensure that the correct undiscounted values are incorporated.

Comment: MedPAC stated that in comparison to other payment systems, the unit of payment under the PFS is very narrow and consists of many discrete services. MedPAC reiterated its longstanding concern that such a unit of payment might give physicians a financial incentive to increase payments by increasing the volume of services, which could lead to unnecessary services being provided. Therefore, in the absence of information suggesting that access to appropriate care is being compromised, MedPAC supports the current concept of packaging/bundling these services to encourage efficient and appropriate care. Several commenters representing surgical specialties agreed with this position, and additionally one commenter stated that such a change might also increase the risk of "fee splitting." The commenter also supports the expansion of the global concept into disease management.

Other commenters suggested that we drop the global surgical model and replace this concept with a system that measures the actual amount of post-service work included in these global surgical services. Commenters suggested that this would "level" the playing field for documentation requirements and be less detrimental to "centers for excellence" which usually provide more care than is currently included within the global period. Commenters also suggested there are additional advantages to eliminating the global surgical model including the valuation of services being straightforward, the reduction of errors in PE valuation, and the facilitation of research, quality improvement and utilization tracking. However, there would be an associated increase in the volume of claims to be processed.

One commenter suggested that we meet with stakeholders prior to implementing such a change, while another commenter urged us to conduct a study on impact of revising the global surgical concept.

Response: We appreciate these comments and suggestions and will consider these along with additional information as we continue to study this issue.

3. Budget Neutrality

As discussed in the June 29, 2006 proposed notice, section 1848(c)(2)(B)(ii) of the Act requires that increases or decreases in RVUs for a year may not cause the amount of expenditures for the year to differ by more than \$20 million from what expenditures would have been in the absence of these changes. If this threshold is exceeded, we must make

adjustments to preserve budget neutrality (BN). This year, we expected that BN adjustments would be required as a result of changes in RVUs resulting from the 5-Year Review. We considered making the statutorily required BN adjustments (under section 1848(c)(2)(B)(ii)(II) of the Act) to account for the 5-Year Review of physician work by reducing all work RVUs. We estimated that all work RVUs would have to have been reduced by 10 percent under this option. Alternatively, we considered making an adjustment to the PFS CF to meet the provisions of section 1848(c)(2)(B)(ii)(II) of the Act. This option would have required an estimated 5 percent reduction to the CF. We also noted that the application of the BN adjustments to the CF would negatively impact all PFS services; whereas the application of the BN adjustment to the work RVUs would impact only those services that have physician work RVUs. Because the need for BN adjustment would be largely due to changes proposed as a result of the 5-Year Review of work RVUs, we believed it was more equitable to apply the adjustment across services that have work RVUs. We proposed to establish a BN adjustor that would reduce all work RVUs by an estimated 10 percent to meet the BN provisions of section 1848(c)(2)(B)(ii)(II) of the Act.

Comment: We received numerous comments on this issue. Many of the commenters were opposed to our proposal and requested that the adjustment be made to the CF for the following reasons:

(1) Applying the BN adjustor to all work RVUs has been problematic in the past.

(2) By imposing the full burden of BN on the pool of work values, we would be significantly mitigating the improved accuracy of the values that have now been assigned to E/M services.

(3) This approach obfuscates the recommended changes of the RUC and could potentially have an inappropriate effect on relativity.

(4) The application of a separate work adjustor is not consistent with our goal of cost transparency and may adversely affect payments by non-Medicare payers.

These commenters, which include the AMA, the RUC, and the AMA-HCPAC, asserted that applying the BN adjustor to the work RVUs is contrary to our longstanding policy. In addition, they do not believe that we provided an adequate rationale for shifting to this new approach, which we have previously stated is neither appropriate, nor effective. These associations noted that when in the past we applied a BN

adjustor to the work RVUs, it caused considerable confusion among many non-Medicare payers, as well as physician practices that use the Medicare relative values as efficiency measures, and that the constant fluctuations in the work RVUs due to BN adjustments impeded the process of establishing work RVUs for new and revised services.

In addition to these objections, numerous specialty societies, organizations, groups, and providers also indicated that an adjustment to the CF is preferable because it would recognize that BN is mandated for monetary reasons. Thus, the CF, as the monetary multiplier in the Medicare payment formula, is the most appropriate place to adjust for BN.

A number of commenters, including representatives of some radiology and oncology providers, were supportive of our proposal because it fairly applies the required BN adjustment to the portion of the fee schedule that was the subject of review.

A few commenters also stated that although the BN adjustment methodology set forth in the June 29, 2006 proposed notice is not ideal, they believe that it is the best of the available alternatives under the circumstances (71 FR 37241). These commenters also believe that making all BN and scaling adjustments on a fee-schedule-wide basis would apparently result in unacceptable fee-schedule-wide reductions and is clearly inequitable for TC services. Another commenter urged us to delay the implementation of the BN adjustor for 1 year to allow more time to explore ways to increase recognition of E/M services without imposing such a financial hardship on select physician and nonphysician providers and to allow physicians and nonphysicians the opportunity to work with us to suggest alternative approaches.

Other commenters also discussed the interaction of the application of the BN adjustment and the DRA OPD cap on imaging services. As required by the DRA, reductions in imaging payments because of the OPD cap result in actual savings to the Medicare program (that is, they are not done in a budget neutral manner). The commenters note that if the BN is applied to the CF and not to the work RVUs, then the impact of the DRA cap on total Medicare spending is lower. This is because applying BN to the CF will narrow the payment differential between imaging services furnished in physicians' offices and hospital OPDs, and thus reduce the effect of the DRA cap on payments for imaging services.

Response: We appreciate the information presented by the commenters. We do not have the authority to delay implementing the BN adjustment and we must apply a BNF to offset the increases in work RVUs effective for 2007.

We are very appreciative of the work the RUC and the specialty societies have done in the past several years to prepare for this 5-Year Review. As a result of their dedication and analysis, the work RVUs are now more accurate and reflective of the time and resources associated with them. We do not believe that applying the BN on the work RVUs would undermine or diminish the RUC or specialty societies' contributions or the resulting improvements.

Section 1848(c)(2)(B)(ii)(II) of the Act requires a BN adjustment. Regardless of whether the BN is achieved by applying an adjustment factor to the work RVUs, as we proposed in the proposed rule, or the CF, which is the preferred option of many of the commenters, the values associated with the work ultimately will be decreased. Therefore, we do not agree with the commenters' suggestions that applying the BN to the work RVUs would do the system a great harm. Specifically, we disagree that it would significantly reverse the improved accuracy of the values that have now been assigned to E/M services. Further, we do not think that this approach would distort the relativity of the RVUs. Because such an adjustment is uniformly applied to all the work RVUs, it does not alter the relationship among them.

We also note that this rule finalizes a change in the PE methodology. Changes to the PE RVUs are being budget neutralized within those PE RVUs. Applying BN adjustments at this time, within each set of RVUs, maintains equity and helps to ensure that the weights between work, PE and malpractice are consistent with the weighting used in the MEI.

Therefore, for the reasons discussed above in this section, we will be applying the statutorily-required BN adjustment to the work RVUs as proposed in the proposed rule. We note that we previously applied a separate adjuster to the work RVUs following the first 5-Year Review of physician work in 1997. We understand that many commenters would find it preferable for us to make the required BN adjustment to the CF. However, we believe the best and most equitable approach to applying BN for this 5-Year Review of work is to adjust the work RVUs for 2007 using a separate adjuster for those RVUs. Achieving BN by adjusting the CF would have the effect of reducing

payment for all services on the fee schedule. This would include reductions to RVUs for a number of services that have no physician work and were, therefore, outside the scope of the 5-Year Review. We believe it would be unfair, given the significant negative update to the CF this year, to impose additional reductions resulting from the BN adjustment on codes that have no work values associated with them.

We share the commenters' concerns about transparency and recognize the Medicare PFS is used by other payors and for other purposes than just Medicare payments. To maintain a high level of transparency in the fee schedule, the Addendum B published in this rule will show the RVUs without the BN adjustment applied. This will serve as a reference for any interested party and should help to minimize any confusion about the unadjusted codes. There also is a discussion of the BN work adjuster and the payment formula for 2007 included in the section IX. of this final rule with comment period, "Anesthesia and Physician Fee Schedule Conversion Factors for 2007." Payment for services will be calculated as follows:

$$\text{Payment} = [(\text{RVU work} \times \text{BN adjuster} \times \text{GPCI work}) + (\text{RVU PE} \times \text{GPCI PE}) + (\text{RVU malpractice} \times \text{GPCI malpractice})] \times \text{CF}.$$

We appreciate the commenters pointing out to us that the approach used in applying BN has an interactive effect with the DRA imaging OPD cap and has an effect on the total Medicare spending on physicians' services. However, as previously described in this section, we continue to believe the most equitable way to adjust for changes in the work RVUs resulting from the 5-Year Review is to apply a BN adjuster to work RVU.

Comment: Some commenters suggested that applying the BN adjustment to the CF could also be applied to the PE BN application, but only after we have addressed all of the RUC's recommendations related to the methodology and the PE relativity is stable. Ultimately, however, PEs for individual services should be evaluated under a 5-Year Review, at which point a similar application for BN to the CF could be appropriate.

Response: We appreciate and will consider these suggestions as we proceed with the implementation of the revised PE methodology.

4. Review Process

Comment: MedPAC and several specialties, as well as the RUC, commented on the process used for the

5-Year Review, including the methodology and data sources used in the review process. MedPAC stated that it continues to have concerns that overvalued services are ignored and referenced the MedPAC March 2006 Report to Congress. In this report, it recommended the creation of a standing panel to—

- Assist in identifying misvalued services;
- Establish a process for analyzing data to ensure automatic review of new services after a certain period; and
- Periodically review all services.

Several specialty societies expressed support for the existing RUC methodologies for estimating intensity, but also supported the use of objective data from large clinical databases and urged us not to discount the use of alternative data sources.

Response: As indicated earlier in this section, we believe that it will be necessary for the RUC and the specialty societies to join us in further dialog concerning the role of alternative databases. There are still many questions that need to be fully explored including: what should the criteria be for the acceptance of a given database; can databases take the place of surveys; can IWPUT be used to create work RVUs, rather than just to validate them; is there a linear relationship between survey respondents' estimate of work and time; and, can survey respondents accurately estimate IWPUTs. We are also continuing to examine how best to identify misvalued services. As part of this initiative, the RUC has indicated that it has established a subcommittee to suggest approaches to identifying overvalued services and the RUC's Research Subcommittee has initiated discussion regarding existing time data and indicated its willingness to consider issues related to any other concerns that we and the specialty societies wish to address regarding the use of databases in the valuation of physician work. We look forward to working with these groups and will carefully evaluate suggestions and recommendations that are provided.

V. Refinement of Relative Value Units for Calendar Year 2007 and Response to Public Comments on Interim Relative Value Units for 2006

[If you choose to comment on issues in this section, please include the caption "Interim Relative Value Units" at the beginning of your comments.]

A. Summary of Issues Discussed Related to the Adjustment of Relative Value Units

Section V.B. and V.C. of this final rule with comment describes the methodology used to review the comments received on the RVUs for physician work and the process used to establish RVUs for new and revised CPT codes. Changes to codes on the PFS reflected in Addendum B are effective for services furnished beginning January 1, 2007

B. Process for Establishing Work Relative Value Units for the 2006 Physician Fee Schedule

The CY 2006 PFS final rule with comment period (70 FR 70116) contained the work RVUs for Medicare payment for existing procedure codes under the PFS and interim RVUs for new and revised codes beginning January 1, 2006. We considered the RVUs for the interim codes to be subject to public comment under the annual refinement process. In this section, we summarize the refinements to the interim work RVUs published in the CY 2006 PFS final rule with comment period and our establishment of the work RVUs for new and revised codes for the CY 2007 PFS.

C. Work Relative Value Unit Refinements of Interim Relative Value Units

1. Methodology (Includes Table titled "2006 Interim Work Relative Value Units for Codes Reviewed Under the Refinement Panel Process")

Although the RVUs in the CY 2006 PFS final rule with comment period were used to calculate 2006 payment amounts, we considered the RVUs for the new or revised codes to be interim. We accepted comments for a period of 60 days. We received substantive comments for 7 CPT codes with interim work RVUs.

To evaluate these comments, we used a process similar to the process used since 1997. (See the CY 1998 PFS final rule published in the October 31, 1997 **Federal Register** (62 FR 59084) for the discussion of refinement of CPT codes with interim work RVUs.) We convened a multi-specialty panel of physicians to assist us in the review of the comments. The comments that we did not submit to panel review are discussed at the end of this section, as well as those that

were reviewed by the panel, which are contained in Table 14, 2006 Interim Work Relative Value Units for Codes Reviewed Under the Refinement Panel Process. We invited representatives from the organizations from which we received substantive comments to attend a panel for discussion of the code on which they had commented. The panel was moderated by our medical staff, and consisted of the following voting members:

- Clinicians representing the commenting specialty(ies), based on our determination of those specialties which are most identified with the services in question. Although commenting specialties were welcomed to observe the entire refinement process, they were only involved in the discussion of those services for which they were invited to participate.
- Primary care clinicians nominated by the AAFP and the American College of Physicians.
- Four carrier medical directors.
- One or two clinicians who practice in related specialties and have knowledge of the services under review.

The panel discussed the work involved in the procedure under review in comparison to the work associated with other services under the PFS. We assembled a set of reference services and asked the panel members to compare the clinical aspects of the work for the service a commenter believed was incorrectly valued to one or more of the reference services. In compiling the reference set, we attempted to include: (1) Services that are commonly furnished for which work RVUs are not controversial; (2) services that span the entire spectrum of work intensity from the easiest to the most difficult; and (3) at least three services furnished by each of the major specialties so that each specialty would be represented. The intent of the panel process was to capture each participant's independent judgment based on the discussion and his or her clinical experience. Following the discussion for each service, each participant rated the work for that procedure. Ratings were individual and confidential; there was no attempt to achieve consensus among the panel members.

We then analyzed the ratings based on a presumption that the interim RVUs were correct. To overcome that presumption, the inaccuracy of the

interim RVUs had to be apparent to the broad range of physicians participating in each panel.

Ratings of work were analyzed for consistency among the groups represented on each panel. In general terms, we used statistical tests to determine whether there was enough agreement among the groups on the panel and, if so, whether the agreed-upon RVUs were significantly different from the interim RVUs published in Addendum C of the CY 2006 PFS final rule with comment to demonstrate that the interim RVUs should be modified. We did not modify the RVUs unless there was a clear indication for a change. If there was agreement across groups for change, but the groups did not agree on what the new RVUs should be, we eliminated the outlier group, and looked for agreement among the remaining groups as to the basis for new RVUs. We used the same methodology in analyzing the ratings that we first used in the refinement process for the CY 1993 PFS final rule published in the November 25, 1992 **Federal Register** which described the statistical tests in detail (57 FR 55938). Our decision to convene a multi-specialty panel of physicians and to apply the statistical tests described above in this section was based on our need to balance the interests of those who commented on the work RVUs against the redistributive effects that would occur in other specialties.

Table 14 lists those interim codes reviewed under the refinement panel process described in this section. This table includes the following information:

- CPT Code. This is the CPT code for a service.
- Description. This is an abbreviated version of the narrative description of the code.
- 2006 Work RVU. The work RVUs that appeared in the CY 2006 final rule are shown for each reviewed code.
- Requested Work RVU. This column identifies the work RVUs requested by commenters.
- 2007 Work RVU. This column contains the final RVUs for physician work as a result of the multi-specialty panel (**Note:** Values for 10- and 90-day global period codes do not reflect E/M increases. Increases due to E/M changes are reflected in Addenda B.)

TABLE 14.—2006 INTERIM WORK RELATIVE VALUE UNITS FOR CODES REVIEWED UNDER THE REFINEMENT PANEL PROCESS

| CPT code ¹ | Mod | Descriptor | 2006 Interim work RVU | Requested work RVU | 2007 work RVU ² |
|-----------------------|-------|------------------------------------|-----------------------|--------------------|----------------------------|
| 22523 | | PERCUT KYPHOPLASTY, THOR | 8.94 | 8.94 | 8.94 |
| 22524 | | PERCUT KYPHOPLASTY, LUMBAR | 8.54 | 8.54 | 8.54 |
| 22525 | | PERCUT KYPHOPLASTY, ADD-ON | 4.47 | 4.67 | 4.47 |
| 88334 | | INTRAOPT CYTO PATH CONSULT 2 | 0.59 | 0.80 | 0.73 |
| 95251 | | GLUC MONITOR, CONT, PHYS I&R | 0.52 | 0.85 | 0.85 |

¹ All CPT codes and descriptions copyright 2005 AMA. All rights reserved and applicable FARS/DFARS clauses apply.

² Values for 10- and 90-day global period codes do not reflect E/M increases. Increases due to E/M changes are reflected in Addendum B.

2. Interim 2006 Codes

For CPT code 22523, *Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device, one vertebral body, unilateral or bilateral cannulation (e.g., kyphoplasty); thoracic*; CPT code 22524, *Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device, one vertebral body, unilateral or bilateral cannulation (e.g., kyphoplasty); lumbar*; and CPT code 22525, *Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device, one vertebral body, unilateral or bilateral cannulation (e.g., kyphoplasty); each additional thoracic or lumbar vertebral body (List separately in addition to code for primary procedure)*, the RUC recommended 8.94 work RVUs for CPT code 22523, 8.54 work RVUs for CPT code 22524 and 4.47 work RVUs for CPT code 22525, which we accepted.

Comment: Commenters disagreed with the RUC-recommended work values for these services, which we had accepted. The commenters believed that the recommended values were primarily based on a comparison to vertebroplasty services and did not reflect important data that is associated with kyphoplasty procedures. Based on these comments, we referred these codes to the multi-specialty validation panel for review.

Response: As a result of the statistical analysis of the 2006 multi-specialty validation panel ratings, we have assigned 8.94 work RVUs to CPT code 22523, 8.54 work RVUs to CPT code 22524 and 4.47 work RVUs to CPT code 22525.

For CPT code 88334, *Pathology consultation during surgery; cytologic examination (e.g., touch prep, squash prep), each additional site*, the RUC recommended a work RVU of 0.80 for this service based on a comparison of this procedure to CPT code 88332,

Pathology consultation during surgery; each additional tissue block, with frozen section(s). The RUC reviewed the specialty society's survey data and noted that the surveyed CPT code 88334, when compared to the reference CPT code 88332 has higher intensity/complexity measures (20 minutes) and an additional five minutes of intra-service time (15 minutes). Although CPT code 88334 has an additional 5 minutes of intra-service time, we believed that CPT code 88334 is very similar in work to CPT code 88332, and therefore, should be valued the same. We assigned 0.59 work RVUs to CPT code 88334.

Comment: Commenters did not agree with our comparison of CPT code 88334 to 88332, as there is increased work mainly vested on the necessity to examine every field under 10X magnification in CPT code 88334, which is not inherent in the frozen section process represented by CPT code 88332. Based on these comments, we referred this code to the multi-specialty validation panel for review.

Response: As a result of the statistical analysis of the 2006 multi-specialty validation panel ratings, we have assigned 0.73 work RVUs to CPT code 88334.

For CPT code 95251, *Ambulatory continuous glucose monitoring of interstitial tissue fluid via a subcutaneous sensor for up to 72 hours; physician interpretation and report*, the RUC recommended a work RVU of 0.85 for this service. We disagree with the RUC's recommendation because we believe the work for this service is similar to CPT code 93268, *Patient demand single or multiple event recording with presymptom memory loop, 24-hour attended monitoring, per 30-day period of time; includes transmission, physician review and interpretation*, which involves the review of data over a 30-day period. Therefore, we assigned 0.52 work RVUs to 95251.

Comment: Commenters disagreed with our comparison of CPT code 95251 to 93268, as they believe the amount and complexity of the data that needs to be reviewed for CPT code 95251 is considerable. Based on these comments, we referred this code to the multi-specialty validation panel for review.

Response: As a result of the statistical analysis of the 2006 multi-specialty validation panel ratings, we have assigned 0.85 work RVUs to CPT code 95251.

For CPT code 61630, *Balloon angioplasty, intracranial (e.g., atherosclerotic stenosis), percutaneous*; CPT code 61635, *Transcatheter placement of intravascular stent(s), intracranial (e.g., atherosclerotic stenosis), including balloon angioplasty if performed*; CPT code 61640, *Balloon dilatation of intracranial vasospasm, percutaneous, initial vessel*; CPT code 61641, *Balloon dilatation of intracranial vasospasm, percutaneous, initial vessel; each additional vessel in same vascular family*; and CPT code 61642, *Balloon dilatation of intracranial vasospasm, percutaneous, initial vessel; each additional vessel in different vascular family*, the RUC recommended 21.08 work RVUs for CPT code 61630, 23.08 work RVUs for CPT code 61635, 12.32 work RVUs for CPT code 61640, 4.33 work RVUs for CPT code 61641 and 8.66 work RVUs for CPT code 61642. We assigned a status indicator of N for these services because they are noncovered under Medicare due to a National Coverage Decision (NCD).

Comment: Commenters questioned the assignment of the status indicator of N for these services. Commenters also requested that the RVUs be published for these services. (**Note:** In the correction notice that appeared in the February 24, 2006 *Federal Register* (71 FR 9458), RVUs were published for CPT codes 61630 and 61635.)

Response: Based on an NCD regarding the non-coverage of performance of percutaneous transluminal angioplasty to treat obstructive lesions of the

vertebral and cerebral arteries we will maintain the status indicator of N for these services. (**Note:** The RUC-recommended RVUs for these codes will be reflected in Addendum B.)

For CPT codes 98960, *Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; individual patient*; CPT code 98961, *Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 2-4 patients*; and CPT code 98962, *Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 5-8 patients*, a status indicator of N was erroneously assigned for these services in the CY 2006 PFS final rule published in the November 21, 2005 **Federal Register** (70 FR 70282). The status indicator was corrected to B in the correction notice that appeared in the February 24, 2006 **Federal Register** (71 FR 9458).

Comment: Commenters questioned the assigned status indicator of N for these services and urged acceptance of the RVUs, as physician education is a service covered under Medicare Part B and, as one commenter indicated, included and reported in an E/M code. However, the commenter stated that the E/M service that we might believe is appropriate (CPT code 99211) is not sufficient for the amount of time and work described by these services. Other commenters requested that the RUC-assigned RVUs be published, even if they are not used for Medicare payment, as other payers use the PFS to establish payment.

Response: As stated above in this section, the status indicator for these codes was corrected to a status indicator of B in the correction notice that appeared in the February 24, 2006 **Federal Register** (71 FR 9458). We believe these services are bundled into E/M services. Other than the diabetic education services (CPT codes G0108 and G0109) specified by the Congress, we do not cover separate education services outside of demonstrations or the Medicare Health Support program. For diabetic education services, CPT codes G0108 and G0109 should be used to bill for these services. CPT codes 98960-98962 will not be recognized as separate services for diabetic education.

Additional information on the DSMT benefit is available in § 410.140 through § 410.146, and on our Web site at <http://www.cms.hhs.gov/DiabetesSelfManagement/>. We are available to discuss certification requirements with interested providers. As requested by the commenters, we have published the RUC-assigned RVUs for these codes.

For CPT code 99143, *Moderate sedation services (other than those services described by codes 00100-01999) provided by the same physician performing the diagnostic or therapeutic service that the sedation supports, requiring the presence of an independent trained observer to assist in the monitoring of the patient's level of consciousness and physiological status, under 5 years of age; first 30 minutes intra-service time*, CPT code 99144, *Moderate sedation services (other than those services described by codes 00100-01999) provided by the same physician performing the diagnostic or therapeutic service that the sedation supports, requiring the presence of an independent trained observer to assist in the monitoring of the patient's level of consciousness and physiological status, age 5 years or older; first 30 minutes intra-service time*, CPT code 99145, *Moderate sedation services (other than those services described by codes 00100-01999) provided by the same physician performing the diagnostic or therapeutic service that the sedation supports, requiring the presence of an independent trained observer to assist in the monitoring of the patient's level of consciousness and physiological status, age 5 years or older; each additional 15 minutes intra-service time*, CPT code 99148, *Moderate sedation services (other than those services described by codes 00100-01999) provided by a physician other than the health care professional performing the diagnostic or therapeutic service that the sedation supports, under 5 years of age; first 30 minutes intra-service time*, CPT code 99149, *Moderate sedation services (other than those services described by codes 00100-01999) provided by a physician other than the health care professional performing the diagnostic or therapeutic service that the sedation supports, age 5 years or older; first 30 minutes intra-service time*, and CPT code 99150, *Moderate sedation services (other than those services described by codes 00100-01999) provided by a physician other than the health care professional performing the diagnostic or therapeutic service that the sedation supports, each*

additional 15 minutes intra-service time, the CPT Editorial Panel created six new codes to accurately report 2 separate families of moderate sedation. One family describes the provision of moderate sedation services by the physician who is performing the diagnostic or therapeutic service and supervising an independent trained observer while the other family describes moderate sedation services performed by a physician (other than an anesthesiologist) other than the physician performing a diagnostic or therapeutic service. These new codes replace CPT code 99141, *Sedation with or without analgesia (conscious sedation); intravenous, intra-muscular or inhalation*, and CPT code 99142, *Sedation with or without analgesia (conscious sedation); oral, rectal and/or intranasal*, which were bundled under the PFS. The RUC recommended 0.70 work RVUs for CPT code 99143, 0.66 work RVUs for CPT code 99144, 0.23 work RVUs for CPT code 99145, 1.75 work RVUs for CPT code 99148, 1.65 work RVUs for CPT code 99149 and 0.47 work RVUs for CPT code 99150. We questioned whether the RUC-assigned values are appropriate and carrier priced these codes in order to gather information for utilization and proper pricing.

Comment: Commenters requested that the RUC-recommended value for these services be accepted as these values were based on valid surveys and vetted through the RUC process. The RUC also indicated it would be happy to provide any additional information that would address any concerns we might have.

Response: We will maintain carrier pricing of these codes and will continue to monitor utilization.

Comment: Commenters requested that we publish the RVUs for noncovered services for which we receive RUC recommendations.

Response: In response to comments, we have published the RVUs for noncovered services for which we received RUC recommendations (with the exception of carrier-priced codes).

In the CY 2006 PFS final rule with comment period (70 FR 66370), we also responded to the RUC recommendations on the PE inputs for the new and revised CPT codes for 2006. We received the following comments:

Comment: Although we assigned non-facility PE inputs based on information provided by the RUC for CPT code 28890, *Extracorporeal shock wave, high energy, performed by a physician, requiring anesthesia other than local, including ultrasound guidance, involving the plantar fascia*, one commenter expressed concern that the

PE RVUs are not sufficient to cover the actual costs associated with the performance of this procedure in the office setting. The commenter acknowledged that a single payment scheme for the purchase or rental of the equipment associated with its service does not exist and believes the expense to be higher than what was represented in the PE database. The commenter indicated that a "technical fee" is frequently paid when the procedure is performed in the office setting. The costs associated with this "technical fee" can include: The shock wave equipment, a specialized transport truck, a service contract with the manufacturer, salary/benefits for technologist and the transport driver, medical director fee, anesthesia fee, supplies and training material, malpractice and liability insurance, and fuel cost.

Response: Under the PFS, the PE component is based on the resources used to furnish each service and, for CPT code 28890, consists of a total of 133 minutes of clinical labor, disposable supplies, including the necessary items to provide the regional anesthetic block, and equipment over \$500, including the "shock-wave" machine. The PE methodology utilizes the price of equipment (as if the physician owned it) and considers the time used for performing the procedure (36 minutes). Costs of leasing arrangements or per use fees are not recognized in our PE methodology. Therefore, we are maintaining the direct PE inputs for this service (except as discussed previously in this rule) because they are consistent with the typical clinical labor, supplies, and equipment needed to provide this service in the physician's office.

Comment: We received three comments concerning the PE inputs for CPT codes 36475, *Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, radiofrequency, first vein treated*, and 36476, *Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, radiofrequency, second and subsequent veins treated in a single extremity, each through separate access sites (List separately in addition to code for primary location)*. Two commenters supported our proposal to add the tilt table for these services and also suggested the tilt table be added to CPT

codes 36478 and 36479—the entire endovenous family. One commenter requested that 15 minutes of clinical labor time be added to CPT codes 36475 and 36476. However, the commenters disagreed with the addition of 15 minutes of clinical labor time to CPT codes 36475 and 36476, indicating that the description of the physician work for these codes states that, when needed, the physician places the patient in the required position. One of these commenters indicated that this was also to be addressed at the February 2006 RUC meeting.

Response: At the February 2006 RUC meeting, the PERC recommended the addition of the tilt table to the family of CPT codes, 36475, 36476, 36478 and 36479. However, the PERC did not accept the additional clinical labor time. The tilt table was added to the PE database for these CPT codes, in concert with the PERC recommendations for CY 2007, and the PE RVUs in Addendum B reflect these changes.

D. Establishment of Interim Work Relative Value Units for New and Revised Physician's Current Procedural Terminology (CPT) Codes and New Healthcare Common Procedure Coding System Codes (HCPCS) for 2007 (Includes Table titled "American Medical Association Specialty Relative Value Update Committee and Health Care Professionals Advisory Committee Recommendations and CMS's Decisions for New and Revised 2007 CPT Codes")

One aspect of establishing RVUs for 2007 was to assign interim work RVUs for all new and revised CPT codes. As described in our November 25, 1992 notice on the 1993 PFS (57 FR 55951) and in section III.B. of the CY 1997 PFS final rule (61 FR 59505), we established a process, based on recommendations received from the AMA's RUC, for establishing interim work RVUs for new and revised codes.

This year we received work RVU recommendations for 230 new and revised CPT codes from the RUC. Of the 230 codes, 56 were modified by editorial changes, 57 were renumbered and the work RVUs associated with these services were assigned to the new codes (not included in Table 15), and 1 code was renumbered and assigned a new work RVU (included in Table 15). Our staff and medical officers reviewed the RUC recommendations by comparing them to our reference set or to other comparable services for which

work RVUs had previously been established. We also considered the relationships among the new and revised codes for which we received RUC recommendations and agreed with the majority of the relative relationships reflected in the RUC values. In some instances, although we agreed with the relationships, we nonetheless revised the work RVUs to achieve work neutrality within families of codes. That is, the work RVUs were adjusted so that the sum of the new or revised work RVUs (weighted by projected frequency of use) for a family will be the same as the sum of the current work RVUs (weighted by projected frequency of use) for the family of codes. We reviewed all the RUC recommendations and accepted approximately 98 percent of the RUC-recommended values.

We received one recommendation from the Health Care Professional Advisory Committee (HCPAC), which we accepted.

Table 15, titled "AMA RUC and HCPAC Recommendations and CMS Decisions for New and Revised 2007 CPT Codes," lists the new or revised CPT codes, and their associated work RVUs, that will be interim in 2007. This table includes the following information:

- A "#" identifies a new code for 2007.
- CPT code. This is the CPT code for a service.
- Modifier. A "26" in this column indicates that the work RVUs are for the PC of the code.
- Description. This is an abbreviated version of the narrative description of the code.
- RUC recommendations. This column identifies the work RVUs recommended by the RUC.
- HCPAC recommendations. This column identifies the work RVUs recommended by the HCPAC.
- CMS decision. This column indicates whether we agreed or we disagreed with the RUC recommendation. Codes for which we did not accept the RUC recommendation are discussed in greater detail following this table.
- 2007 Work RVUs. This column establishes the interim 2007 work RVUs for physician work. (**Note:** Values for 10- and 90-day global period codes reflect E/M increases from the 5-Year Review.)

BILLING CODE 4120-01-P

TABLE 15: AMA RUC and HCPAC Recommendations and CMS' Decisions for New and Revised 2007 CPT Codes

New CPT code.

* All CPT codes copyright 2006 AMA.

** Denotes restricted coverage of code.

Table 16, which is titled “AMA RUC Anesthesia Recommendations and CMS Decisions for New and Revised 2007 CPT Codes,” lists the new or revised CPT codes for anesthesia and their base units that will be interim in 2007. This table includes the following information:

- CPT code. This is the CPT code for a service.
- Description. This is an abbreviated version of the narrative description of the code.
- RUC recommendations. This column identifies the base units recommended by the RUC.
- CMS decision. This column indicates whether we agreed or we

disagreed with the RUC recommendation. Codes for which we did not accept the RUC recommendation are discussed in greater detail following this table.

- 2007 Base Units. This column establishes the 2007 base units for these services.

TABLE 16.—AMA RUC ANESTHESIA RECOMMENDATIONS AND CMS DECISIONS FOR NEW AND REVISED CPT CODES

| *CPT code | Description | RUC recommendation | CMS decision | 2007 base units |
|--------------|------------------------------------|--------------------|--------------|-----------------|
| #00625 | ANES SPINE TRANTHOR W/O VENT | 13.00 | Agree | 13.00 |
| #00626 | ANES, SPINE TRANSTHOR W/VENT | 13.00 | Agree | 15.00 |

* All CPT codes copyright 2006 AMA.
New CPT code.

E. Discussion of Codes for Which There Were no RUC Recommendations or for Which the RUC Recommendations Were Not Accepted

The following is a summary of our rationale for not accepting particular RUC work RVUs. It is arranged by type of service in CPT order. This summary refers only to work RVUs.

For CPT code 22857, *Total disc arthroplasty (artificial disc), anterior approach, including discectomy to prepare interspace (other than for decompression), lumbar, single interspace*; CPT code 22862, *Revision including replacement of total disc arthroplasty (artificial disc) anterior approach, lumbar, single interspace (includes approach)*; and CPT code 22865, *Removal of total disc arthroplasty (artificial disc), anterior approach, lumbar, single interspace*, the RUC recommended 25.07 work RVUs for CPT code 22857, 30.57 work RVUs for CPT code 22862 and 29.57 work RVUs for CPT code 22865. We are assigning a status indicator of R (Restricted) to these services due to an NCD for non-coverage of Lumbar Artificial Disc Replacement with the Charite™ lumbar artificial disc for patients over the age of 60.

For CPT code 94005, *Home ventilator management care plan oversight of a patient (patient not present) in home, domiciliary or rest home (e.g., assisted living) requiring review of status, review of laboratories and other studies and revision of orders and respiratory care*

plan (as appropriate), within a calendar month, 30 minutes or more, the RUC-recommended 1.50 work RVUs for this code. We are assigning a status indicator of B (Bundled) to this service because: (1) The patient is not present when this service is rendered and (2) we believe this service is captured in E/M services. (**Note:** The RUC-recommended RVUs for this code will be reflected in Addendum B.)

For CPT code 96040, *Medical genetics and genetic counseling services, each 30 minutes face-to-face with patient/family*, this procedure does not have any physician work and to the extent that these services are covered, we consider them bundled into E/M services and have assigned as status indicator of B. (**Note:** The RUC-recommended RVUs for this code will be reflected in Addendum B.)

For CPT code 96904, *Whole body integumentary photography, for monitoring of high risk patients with dysplastic nevus syndrome or a history of dysplastic nevi, or patients with a personal or familial history of melanoma*, this procedure does not have any physician work. We have assigned a status indicator of R (Restricted) to this service, and will only recognize this code when services are performed on patients with melanoma and not when services are performed for screening based on family history (because we did not cover screenings). We will implement edits for situations involving patients with melanoma and/or dysplastic nevus syndrome.

For CPT code 99363, *Anticoagulant management for an outpatient taking warfarin, physician review and interpretation of International Normalized Ratio (INR) testing, patient instructions, dosage adjustment (as needed), and ordering of additional tests; initial 90 days of therapy (must include a minimum of 8 INR measurements)*; and CPT code 99364, *Anticoagulant management for a patient taking warfarin, physician review and interpretation of International Normalized Ratio (INR) testing, patient instructions, dosage adjustment (as needed), and ordering of additional tests; each subsequent 90 days of therapy (must include a minimum of three INR measurements)*, the RUC recommended 1.65 work RVUs for CPT code 99363 and 0.63 work RVUs for CPT code 99364. We believe these services are bundled into E/M services and have assigned a status indicator of B to these codes. (**Note:** The RUC-recommended RVUs for these codes will be reflected in Addendum B.)

F. Additional Pricing Issue

We are carrier-pricing the global and TC for the codes listed in Table 17. The TC is not paid in the facility setting under the PFS and the RUC did not forward recommendations in the non-facility setting because these services are performed infrequently, if at all in the non-facility setting. Work RVUs will continue to be used to establish payment for the PC.

TABLE 17.—CARRIER PRICED CODES

| CPT code * | Mod | Short descriptor | Status indicator |
|-------------|----------|-------------------------------|------------------|
| 70170 | | X-RAY EXAM OF TEAR DUCT | Carrier Priced. |
| 70170 | TC | X-RAY EXAM OF TEAR DUCT | Carrier Priced. |

G. Establishment of Interim PE RVUs for New and Revised Physician's Current Procedural Terminology (CPT) Codes and New Healthcare Common Procedure Coding System (HCPCS) Codes for 2007

We have developed a process for establishing interim PE RVUs for new and revised codes that is similar to that used for work RVUs. Under this process, the RUC recommends the PE direct inputs (the staff time, supplies and equipment) associated with each new code. We then review the recommendations in a manner similar to our evaluation of the recommended work RVUs. The RUC recommendations on the PE inputs for the new and revised 2007 codes were submitted to us as interim recommendations.

We have accepted, in the interim, the PE recommendations submitted by the RUC for the codes listed in the table titled "AMA RUC and HCPAC RVU Recommendations and CMS Decisions" for New and Revised 2007 CPT Codes" except as noted below in this section.

For CPT code 15731, *Forehead flap with preservation of vascular pedicle (e.g., axial pattern flap, paramedian forehead flap)*; and CPT code 15830, *Excision, excessive skin and subcutaneous tissue (includes lipectomy); abdomen, infraumbilical panniculectomy*, we assigned 5 minutes for each post-operative visit for the digital camera used in the post-operative visits, rather than the entire clinical labor time for each post-operative period.

For CPT code 22527, *Percutaneous intradiscal electrothermal annuloplasty, unilateral or bilateral including fluoroscopic guidance; one or more additional levels (List separately in addition to code for primary procedure)*, we deleted the ambulatory blood pressure monitor because it duplicates the function of the 3-channel ECG machine.

For CPT code 55876, *Placement of interstitial device(s) for radiation guidance (e.g., fiducial markers, dosimeter), prostate (via needle, any approach), single or multiple*, we deleted one package of gold markers (contains 3 markers each) because we believe that the typical number of gold

markers used in this procedure is 2 or 3 and we entered an interim price of \$119 per 3-pack. We are asking the specialty to provide us with: (a) Verification of the typical number of gold markers used in this procedure; and (b) documentation as to the typical price of these markers.

For CPT code 76776, *Ultrasound, transplanted kidney, real time and duplex Doppler with image documentation*, we deleted the color laser printer because it is contained in the ultrasound room that is also used for the procedure.

For CPT code 77371, *Radiation treatment delivery, stereotactic radiosurgery (SRS) (complete course of treatment of cerebral lesion[s] consisting of 1 session); multi-source Cobalt 60 based*, we designated, as an interim measure, the \$15,000 radiation source with a specific 1-month life (that was included in the list of direct-expense equipment items for this service), as an indirect expense because we believe it does not meet the criteria for inclusion as a direct expense. To the extent that the specialty disagrees with our decision to assign the radiation source cost as an indirect expense, the interim nature of this designation gives the specialty the opportunity to provide us with documentation to support their belief that the radiation source should be considered a direct expense.

For CPT code 94644, *Continuous inhalation with aerosol medication for acute airway obstruction; first hour*, we did not include the peak flow meter as a supply item for this service because this item is reusable and was previously removed from the PE database at the time the supplies were re-priced.

For CPT code 96040, *Medical genetics and genetics counseling services, each 30 minutes face-to-face with patient/family*, the payment rate, at \$0.567, for "genetic counselor" was created from a non-BLS source that listed a 2003 national annual average salary of \$53,377. This salary was inflated to include fringe benefits (\$53,377 multiplied by 1.366), then deflated by the MEI to the year 2002 (the same year as the other labor costs in the PE database), then divided by 2080 (the number of hours in a work year), and

finally divided by 60 (the number minutes in an hour). We were not able to include a price for the pedigree software equipment as it was not provided with the PE inputs.

For CPT code 96904, *Whole body integumentary photography, for monitoring of high risk patients with dysplastic nevus syndrome or a history of dysplastic nevi, or patients with a personal or familial history of melanoma*, the payment rate, at \$0.383, for "medical photographers", was created from a non-BLS source that gave a 2003 national annual average salary of \$36,000. This salary was inflated by a factor of 1.366 to include fringe benefits, then deflated by the MEI to 2002 (the labor base year), then divided by 2080 (the number of annual work hours), and lastly, divided by number 60 (the number of minutes in an hour). We are asking the specialty to submit acceptable documentation for all of the cameras and related equipment that are listed for this service. The prices submitted by the specialty have been entered on an interim basis for CY 2007.

For CPT code 58240, *Pelvic exenteration for gynecologic malignancy, with total abdominal hysterectomy or cervicectomy, with or without removal of tube(s), with or without removal of ovary(s), with removal of bladder and ureteral transplantations, and/or abdominoperineal resection of rectum and colon and colostomy, or any combination thereof*, the supplies for this service were correctly entered as a quantity of 6—the number of post-operative visits (POVs)—rather than 4, as listed on the PE spreadsheet in the RUC recommendations. The correct labor and equipment times were entered as reflected by the level and number of POVs.

For CPT code 92025, *Computerized corneal topography, unilateral or bilateral with interpretation and report*, the specific topography equipment (at \$44,000) requested for this procedure was not included because we do not believe it is the typical unit used in physician offices. Instead, we used the existing topography unit (at \$13,495) and added a printer and computer with

monitor to the PE database for this service.

VI. Physician Self-Referral Prohibition: Annual Update to the List of CPT/HCPCS Codes

A. General

Section 1877 of the Act prohibits a physician from referring a Medicare beneficiary for certain designated health services (DHS) to a health care entity with which the physician (or a member of the physician's immediate family) has a financial relationship, unless an exception applies. Section 1877 of the Act also prohibits the DHS entity from submitting claims to Medicare or billing the beneficiary or any other entity for Medicare DHS that are furnished as a result of a prohibited referral.

As specified in our regulations at § 411.351, the following services are DHS:

- Clinical laboratory services.
- Physical therapy, occupational therapy, and speech-language pathology services.
- Radiology and certain other imaging services.
- Radiation therapy services and supplies.
- Durable medical equipment and supplies.
- Parenteral and enteral nutrients, equipment, and supplies.
- Prosthetics, orthotics, and prosthetic devices and supplies.
- Home health services.
- Outpatient prescription drugs.
- Inpatient and outpatient hospital services.

B. Nuclear Medicine

In the CY 2006 PFS proposed rule (70 FR 45764), we sought public comments on a proposal to amend the definitions of "radiation and certain other imaging services" and "radiation therapy services and supplies" at § 411.351 to include nuclear medicine services and supplies. In the CY 2006 PFS final rule with comment (70 FR 70116), we finalized the proposal and provided a delayed effective date of January 1, 2007 for the new provisions. We included a list of the nuclear medicine CPT and HCPCS codes in Table 31 and Addendum H of the CY 2006 PFS final rule with comment (70 FR 70290 through 70295 and 70472 through 70476).

In response to the CY 2006 PFS final rule with comment period, we received public comments from three organizations regarding the nuclear medicine issue. Because we had previously provided an opportunity for comment on the proposal in accordance

with the provisions of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*), we are not required to respond further. Nevertheless, we are responding to the only comment that provided significant new information. Specifically, we are responding to the following comment from the AMA.

Comment: The AMA stated that it does not recognize diagnostic and therapeutic nuclear medicine services as a subspecialty of radiology, contrary to our statement in the CY 2006 PFS final rule (70 FR 70285). In that rule and in the proposed rule, we had explained that radiology and other imaging services should include diagnostic nuclear medicine procedures, because, among a number of other reasons, the AMA recognizes nuclear medicine as a subspecialty of radiology. We also noted in the CY 2006 PFS final rule (70 FR 70285) that the AMA had not objected to this statement in the proposed rule. In its comment, the AMA has now stated that its CPT coding categories are not intended to be a determination of subspecialties. The AMA added that nuclear medicine should be recognized as its own specialty, separate from radiology, because it has its own board certification and residency program.

Response: We accept the explanation by the AMA that it does not recognize diagnostic nuclear medicine services as a subspecialty of radiology. However, we continue to believe that we should include all forms of radiological imaging in the DHS category "radiology and other imaging services." As we noted in both the CY 2006 PFS proposed (70 FR 45855) and final rules (70 FR 70285), although there may be differences of opinion as to whether diagnostic nuclear medicine is a subset of radiology, it is an imaging service covered by 1861(s)(3) of the Act, and of the type for which the Congress intended to prohibit referrals.

C. Annual Update to the Code List

1. Background

In § 411.351, we specify that the entire scope of four DHS categories is defined in a list of CPT/HCPCS codes (the Code List), which is updated annually to account for changes in the most recent CPT and HCPCS publications. The DHS categories defined and updated in this manner are:

- Clinical laboratory services.
- Physical therapy, occupational therapy, and speech-language pathology services.
- Radiology and certain other imaging services.
- Radiation therapy services and supplies.

The Code List also identifies those items and services that may qualify for either of the following two exceptions to the physician self-referral prohibition:

- EPO and other dialysis-related drugs furnished in or by an ESRD facility (§ 411.355(g)).
- Preventive screening tests, immunizations or vaccines (§ 411.355(h)).

The Code List was last updated in the CY 2006 PFS final rule with comment period (70 FR 70116).

2. Response to Comments

We did not receive any comments relating to the Code List that became effective January 1, 2006.

3. Revisions Effective for 2007

The updated, comprehensive Code List effective January 1, 2007 appears as Addendum J in this final rule with comment and is available on our Web site at <http://www.cms.hhs.gov/PhysicianSelfReferral>. Addendum J reflects the addition of CPT code 86960 to the list of CPT codes in the 80000 series that are excluded from the definition of "clinical laboratory services." This code was a new CPT code last year and should have been added to the list of excluded 80000 series codes at that time. In addition, Addendum J reflects the changes indicated in Tables 18 and 19.

Tables 18 and 19 identify the additions and deletions, respectively, to the comprehensive Code List that was published in Addendum H of the CY 2006 PFS final rule (70 FR 70472 through 70476). Tables 18 and 19 also identify the additions and deletions to the lists of codes used to identify the items and services that may qualify for the exceptions in § 411.355(g) (regarding EPO and other dialysis-related outpatient prescription drugs furnished in or by an ESRD facility) and in § 411.355(h) (regarding preventive screening tests, immunizations and vaccines).

The additions specified in Table 18 generally reflect new CPT and HCPCS codes that become effective January 1, 2007, or that became effective since our last update. Although we included nuclear medicine codes in Addendum H of the CY 2006 PFS final rule, we are including them as additions in Table 18 since they will become effective January 1, 2007. In addition, Table 18 also reflects our decision to move several nuclear medicine procedures that had been added last year to the DHS category of "radiology and certain other imaging services" (but not effective until January 1, 2007) to the category of "clinical laboratory services." We

determined that the following CPT codes do not involve imaging services and are categorized more appropriately as clinical laboratory services: 78110, 78111, 78120, 78121, 78122, 78130, 78191, 78270, 78271, 78272 and 78725. We are also adding CPT code 86960 to the excluded portion of the "clinical laboratory services" category.

Additionally, we are adding several HCPCS codes for radiopharmaceuticals and high osmolar contrast materials to the category of "radiology of and certain other imaging services." We inadvertently omitted these codes in Addendum H of the CY 2006 PFS final rule with comment.

Table 19 reflects the deletions necessary to conform the Code List to the most recent publications of CPT and HCPCS. It also reflects our decision to delete certain nuclear medicine services (CPT codes 78110, 78111, 78120, 78121, 78122, 78130, 78191, 78270, 78271, 78272 and 78725) from the category of "radiology and certain other imaging services" and to move them to the more appropriate category of "clinical laboratory services."

We will consider comments regarding the codes listed in Tables 18 and 19 and the addition on Addendum J of CPT code 86960 to the list of CPT codes in the 80000 series that are excluded from the definition of "clinical laboratory services." Comments will be considered if we receive them by the date specified in the DATES section of this final rule with comment. We will not consider any comment that advocates a substantive change to any of the DHS defined in § 411.351.

TABLE 18.—ADDITIONS TO THE PHYSICIAN SELF-REFERRAL LIST OF CPT 1/HCPCS CODES

| CLINICAL LABORATORY SERVICES | |
|--|--------------------------------|
| 78110 | Plasma volume, single. |
| 78111 | Plasma volume, multiple. |
| 78120 | Red cell mass, single. |
| 78121 | Red cell mass, multiple. |
| 78122 | Blood volume. |
| 78130 | Red cell survival study. |
| 78191 | Pylatelet survival. |
| 78270 | Vit B-12 absorption exam. |
| 78271 | Vit B-12 absorp exam, int fac. |
| 78272 | Vit B-12 absorp, combined. |
| 78725 | Kidney function study. |
| G0394 | Blood occult test colorectal. |
| PHYSICAL THERAPY, OCCUPATIONAL THERAPY, AND SPEECH-LANGUAGE PATHOLOGY SERVICES | |
| [No additions]. | |
| RADIOLOGY AND CERTAIN OTHER IMAGING SERVICES | |
| 0144T | Ct heart w/ dye; qual calc. |
| 0145T | Ct heart w/w/ dye funct. |
| 0146T | Ccta w/w/ dye. |
| 0147T | Ccta w/w/ quan calcium. |
| 0148T | Ccta w/w/ strxr. |
| 0149T | Ccta w/w/ strxr quan calc. |

TABLE 18.—ADDITIONS TO THE PHYSICIAN SELF-REFERRAL LIST OF CPT 1/HCPCS CODES—Continued

| | |
|-------|-------------------------------|
| 0150T | Ccta w/w/ disease strxr. |
| 0151T | Ct heart funct add-on. |
| 0159T | Cad breast mri. |
| 0174T | Cad crx with interp. |
| 0175T | Cad crx remote. |
| 70554 | Fmri brain by tech. |
| 70555 | Fmri brain by phys/psych. |
| 76776 | Us exam k transpl w/Doppler. |
| 77014 | Ct scan for therapy guide. |
| 77051 | Computer dx mammogram add-on. |
| 77052 | Comp screen mammogram add-on. |
| 77055 | Mammogram, one breast. |
| 77056 | Mammogram, both breasts. |
| 77057 | Mammogram, screening. |
| 77058 | Mri, one breast. |
| 77059 | Mri, both breasts. |
| 77071 | X-ray stress view. |
| 77072 | X-rays for bone age. |
| 77073 | X-rays, bone length studies. |
| 77074 | X-rays, bone survey, limited. |
| 77075 | X-rays, bone survey complete. |
| 77076 | X-rays, bone survey, infant. |
| 77077 | Joint survey, single view. |
| 77078 | Ct bone density, axial. |
| 77079 | Ct bone density, peripheral. |
| 77080 | Dxa bone density, axial. |
| 77081 | Dxa bone density/peripheral. |
| 77082 | Dxa bone density, vert fx. |
| 77083 | Radiographic absorptiometry. |
| 77084 | Magnetic image, bone marrow. |
| 78000 | Thyroid, single uptake. |
| 78001 | Thyroid, multiple uptakes. |
| 78003 | Thyroid suppress/stimul. |
| 78006 | Thyroid imaging with uptake. |
| 78007 | Thyroid image, mult uptakes. |
| 78010 | Thyroid imaging. |
| 78011 | Thyroid imaging with flow. |
| 78015 | Thyroid met imaging. |
| 78016 | Thyroid met imaging/studies. |
| 78018 | Thyroid met imaging, body. |
| 78020 | Thyroid met uptake. |
| 78070 | Parathyroid nuclear imaging. |
| 78075 | Adrenal nuclear imaging. |
| 78099 | Endocrine nuclear procedure. |
| 78102 | Bone marrow imaging, ltd. |
| 78103 | Bone marrow imaging, mult. |
| 78104 | Bone marrow imaging, body. |
| 78135 | Red cell survival kinetics. |
| 78140 | Red cell sequestration. |
| 78185 | Spleen imaging. |
| 78190 | Platelet survival, kinetics. |
| 78195 | Lymph system imaging. |
| 78199 | Blood/lymph nuclear exam. |
| 78201 | Liver imaging. |
| 78202 | Liver imaging with flow. |
| 78205 | Liver imaging (3D). |
| 78206 | Liver image (3D) with flow. |
| 78215 | Liver and spleen imaging. |
| 78216 | Liver & spleen image/flow. |
| 78220 | Liver function study. |
| 78223 | Hepatobiliary imaging. |
| 78230 | Salivary gland imaging. |
| 78231 | Serial salivary imaging. |
| 78232 | Salivary gland function exam. |
| 78258 | Esophageal motility study. |
| 78261 | Gastric mucosa imaging. |
| 78262 | Gastroesophageal reflux exam. |
| 78264 | Gastric emptying study. |
| 78278 | Acute GI blood loss imaging. |
| 78282 | GI protein loss exam. |
| 78290 | Meckel's divert exam. |
| 78291 | Leveen/shunt patency exam. |
| 78299 | GI nuclear procedure. |
| 78300 | Bone imaging, limited area. |
| 78305 | Bone imaging, multiple areas. |
| 78306 | Bone imaging, whole body. |
| 78315 | Bone imaging, 3 phase. |
| 78320 | Bone imaging (3D). |
| 78399 | Musculoskeletal nuclear exam. |

TABLE 18.—ADDITIONS TO THE PHYSICIAN SELF-REFERRAL LIST OF CPT 1/HCPCS CODES—Continued

| | |
|-------|--------------------------------|
| 78414 | Non-imaging heart function. |
| 78428 | Cardiac shunt imaging. |
| 78445 | Vascular flow imaging. |
| 78456 | Acute venous thrombus image. |
| 78457 | Venous thrombosis imaging. |
| 78458 | Ven thrombosis images, bilat. |
| 78459 | Heart muscle imaging (PET). |
| 78460 | Heart muscle blood, single. |
| 78461 | Heart muscle blood, multiple. |
| 78464 | Heart image (3d), single. |
| 78465 | Heart image (3d), multiple. |
| 78466 | Heart infarct image. |
| 78468 | Heart infarct image (ef). |
| 78469 | Heart infarct image (3D). |
| 78472 | Gated heart, planar, single. |
| 78473 | Gated heart, multiple. |
| 78478 | Heart wall motion add-on. |
| 78480 | Heart function add-on. |
| 78481 | Heart first pass, single. |
| 78483 | Heart first pass, multiple. |

VII. Physician Fee Schedule Update for CY 2007

A. Physician Fee Schedule Update

The PFS update is determined using a formula specified by statute. Under section 1848(d)(4) of the Act, the update is equal to the product of 1 plus the percentage increase in the MEI (divided by 100) and 1 plus the UAF. For CY 2007, the MEI is equal to 2.1 percent

(1.021). The UAF is -7.0 percent (0.930). The product of the MEI (1.021) and the UAF (0.930) equals the CY 2007 update of -5.0 percent (0.94953).

Our calculations of these figures are explained in this section.

B. The Percentage Change in the Medicare Economic Index (MEI)

The MEI measures the weighted-average annual price change for various inputs needed to produce physicians' services. The MEI is a fixed-weight input price index, with an adjustment for the change in economy-wide multifactor productivity. This index, which has CY 2000 base year weights, is comprised of two broad categories: (1) Physician's own time; and (2) physician's PE.

The physician's own time component represents the net income portion of business receipts and primarily reflects the input of the physician's own time into the production of physicians' services in physicians' offices. This category consists of two subcomponents: (1) Wages and salaries; and (2) fringe benefits.

The physician's PE category represents nonphysician inputs used in the production of services in physicians' offices. This category consists of wages and salaries and fringe benefits for nonphysician staff and other nonlabor inputs. The physician's PE component also includes the following categories of nonlabor inputs: Office expense; medical materials and supplies; professional liability insurance; medical equipment; prescription drugs; and

other expenses. The components are adjusted to reflect productivity growth in physicians' offices by the 10-year moving average of productivity in the private nonfarm business sector. Table 20 presents a listing of the MEI cost categories with associated weights and percent changes for price proxies for the 2007 update. For CY 2007, the increase in the MEI is 2.1 percent, which includes a 1.3 percent productivity offset based on the 10-year moving average of multifactor productivity. This is the result of a 3.3 percent increase in physician's own time and a 3.6 percent increase in physician's PE. Within the physician's PE, the largest increase occurred in professional liability insurance, which increased 6.9 percent, and prescription drugs, which increased 7.7 percent.

TABLE 20.—INCREASE IN THE MEDICARE ECONOMIC INDEX UPDATE FOR CY 2007¹

| Cost categories and price measures | CY 2000 weights ² | CY 2007 percent changes |
|---|------------------------------|-------------------------|
| Medicare Economic Index Total, productivity adjusted ³ | N/A | 2.1 |
| Productivity: 10-year moving average of multifactor productivity, private nonfarm business sector ^{3, 4} | N/A | 1.3 |
| Medicare Economic Index Total, without productivity adjustment ⁴ | 100.000 | 3.5 |
| 1. Physician's Own Time ⁵ | 52.466 | 3.3 |
| a. Wages and Salaries: Average Hourly Earnings, private nonfarm | 42.730 | 3.3 |
| Fringe Benefits: Employment Cost Index, benefits, private nonfarm | 9.735 | 3.5 |
| 2. Physician's Practice Expense ⁵ | 47.534 | 3.6 |
| a. Nonphysician Employee Compensation | 18.653 | 2.9 |
| (1) Wages and Salaries: Employment Cost Index, wages and salaries, weighted by occupation | 13.808 | 2.6 |
| (2) Fringe Benefits: Employment Cost Index, fringe benefits, white collar | 4.845 | 4.0 |
| b. Office Expense: Consumer Price Index for Urban Areas (CPI-U), housing | 12.209 | 3.7 |
| c. Drugs and Medical Materials and Supplies | 4.319 | 4.8 |
| (1) Medical Materials and Supplies: Producer Price Index (PPI), surgical appliances and supplies/CPI-U, medical equipment and supplies (equally weighted) | 2.011 | 1.1 |
| (2) Pharmaceuticals: Producer Price Index (PPI ethical prescription drugs) | 2.308 | 7.7 |
| d. Professional Liability Insurance: Professional liability insurance Premiums ⁶ | 3.865 | 6.9 |
| e. Medical Equipment: PPI, medical instruments and equipment | 2.055 | -0.1 |
| f. Other Expenses | 6.433 | 2.2 |

1. The rates of historical change are estimated for the 12-month period ending June 30, 2006, which is the period used for computing the CY 2007 update. The price proxy values are based upon the latest available Bureau of Labor Statistics data as of August 31, 2006.

2. The weights shown for the MEI components are the 2000 base-year weights, which may not sum to subtotals or totals because of rounding. The MEI is a fixed-weight, Laspeyres-type input price index whose category weights indicate the distribution of expenditures among the inputs to physicians' services for CY 2000. To determine the MEI level for a given year, the price proxy level for each component is multiplied by its 2000 weight. The sum of these products (weights multiplied by the price index levels) over all cost categories yields the composite MEI level for a given year. The annual percent change in the MEI levels is an estimate of price change over time for a fixed market basket of inputs to physicians' services.

3. These numbers may not sum due to rounding and the multiplicative nature of their relationship.

4. On March 23, 2006, Bureau of Labor Statistics introduced a new Multi Factor Productivity (MFP) series based on the 1997 NAICS classification system to replace its SIC based series published until 2005 (the last historical value was for 2002). The new series differs historically from the old MFP series and adds two new historical values through 2004. Therefore, we used the most recently available information (thru CY 2004) to develop the productivity adjustment for the CY 2007 update.

5. The measures of productivity, average hourly earnings, Employment Cost Indexes, as well as the various Producer and CPIs can be found on the BLS Web site at <http://stats.bls.gov>.

6. Derived from data collected from several major insurers (the latest available historical percent change data are for the period ending second quarter of 2006).

Comment: Several commenters believe we are in violation of the Administrative Procedures Act (APA) for not proposing and soliciting comments on the incorporation of new Bureau of Labor Statistics Multifactor Productivity data in the MEI.

Response: We disagree with the commenters' claim that we are in

violation of the APA. The APA requires us to propose and solicit comments on substantive changes to our payment methodology. The PFS update published in this year's proposed rule is based on the same MEI methodology proposed and adopted in the CY 2003 and CY 2004 PFS proposed and final

rules. The CY 2003 final rule adopted the use of BLS' private nonfarm business multifactor productivity (MFP) as the official data used to adjust the MEI for productivity. Specifically, consistent with the proposal made in the CY 2003 proposed rule (67 FR 43860), the CY 2003 final rule (67 FR

80023) states "Thus, the productivity adjustment will be based on the latest available actual historical economy-wide multifactor productivity data, as measured by the BLS." For the CY 2007 proposed rule, we followed this methodology and incorporated the latest available BLS private nonfarm business multifactor productivity.

Comment: Several commenters believe the multifactor productivity estimate of 1.3 percent is high in light of the new Medicare initiatives such as the new Welcome to Medicare benefits, the new comprehensive Part D benefit, and compliance related to the Physician Voluntary Reporting Program (PVRP), which impose numerous time and paperwork burdens on physicians.

Response: Our proposed and adopted methodology for calculating the MEI utilizes BLS's private nonfarm business MFP as the proxy for productivity changes. We recognize that productivity in physicians' offices for a given year may not equate to that of the economy-wide measure. For that reason, as well as to remove the effect of normal business cycles, we employ a 10-year moving average as the official measure. Also, CMS, in conjunction with the Assistant Secretary for Planning and Evaluation, is in the process of conducting a study on productivity in the physicians' offices. This work is being done to determine if the presently-used economy-wide measure for multi-factor productivity provides a reasonable target for physicians. We will analyze the results from this study and carefully evaluate its findings and their applicability to future MEI updates.

Comment: Several commenters believe it is not warranted that we assume and calculate increased productivity levels for physicians while the payment update process for other providers does not include assumed or automatic productivity adjustments.

Response: Since its inception in the mid-1970's, the MEI has included a productivity adjustment. The payment system for physicians' services requires that factors affecting the payment update be reflected in the update formula itself. The statutory provision relating to the MEI contemplates that the Secretary would not increase payments except to the extent that the extent that the Secretary finds, on the basis of appropriate economic index data, that such higher level is justified by year-to-year economic changes. We have long maintained that an MEI framework that focuses solely on the inputs portion of the equation effectively ignores the efficiencies that are employed to produce the outputs associated with the provision of care. It

is necessary to account for these efficiencies to accurately reflect the net inflationary pressures encountered by physicians.

The intent of the MEI is to represent industry-wide output prices for physicians' services. We note that this index structure is similar to the CPI, which is an economy-wide output price index. The CPI implicitly incorporates a productivity adjustment. Except when the statute directs otherwise, the Medicare update for a number of types of services (for example, clinical diagnostic laboratory services, durable medical equipment, prosthetics and supplies) is based the CPI with its implicit productivity adjustment.

With respect to updates for other types of Medicare providers, such as institutional providers, we note that the underlying payment methodology is completely different from the payment system for physicians' services. Under the Medicare PFS, payments are made for unbundled services such as lab tests, follow-up visits, and x-rays. For institutions compensated by a PPS, a single payment is made for a bundle of services linked to treating a particular category of case (for instance, the services within one diagnosis-related group under the IPPS). Adjustments to payments associated with productivity and other payment framework-related considerations, when paying for bundled services, are addressed in other portions of the update process, such as via MedPAC recommendations and/or in the update itself when approved by the Congress.

Comment: Several commenters requested that we examine and address the broader problem that the MEI only measures changes in specific types of practice costs that existed in 1973. They further stated that inputs to the MEI are vastly different now than when the MEI was first developed in the early 1970s and that an array of government-imposed regulatory requirements now exist that did not in 1973. They claim that physician practice costs for these types of inputs are not currently taken into account for purposes of measuring the MEI, and therefore, the MEI undervalues actual medical cost increases. One commenter added that employee wages used in the MEI formula do not accurately reflect the skill mix of the industry and the MEI needs to be updated to account for the highly skilled staff necessary to deliver today's level of medical care service.

Response: We disagree with the commenter's claim that the MEI only measures changes in specific types of practice costs that existed in 1973. The current MEI is based on costs reported

by physicians for 2000, which would reflect changes in the distributions of the cost weights associated with the government-imposed regulatory requirements that applied in 2000. The 2000-based cost weights are derived from the 2003 AMA Physician Socioeconomic Characteristics publication (2003 Patient Care Physician Survey data), which measures physicians' earnings and overall PEs for 2000. This is the latest available AMA data on physician expenses. We are currently researching alternative data sources for rebasing the MEI.

Regarding skill mix, the current MEI uses the occupation mix for nonphysician wages from the 2000 Current Population Survey published by BLS. This reflected the latest occupation mix at the time of our most recent rebasing. We recognize that skill mix can change, thus, we will continue to use the most recently published data available to us for all future rebasings to ensure the MEI reflects the occupational blend at that time.

Comment: Many commenters objected to the 0.5 percentage point reduction of the 2007 PFS update relative to the forecasted update in the President's Budget and urged us to delay or withdraw any changes in the MEI until the proposed changes and the solicitation of public comments appear in a published **Federal Register**.

Response: As stated previously, we did not make any methodological changes to the calculation of the MEI, and therefore, it is not necessary to delay use of the MFP-adjusted MEI in order to solicit and respond to public comments. As we indicated in the 2003 and 2004 physician fee schedule proposed and final rules, we are using the latest-available historical data in the calculation of the MEI applicable to a year. As such, we are not required to propose or solicit public comments on changes in the MEI that result from use of latest available data. The inclusion of more recent, historical MFP data in the MEI reflects our adopted methodology as finalized in the CY 2003 PFS final rule which states the MEI "productivity adjustment will be based on the latest available actual historical economy-wide multifactor productivity data, as measured by the BLS."

Comment: One commenter believes that there are alternative measures of multifactor productivity available from BLS and the Census Bureau. The commenter states that we should identify and consider these alternatives and seek public comment before changing the data used to calculate the MEI.

Response: In the CY 2003 PFS final rule, we presented the research we had completed on evaluating the most appropriate productivity adjustment for the MEI. This research included an evaluation of all currently available productivity estimates produced by BLS to develop a better understanding of the strengths and weaknesses of these measures. It also included a review of the theoretical foundation of the MEI to develop a better understanding of how labor and multifactor productivity relate to the current physician payment system. Additionally, we studied the sparse and fragmented publicly-available data to begin to develop preliminary estimates of trends in physician specific productivity to better understand the current market conditions facing physicians. For a list of the experts that participated in this analysis, as well as a full description of the options that were identified and evaluated (67 FR 80019).

As stated earlier, CMS and ASPE are jointly sponsoring a study of physicians' office productivity. We will be evaluating the results of that study to determine if the use of BLS's private nonfarm business MFP is a reasonable target for physicians to achieve.

Comment: Several commenters claim that in previous years, there have been extensive discussions in the proposed rule of the upcoming year's update and the MEI. They further state that based on the impact table in the CY 2007 proposed rule, a -0.5 percent percentage point reduction in the update will result in a \$375 million cut in physician payments in 2007. One commenter claimed that our actions this year, in contrast to previous years, suggest we are attempting to hide the revision in the MEI for CY 2007.

Response: We disagree with the commenters' claim that in previous

years there has been extensive discussion of the upcoming year's MEI update in the proposed rule. With the exception of those updates that include a rebased and revised MEI, a detailed discussion, as well as the percent changes in the MEI cost categories, has been provided only in the final rule. When we rebase and revise the MEI, we do include extensive discussion on the MEI and solicit comments on proposed methodological changes. Given the historical precedent, we disagree with the commenter's suggestion that we were hiding any revision in the MEI.

C. The Update Adjustment Factor (UAF)

Section 1848(d) of the Act provides that the PFS update is equal to the product of the MEI and the UAF. The UAF is applied to make actual and target expenditures (referred to in the statute as "allowed expenditures") equal. Allowed expenditures are equal to actual expenditures in a base period updated each year by the SGR. The SGR sets the annual rate of growth in allowed expenditures and is determined by a formula specified in section 1848(f) of the Act.

1. Calculation Under Current Law

Under section 1848(d)(4)(B) of the Act, the UAF for a year beginning with 2001 is equal to the sum of the following—

- *Prior Year Adjustment Component.* An amount determined by—
 - + Computing the difference (which may be positive or negative) between the amount of the allowed expenditures for physicians' services for the prior year (the year prior to the year for which the update is being determined) and the amount of the actual expenditures for those services for that year;
 - + Dividing that difference by the amount of the actual expenditures for those services for that year; and

- + Multiplying that quotient by 0.75.
- *Cumulative Adjustment Component.* An amount determined by—
 - + Computing the difference (which may be positive or negative) between the amount of the allowed expenditures for physicians' services from April 1, 1996, through the end of the prior year and the amount of the actual expenditures for those services during that period;
 - + Dividing that difference by actual expenditures for those services for the prior year as increased by the SGR for the year for which the UAF is to be determined; and
 - + Multiplying that quotient by 0.33.

Section 1848(d)(4)(E) of the Act requires the Secretary to recalculate allowed expenditures consistent with section 1848(f)(3) of the Act. Section 1848(f)(3) specifies that the SGR (and, in turn, allowed expenditures) for the upcoming CY (2007 in this case), the current CY (2006) and the preceding CY (2005) are to be determined on the basis of the best data available as of September 1 of the current year. Allowed expenditures are initially estimated and subsequently revised twice. The second revision occurs after the CY has ended (that is, we are making the final revision to 2005 allowed expenditures in this final rule with comment). Once the SGR and allowed expenditures for a year have been revised twice, they are final.

Table 21 shows annual and cumulative allowed expenditures for physicians' services from April 1, 1996 through the end of the current CY, including the transition period to a CY system that occurred in 1999. Also shown is the SGR corresponding with each period. The calculation of the SGR is discussed in detail below in this section.

TABLE 21.—ANNUAL AND CUMULATIVE ALLOWED AND ACTUAL EXPENDITURES FOR PHYSICIANS' SERVICES FROM APRIL 1, 1996 THROUGH THE END OF THE CURRENT CALENDAR YEAR

| Period | Annual allowed expenditures (\$ in billions) | Annual actual expenditures (\$ in billions) | Cumulative allowed expenditures (\$ in billions) | Cumulative actual expenditures (\$ in billions) | FY/CY SGR |
|-----------------------|--|---|--|---|------------------|
| 4/1/96–3/31/97 | \$48.9 | \$48.9 | \$48.9 | \$48.9 | N/A |
| 4/1/97–3/31/98 | 50.5 | 49.4 | 99.4 | 98.4 | FY 1998=3.2% |
| 4/1/98–3/31/99 | 52.6 | 50.5 | 152.0 | 148.9 | FY 1999=4.2% |
| 1/1/99–3/31/99 | 13.3 | 13.1 | (1) | 148.9 | FY 1999=4.2% |
| 4/1/99–12/31/99 | 42.1 | 39.5 | (2) | 188.4 | FY 2000=6.9% |
| 1/1/99–12/31/99 | 55.3 | 52.6 | 194.0 | 188.4 | FY 1999/2000 (3) |
| 1/1/00–12/31/00 | 59.4 | 58.1 | 253.4 | 246.5 | CY 2000=7.3% |
| 1/1/01–12/31/01 | 62.0 | 66.3 | 315.4 | 312.8 | CY 2001=4.5% |
| 1/1/02–12/31/02 | 67.2 | 71.0 | 382.6 | 383.7 | CY 2002=8.3% |
| 1/1/03–12/31/03 | 72.1 | 78.2 | 454.6 | 461.9 | CY 2003=7.3% |
| 1/1/04–12/31/04 | 76.8 | 87.1 | 531.5 | 549.0 | CY 2004=6.6% |
| 1/1/05–12/31/05 | 80.0 | 92.0 | 611.5 | 641.0 | CY 2005=4.2% |
| 1/1/06–12/31/06 | 81.7 | 94.9 | 693.3 | 735.9 | CY 2006=2.1% |

TABLE 21.—ANNUAL AND CUMULATIVE ALLOWED AND ACTUAL EXPENDITURES FOR PHYSICIANS’ SERVICES FROM APRIL 1, 1996 THROUGH THE END OF THE CURRENT CALENDAR YEAR—Continued

| Period | Annual allowed expenditures (\$ in billions) | Annual actual expenditures (\$ in billions) | Cumulative allowed expenditures (\$ in billions) | Cumulative actual expenditures (\$ in billions) | FY/CY SGR |
|-----------------------|--|---|--|---|--------------|
| 1/1/07–12/31/07 | 83.2 | NA | 776.5 | NA | CY 2007=1.8% |

(1) Allowed expenditures for the first quarter of 1999 are based on the FY 1999 SGR.
 (2) Allowed expenditures for the last three quarters of 1999 are based on the FY 2000 SGR.
 (3) Allowed expenditures in the first year (April 1, 1996–March 31, 1997) are equal to actual expenditures. All subsequent figures are equal to quarterly allowed expenditure figures increased by the applicable SGR. Cumulative allowed expenditures are equal to the sum of annual allowed expenditures. We provide more detailed quarterly allowed and actual expenditure data on our web site at the following address: <http://www.cms.hhs.gov/SustainableGRatesConFact/>. We expect to update the web site with the most current information later this month.

Consistent with section 1848(d)(4)(E) of the Act, Table 21 includes our final revision of allowed expenditures for 2005, a recalculation of allowed expenditures for 2006, and our initial estimate of allowed expenditures for 2007. To determine the UAF for 2007, the statute requires that we use allowed

and actual expenditures from April 1, 1996 through December 31, 2006 and the 2007 SGR. Consistent with section 1848(d)(4)(E) of the Act, we will be making revisions to the 2006 and 2007 SGRs and 2006 and 2007 allowed expenditures. Because we have incomplete actual expenditure data for

2006, we are using an estimate for this period. Any difference between current estimates and final figures will be taken into account in determining the UAF for future years.

We are using figures from Table 21 in the following statutory formula:

$$UAF = \frac{Target_{06} - Actual_{06}}{Actual_{06}} \times 0.75 + \frac{Target_{4/96-12/06} - Actual_{4/96-12/06}}{Actual_{06} \times SGR_{07}} \times 0.33$$

UAF = Update Adjustment Factor
 Target₀₆ = Allowed Expenditures for 2006 = \$81.7 billion

Actual₀₆ = Estimated Actual Expenditures for 2006 = \$94.9 billion
 Target_{4/96-12/06} = Allowed Expenditures from 4/1/1996–12/31/2006 = \$693.3 billion

Actual_{4/96-12/06} = Estimated Actual Expenditures from 4/1/1996–12/31/2006 = \$735.9 billion
 SGR₀₇ = 1.8 percent (1.018)

$$\frac{\$81.7 - \$94.9}{\$94.9} \times .75 + \frac{\$693.3 - \$735.9}{\$94.9 \times 1.018} \times .33 = -0.250$$

Section 1848(d)(4)(D) of the Act indicates that the UAF determined under section 1848(d)(4)(B) of the Act for a year may not be less than -0.070 or greater than 0.03. Since -0.250 is less than -0.070, the UAF for 2006 will be -0.070.

Section 1848(d)(4)(A)(ii) of the Act indicates that 1.0 should be added to the UAF determined under section 1848(d)(4)(B) of the Act. Thus, adding 1.0 to -0.070 makes the UAF equal to 0.930.

VIII. Allowed Expenditures for Physicians’ Services and the Sustainable Growth Rate

A. Medicare Sustainable Growth Rate

The SGR is an annual growth rate that applies to physicians’ services paid by Medicare. The use of the SGR is intended to control growth in aggregate Medicare expenditures for physicians’ services. Payments for services are not withheld if the percentage increase in actual expenditures exceeds the SGR. Rather, the PFS update, as specified in section 1848(d)(4) of the Act, is adjusted

based on a comparison of allowed expenditures (determined using the SGR) and actual expenditures. If actual expenditures exceed allowed expenditures, the update is reduced. If actual expenditures are less than allowed expenditures, the update is increased.

Section 1848(f)(2) of the Act specifies that the SGR for a year (beginning with 2001) is equal to the product of the following four factors:

- (1) The estimated change in fees for physicians’ services;
- (2) The estimated change in the average number of Medicare fee-for-service beneficiaries;
- (3) The estimated projected growth in real GDP per capita; and
- (4) The estimated change in expenditures due to changes in statute or regulations.

In general, section 1848(f)(3) of the Act requires us to publish SGRs for 3 different time periods, no later than November 1 of each year, using the best data available as of September 1 of each year. Under section 1848(f)(3)(C)(i) of

the Act, the SGR is estimated and subsequently revised twice (beginning with the FY and CY 2000 SGRs) based on later data. (The Act also provides for adjustments to be made to the SGRs for FY 1998 and FY 1999. See the February 28, 2003 **Federal Register** (68 FR 9567) for a discussion of these SGRs). Under section 1848(f)(3)(C)(ii) of the Act, there are no further revisions to the SGR once it has been estimated and subsequently revised in each of the 2 years following the preliminary estimate. In this final rule with comment, we are making our preliminary estimate of the 2007 SGR, a revision to the 2006 SGR, and our final revision to the 2005 SGR.

B. Physicians’ Services

Section 1848(f)(4)(A) of the Act defines the scope of physicians’ services covered by the SGR. The statute indicates that “the term physicians’ services includes other items and services (such as clinical diagnostic laboratory tests and radiology services), specified by the Secretary, that are commonly performed or furnished by a

physician or in a physician's office, but does not include services furnished to a Medicare+Choice plan enrollee." We published a definition of physicians' services for use in the SGR in the **Federal Register** (66 FR 55316) on November 1, 2001. We defined physicians' services to include many of the medical and other health services listed in section 1861(s) of the Act. For purposes of determining allowed expenditures, actual expenditures, and SGRs, we have specified that physicians' services include the following medical and other health services if bills for the items and services are processed and paid by Medicare carriers (and those paid through intermediaries where specified):

- Physicians' services.
 - Services and supplies furnished incident to physicians' services.
 - Outpatient physical therapy services and outpatient occupational therapy services.
 - Antigens prepared by, or under the direct supervision of, a physician.
 - Services of PAs, certified registered nurse anesthetists, certified nurse midwives, clinical psychologists, clinical social workers, NPs, and certified nurse specialists.
 - Screening tests for prostate cancer, colorectal cancer, and glaucoma.
 - Screening mammography, screening pap smears, and screening pelvic exams.
 - Diabetes outpatient self-management training (DSMT) services.
 - MNT services.
 - Diagnostic x-ray tests, diagnostic laboratory tests, and other diagnostic tests (including outpatient diagnostic laboratory tests paid through intermediaries).
 - X-ray, radium, and radioactive isotope therapy.
 - Surgical dressings, splints, casts, and other devices used for the reduction of fractures and dislocations.
 - Bone mass measurements.
 - An initial preventive physical exam.
 - Cardiovascular screening blood tests.
 - Diabetes screening tests.
 - Telehealth services.
 - Physician work and resources to establish and document the need for a power mobility device (70 FR 50940).
- Telehealth services and the power mobility device related services were added because they meet the statutory criteria for services to be included in the SGR (that is, these services are commonly performed or furnished by a physician or in a physician's office) (70 FR 70305).

Summary of Comments on the Physician Update and the SGR

We appreciate the comments we received expressing concern about the negative update for 2007 and the SGR formula. Those comments are summarized below, along with our responses.

Comment: Commenters noted that physicians' costs are rising, while fees are being cut. Under current law, the 2006 Medicare Trustees Report projected negative updates of about -5 percent for at least nine consecutive years. The cumulative impact of the projected reductions from 2007 to 2015 was estimated to be about -37 percent. Because commercial insurance carriers and Medicaid base their payment updates upon Medicare's PFS, the overall negative impact is compounded and affects the entire health care industry. In contrast, the MEI increase over this same period is projected to be about 22 percent.

Commenters noted that increases in their practice costs are outpacing most inflationary measures, and they predicted that costs to provide care will soon exceed reimbursement. Many physician practices are small businesses that operate on slim margins. With ever increasing costs, they will not have the resources to absorb payment cuts resulting from the SGR formula. The result will be that patient quality of care will be compromised, with doctors taking drastic measures to cut costs of health care delivery to remain solvent. Eventually, physicians will be unable to absorb the sustained losses, and they will refuse or limit Medicare patients, resulting in reduced access to care. A survey conducted by the AMA found that 45 percent of physicians will either stop accepting or decrease the number of new Medicare patients they accept if payments are cut for 2007. Inadequate access to care will lead to a deterioration in the health status of Medicare beneficiaries. Beneficiaries will be forced to seek care in inpatient settings, which will be more costly for Medicare, less efficient in delivering care, and yield worse health outcomes for beneficiaries.

Commenters recommended that the SGR be replaced with an appropriate inflation rate linked to changes in the actual costs of medical practice. Commenters cited MedPAC's recommendation to replace the SGR with a system that reflects the increases in practice costs and other medical inflation variables, which would be 2.8 percent for 2007. Other commenters suggested using the MEI, which is

estimated at 2.1 percent for 2007, to update the CF.

Commenters suggested that we assume the leadership in pushing the Congress to enact legislation preventing a negative update for 2007, and to replace the SGR with a more sustainable system.

Response: We are fully cognizant of the potential implications of more than 9 years of negative physician updates. We remain concerned regarding those trends, and are closely monitoring physicians' participation in the Medicare program, as well as beneficiaries' access to care.

The formula for the SGR and the physician update are dictated by statute. We are required to follow this methodology when calculating the payment rates under the PFS.

We are working closely and collaboratively with medical professionals and the Congress on the most effective Medicare payment methodologies to compensate physicians for providing services to Medicare beneficiaries. We are engaging physicians on issues of quality and performance with the goal of encouraging the most effective approaches to achieve better health outcomes for Medicare beneficiaries. We are committed to developing systems that enable us to encourage quality, and to improve care without increasing overall Medicare costs.

Comment: Commenters requested that we implement administrative changes to the SGR calculation that would prevent a negative physician update for 2007. Specifically, many commenters requested that we remove the cost of Medicare-covered physician-administered drugs from the SGR on a retrospective basis. Commenters noted that expenditures on these drugs increased from \$1.8 billion in 1996, to \$8.6 billion in 2004, and was estimated at \$8.2 billion in 2005. The commenters opined that if we make the administrative changes now, worth about \$100 billion, then the cost of legislation revising the payment methodology for physicians' services will drop, and the likelihood of Congressional action to fix the SGR permanently will increase. Commenters expressed frustration that this recalculation has been requested numerous times, yet we have never implemented the change.

Some commenters requested that we remove all nonphysician services from the SGR calculation. Commenters stated that the annual spending growth of many nonphysician services, including drugs and physical therapy, far outstrip the growth of physician services.

Commenters requested separate funding pools for physician and nonphysician services, each with its own respective targets, to calculate separate update factors for physician and nonphysician services.

Response: We carefully reviewed our authority to make administrative changes, most notably the feasibility of removing Part B drugs from the SGR baseline. We indicated in the past (most recently in 70 FR 70307) that administrative changes, such as retrospective removal of drugs from the SGR, are statutorily difficult. For example, the statute requires estimates of the SGR to be refined twice based on actual data. We see no legal basis to re-estimate the SGR and recompute allowed expenditures for a year after the SGR has been estimated and revised twice. Further, our current estimates are that these administrative changes, including removing drugs retroactively from the SGR, would not provide relief to the negative updates projected for 2007 and the succeeding several years. As indicated above in this section, we are working with the Congress and health professional organizations on potential reforms that would improve the effectiveness of the payment methodology for physicians without increasing overall Medicare costs.

In reference to removing all “nonphysician services” from the SGR, the statute provides the Secretary with clear authority to specify the services that are included in the SGR. Section 1848(f)(4)(A) of the Act indicates that the term “physicians’ services” includes other items and services specified by the Secretary that are commonly performed or furnished by a physician or in a physician’s office. We published a definition of physicians’ services for use in the SGR in the **Federal Register** (66 FR 55316) on November 1, 2001. For purposes of determining allowed expenditures, actual expenditures, and SGRs, we defined physicians’ services to include many of the medical and other health services listed in section 1861(s) of the Act that meet the criterion of being commonly performed by a physician or are services and supplies furnished incident to physicians’ services. We disagree with the comments suggesting that the Secretary should not include drugs and physical therapy services in the definition of physicians’ services for purposes of determining allowed expenditures, actual expenditures, and the SGR. Further, we have no authority to create separate targets and update factors for what commenters are identifying as “physician” and “nonphysician” services.

Comment: Commenters noted that payment updates under the SGR are tied to GDP, which bears little relationship to Medicare beneficiaries’ health care needs or physician practice costs. Commenters noted that medical needs of individual patients are not related to the growth of the overall economy, and beneficiaries’ medical needs do not decline during economic downturns. Commenters stated that MEI is a better reflection than GDP of the growth in health care costs.

Response: Under section 1848(d)(4) of the Act, the PFS update is equal to the product of the percentage increase in the MEI and the UAF. The UAF is determined by comparing allowed and actual expenditures from prior years and the current year, and adjusting the update to account for the difference. The SGR is used to calculate allowed expenditures, and the GDP is one of the components used to calculate the SGR as specified in section 1848(f)(2)(C) of the Act.

The percentage change in the MEI is one of the key components used to update the PFS CF. In accounting for the weighted-average price change for various inputs involved with producing physicians’ services, the MEI measures inflation in physician practice costs and general wage levels. Elements of the MEI include measures of physicians’ PEs, including nonphysician employee compensation, office expenses, medical material and supplies, professional liability insurance, and medical equipment.

The GDP is a general measure of economic growth. It is not intended to reflect factors specific to operating a medical practice because these are captured in the MEI. Currently, the statute requires that we use the GDP as a component of the SGR, which is then used to calculate the target level of expenditures. Although both MEI and GDP are included in the calculation of the conversion factor, the MEI has a more direct and greater impact on the physician update than GDP.

Comment: Commenters believe that we continue to underestimate the impact of National and Local Coverage Decisions on physician spending. Through these coverage decisions, we are directly responsible for volume increases, and must adjust the SGR target accordingly.

Response: We do not have the authority to pay for a service lacking a defined statutory benefit listed in section 1861(s) of the Act. However, we do have the authority to establish national coverage decisions (NCDs) for items and services that are included in a benefit category listed in section

1861(s) of the Act. Further, we contract with Medicare carriers who may establish local coverage decisions (LCDs) for items and services that have a statutory benefit category.

Factor 4 of the SGR (1848(f)(2)(D)) requires us to estimate expenditures “which will result from changes in law and regulations.” NCDs are not required to be issued by regulation, and we are not aware of any NCDs that have been issued via regulation. Although coverage decisions that reduce the coverage available for certain items and services must be published in the **Federal Register**, they are published as notices. Furthermore, as indicated above, LCDs are issued by contractors and are not binding on CMS or other contractors. As a result, it is unclear that we have the authority to consider NCDs or LCDs in our estimate of factor 4 of the SGR. Furthermore, while we may establish a national coverage decision (NCD) for a new item of service with a defined statutory benefit category, the NCD does not necessarily increase Medicare spending to the extent that the service has or would have been covered at local carrier discretion in the absence of a NCD. Because Medicare might cover these services without an NCD, it is unclear whether there are any additional costs associated with the NCDs.

At this time, we do not intend to make any adjustment to the SGR to account for new NCDs. We continue to examine the issue, but we expect that NCDs have, at most, limited impact on Medicare spending for physicians’ services. (For a more detailed discussion see 70 FR 70308).

Comment: Commenters stated that additional funds need to be added to the SGR allowed expenditures for all the ancillary costs associated with new benefits. New benefits adjust the target, but they generate other services whose costs are not added to the targeted allowed expenditures. For example, the new AAA ultrasound benefit may reveal health problems that will generate additional visits, tests, and other services that are not reflected in the SGR’s legislative factor.

Response: Section 1848(f)(2) of the Act specifies that the SGR for a year (beginning with 2001) is equal to the product of four factors. One of these factors is the estimated change in expenditures due to changes in statute or regulations. For 2007, this factor includes the AAA ultrasound referenced by commenters. Our estimate of changes in expenditures arising from changes in law and regulations include induced spending impacts, when applicable and material. Our estimate of the additional

expenditures associated with this new benefit, like all of the figures used to determine the 2007 SGR, is an estimate that will be revised based on subsequent data. A 2-year look back window allows adjustments to the estimates to reflect actual impacts. Any differences between these estimates and the actual measurement of these figures will be included in future revisions of the SGR and allowed expenditures and incorporated into subsequent PFS updates. (See further discussion below for all the new benefits that adjusted the

legislative factor in 2005, 2006, and 2007.)

Comment: Commenters suggested that CMS compliance programs, such as HIPAA, increased overhead expenses by 15 to 20 percent, but their costs are not included in SGR allowed expenditures.

Response: The statute provides the Secretary with clear authority to specify the services that are included in the SGR. Section 1848(f)(4)(A) of the Act indicates that the term “physicians” services” includes other items and services specified by the Secretary that are commonly performed or furnished by a physician or in a physician’s office.

Overhead costs attributable to compliance programs do not meet the definition of physicians’ services for determining SGR allowed expenditures.

C. Preliminary Estimate of the SGR for 2007

Our preliminary estimate of the 2007 SGR is 1.8 percent. We first estimated the 2007 SGR in March and made the estimate available to the MedPAC and on our Web site. Table 22 shows that March 2006 estimate and our current estimates of the factors included in the 2007 SGR.

TABLE 22.—2007 SGR CALCULATION

| Statutory factors | March estimate | Current estimate |
|---------------------------|----------------------------------|------------------------------|
| Fees | 2.6 percent (1.026) | 2.2 percent (1.022). |
| Enrollment | – 2.9 percent (0.971) | – 0.9 percent (0.991). |
| Real Per Capita GDP | 2.2 percent (1.022) | 2.0 percent (1.020). |
| Law and Regulation | – 1.0 percent (0.990) | – 1.5 percent (0.985). |
| Total | 0.7 percent (1.007) | 1.80 percent (1.018). |

Note: Consistent with section 1848(f)(2) of the Act, the statutory factors are multiplied, not added, to produce the total (that is, $1.022 \times 0.991 \times 1.020 \times 0.985 = 1.018$). A more detailed explanation of each figure is provided in section VII.F.1 of this preamble.

D. Revised Sustainable Growth Rate for 2006

Our current estimate of the 2006 SGR is 2.1 percent. Table 23 shows our

preliminary estimate of the 2006 SGR that was published in the CY 2006 Final Rule (70 FR 70309) and our current estimate.

TABLE 23.—2006 SGR CALCULATION

| Statutory factors | Estimate from CY 2006 final rule | Current estimate |
|---------------------------|----------------------------------|-----------------------------|
| Fees | 2.7 percent (1.027) | 2.2 percent (1.022). |
| Enrollment | – 3.1 percent (0.969) | – 2.2 percent (0.978). |
| Real Per Capita GDP | 2.2 percent (1.022) | 2.1 percent (1.021). |
| Law and Regulation | 0.0 percent (1.000) | 0.0 percent (1.000). |
| Total | 1.7 percent (1.017) | 2.1 percent (1.021). |

A more detailed explanation of each figure is provided in section VII.F.2 of this preamble.

E. Final Sustainable Growth Rate for 2005

The SGR for 2005 is 4.2 percent. Table 24 shows our preliminary estimate of the 2005 SGR from the CY 2005 PFS

final rule with comment period (69 FR 66386), our revised estimate from the CY 2006 PFS final rule with comment period (70 FR 70309) and the final figures determined using the best available data as of September 1, 2006.

TABLE 24.—2005 SGR CALCULATION

| Statutory factors | Estimate from CY 2005 final rule | Estimate from CY 2006 final rule | Final |
|---------------------------|----------------------------------|----------------------------------|-----------------------------|
| Fees | 1.3 percent (1.013) | 0.8 percent (1.008) | 0.8 percent (1.008). |
| Enrollment | – 0.3 percent (0.997) | 0.3 percent (1.003) | 0.3 percent (1.003). |
| Real Per Capita GDP | 2.2 percent (1.022) | 2.2 percent (1.022) | 2.1 percent (1.021). |
| Law and Reg | 1.0 percent (1.010) | 1.2 percent (1.010) | 0.9 percent (1.009). |
| Total | 4.3 percent (1.043) | 4.6 percent (1.046) | 4.2 percent (1.042). |

A more detailed explanation of each figure is provided in section VII.F.3.

F. Calculation of 2007, 2006, and 2005 Sustainable Growth Rates

1. Detail on the 2007 SGR

All of the figures used to determine the 2007 SGR are estimates that will be revised based on subsequent data. Any differences between these estimates and the actual measurement of these figures will be included in future revisions of the SGR and allowed expenditures and incorporated into subsequent PFS updates.

• Factor 1—Changes in Fees for Physicians’ Services (Before Applying Legislative Adjustments) for 2007

This factor is calculated as a weighted-average of the 2007 fee increases for the different types of services included in the definition of physicians’ services for the SGR. Medical and other health services paid using the PFS are estimated to account for approximately 81.4 percent of total allowed charges included in the SGR in 2007 and are updated using the MEI.

The MEI for 2007 is 2.1 percent. Diagnostic laboratory tests are estimated to represent approximately 7.5 percent of Medicare allowed charges included in the SGR for 2007. Medicare payments for these tests are updated by the Consumer Price Index for Urban Areas (CPI-U). However, section 629 of the MMA specifies that diagnostic laboratory services will receive an update of 0.0 percent from 2004 through 2008.

Drugs are estimated to represent 11.1 percent of Medicare allowed charges included in the SGR in 2007. We estimated a weighted-average change in fees for drugs included in the SGR (using the ASP+6 percent pricing methodology) of 4.0 percent for 2007.

Table 25 shows the weighted-average of the MEI, laboratory and drug price changes for 2007.

TABLE 25

| | Weight | Update |
|------------------|--------|--------|
| Physician | 0.814 | 2.1 |
| Laboratory | 0.075 | 0.0 |

TABLE 26

| | 2006 | 2007 |
|-------------------------------|----------------------|----------------|
| Overall | 40.136 million | 40.735 million |
| Medicare Advantage (MA) | 6.369 million | 7.265 million |
| Net | 33.768 million | 33.470 million |
| Percent Increase | | -0.9 percent |

An important factor affecting fee-for-service enrollment is beneficiary enrollment in MA plans. Because it is difficult to estimate the size of the MA enrollee population before the start of a CY, at this time we do not know how actual enrollment in MA plans will compare to current estimates. For this reason, the estimate may change substantially as actual Medicare fee-for-service enrollment for 2007 becomes known.

• Factor 3—Estimated Real Gross Domestic Product Per Capita Growth in 2007

We estimate that the growth in real GDP per capita from 2006 to 2007 will be 2.0 percent (based on the 10-year average GDP over the 10 years of 1998–2007). Our past experience indicates that there have also been changes in estimates of real per capita GDP growth made before the year begins and the actual change in GDP computed after the year is complete. Thus, it is possible that this figure will change as actual information on economic performance becomes available to us in 2007.

• Factor 4—Percentage Change in Expenditures for Physicians’ Services Resulting From Changes in Statute or Regulations in 2007 Compared With 2006

The statutory and regulatory provisions that will affect expenditures in CY 2007 relative to CY 2006 are estimated to have an impact on expenditures of -1.5 percent. These provisions include the expiration of the work GPCI floor and DRA provisions adding the AAA ultrasound test to the Welcome to Medicare visit as a preventive benefit, and reducing payments for imaging services, which are discussed elsewhere in this final rule with comment.

2. Detail on the 2006 SGR

A more detailed discussion of our revised estimates of the four elements of the 2006 SGR follows.

• Factor 1—Changes in Fees for Physicians’ Services (Before Applying Legislative Adjustments) for 2006

This factor was calculated as a weighted-average of the 2006 fee

TABLE 25—Continued

| | Weight | Update |
|------------------------|--------|--------|
| Drugs | 0.111 | 4.0 |
| Weighted-average | 1.000 | 2.2 |

We estimate that the weighted-average increase in fees for physicians’ services in 2007 under the SGR (before applying any legislative adjustments) will be 2.2 percent.

• Factor 2—The Percentage Change in the Average Number of Part B Enrollees from 2006 to 2007

This factor is our estimate of the percent change in the average number of fee-for-service enrollees from 2006 to 2007. Services provided to Medicare Advantage (MA) plan enrollees are outside the scope of the SGR and are excluded from this estimate. OACT estimates that the average number of Medicare Part B fee-for-service enrollees will decrease by 0.9 percent from 2006 to 2007. Table 26 illustrates how this figure was determined.

increases that apply for the different types of services included in the definition of physicians’ services for the SGR.

We estimate that services paid using the PFS account for approximately 83.2 percent of total allowed charges included in the SGR in 2006. These services were updated using the 2006 MEI of 2.8 percent. We estimate that diagnostic laboratory tests represent approximately 7.1 percent of total allowed charges included in the SGR in 2006. Medicare payments for these tests are updated by the CPI-U. However, section 629 of the MMA specifies that diagnostic laboratory services will receive an update of 0.0 percent from 2004 through 2008.

We estimate that drugs represent 9.7 percent of Medicare-allowed charges included in the SGR in 2006. Sections 303 and 304 of the MMA require Medicare to pay for most drugs at 106 percent of ASP beginning January 1, 2005. We now estimate a weighted-average change in fees for drugs included in the SGR of -1.7 percent for 2006. The estimated weighted-average

change in the CY 2006 PFS final rule was 4.1 percent. The decline in the estimate is due to the availability of some actual data.

Table 27 shows the weighted-average of the MEI, laboratory and drug price changes for 2006.

TABLE 27

| | Weight | Update |
|------------------|--------|--------|
| Physician | 0.832 | 2.8 |
| Laboratory | 0.071 | 0.0 |

TABLE 27—Continued

| | Weight | Update |
|------------------------|--------|--------|
| Drugs | 0.097 | -1.7 |
| Weighted-average | 1.000 | 2.2 |

After taking into account the elements described in Table 27, we estimate that the weighted-average increase in fees for physicians' services in 2006 under the SGR (before applying any legislative adjustments) will be 2.2 percent. Our

estimate of this factor in the CY 2005 PFS final rule was 2.7 percent.

- *Factor 2—The Percentage Change in the Average Number of Part B Enrollees from 2005 to 2006*

OACT estimates that the average number of Medicare Part B fee-for-service enrollees (excluding beneficiaries enrolled in M+C plans) decreased by 2.2 percent in 2006. Table 28 illustrates how we determined this figure.

TABLE 28

| | 2005 | 2006 |
|------------------------|----------------------|-----------------|
| Overall | 39.601 million | 40.136 million. |
| Medicare+Choice | 5.084 million | 6.369 million. |
| Net | 34.518 million | 33.768 million. |
| Percent Increase | | -2.2 percent. |

OACT's estimate of the -2.2 percent change in the number of fee-for-service enrollees, net of M+C enrollment for 2006 compared to 2005, is greater than our original estimate of -3.1 percent in the CY 2006 PFS final rule (70 FR 70310). While our current projection based on data from 8 months of 2006 is greater than our original estimate of -3.1 percent when we had no actual data, it is still possible that our final estimate of this figure will be different once we have complete information on 2006 fee-for-service enrollment.

- *Factor 3—Estimated Real Gross Domestic Product Per Capita Growth in 2006*

We estimate that the growth in real GDP per capita will be 2.1 percent for 2006 (based on the 10-year average GDP over the 10 years of 1997–2006). Our past experience indicates that there have also been differences between our estimates of real per capita GDP growth made prior to the year's end and the actual change in this factor. Thus, it is possible that this figure will change further as complete actual information on 2006 economic performance becomes available to us in 2007.

- *Factor 4—Percentage Change in Expenditures for Physicians' Services Resulting From Changes in Statute or Regulations in 2006 Compared With 2005*

The statutory and regulatory provisions that affect expenditures in CY 2006 relative to CY 2005 are estimated to have a net impact on expenditures of less than 0.05. These provisions include the expiration of the temporary higher payments to physicians in Alaska, the new power

wheelchair code for physicians, and the impact of the new IVIG service.

3. Detail On the 2005 SGR

A more detailed discussion of our final revised estimates of the four elements of the 2005 SGR follows.

- *Factor 1—Changes in Fees for Physicians' Services (Before Applying Legislative Adjustments) for 2005*

This factor was calculated as a weighted-average of the 2005 fee increases that apply for the different types of services included in the definition of physicians' services for the SGR.

Services paid using the PFS accounted for approximately 84.2 percent of total Medicare-allowed charges included in the SGR for 2005 and are updated using the MEI. The MEI for 2005 was 3.1 percent. Diagnostic laboratory tests represented approximately 7.0 percent of total 2005 Medicare-allowed charges included in the SGR and are updated by the CPI-U. However, section 629 of the MMA specifies that diagnostic laboratory services will receive an update of 0.0 percent from 2004 through 2008. Drugs represented approximately 8.8 percent of total Medicare-allowed charges included in the SGR for 2005. Historically, Medicare paid for drugs under section 1842(o) of the Act at 95 percent of the AWP. However, with some exceptions, in 2004 sections 303 and 304 of the MMA generally required Medicare to pay for drugs at 85 percent of the AWP determined as of April 1, 2003, or a specified percentage of AWP based on studies by the Government Accountability Office and the OIG. We implemented section 303 and 304 of the

MMA in an interim final rule making changes to the PFS for 2004, which appeared in the **Federal Register** on January 7, 2004 (69 FR 1086). Beginning on January 1, 2005, sections 303 and 304 of the MMA require Medicare to pay for most drugs at 106 percent of the ASP. Taking into account sections 303 and 304 of the MMA, we estimate a weighted-average change in fees for drugs included in the SGR of -21.0 percent for 2005. Table 29 shows the weighted-average of the MEI, laboratory, and drug price increases for 2005.

TABLE 29

| | Weight | Update |
|------------------------|--------|--------|
| Physician | 0.842 | 3.1 |
| Laboratory | 0.070 | 0.0 |
| Drugs | 0.088 | -21.0 |
| Weighted-average | 1.000 | 0.8 |

After taking into account the elements described in Table 29, we estimate that the weighted-average increase in fees for physicians' services in 2005 under the SGR (before applying any legislative adjustments) was 0.8 percent. This figure is a final one based on complete data for 2005.

- *Factor 2—The Percentage Change in the Average Number of Part B Enrollees from 2004 to 2005*

We estimate the increase in the number of fee-for-service enrollees (excluding beneficiaries enrolled in M+C plans) from 2004 to 2005 was 0.3 percent. Our calculation of this factor is based on complete data from 2005. Table 30 illustrates the calculation of this factor.

TABLE 30

| | 2004 | 2005 |
|------------------------|----------------|----------------|
| Overall | 39.099 million | 39.601 million |
| Medicare +Choice | 4.683 million | 5.084 million |
| Net | 34.416 million | 34.518 million |
| Percent Increase | | 0.3 percent |

• *Factor 3—Estimated Real Gross Domestic Product Per Capita Growth in 2005*

We estimate that the growth in real per capita GDP was 2.1 percent in 2005 (based on the 10-year average GDP over the 10 years of 1996–2005). This figure is a final one based on complete data for 2005.

• *Factor 4—Percentage Change in Expenditures for Physicians’ Services Resulting From Changes in Statute or Regulations in 2005 Compared With 2004*

There are a number of statutory provisions that affected the 2005 SGR. Sections 303 and 304 of the MMA changed Medicare payment for drugs. These provisions also changed Medicare payments for the administration of drugs. Section 303(a)(1) of the MMA amended section 1848(c)(2) of the Act to require the Secretary to make a number of changes that increased Medicare payment for drug administration beginning January 1, 2004. Section 303(a)(4) of the MMA required an additional transitional adjustment (temporary increase) to Medicare’s payment for drug administration of 32 percent for 2004 and 3 percent for 2005. We also adopted changes to the codes and payment amounts for drug administration based on recommendations from the AMA’s CPT Editorial Panel and Relative Value Update Committee (RUC), under the authority of section 1848(c)(2)(J) of the Act. We further increased PFS payments by paying separately for injections provided on the same day as another PFS service.

Section 413(a) of the MMA established a 5 percent increase in the PFS payment for services provided in physician scarcity areas. Section 413(b)

of the MMA improved the procedures for paying the 10 percent PFS bonus payment for services provided in health professional shortage areas (HPSAs). Taken together, all of the statutory provisions for 2005, increased Medicare spending for physicians’ services by 0.9 percent.

IX. Anesthesia and Physician Fee Schedule Conversion Factors for CY 2007

The 2007 PFS CF will be \$35.9848. The 2007 national average anesthesia CF is \$15.3328. Both CFs will be subject to a separate, independent BN adjustor, as described below.

A. Physician Fee Schedule Conversion Factor

Under section 1848(d)(1)(A) of the Act, the PFS CF is equal to the CF for the previous year multiplied by the update determined under section 1848(d)(4) of the Act.

We illustrate the calculation for the 2007 PFS CF in Table 31.

TABLE 31

| | |
|-------------------------|-------------------------|
| 2006 Conversion Factor. | \$37.8975 |
| 2007 Update | – 5.0 percent (0.94953) |
| 2007 Conversion Factor. | \$35.9848 |

Section 1848(c)(2)(B)(ii)(II) of the Act requires that increases or decreases in RVUs for a year may not cause the amount of expenditures for the year to differ by more than \$20 million from what expenditures would have been in the absence of these changes. If this threshold is exceeded, we must make adjustments to preserve BN. The 5-Year Review of work RVUs would result in a change in expenditures that would exceed \$20 million if we made no offsetting adjustments to either the CF or RVUs. As discussed in section IV.D of this final rule with comment period, we are applying the following BN adjustor to the work RVUs in order to calculate payment for a service:

2007 Work Adjustor: 10.1 percent (0.8994)

Payment for services under the PFS will now be calculated as follows:

$$\text{Payment} = [(\text{RVU work} \times \text{BN adjustor} \times \text{GPCI work}) + (\text{RVU PE} \times \text{GPCI PE}) + (\text{RVU malpractice} \times \text{GPCI malpractice})] \times \text{CF.}$$

B. Anesthesia Fee Schedule Conversion Factor

Anesthesia services do not have RVUs like other PFS services. Therefore, we account for any necessary RVU adjustments through an adjustment to the anesthesia fee schedule CF to simulate changes to RVUs. We modeled the resource-based PE methodology using imputed anesthesia RVUs that were made comparable to other PFS services. The adjustment factor in Table 32 includes the combined effect of the PE adjustment and the BN adjustment. We used the following figures to determine the anesthesia fee schedule CF as shown in Table 32.

TABLE 32

| | |
|-------------------------------------|-------------------------|
| 2006 Anesthesia Conversion Factor. | \$17.7663 |
| 2007 Update | – 5.0 percent (0.94953) |
| 2007 Combined Adjustment PE and BN. | 0.9089 |
| 2007 Anesthesia Conversion Factor. | \$15.3328 |

X. Telehealth Originating Site Facility Fee Payment Amount Update

Section 1834(m) of the Act establishes the payment amount for the Medicare telehealth originating site facility fee for telehealth services provided from October 1, 2001 through December 31 2002, at \$20. For telehealth services provided on or after January 1 of each subsequent calendar year, the telehealth originating site facility fee is increased by the percentage increase in the MEI as defined in section 1842(i)(3) of the Act. The MEI increase for 2007 is 2.1 percent.

Therefore, for CY 2007, the payment amount for HCPCS code “Q3014, telehealth originating site facility fee” is 80 percent of the lesser of the actual charge or \$22.94. The Medicare telehealth originating site facility fee and MEI increase by the applicable time period are shown in Table 33.

TABLE 33

| Facility Fee | MEI increase (percent) | Period |
|---------------|------------------------|------------------------|
| \$20.00 | N/A | 10/01/2001–12/31/2002. |
| 20.60 | 3.0 | 01/01/2003–12/31/2003. |

XI. Provisions of the Final Rule

The provisions of this final rule with comment restate the provisions of the CY 2007 PFS proposed rule, except as noted elsewhere in the preamble.

XII. Waiver of Proposed Rulemaking and Delay in Effective Date

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment on the proposed rule. The notice of proposed rulemaking includes a reference to the legal authority under which the rule is proposed, and the terms and substances of the proposed rule or a description of the subjects and issues involved. This procedure can be waived, however, if an agency finds good cause that a notice-and-comment procedure is impracticable, unnecessary, or contrary to the public interest and incorporates a statement of the finding and its reasons in the rule issued.

As discussed in sections IV. and V. of this final rule, we utilize HCPCS codes for Medicare payment purposes. The HCPCS is a national drug coding system comprised of Level I (CPT) codes and Level II (HCPCS National Codes) that are intended to provide uniformity to coding procedures, services, and supplies across all types of medical providers and suppliers. Level I (CPT) codes are copyrighted by the AMA and consist of several categories, including Category I codes which are 5-digit numeric codes, and Category III codes which are temporary codes to track emerging technology, services and procedures.

The AMA issues an annual update of the CPT code set each Fall, with January 1 as the effective date for implementing the updated CPT codes. The HCPCS, including both Level I and Level II codes, is similarly updated annually on a CY basis. Annual coding changes are not available to the public until the Fall immediately preceding the annual January update of the PFS. Because of the timing of the release of these new codes, it is impracticable for CMS to provide prior notice and solicit comment on these codes and the RVUs assigned to them in advance of publication of the final rule that

implements the PFS. Yet, it is imperative that these coding changes be accounted for and recognized timely under the PFS for payment because services represented by these codes will be provided to Medicare beneficiaries by physicians during the CY in which they become effective. Moreover, regulations implementing HIPAA (42 CFR parts 160 and 162) require that the HCPCS be used to report health care services, including services paid under the PFS. We also assign interim RVUs to any new codes based on a review of the RUC recommendations for valuing these services. By reviewing these RUC recommendations for the new codes, we are able to assign RVUs to services based on input from the medical community and to establish payment for them, on an interim basis, that corresponds to the relative resources associated with providing the services. If we did not assign RVUs to new codes on an interim basis, the alternative would be to either not pay for these services during the initial CY or have each carrier establish a payment rate for these new codes. We believe both of these alternatives are contrary to the public interest, particularly since the RUC process allows for an assessment of the valuation of these services by the medical community prior to our establishing payment for these codes on an interim basis. Therefore, we believe it would be contrary to the public interest to delay establishment of fee schedule payment amounts for these codes.

For the reasons outlined above in this section, we find good cause to waive the notice of proposed rulemaking for the interim RVUs for selected procedure codes identified in Addendum C and to establish RVUs for these codes on an interim final basis. We are providing a 60-day public comment period.

In addition, we ordinarily publish a notice of proposed rulemaking in the **Federal Register** and provide a period for public comment before we make final the provisions of the notice. We can waive this procedure, however, if we find good cause that notice-and-comment procedure is impracticable, unnecessary, or contrary to the public interest and we incorporate a statement

of finding and its reasons in the notice issued. We find it unnecessary to undertake notice and comment rulemaking in this instance for the ambulance inflation factor because the law specifies the method of computation of annual updates, and we have no discretion in this matter. Further, we are merely applying the update method specified in statute and regulation. Therefore, under 5 U.S.C. 553(b)(B), for good cause, we waive notice and comment procedures for this ambulance inflation factor update.

XIII. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995, we are required to provide 30-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the OMB for review and approval. In order to fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires that we solicit comment on the following issues:

- The need for the information collection and its usefulness in carrying out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

We solicited public comment on each of these issues for the following sections of this document that contain information collection requirements:

Section 410.33 Independent Diagnostic Testing Facility

Section 410.33(e)(1) imposes a recordkeeping requirement on multi-State entities. Specifically, an independent diagnostic testing facility (IDTF) that operates across State boundaries must maintain documentation that its supervising physicians and technicians are licensed and certified in each of the States in which it operates. The burden associated with this requirement is the

time and effort it takes the IDTF to collect and maintain the aforementioned information.

While subject to the PRA, we believe this information collection requirement is exempt as defined in 5 CFR 1320.3(b)(2), because the time, effort, and financial resources necessary to comply with the requirement would be incurred by persons in the normal course of their activities (for example, in compiling and maintaining business records) and is considered to be usual and customary.

Section 410.33(g) discusses the application certification standards that an IDTF must meet. An IDTF must complete an enrollment application and certify the information contained in the application. The certification is part of an application that is subject to the PRA. The burden associated with this requirement is the time and effort necessary to complete the application. This requirement is currently approved in OMB No. 0938-0685, with a current expiration date of April 30, 2009.

Payment for Covered Outpatient Drugs and Biologicals (ASP Issues)

Section II.F.1 of the preamble provides background information pertaining to the use of average sales price (ASP) as the basis for our drug payment methodology. In accordance with section 1857 of the Act, Medicare Part B covered drugs and biologicals not paid on a cost of prospective payment basis are paid based on the ASP. The ASP data reporting requirements are outlined in section 1927(b) of the Act, and were implemented in the interim final rule with comment period that published on April 6, 2004 (69 FR 17935).

The collection of ASP data imposes a reporting requirement on the public. The burden associated with this requirement is the time and effort required by manufacturers of Medicare Part B drugs and biologicals to calculate, record, and submit the required data to CMS. While this requirement is subject to the PRA, it is currently approved under OMB control number 0938-0921, with an expiration date of May 31, 2009.

As required by section 3504(h) of the Paperwork Reduction Act of 1995, we have submitted a copy of this document to the OMB for its review of these information collection requirements.

XIV. Response to Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and

time specified in the "DATES" section of this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

XV. Regulatory Impact Analysis

We have examined the impact of this rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review), the Regulatory Flexibility Act (RFA) (September 19, 1980 Pub. L. 96-354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4), and Executive Order 13132.

Executive Order 12866 (as amended by Executive Order 13258, which merely reassigns responsibilities of duties) directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis must be prepared for final rules with economically significant effects (that is, a final rule that would have an annual effect on the economy of \$100 million or more in any one year, or would adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities). As indicated in more detail below in this section, we estimate that the PFS provisions included in this final rule with comment period will redistribute more than \$100 million in 1 year. We are considering this final rule with comment period to be economically significant because its provisions are estimated to result in an increase, decrease or aggregate redistribution of Medicare spending that will exceed \$100 million. Therefore, this final rule with comment period is a major rule and we have prepared a regulatory impact analysis.

The RFA requires that we analyze regulatory options for small businesses and other entities. We prepare a regulatory flexibility analysis unless we certify that a rule would not have a significant economic impact on a substantial number of small entities. The analysis must include a justification concerning the reason action is being taken, the kinds and number of small entities the rule affects, and an explanation of any meaningful options that achieve the objectives with less significant adverse economic impact on the small entities.

Section 1102(b) of the Act requires us to prepare a regulatory impact analysis for any final rule that may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside a Metropolitan Statistical Area and has fewer than 100 beds. We have determined that this final rule with comment period would have minimal impact on small hospitals located in rural areas. Of the 201 hospital-based ESRD facilities located in rural areas, only 40 are affiliated with hospitals with fewer than 100 beds.

For purposes of the RFA, physicians, NPPs, and suppliers are considered small businesses if they generate revenues of \$6 million or less. Approximately 95 percent of physicians are considered to be small entities. There are about 980,000 physicians, other practitioners and medical suppliers that receive Medicare payment under the PFS.

For purposes of the RFA, approximately 80 percent of clinical diagnostic laboratories are considered small businesses according to the Small Business Administration's size standards.

In addition, most ESRD facilities are considered small entities, either based on nonprofit status or by having revenues of \$29 million or less in any year. We consider a substantial number of entities to be affected if the final rule is estimated to impact more than 5 percent of the total number of small entities. Based on our analysis of the 932 nonprofit ESRD facilities considered small entities in accordance with the above definitions, we estimate that the combined impact of the changes to payment for renal dialysis services included in this final rule with comment period would have a 0.8 percent increase in overall payments relative to current overall payments.

IDTFs are suppliers under the Medicare program. For purposes of the RFA, suppliers with annual sales of \$6 million or less are considered to be small entities. (Individuals and States are not included in the definition of a small entity.) We believe that our standards for IDTFs will help bar fraudulent suppliers from participating in the Medicare program and provide an added level of protection to Medicare beneficiaries. Therefore, we expect to have an impact on an unknown number of persons and entities who will effectively be prevented from practicing their aberrant billing activities. The vast

majority of suppliers would not be significantly affected by this final rule with comment period. The reduction in program overpayments and the added level of protection to beneficiaries that we expect to achieve as a result of this final rule with comment period justifies the relatively small burden this final rule with comment period would impose on all small entities.

Ambulance providers and suppliers for purposes of the RFA are also considered to be small entities. While we expect the initial change in geographic designations to have little, if any, overall effect on ambulance payments, application of the ambulance inflation factor (AIF) will result in an increase in payment rates for all ambulance services furnished by all types of ambulance providers.

The analysis and discussion provided in this section, as well as elsewhere in this final rule with comment period, complies with the RFA requirements.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule that may result in expenditures in any year by State, local, or tribal governments, in the aggregate, or by the private sector, of \$120 million. Medicare beneficiaries are considered to be part of the private sector for this purpose.

We have examined this final rule with comment period in accordance with Executive Order 13132 and have determined that this regulation would not have any significant impact on the rights, roles, or responsibilities of State, local, or tribal governments. A discussion concerning the impact of this rule on beneficiaries is found later in this section.

We have prepared the following analysis, which, together with the information provided in the rest of this preamble, meets all assessment requirements. The analysis explains the rationale for and purposes of this final rule with comment period; details the costs and benefits of the rule; analyzes alternatives; and presents the measures we proposed to use to minimize the burden on small entities. As indicated elsewhere in this final rule with comment period, we proposed to change

our methodology for calculating resource-based PE RVUs and make a variety of other changes to our regulations, payments, or payment policies to ensure that our payment systems reflect changes in medical practice and the relative value of services. We provide information for each of the policy changes in the relevant sections of this final rule with comment period. We are unaware of any relevant Federal rules that duplicate, overlap or conflict with this final rule with comment period. The relevant sections of this final rule with comment period contain a description of significant alternatives if applicable.

A. RVU Impacts

1. Resource-Based Work and PE RVUs

Section 1848(c)(2)(B)(ii) of the Act requires that increases or decreases in RVUs may not cause the amount of expenditures for the year to differ by more than \$20 million from what expenditures would have been in the absence of these changes. If this threshold is exceeded, we make adjustments to preserve BN. This year, the estimated \$4 billion impact of changes in work RVUs resulting from the 5-Year Review require that a budget-neutrality adjustment be made.

As discussed in the June 29, 2006 proposed notice, we proposed making the statutorily required BN adjustment to account for the 5-Year Review of physician work by reducing all work RVUs. We estimated that all work RVUs would have to be reduced by 10 percent under this option. As discussed in section IV.D.1 of this final rule with comment period, we carefully reviewed the comments received concerning this issue, and to meet the BN provisions of section 1848(c)(2)(B)(ii)(II) of the Act, we are applying a BN adjustor of 0.8994 or - 10.1 percent to the work RVUs.

Table 34 shows the specialty-level impact of the work and PE RVU changes.

Our estimates of changes in Medicare revenues for PFS services compare payment rates for CY 2006 with proposed payment rates for CY 2007 using CY 2005 Medicare utilization for all years. We are using CY 2005 Medicare claims processed and paid

through March 30, 2005, that we estimate are 98 percent complete. To the extent that there are year-to-year changes in the volume and mix of services provided by physicians, the actual impact on total Medicare revenues will be different than those shown in Table 34. The payment impacts reflect averages for each specialty based on Medicare utilization. The payment impact for an individual physician would be different from the average, based on the mix of services the physician provides. The average change in total revenues would be less than the impact displayed here because physicians furnish services to both Medicare and non-Medicare patients and specialties may receive substantial Medicare revenues for services that are not paid under the PFS. For instance, independent laboratories receive approximately 80 percent of their Medicare revenues from clinical laboratory services that are not paid under the PFS.

Table 34 shows only the payment impact on PFS services. The following is an explanation of the information represented in Table 34. Note that this table does include the impact of the CY 2007 update.

- **Specialty:** The physician specialty or type of practitioner/supplier.
- **Allowed Charges:** Allowed charges are the Medicare Fee Schedule amounts for covered services and include copayments and deductibles (which are the financial responsibility of the beneficiary). These amounts have been summed across all services provided by physicians, practitioners, or suppliers with a specialty to arrive at the total allowed charges for the specialty.
- **Impact of Work RVU Changes from the five year review of work**
- **Impact of PE RVU changes.** The impact is shown for both 2007, which is the first year of the four year transition using the new methodology, and 2010, which is the year in which the methodology is fully implemented.
- **Combined impact of the finalized work and PE RVUs for both 2007 and 2010.**

BILLING CODE 4120-01-C

2. Section 5102 of the DRA Adjustments for Payments for Imaging Services

As required by section 5102(a) of the DRA and described in section I.E.1. of this final rule with comment period, we are removing, from the PE RVUs under the PFS the 0.3 percent increase made to the PE RVUs in the CY 2006 PFS final rule with comment period to ensure the BN of the impact of the multiple imaging policy adopted for CY 2006. Section 5102(a) of the DRA exempts the CY 2006 and 2007 impact of the multiple imaging policy from BN. Because we proposed to maintain the current 25 percent payment reduction for multiple imaging procedures in CY 2007, there is no additional impact resulting from our policies for CY 2007. Section 5102 of the DRA also exempts the estimated savings from the application of the OPPI-based payment limitation on PFS imaging services from the PFS BN requirement. We estimate that the combined impact of the BN exemptions in section 5102 of the DRA would reduce PFS expenditures by approximately 0.9 percent in CY 2007.

3. Combined Impacts

Table 35 shows the specialty-level impact of: The work and PE RVU changes, section 5102 of the DRA, and our most recent estimate (-5.0 percent) of the CY 2007 Medicare PFS update. Additionally, the impacts in this final

rule with comment period reflect the use of updated physician time data from the AMA-RUC.

Our estimates of changes in Medicare revenues for PFS services compare payment rates for CY 2006 with proposed payment rates for CY 2007 using CY 2005 Medicare utilization for all years. We are using CY 2005 Medicare claims processed and paid through March 30, 2005, that we estimate are 98 percent complete. To the extent that there are year-to-year changes in the volume and mix of services provided by physicians, the actual impact on total Medicare revenues will be different than those shown in Table 35. The payment impacts reflect averages for each specialty based on Medicare utilization. The payment impact for an individual physician would be different from the average, based on the mix of services the physician provides. The average change in total revenues would be less than the impact displayed here because physicians furnish services to both Medicare and non-Medicare patients and specialties may receive substantial Medicare revenues for services that are not paid under the PFS. For instance, independent laboratories receive approximately 80 percent of their Medicare revenues from clinical laboratory services that are not paid under the PFS.

Table 35 shows only the payment impact on PFS services. The following is an explanation of the information represented in Table 35.

- Specialty: The physician specialty or type of practitioner/supplier.
- Allowed Charges: Allowed charges are the Medicare Fee Schedule amounts for covered services and include copayments and deductibles (which are the financial responsibility of the beneficiary.) These amounts have been summed across all services provided by physicians, practitioners, or suppliers with a specialty to arrive at the total allowed charges for the specialty.
- Impact of Work and PE RVU Changes using the methodology finalized in this rule.
- Impact of section 5102 of the DRA: The CY 2007 percentage decrease in allowed charges attributed to section 5102 of the DRA.
- Combined impact of the finalized work and PE RVUs and section 5102 of the DRA.
- CY 2007 Update: The percentage decrease in allowed charges attributed to the CY 2007 PFS conversion factor update (-5.0 percent).
- Combined impact with CY 2007 update: The CY 2007 percentage decrease in allowed charges attributed to the impact of the work and PE RVU changes, section 5102 of the DRA, and the CY 2007 update.

Table 36 shows the impact on total payments for selected high-volume procedures of all of the changes previously discussed. We selected these procedures because they are the most

commonly provided by a broad spectrum of physician specialties. There are separate columns that show the change in the facility rates and the nonfacility rates. For an explanation of

facility and nonfacility PE refer to Addendum A of this final rule with comment period.

B. Geographic Practice Cost Indices (GPCI)—Payment Localities

As discussed in section II.B. of the preamble to this final rule with comment period, we proposed new GPCIs for 2007. In the CY 2005 PFS final rule with comment period, we published 2005 and 2006 GPCI and GAF values reflecting the 2-year phase-in of updated GPCI data. In 2007, the proposed GPCI and GAF values will reflect the removal of the 1,000 MMA floor from the physician work GPCI. The negative impact of these changes on a number of payment localities is shown in section II.B. in Table 7.

C. Global Period for Remote Afterloading High Intensity Brachytherapy Procedures

As discussed in section II.D.1. of this final rule with comment period, we are revising the global period for these services. We do not anticipate this change will have a significant impact on Medicare expenditures. Current brachytherapy coding allows for billing only one time for the entire physician services provided during a 90-day period. Any expected increase in the billing of brachytherapy physician services is offset by the reduction in the work RVUs.

D. DRA 5112: Addition of the Ultrasound Screening for Abdominal Aortic Aneurysm to “Welcome to Medicare” Benefit

As discussed in section II.E.3. of this final rule with comment period, section 5112 of the DRA authorizes coverage of an ultrasound screening for abdominal aortic aneurysms effective January 1, 2007, subject to certain eligibility and other limitations. We estimate that this new benefit would result in an increase in Medicare expenditures to physicians and other practitioners and suppliers of ultrasound services and related follow-up tests and treatment that may be required as a result of the coverage of these screening examinations. However, this is not expected to have a significant

cost impact on the Medicare program because of the limited scope of the benefit.

E. DRA 5113: Colorectal Screening Exemption From Part B Deductible

As discussed in section II.E.4. of this final rule with comment period, beginning January 1, 2007, colorectal cancer screening services as described in section 1861(pp)(1) of the Act are no longer subject to the Part B deductible. While waiver of this deductible will be beneficial to Medicare beneficiaries, we do not anticipate that this change will have a significant cost impact on the Medicare program.

F. Section 5114: Addition of Diabetes Outpatient Self-Management Training Services (DSMT) and Medical Nutrition Therapy (MNT) for the FQHC Program

As discussed in section II.E.5. of this final rule with comment period, section 5114 of the DRA amended section 1861(aa)(3) the Act to add DSMT and MNT to the list of Medicare covered and reimbursed services under the Medicare FQHC benefit, effective for services provided on or after January 1, 2006. Although this statutory change has already been implemented in administrative instructions, we proposed to conform the regulations to meet the new statutory requirement. FQHCs certified as DSMT and MNT providers have been allowed to bundle the cost of those services into their FQHC payment rates. But before the enactment of the DRA, the provision of these services would not generate a separate FQHC visit payment. Effective for services furnished on or after January 1, 2006, FQHCs that are certified providers of DSMT and MNT services can receive per visit payments for covered services furnished by registered dietitians or nutrition professionals. Because there are a limited number of qualified centers for DSMT and MNT services, the increase in Medicare expenditures should be negligible.

G. Payment for Covered Outpatient Drugs and Biologicals (ASP Issues)

While it is difficult to quantify the impact of clarifications in ASP reporting guidelines on Medicare expenditures, we expect that the changes discussed in section II.F. of this final rule with comment period, for payment for covered outpatient drugs and biologicals, will have a minimal impact on Medicare expenditures.

H. Provisions Related to Payment for Renal Dialysis Services Furnished by End State Renal Disease (ESRD) Facilities

In section II.G. of this final rule with comment period, we discuss the ESRD-related provisions. To understand the impact of the changes affecting payments to different categories of ESRD facilities, it is necessary to compare estimated payments under the current year (2006 payments) to estimated payments under the revisions to the composite rate payment system as discussed in II.G. of this final rule with comment period (2007 payments). To estimate the impact among various classes of ESRD facilities, it is imperative that the estimates of current payments and projected payments contain similar inputs. Therefore, we simulated payments only for those ESRD facilities that we are able to calculate both current 2006 payments and 2007 payments.

ESRD providers were grouped into the categories based on characteristics provided in the Online Survey and Certification and Reporting (OSCAR) file and the most recent cost report data from the Healthcare Cost Report Information System (HCRIS). We also used the June 2006 update of CY 2005 National Claims History file as a basis for Medicare dialysis treatments and separately billable drugs and biologicals. Due to data limitations, we are unable to estimate current and proposed payments for 130 of the 4,669 ESRD facilities that bill for ESRD dialysis treatments.

TABLE 37.—IMPACT OF CY 2007 CHANGES IN PAYMENTS TO HOSPITAL BASED AND INDEPENDENT ESRD FACILITIES
[Percent change in composite rate payments to ESRD facilities (both program and beneficiaries)]

| | Number of facilities | Number of dialysis treatments (in millions) | Effect of changes in wage index ¹ | Overall effect ² |
|------------------------------------|----------------------|---|--|-----------------------------|
| All Providers | 4,539 | 34.4 | 0.0 | 0.5 |

| Puerto Rico | 31 | 0.4 | -1.6 | -1.1 |

¹ This column shows the effect of wage index changes on ESRD providers. Composite rate payments computed using the current wage index are compared to composite rate payments using the CY 2007 wage index changes.

² This column shows the percent change between CY 2007 and CY 2006 composite rate payments to ESRD facilities. The CY 2007 payments include the CY 2007 wage adjusted composite rate, and the 15.1 percent drug add-on times treatments. The CY 2006 payments to ESRD facilities includes the CY 2006 wage adjusted composite rate and the 14.5 percent drug add-on times treatments.

Table 37 shows the impact of this year's changes to CY 2007 payments to hospital-based and independent ESRD facilities. The first column of Table 37 identifies the type of ESRD provider, the second column indicates the number of ESRD facilities for each type, and the third column indicates the number of dialysis treatments.

The fourth column shows the effect of CY 2007 changes to the ESRD wage index as it affects the composite rate payments to ESRD facilities. The fourth column compares aggregate ESRD wage adjusted composite rate payments in the second year of the transition (CY 2007) to aggregate ESRD wage adjusted composite rate payments in first year of the transition (CY 2006). In the second year of the transition (CY 2007), ESRD facilities receive 50 percent of the CBSA wage adjusted composite rate and 50 percent of the MSA wage adjusted composite rate. In the first year of the transition, ESRD facilities receive 25 percent of the CBSA wage adjusted composite rate and 75 percent of the MSA wage adjusted composite rate. The overall effect to all ESRD providers in aggregate is zero because the CY 2007 ESRD wage index has been multiplied by a BNF to comply with the statutory requirement that any wage index revisions be done in a manner that results in the same aggregate amount of expenditures as would have been made without any changes in the wage index. The decreases shown among census

regions is primarily due to reducing the wage index floor, as there were areas in these areas with wage index values below the floor.

The fifth column shows the overall effect of the changes in composite rate payments to ESRD providers. The overall effect is measured as the difference between the projected CY 2007 payment with all changes in this final rule and CY 2006 payment. This payment amount is computed by multiplying the wage adjusted composite rate with the drug add-on for each provider times the number of dialysis treatments from 2005 claims. The projected CY 2007 payment is the transition year 2 wage-adjusted composite rate for each provider (with the 15.1 percent drug add-on) times dialysis treatments from CY 2005 claims. The CY 2006 current payment is the transition year 1 wage-adjusted composite rate for each provider (with the current 14.5 percent drug add-on) times dialysis treatments from CY 2005 claims.

The overall impact to ESRD providers in aggregate is 0.5 percent. This increase corresponds to the 0.5 percent increase to the drug add-on. The variation seen in column 5 is due to variation in changes in the wage index (column 4). All provider types receive the same 0.5 percent increase to the drug add-on.

Comment: We received a comment requesting that we update the impact table to reflect the current Puerto Rico

ESRD provider count and treatment count.

Response: The impact table shows the same provider count the commenter suggested. However, our tabulation of the 2005 claims data indicates that there are 0.4 million treatments rather than the 0.55 million treatment count furnished by the commenter.

I. Private Contracts and Opt-out Provision

The changes discussed in this final rule with comment period, for private contracts and the opt-out provision, are currently estimated to have no significant impact on Medicare expenditures as the number of physicians and practitioners who opt-out of Medicare is very small.

J. Supplier Access to Claims Billed on Reassignment

The reassignment provisions discussed in section II.J.2. of this final rule with comment period are amending the reassignment regulations so that employees will have the same "unrestricted access to billing records," that has been afforded to independent contractors since January 1, 2005. We are simply extending this right to access one's billing records to employees. This change should have no impact on Medicare expenditures.

K. Coverage of Bone Mass Measurement

As discussed in section II.K. of this final rule with comment period, we discuss several revisions to § 410.31 relative to the definition of the term "Bone Mass Measurement" (§ 410.31(a)(2)), the conditions for coverage (§ 410.31(b)), the examples of exceptions to the standards on frequency of coverage (§ 410.31(c)(2)), and the category of individuals receiving glucocorticoid (steroid) therapy (§ 410.31(d)(3)). We also discuss the addition of a new paragraph (f) that would allow CMS, through the NCD process, to identify additional BMM systems for monitoring individuals receiving osteoporosis drug therapy and for performing confirmatory baseline measurements. We do not expect that this addition would have a significant cost impact on the Medicare program in the next several years.

Based on the projected impact of the first three changes that would place greater reliance on the use of the more expensive DXA (axial skeleton) devices, we estimate that this revised benefit would result in an increase in Medicare payments for providers who use the DXA (axial skeleton) devices and a somewhat smaller decrease in payments to providers who use QCT (axial skeleton) and peripheral devices. However, we do not expect that these changes would have a significant cost impact on the Medicare program because, at present, a very small percentage of our total Medicare payments for bone mass measurements are being made to providers who use QCT or peripheral devices. In addition, we estimate that lowering the eligibility standard for coverage of individuals on steroid therapy from 7.5 mg/day to 5.0 mg/day of prednisone (the fourth change) would result in an increase in Medicare payment for testing of additional patients, but this modest lowering of the steroid standard is not expected to have a significant cost impact on the program.

L. IDTF Changes

The costs associated with these changes are as follows.

1. Liability Insurance Requirement (§ 424.57(c)(10))

We estimate that only 10 percent of IDTFs do not already have liability insurance that meets this requirement. Based on Medicare data as of June 2005, 10 percent of the total number of IDTF's is approximately 559 suppliers. Using the previously highest estimate received (\$1,800 annually), results in an approximate additional liability

insurance cost of \$1 million annually (559 times \$1,800) to the IDTF industry due to this final rule with comment period.

2. Primary Business Telephone Listed Under the Name of the Business Locally or Toll-free for Beneficiaries Requirement (§ 424.57(c)(9))

We estimate that only 1 percent of IDTFs do not already meet this requirement. Based on Medicare data as of June 2005, we determined that 1 percent of IDTFs is approximately 56 suppliers. Therefore, 56 times the approximate \$600 annual cost of telephone service results in an additional cost of \$33,600 annually. Total Cost = \$1 million + \$33,600 = approximately \$1.04 million annually.

M. Independent Lab Billing for TC Component of Physician Pathology Services for Hospital Patients

The most current information on the number of affected hospitals and the impact on laboratories and hospitals comes from a report issued by GAO in September 2003.

The GAO estimated that approximately 95 percent of the total of all Medicare hospitals on the prospective payment system, as well as CAHs sent the TC of physician pathology services to independent laboratories and the independent laboratories billed the carrier under the PFS.

The GAO estimated that the median number of services sent by each hospital to outside independent laboratories was small, approximately 81 services. The GAO was unable to identify the number of laboratories billing for the TC service because a single laboratory may submit claims under multiple provider numbers. In general, the impact on the individual hospital is small; however, we do not know the impact on the individual independent laboratory.

If the independent laboratories had not received payments from the carriers for these TC services for hospital patients, the GAO estimates that Medicare spending would have been \$42 million less in 2001 and beneficiary cost sharing obligations for inpatient and outpatient services would have been reduced by \$2 million.

Based on what they learned from the hospital industry, the GAO thought that Medicare beneficiaries' access to pathology services would not likely be affected if independent laboratories could no longer bill the carrier for these services. Hospital representatives indicated that they would likely continue to use independent

laboratories to provide TC pathology services.

It is unclear if the hospitals contracting with independent laboratories would pay the laboratories at the same rates that the laboratories received by billing the Medicare carriers under the PFS.

N. Public Consultation for Medicare Payment for New Outpatient Clinical Diagnostic Laboratory Tests

This codification of our process for public consultation for new clinical diagnostic laboratory tests paid under the Medicare Part B clinical laboratory fee schedule does not increase or decrease payment amounts for existing clinical diagnostic laboratory tests because it does not alter our current methodology for calculating payment amounts for existing clinical diagnostic laboratory tests. For new tests, this change primarily codifies an existing process for the determination of payment amounts. Because any new laboratory tests to be gapfilled are unknown to us at the current time, we do not have any data to estimate the impact of our policy to pay for new gapfilled lab tests at the median of the local carrier amounts for all carriers rather than the lower of that amount and the local carrier amount.

O. Bad Debt Payment for Services Associated With Reasonable Charge/Fee Schedules

This is a clarification of a longstanding policy and, therefore, has no associated dollar impact.

P. Revisions to Payment Policies Under the Ambulance Fee Schedule and the Ambulance Inflation Factor Update for CY 2007

We believe that the overall effect of adopting the CBSA-based geographic definitions, as well as the RUCAs will result in a redistribution of payments from urban to rural areas in some States and from rural to urban areas in other States; however, the RUCAs will enable rural areas with a rurality level of 4.0 or greater in all counties in all States to remain rural rather than only recognizing those rural areas in large counties per the Goldsmith Modification. We have included three tables to reflect the impact of the geographic changes. These three tables reflect the CBSA-based definitions, as well as the RUCAs. Table 38 is a State-by-State analysis of urban and rural areas after all geographic changes have been implemented. As can be seen in this table, there is not a great deal of difference between the number of zip codes that move from rural to urban

(2,328—5.56 percent) and the number of zip codes that move from urban to rural (1,870—4.46 percent). There are a total of 41,888 zip codes—an average of 89.98 percent of all zip codes do not change their geographic designation. Table 39 is an analysis of all the areas to which commenters referred as specific concerns for them in response to the proposed rule. The table is arranged by State, and, within each State, by zip code area based on the information provided by the commenters (some commenters mentioned counties or townships). We translated those concerns into the appropriate zip code areas within each State. This table shows the actual RUCA rurality level of each of these zip code areas. If the area is, indeed, designated urban (a rurality level of less than 4.0), a “yes” is indicated in the “Urban Zip?” column, and the associated town or city is named in the following column as a reference point. Approximately half of the areas about which commenters were

specifically concerned remained rural once the RUCA rurality level was applied. The third and final table is Addendum I which shows all zip codes nationally by State and the rurality level associated with each zip code.

In addition, we contend that with the use of updated geographical areas where rural areas are redesignated as urban areas, it will be more likely than not, that some level of population growth has occurred resulting in more ambulance trips overall than had occurred prior to the use of the updated geographical areas, even though these trips are paid at a lower rate per trip (areas designated as rural generally receive a higher payment per trip than areas designated as urban).

In contrast, where urban areas are redesignated as rural, there will be fewer trips than were reported prior to the use of the updated geographical areas, but at higher rates. Thus, although ambulance suppliers and providers may bill fewer rural trips at the higher rate

or more urban trips at the lower rate, we anticipate that the overall payments will remain the same. For these reasons, we estimate that this proposed rule will have no fiscal impact on the Medicare program because payments will, in effect, be redistributed.

We estimate that the total program expenditure for CY 2007 for ambulance services covered by the Medicare program is approximately \$4.8 billion. Application of an AIF of 4.3 percent will result in an additional total program expenditure for CY 2007 of approximately \$206 million over CY 2006 expenditures.

With respect to our SCT policies, while we believe ambulance suppliers and providers may now better understand the interfacility requirements and the personnel requirements for payment of SCT services, we do not expect any significant net impact on Medicare expenditures.

BILLING CODE 4120-01-P

BILLING CODE 4120-01-C

Q. Alternatives Considered

This final rule with comment period contains a range of policies, including some provisions related to specific MMA provisions. The preamble provides descriptions of the statutory provisions that are addressed, identifies those policies when discretion has been exercised, presents rationale for our decisions and, where relevant, alternatives that were considered.

R. Impact on Beneficiaries

There are a number of changes made in this final rule with comment period that would have an effect on beneficiaries. In general, we believe these changes, particularly the DRA provisions that provide for an exception to the application of the Part B deductible with respect to colorectal cancer screening tests and coverage of an ultrasound screening for the early detection of AAAs as part of the IPPE

benefit (referred to as the Welcome to Medicare benefit) will improve beneficiary access to services that are currently covered or expand the Medicare benefit package to include new services. As explained in more detail below in this section, the regulatory provisions may affect beneficiary liability in some cases. Any changes in aggregate beneficiary liability from a particular provision would be a function of the coinsurance (20 percent

if applicable for the particular provision after the beneficiary has met the deductible) and the effect of the aggregate cost (savings) of the provision on the calculation of the Medicare Part B premium rate (generally 25 percent of the provision's cost or savings).

To illustrate this point, as shown in Table 36, the 2006 national payment amount in the nonfacility setting for CPT code 99203 (Office/outpatient visit, new), is \$97.02 which means that currently a beneficiary is responsible for 20 percent of this amount, or \$19.40. Based on this final rule with comment

period, the 2007 national payment amount in the nonfacility setting for CPT code 99203, as shown in Table 36, is \$87.44 which means that, in 2007, the beneficiary coinsurance for this service would be \$17.49.

Policies discussed above in this section that do affect overall spending, such as DRA 5102 imaging provisions, would similarly impact beneficiaries' coinsurance.

S. Accounting Statement

As required by OMB Circular A-4 (available at <http://www.whitehouse.gov/omb/circulars/a004/a-4.pdf>), in Table 40, we have prepared an accounting statement showing the classification of the expenditures associated with this final rule with comment period. This table provides our best estimate of the decrease in Medicare payments under the physician fee schedule as a result of the provisions presented in this final rule with comment period for CY 2007. All expenditures are classified as transfers.

As required by OMB Circular A-4 (available at <http://www.whitehouse.gov/omb/circulars/a004/a-4.pdf>)

TABLE 40.—ACCOUNTING STATEMENT: CLASSIFICATION OF ESTIMATED CY 2007 EXPENDITURES ASSOCIATED WITH CY 2007 FINAL RULE PROVISIONS

| Category | Transfers |
|--------------------------------------|---|
| Annualized Monetized Transfers | Estimated decrease in expenditures of \$3.7 billion. |
| From Whom To Whom? | Federal Government to physicians, other practitioners and suppliers who receive payment under the Medicare Physician Fee Schedule; ESRD Medicare Providers; ambulance suppliers, and Medicare suppliers billing for Part B drugs. |

In accordance with the provisions of Executive Order 12866, this final rule was reviewed by the Office of Management and Budget.

List of Subjects

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Medical devices, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 410

Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 411

Kidney diseases, Medicare, Physician Referral, Reporting and recordkeeping requirements.

42 CFR Part 413

Health facilities, Kidney diseases, Medicare, Reporting and recordkeeping requirements.

42 CFR part 414

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Medicare, Reporting and recordkeeping.

42 CFR Part 415

Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 424

Emergency medical services, Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

■ For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR chapter IV as follows:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

■ 1. The authority citation for part 405 continues to read as follows:

Authority: Secs. 1102, 1861, 1862(a), 1871, 1874, 1881, and 1886(k) of the Social Security Act (42 U.S.C. 1302, 1395x, 1395y(a), 1395hh, 1395kk, 1395rr, and 1395ww(k)), and sec. 353 of the Public Health Service Act (42 U.S.C. 263a).

Subpart D—Private Contracts

■ 2. Section 405.400 is amended by revising the definition of “Practitioner” to read as follows:

§ 405.400 Definitions.

* * * * *

Practitioner means a physician assistant, nurse practitioner, clinical nurse specialist, certified registered nurse anesthetist, certified nurse midwife, clinical psychologist, clinical social worker, registered dietitian or nutrition professional, who is currently legally authorized to practice in that capacity by each State in which he or

she furnishes services to patients or clients.

* * * * *

Subpart X—Rural Health Clinic and Federally Qualified Health Center Services Payment for Rural Health Clinic and Federally Qualified Health Center Services

■ 3. Section 405.2446 is amended by adding paragraph (b)(10) to read as follows:

§ 405.2446 Scope of services.

* * * * *

(b) * * *

(10) Medical nutrition therapy services as specified in part 410, subpart G of this chapter, and diabetes outpatient self-management training services as specified in part 410, subpart H of this chapter.

* * * * *

■ 4. Section 405.2463 is revised to read as follows:

§ 405.2463 What constitutes a visit.

(a) *Visit*—(1) *General.* (i) For rural health clinics, a visit is a face-to-face encounter between a clinic or center patient and a physician, physician assistant, nurse practitioner, nurse midwife, visiting nurse, clinical psychologist, or clinical social worker.

(ii) For FQHCs, a visit is—
(A) A face-to-face encounter, as described in paragraph (a)(1)(i) of this section; or

(B) A face-to-face encounter between a patient and a qualified provider of medical nutrition therapy services as

defined in part 410, subpart G of this chapter; or a qualified provider of outpatient diabetes self-management training services as defined in part 410, subpart H of this chapter.

(2) *Medical visit.* A medical visit is a face-to-face encounter between a clinic or center patient and a physician, physician assistant, nurse practitioner, nurse midwife, or a visiting nurse; and for FQHCs only, a medical visit also includes a separately billable medical nutrition therapy visit or a diabetes outpatient self-management training visit.

(3) *Other health visit.* An other health visit is a face-to-face encounter between a clinic or center patient and a clinical psychologist, clinical social worker, or other health professional for mental health services.

(b) *Encounters.* Encounters with more than one health professional and multiple encounters with the same health professional that take place on the same day and at a single location constitute a single visit, except when one of the following conditions exist:

(1) After the first encounter, the patient suffers illness or injury requiring additional diagnosis or treatment.

(2) The patient has a medical visit and other health visit(s), as defined in paragraph (a) of this section.

(c) *Payment.* Medicare pays for more than one visit per day when the conditions in paragraph (b) of this section are met or a separate visit under paragraph (a)(1)(ii)(B) of this section is made.

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

■ 5. The authority citation for part 410 continues to read as follows:

Authority: Secs. 1102, 1834, and 1871 of the Social Security Act (42 U.S.C. 1302, 1395m, and 1395hh).

Subpart B—Medical and Other Health Services

■ 6. In § 410.16 paragraph (a) is amended by revising paragraph (7) of the definition of “initial preventive physical examination” to read as follows:

§ 410.16 Initial preventive physical examination: Conditions for and limitations on coverage.

(a) * * *

Initial preventive physical examination * * *

(7) Education, counseling, and referral, including a written plan such

as a checklist provided to the beneficiary for obtaining the appropriate screening and other preventive services that are covered as separate Medicare Part B benefits as described in section 1861(s)(10), section 1861(jj), section 1861(nn), section 1861(oo), section 1861(pp), section 1861(qq)(1), section 1861(rr), section 1861(uu), section 1861(vv), section 1861(xx)(1), section 1861(yy), and section 1861(bbb) of the Act.

* * * * *

■ 7. A new § 410.19 is added to read as follows:

§ 410.19 Ultrasound screening for abdominal aortic aneurysms: Condition for and limitation on coverage.

(a) *Definitions:* As used in this section, the following definitions apply:

Eligible beneficiary means an individual who—

(1) Has received a referral for an ultrasound screening for an abdominal aortic aneurysm as a result of an initial preventive physical examination (as defined in section 1861(wv)(1) of the Act);

(2) Has not been previously furnished an ultrasound screening for an abdominal aortic aneurysm under Medicare program; and

(3) Is included in at least one of the following risk categories:

(i) Has a family history of an abdominal aortic aneurysm.

(ii) Is a man age 65 to 75 who has smoked at least 100 cigarettes in his lifetime.

(iii) Is an individual who manifests other risk factors in a beneficiary category recommended for screening by the United States Preventive Services Task Force regarding abdominal aortic aneurysms, as specified by the Secretary through a national coverage determination process.

Ultrasound screening for abdominal aortic aneurysms means the following services furnished to an asymptomatic individual for the early detection of an abdominal aortic aneurysm:

(1) A procedure using soundwaves (or other procedures using alternative technologies of commensurate accuracy and cost, as specified by the Secretary through a national coverage determination process) provided for the early detection of abdominal aortic aneurysms.

(2) Includes a physician's interpretation of the results of the procedure.

(b) *Conditions for coverage of an ultrasound screening for abdominal aortic aneurysms.* Medicare Part B pays for one ultrasound screening for an abdominal aortic aneurysm provided to

eligible beneficiaries, as described in this section, after a referral from a physician or a qualified nonphysician practitioner as defined in § 410.16(a), when the test is performed by a provider or supplier that is authorized to provide covered ultrasound diagnostic services.

(c) *Limitation on coverage of ultrasound screening for abdominal aortic aneurysms.* Payment may not be made for an ultrasound screening for an abdominal aortic aneurysm that is performed for an individual that does not meet the definition of “eligible beneficiary” specified in this section.

■ 8. Section 410.31 is revised to read as follows:

§ 410.31 Bone mass measurement: Conditions for coverage and frequency standards.

(a) *Definition.* As used in this section unless specified otherwise, the following definition applies:

Bone mass measurement means a radiologic, radioisotopic, or other procedure that meets the following conditions:

(1) Is performed for the purpose of identifying bone mass, detecting bone loss, or determining bone quality.

(2) Is performed with either a bone densitometer (other than single-photon or dual-photon absorptiometry) or with a bone sonometer system that has been cleared for marketing for this use by the FDA under 21 CFR part 807, or approved for marketing by the FDA for this use under 21 CFR part 814.

(3) Includes a physician's interpretation of the results of the procedure.

(b) *Conditions for coverage.* (1) Medicare covers a medically necessary bone mass measurement if the following conditions are met:

(i) Following an evaluation of the beneficiary's need for the measurement, including a determination as to the medically appropriate procedure to be used for the beneficiary, it is ordered by the physician or a qualified nonphysician practitioner (as these terms are defined in § 410.32(a)) treating the beneficiary.

(ii) It is performed under the appropriate level of supervision of a physician (as set forth in § 410.32(b)).

(iii) It is reasonable and necessary for diagnosing and treating the condition of a beneficiary who meets the conditions described in paragraph (d) of this section.

(2) Medicare covers a medically necessary bone mass measurement for an individual defined under paragraph (d)(5) of this section if the conditions under paragraph (b)(1) of this section are met and the monitoring is performed

by the use of a dual energy x-ray absorptiometry system (axial skeleton).

(3) Medicare covers a medically necessary confirmatory baseline bone mass measurement for an individual defined under paragraph (d) of this section, if the conditions under paragraph (b)(1) of this section are met and the confirmatory baseline bone mass measurement is performed by a dual energy x-ray absorptiometry system (axial skeleton) and the initial measurement was not performed by a dual energy x-ray absorptiometry system (axial skeleton).

(c) *Standards on frequency of coverage*—(1) *General rule.* Except as allowed under paragraph (c)(2) of this section, Medicare may cover a bone mass measurement for a beneficiary if at least 23 months have passed since the month the last bone mass measurement was performed.

(2) *Exception.* If medically necessary, Medicare may cover a bone mass measurement for a beneficiary more frequently than allowed under paragraph (c)(1) of this section. Examples of situations where more frequent bone mass measurement procedures may be medically necessary include, but are not limited to the following medical circumstances:

(i) Monitoring beneficiaries on long-term glucocorticoid (steroid) therapy of more than 3 months.

(ii) Allowing for a confirmatory baseline measurement to permit monitoring of beneficiaries in the future if the requirements of paragraph (b)(3) of this section are met.

(d) *Beneficiaries who may be covered.* The following categories of beneficiaries may receive Medicare coverage for a medically necessary bone mass measurement:

(1) A woman who has been determined by the physician (or a qualified nonphysician practitioner) treating her to be estrogen-deficient and at clinical risk for osteoporosis, based on her medical history and other findings.

(2) An individual with vertebral abnormalities as demonstrated by an x-ray to be indicative of osteoporosis, osteopenia, or vertebral fracture.

(3) An individual receiving (or expecting to receive) glucocorticoid (steroid) therapy equivalent to an average of 5.0 mg of prednisone, or greater, per day for more than 3 months.

(4) An individual with primary hyperparathyroidism.

(5) An individual being monitored to assess the response to or efficacy of an FDA-approved osteoporosis drug therapy.

(e) *Denial as not reasonable and necessary.* If CMS determines that a bone mass measurement does not meet the conditions for coverage in paragraphs (b) or (d) of this section, or the standards on frequency of coverage in paragraph (c) of this section, it is excluded from Medicare coverage as not “reasonable” and “necessary” under section 1862(a)(1)(A) of the Act and § 411.15(k) of this chapter.

(f) *Use of the National Coverage Determination Process.* For the purposes of paragraphs (b)(2) and (b)(3) of this section, CMS may determine through the National Coverage Determination process that additional bone mass measurement systems are reasonable and necessary under section 1862(a)(1) of the Act for monitoring and confirming baseline bone mass measurements.

* * * * *

■ 9. Section 410.33 is amended by—

■ A. Revising paragraph (b)(1).

■ B. Revising paragraph (e).

■ C. Adding paragraphs (g) and (h).

The revision and additions read as follows:

§ 410.33 Independent diagnostic testing facility.

* * * * *

(b) *Supervising physician.* (1) Each supervising physician must be limited to providing supervision to no more than three IDTF sites. The IDTF supervising physician is responsible for the overall operation and administration of the IDTFs, including the employment of personnel who are competent to perform test procedures, record and report test results promptly, accurately and proficiently, and for assuring compliance with the applicable regulations.

* * * * *

(e) *Multi-State entities.* (1) An IDTF that operates across State boundaries must—

(i) Maintain documentation that its supervising physicians and technicians are licensed and certified in each of the States in which it operates; and

(ii) Operate in compliance with all applicable Federal, State, and local licensure and regulatory requirements with regard to the health and safety of patients.

(2) The point of the actual delivery of service means the place of service on the claim form. When the IDTF performs or administers an entire diagnostic test at the beneficiary’s location, the beneficiary’s location is the place of service. When one or more aspects of the diagnostic testing are

performed at the IDTF, the IDTF is the place of service.

* * * * *

(g) *Application certification standards.* The IDTF must certify in its enrollment application that it meets the following standards and related requirements:

(1) Operates its business in compliance with all applicable Federal and State licensure and regulatory requirements for the health and safety of patients.

(2) Provides complete and accurate information on its enrollment application. Any change in enrollment information must be reported to the designated fee-for-service contractor on the Medicare enrollment application within 30 calendar days of the change.

(3) Maintains a physical facility on an appropriate site. For the purposes of this standard, a post office box or commercial mail box is not considered a physical facility. The physical facility, including mobile units, must contain space for equipment appropriate to the services designated on the enrollment application, facilities for hand washing, adequate patient privacy accommodations, and the storage of both business records and current medical records within the office setting of the IDTF, or IDTF home office, not within the actual mobile unit.

(4) Has all applicable diagnostic testing equipment available at the physical site excluding portable diagnostic testing equipment. The IDTF must—

(i) Maintain a catalog of portable diagnostic equipment, including diagnostic testing equipment serial numbers at the physical site;

(ii) Make portable diagnostic testing equipment available for inspection within 2 business days of a CMS inspection request.

(iii) Maintain a current inventory of the diagnostic testing equipment, including serial and registration numbers and provide this information to the designated fee-for-service contractor upon request, and notify the contractor of any changes in equipment within 90 days.

(5) Maintain a primary business phone under the name of the designated business. The IDTF must have its—

(i) Primary business phone located at the designated site of the business or within the home office of the mobile IDTF units.

(ii) Telephone or toll free telephone numbers available in a local directory and through directory assistance.

(6) Have a comprehensive liability insurance policy of at least \$300,000 per

location that covers both the place of business and all customers and employees of the IDTF. The policy must be carried by a nonrelative-owned company and list the serial numbers of any and all diagnostic equipment used by the IDTF, whether the equipment is stationary, in a mobile unit, or at the beneficiary's residence.

(7) Agree not to directly solicit patients, which include, but is not limited to, a prohibition on telephone, computer, or in-person contacts. The IDTF must accept only those patients referred for diagnostic testing by an attending physician, who is furnishing a consultation or treating a beneficiary for a specific medical problem and who uses the results in the management of the beneficiary's specific medical problem. Nonphysician practitioners may order tests as set forth in § 410.32(a)(3).

(8) Answer beneficiaries' questions and respond to their complaints.

(9) Openly post these standards for review by patients and the public.

(10) Disclose to the government any person having ownership, financial, or control interest or any other legal interest in the supplier at the time of enrollment or within 30 days of a change.

(11) Have its testing equipment calibrated and maintained per equipment instructions and in compliance with applicable manufacturers suggested maintenance and calibration standards.

(12) Have technical staff on duty with the appropriate credentials to perform tests. The IDTF must be able to produce the applicable Federal or State licenses or certifications of the individuals performing these services.

(13) Have proper medical record storage and be able to retrieve medical records upon request from CMS or its fee-for-service contractor within 2 business days.

(14) Permit CMS, including its agents, or its designated fee-for-service contractors, to conduct unannounced, on-site inspections to confirm the IDTF's compliance with these standards. The IDTF must—

(i) Be accessible during regular business hours to CMS and beneficiaries; and

(ii) Maintain a visible sign posting its normal business hours.

(h) *Failure to meet standards.* If an IDTF fails to meet one or more of the standards in paragraph (g) of this section at the time of enrollment, its enrollment will be denied. CMS will revoke a supplier's billing privileges if and IDTF is found not to meet the

standards in paragraph (g) or (b)(1) of this section.

Subpart I—Payment of SMI Benefits

■ 10. Section 410.160 is amended by adding paragraphs (b)(7) and (b)(8) to read as follows:

§ 410.160 Part B annual deductible.

* * * * *

(b) * * *

(7) Beginning January 1, 2007, colorectal cancer screening tests as described in § 410.37.

(8) Beginning January 1, 2007, ultrasound screening for abdominal aortic aneurysms described in § 410.19.

* * * * *

PART 411—EXCLUSIONS FROM MEDICARE AND LIMITATIONS ON MEDICARE PAYMENT

■ 11. The authority citation for part 411 is amended to read as follows:

Authority: Secs. 1102, 1860D–1 through 1860D–42, 1871, and 1877 of the Social Security Act (42 U.S.C. 1302, 1395w–101 through 1395w–152, 1395hh, and 1395nn).

Subpart A—General Exclusions and Exclusion of Particular Services

■ 12. Section 411.15 is amended by—

■ A. Revising paragraph (a)(1).

■ B. Adding a new paragraph (k)(12).

■ C. Revising paragraph (o).

The revisions and addition read as follows:

§ 411.15 Particular services excluded from coverage.

* * * * *

(a) * * *

(1) Examinations performed for a purpose other than treatment or diagnosis of a specific illness, symptoms, complaint, or injury, except for screening mammography, colorectal cancer screening tests, screening pelvic exams, prostate cancer screening tests, glaucoma screening exams, initial preventive physical examinations, or ultrasound screening for abdominal aortic aneurysms that meet the criteria specified in paragraphs (k)(6) through (k)(12) of this section.

* * * * *

(k) * * *

(12) In the case of ultrasound screening for abdominal aortic aneurysms, with the goal of early detection of abdominal aortic aneurysms, subject to the conditions and limitation specified in § 410.19 of this chapter.

* * * * *

(o) *Experimental or investigational devices.* Experimental or investigational devices, except for certain devices—

(1) Categorized by the FDA as a Category A or B device defined in § 405.201(b) of this chapter; and

(2) Furnished in accordance with the CMS clinical research policy.

* * * * *

PART 413—PRINCIPLES OF REASONABLE COST REIMBURSEMENT; PAYMENT FOR END-STAGE RENAL DISEASE SERVICES; PROSPECTIVELY DETERMINED PAYMENT RATES FOR SKILLED NURSING FACILITIES

■ 13. The authority citation for part 413 continues to read as follows:

Authority: Secs. 1102, 1138(b), 1812(d), 1814(b), 1815, 1833(a), (i), and (n), 1871, 1881, 1883, and 1886 of the Social Security Act (42 U.S.C. 1302, 1320b–8(b), 1395d(d), 1395f(b), 1395g, 1395l(a), (i), and (n), 1395hh, 1395rr, 1395tt, and 1395ww).

Subpart F—Specific Categories of Costs

■ 14. Section 413.89 is amended by revising paragraphs (a) and (i) to read as follows:

§ 413.89 Bad debts, charity, and courtesy allowances.

(a) *Principle.* Bad debts, charity, and courtesy allowances are deductions from revenue and are not to be included in allowable cost. However, subject to the limitations described under paragraph (h) of this section and the exception for services described under paragraph (i) of this section, bad debts attributable to the deductibles and coinsurance amounts are reimbursable under the program.

* * * * *

(i) *Exception.* Bad debts arising from covered services paid under a reasonable charge-based methodology or a fee schedule are not reimbursable under the program.

Subpart H—Payment for End-Stage Renal Disease (ESRD) Services and Organ Procurement Costs

■ 15. Section 413.178 is amended by adding paragraph (d) to read as follows:

§ 413.178 Bad debts.

* * * * *

(d) Bad debts arising from covered ESRD services paid under a reasonable charge-based methodology or a fee schedule are not reimbursable under the program.

PART 414—PAYMENT FOR PART B MEDICAL AND OTHER HEALTH SERVICES

■ 16. The authority citation for Part 414 continues to read as follows:

* * * * *

Authority: Secs. 1102, 1871, and 1881(b)(1) of the Social Security Act (42 U.S.C. 1302, 1395hh, and 1395rr(b)(1)).

■ 17. A new subpart G is added as follows:

Subpart G—Payment for New Clinical Diagnostic Laboratory Tests

Sec.

- 414.500 Basis and scope.
- 414.502 Definitions.
- 414.504 [Reserved]
- 414.506 Procedures for public consultation for payment for a new clinical diagnostic laboratory test.
- 414.508 Payment for a new clinical diagnostic laboratory test.
- 414.510 Laboratory date of service for specimens.

Subpart G—Payment for New Clinical Diagnostic Laboratory Tests

§ 414.500 Basis and scope.

This subpart implements provisions of 1833(h)(8) of the Act—procedures for determining the basis for, and amount of, payment for a new clinical diagnostic laboratory test with respect to which a new or substantially revised Healthcare Common Procedure Coding System code is assigned on or after January 1, 2005.

§ 414.502 Definitions.

For purposes of this subpart—
Substantially Revised Healthcare Common Procedure Coding System Code means a code for which there has been a substantive change to the definition of the test or procedure to which the code applies (such as a new analyte or a new methodology for measuring an existing analyte specific test).

§ 414.504 [Reserved]

§ 414.506 Procedures for public consultation for payment for a new clinical diagnostic laboratory test.

For a new clinical diagnostic laboratory test that is assigned a new or substantially revised code on or after January 1, 2005, CMS determines the payment after the performance of the following:

(a) CMS makes available to the public (through CMS's Internet Web site) a list that includes codes for which establishment of a payment amount is being considered for the next calendar year.

(b) CMS publishes a **Federal Register** notice of a meeting to receive public comments and recommendations (and data on which recommendations are based) on the appropriate basis, as specified in § 414.508, for establishing payment amounts for the list of codes made available to the public.

(c) Not fewer than 30 days after publication of the notice in the **Federal Register**, CMS convenes a meeting that includes representatives of CMS officials involved in determining payment amounts, to receive public comments and recommendations (and data on which the recommendations are based).

(d) Considering the comments and recommendations (and accompanying data) received at the public meeting, CMS develops and makes available to the public (through an Internet Web site and other appropriate mechanisms) a list of—

(1) Proposed determinations with respect to the appropriate basis for establishing a payment amount for each code, with an explanation of the reasons for each determination, the data on which the determinations are based, and a request for public written comments within a specified time period on the proposed determination; and

(2) Final determinations of the payment amounts for tests, with the rationale for each determination, the data on which the determinations are based, and responses to comments and suggestions from the public.

§ 414.508 Payment for a new clinical diagnostic laboratory test.

For a new clinical diagnostic laboratory test that is assigned a new or substantially revised code on or after January 1, 2005, CMS determines the payment amount based on either of the following:

(a) *Crosswalking*. Crosswalking is used if it is determined that a new test is comparable to an existing test, multiple existing test codes, or a portion of an existing test code.

(1) CMS assigns to the new test code, the local fee schedule amounts and national limitation amount of the existing test.

(2) Payment for the new test code is made at the lesser of the local fee schedule amount or the national limitation amount.

(b) *Gapfilling*. Gapfilling is used when no comparable existing test is available.

(1) In the first year, carrier-specific amounts are established for the new test code using the following sources of information to determine gapfill amounts, if available:

(i) Charges for the test and routine discounts to charges;

(ii) Resources required to perform the test;

(iii) Payment amounts determined by other payers; and

(iv) Charges, payment amounts, and resources required for other tests that may be comparable or otherwise relevant.

(2) In the second year, the test code is paid at the national limitation amount, which is the median of the carrier-specific amounts.

(3) After the first year of gapfilling, CMS determines whether the carrier-specific amounts will pay for the test appropriately. If CMS determines that the carrier-specific amounts will not pay for the test appropriately, CMS may crosswalk the test.

§ 414.510 Laboratory date of service for specimens.

The date of service for a laboratory test is as follows:

(a) Except as provided under paragraph (b) of this section, the date of service of the test must be the date the specimen was collected.

(b)(1) If a specimen was collected over a period that spans 2 calendar days, then the date of service must be the date the collection ended.

(2) In the case of a test performed on a stored specimen, if a specimen was stored for—

(i) Less than or equal to 30 calendar days from the date it was collected, the date of service of the test must be the date the test was performed only if—

(A) The test is ordered by the patient's physician at least 14 days following the date of the patient's discharge from the hospital;

(B) The specimen was collected while the patient was undergoing a hospital surgical procedure;

(C) It would be medically inappropriate to have collected the sample other than during the hospital procedure for which the patient was admitted;

(D) The results of the test do not guide treatment provided during the hospital stay; and

(E) The test was reasonable and medically necessary for the treatment of an illness.

(ii) More than 30 calendar days before testing, the specimen is considered to have been archived and the date of service of the test must be the date the specimen was obtained from storage.

(3) In the case of a chemotherapy sensitivity test performed on live tissue, the date of service of the test must be the date the test was performed only if—

(i) The decision regarding the specific chemotherapeutic agents to test is made at least 14 days after discharge;

(ii) The specimen was collected while the patient was undergoing a hospital surgical procedure;

(iii) It would be medically inappropriate to have collected the sample other than during the hospital procedure for which the patient was admitted;

(iv) The results of the test do not guide treatment provided during the hospital stay; and,

(v) The test was reasonable and medically necessary for the treatment of an illness.

(4) For purposes of this section, "chemotherapy sensitivity test" means a test identified by the Secretary as a test that requires a fresh tissue sample to test the sensitivity of tumor cells to various chemotherapeutic agents. The Secretary identifies such tests through program instructions.

Subpart H—Fee Schedule for Ambulance Services

■ 18. Section 414.605 is amended by—

■ A. Removing the definition of "Goldsmith modification."

■ B. Revising the definition of "rural area."

■ C. Adding the definition of "urban area" in alphabetical order.

The revisions and addition read as follows:

§ 414.605 Definitions.

* * * * *

Rural area means an area located outside an urban area, or a rural census tract within a Metropolitan Statistical Area as determined under the most recent version of the Goldsmith modification as determined by the Office of Rural Health Policy of the Health Resources and Services Administration.

* * * * *

Urban area means a Metropolitan Statistical Area, as defined by the Executive Office of Management and Budget.

■ 19. Section 414.610 is amended by revising paragraph (g) to read as follows:

§ 414.610 Basis of payment.

* * * * *

(g) *Adjustments.* The Secretary monitors payment and billing data on an ongoing basis and adjusts the CF and air ambulance rates as appropriate to reflect actual practices under the fee schedule. These rates are not adjusted solely because of changes in the total number of ambulance transports.

Subpart J—Submission of Manufacturer's Average Sales Price Data

■ 20. Section 414.802 is amended by adding the definition of "Bona fide service fees" in alphabetical order to read as follows:

§ 414.802 Definitions.

* * * * *

Bona fide service fees means fees paid by a manufacturer to an entity, that represent fair market value for a bona fide, itemized service actually performed on behalf of the manufacturer that the manufacturer would otherwise perform (or contract for) in the absence of the service arrangement, and that are not passed on in whole or in part to a client or customer of an entity, whether or not the entity takes title to the drug.

* * * * *

■ 21. Section 414.804 is amended by revising paragraphs (a)(1) through (a)(4) to read as follows:

§ 414.804 Basis of payment.

(a) * * *

(1) The manufacturer's average sales price for a quarter for a drug represented by a particular 11-digit National Drug Code must be calculated as the manufacturer's sales to all purchasers in the United States for that particular 11-digit National Drug Code (after excluding sales as specified in paragraph (a)(4) of this section and then deducting price concessions as specified in paragraphs (a)(2) and (a)(3) of this section) divided by the total number of units sold by the manufacturer in that quarter (after excluding units associated with sales as specified in paragraph (a)(4) of this section).

(2) *Price concessions.* (i) In calculating the manufacturer's average sales price, a manufacturer must deduct price concessions. Price concessions include the following types of transactions and items:

(A) Volume discounts.

(B) Prompt pay discounts.

(C) Cash discounts.

(D) Free goods that are contingent on any purchase requirement.

(E) Chargebacks and rebates (other than rebates under the Medicaid program).

(ii) For the purposes of paragraph (a)(2)(i), bona fide services fees are not considered price concessions.

(3) To the extent that data on price concessions, as described in paragraph (a)(2) of this section, are available on a lagged basis, the manufacturer must estimate this amount in accordance with the methodology described in this paragraph.

(i)(A) For each National Drug Code with at least 12 months of sales (including products for which the manufacturer has redesignated the National Drug Code for the specific product and package size and has 12 months of sales across the prior and current National Drug Codes), after adjusting for exempted sales, the manufacturer calculates a percentage equal to the sum of the price concessions for the most recent 12-month period available associated with sales subject to the average sales price reporting requirement divided by the total in dollars for the sales subject to the average sales price reporting requirement for the same 12-month period.

(B) For each National Drug Code with less than 12 months of sales, the calculation described in paragraph (i)(A) of this section is performed for the time period equaling the total number of months of sales.

(ii) The manufacturer multiplies the applicable percentage described in paragraph (a)(3)(i)(A) or (a)(3)(i)(B) of this section by the total in dollars for the sales subject to the average sales price reporting requirement (after adjusting for exempted sales) for the quarter being submitted. (The manufacturer must carry a sufficient number of decimal places in the calculation of the price concessions percentage in order to round accurately the net total sales amount for the quarter to the nearest whole dollar.) The result of this multiplication is then subtracted from the total in dollars for the sales subject to the average sales price reporting requirement (after adjusting for exempted sales) for the quarter being submitted.

(iii) The manufacturer uses the result of the calculation described in paragraph (a)(3)(ii) of this section as the numerator and the number of units sold in the quarter (after adjusting for exempted sales) as the denominator to calculate the manufacturer's average sales price for the National Drug Code for the quarter being submitted.

(iv) *Example.* After adjusting for exempted sales, the total lagged price concessions (discounts, rebates, etc.) over the most recent 12-month period available associated with sales for National Drug Code 12345-6789-01 subject to the ASP reporting requirement equal \$200,000, and the total in dollars for the sales subject to the average sales price reporting requirement for the same period equals \$600,000. The lagged price concessions percentage for this period equals $200,000/600,000 = 0.33333$. The total in dollars for the sales subject to the

average sales price reporting requirement for the quarter being reported, after accounting for non-lagged price concessions, equals \$50,000 for 10,000 units sold. The manufacturer's average sales price calculation for this National Drug Code for this quarter is: \$50,000 - (0.33333 x \$50,000) = \$33,334 (net total sales amount); \$33,334/10,000 = \$3.33 (average sales price).

(4) Exempted sales. (i) In calculating the manufacturer's average sales price, a manufacturer must exclude sales that are exempt from inclusion in the determination of the best price under section 1927(c)(1)(C)(i) of the Act and sales that are merely nominal in amount as applied for purposes of section 1927(c)(1)(C)(ii)(III) of the Act, as limited by section 1927(c)(1)(D) of the Act.

(ii) In determining nominal sales exempted under section 1927(c)(1)(C)(ii)(III) of the Act, the manufacturer calculates the average manufacturer price as defined in section 1927(k) of the Act and then identifies sales that are eligible to be considered a nominal sale under section 1927(c)(1)(D) of the Act and are at less than 10 percent of the average manufacturer price. To identify nominal sales, the manufacturer must use the average manufacturer price for the calendar quarter that is the same calendar quarter as the average sales price reporting period.

Subpart K—Payment for Drugs and Biologicals Under Part B

■ 22. Section 414.904 is amended by revising paragraphs (d)(2)(iii) and (d)(3) to read as follows:

§ 414.904 Average sales price as the basis for payment.

* * * * *

- (d) * * *
(2) * * *

(iii) Effective for drugs and biologicals furnished in CY 2006 and subsequent calendar years, the payment for such drugs and biologicals furnished in connection with renal dialysis services and separately billed by freestanding and hospital-based renal dialysis facilities not paid on a cost basis is the amount determined under section 1847A of the Act.

(3) Widely available market price and average manufacturer price. If the Inspector General finds that the average sales price exceeds the widely available market price or the average manufacturer price by 5 percent or more in CYs 2005, 2006, and 2007, the

payment limit in the quarter following the transmittal of this information to the Secretary is the lesser of the widely available market price or 103 percent of the average manufacturer price.

* * * * *

PART 415—SERVICES FURNISHED BY PHYSICIANS IN PROVIDERS, SUPERVISING PHYSICIANS IN TEACHING SETTINGS, AND RESIDENTS IN CERTAIN SETTINGS

■ 23. The authority citation for part 415 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

Subpart C—Part B Carrier Payments for Physician Services to Beneficiaries in Providers

■ 24. Section 415.130 is amended by revising paragraph (d) to read as follows:

§ 415.130 Conditions for payment: Physician pathology services.

* * * * *

(d) Physician pathology services furnished by an independent laboratory. The technical component of physician pathology services furnished by an independent laboratory to a hospital inpatient or outpatient on or before December 31, 2006 may be paid to the laboratory by the carrier under the physician fee schedule if the Medicare beneficiary is a patient of a covered hospital as defined in paragraph (a)(1) of this section. For services furnished after December 31, 2006, an independent laboratory may not bill the carrier for the technical component of physician pathology services furnished to a hospital inpatient or outpatient.

PART 424—CONDITIONS FOR MEDICARE PAYMENT

■ 25. The authority citation for part 424 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

Subpart B—Certification and Plan of Treatment Requirements

■ 26. Section 424.24 is amended by—
■ A. Redesignating paragraph (f) as paragraph (g).
■ B. Adding a new paragraph (f).
The addition reads as follows:

§ 424.24 Requirements for medical and other health services furnished by providers under Medicare Part B.

* * * * *

(f) Blood glucose testing. For each blood glucose test, the physician must certify that the test is medically necessary. A physician's standing order is not sufficient to order a series of blood glucose tests payable under the clinical laboratory fee schedule.

* * * * *

Subpart F—Limitations on Assignment and Reassignment of Claims

■ 27. Section 424.80 is amended by—
■ A. Revising the heading of paragraph (d).
■ B. Revising paragraph (d)(2)
The revisions read as follows:

§ 424.80 Prohibition of reassignment of claims by suppliers.

* * * * *

(d) Reassignment to an entity under an employer-employee relationship or under a contractual arrangement: Conditions and limitations. (1) * * *

(2) Access to records. The supplier who furnishes the service has unrestricted access to claims submitted by an entity for services provided by that supplier. This paragraph applies irrespective of whether the supplier is an employee or whether the service is provided under a contractual arrangement. If an entity refuses to provide, upon request, the billing information to the supplier performing the service, the entity's right to receive reassigned benefits may be revoked under § 424.82(c)(3).

(Catalog of Federal Domestic Assistance Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: October 31, 2006.

Leslie V. Norwalk,
Acting Administrator, Centers for Medicare & Medicaid Services.

Approved: November 1, 2006.

Michael O. Leavitt,
Secretary.

Note: These addenda will not appear in the Code of Federal Regulations.

Addendum A: Explanation and Use of Addenda B

The addenda on the following pages provide various data pertaining to the Medicare fee schedule for physicians' services furnished in 2007. Addendum B contains the RVUs for work, non-facility PE, facility PE, and malpractice expense, and other information for all services included in the PFS.

In previous years, we have listed many services in Addendum B that are not paid under the PFS. To avoid publishing as many pages of codes for these services, we are not including clinical laboratory codes or the alphanumeric codes (Healthcare Common Procedure Coding System (HCPCS) codes not

included in CPT) not paid under the PFS in Addendum B.

Addendum B—2007 Relative Value Units and Related Information Used in Determining Medicare Payments for 2007

This addendum contains the following information for each CPT code and alphanumeric HCPCS code, except for: Alphanumeric codes beginning with B (enteral and parenteral therapy), E (durable medical equipment), K (temporary codes for nonphysicians' services or items), or L (orthotics); and codes for anesthesiology. Please also note the following:

- An "NA" in the "Non-facility PE RVUs" column of Addendum B means that CMS has not developed a PE RVU in the non-facility setting for the service because it is typically performed in the hospital (for example, an open heart surgery is generally performed in the hospital setting and not a physician's office). If there is an "NA" in the non-facility PE RVU column, and the contractor determines that this service can be performed in the non-facility setting, the service will be paid at the facility PE RVU rate.

- Services that have an "NA" in the "Facility PE RVUs" column of Addendum B are typically not paid using the PFS when provided in a facility setting. These services (which include "incident to" services and the technical portion of diagnostic tests) are generally paid under either the outpatient hospital prospective payment system or bundled into the hospital inpatient prospective payment system payment.

1. *CPT/HCPCS code.* This is the CPT or alphanumeric HCPCS number for the service. Alphanumeric HCPCS codes are included at the end of this addendum.

2. *Modifier.* A modifier is shown if there is a technical component (modifier TC) and a professional component (PC) (modifier -26) for the service. If there is a PC and a TC for the service, Addendum B contains three entries for the code. A code for: The global values (both professional and technical); modifier -26 (PC); and, modifier TC. The global service is not designated by a modifier, and physicians must bill using the code without a modifier if the physician furnishes both the PC and the TC of the service.

Modifier-53 is shown for a discontinued procedure, for example, a colonoscopy that is not completed. There will be RVUs for a code with this modifier.

3. *Status indicator.* This indicator shows whether the CPT/HCPCS code is in the PFS and whether it is separately payable if the service is covered.

A = Active code. These codes are separately payable under the PFS if covered. There will be RVUs for codes with this status. The presence of an "A" indicator does not mean that Medicare has made a national coverage determination regarding the service. Carriers remain responsible for coverage decisions in the absence of a national Medicare policy.

B = Bundled code. Payments for covered services are always bundled into payment for other services not specified. If RVUs are

shown, they are not used for Medicare payment. If these services are covered, payment for them is subsumed by the payment for the services to which they are incident (an example is a telephone call from a hospital nurse regarding care of a patient).

C = Carriers price the code. Carriers will establish RVUs and payment amounts for these services, generally on an individual case basis following review of documentation, such as an operative report.

D* = Deleted/discontinued code.

E = Excluded from the PFS by regulation. These codes are for items and services that CMS chose to exclude from the fee schedule payment by regulation. No RVUs are shown, and no payment may be made under the PFS for these codes. Payment for them, when covered, continues under reasonable charge procedures.

F = Deleted/discontinued codes. (Code not subject to a 90-day grace period.) These codes are deleted effective with the beginning of the year and are never subject to a grace period. This indicator is no longer effective beginning with the 2005 fee schedule as of January 1, 2005.

G = Code not valid for Medicare purposes. Medicare uses another code for reporting of, and payment for, these services. (Codes subject to a 90-day grace period.) This indicator is no longer effective with the 2005 PFS as of January 1, 2005.

H* = Deleted modifier. For 2000 and later years, either the TC or PC component shown for the code has been deleted and the deleted component is shown in the database with the H status indicator.

I = Not valid for Medicare purposes. Medicare uses another code for the reporting of, and the payment for these services. (Codes not subject to a 90-day grace period.)

L = Local codes. Carriers will apply this status to all local codes in effect on January 1, 1998 or subsequently approved by central office for use. Carriers will complete the RVUs and payment amounts for these codes.

M = Measurement codes, used for reporting purposes only. There are no RVUs and no payment amounts for these codes. Medicare uses them to aid with performance measurement. No separate payment is made. These codes should be billed with a zero ((\$0.00) charge and are denied) on the MPFSDB.

N = Non-covered service. These codes are noncovered services. Medicare payment may not be made for these codes. If RVUs are shown, they are not used for Medicare payment.

R = Restricted coverage. Special coverage instructions apply. If the service is covered and no RVUs are shown, it is carrier-priced.

T = There are RVUs for these services, but they are only paid if there are no other services payable under the PFS billed on the same date by the same provider. If any other services payable under the PFS are billed on the same date by the same provider, these services are bundled into the service(s) for which payment is made.

X = Statutory exclusion. These codes represent an item or service that is not within

the statutory definition of "physicians' services" for PFS payment purposes. No RVUs are shown for these codes, and no payment may be made under the PFS. (Examples are ambulance services and clinical diagnostic laboratory services.)

4. *Description of code.* This is an abbreviated version of the narrative description of the code.

5. *Physician work RVUs.* These are the RVUs for the physician work for this service in 2007. As stated in the June 29, 2006 proposed notice, the RVUs for codes with a 10-or 90-day global period reflect the application of the RUC-recommended values for the E/ M services that are included as part of the global period for the service.

Note: The separate budget neutrality adjustor is not reflected in these physician work RVUs.

6. *Fully implemented non-facility practice expense RVUs.* These are the fully implemented resource-based PE RVUs for non-facility settings.

7. *Transitional Non-facility practice expense RVUs.* These are the 2007 resource-based PE RVUs for non-facility settings.

8. *Fully implemented facility practice expense RVUs.* These are the fully implemented resource-based PE RVUs for facility settings.

9. *Transitional facility practice expense RVUs.* These are the 2007 resource-based PE RVUs for facility settings.

10. *Malpractice expense RVUs.* These are the RVUs for the malpractice expense for the service for 2006.

11. *Non-facility total.* This is the sum of the work, fully implemented non-facility PE, and malpractice expense RVUs.

12. *Transitional non-facility total.* This is the sum of the work, 2007 transitional non-facility PE, and malpractice expense RVUs.

13. *Facility total.* This is the sum of the work, fully implemented facility PE, and malpractice expense RVUs.

14. *Transitional facility total.* This is the sum of the work, 2007 transitional facility PE, and malpractice expense RVUs.

15. *Global period.* This indicator shows the number of days in the global period for the code (0, 10, or 90 days). An explanation of the alpha codes follows:

MMM = Code describes a service furnished in uncomplicated maternity cases including antepartum care, delivery, and postpartum care. The usual global surgical concept does not apply. See the 1999 Physicians' Current Procedural Terminology for specific definitions.

XXX = The global concept does not apply.

YYY = The global period is to be set by the carrier (for example, unlisted surgery codes).

ZZZ = Code related to another service that is always included in the global period of the other service. (Note: Physician work and PE are associated with intra service time and in some instances in the post service time.

*Codes with these indicators had a 90-day grace period before January 1, 2005.

ADDENDUM I.—RUCA RURALITY
LEVEL BY STATE AND ZIP CODE—
Continued

| State | Zip code | RUCA level |
|-------|----------|------------|
| WY | 83414 | 10.2 |

R = Rural
U = Urban

The use of either "R*" or "U*" as an indicator in the "RUCA Level" column signifies that this area is either a military installation or located outside the 50 United States. Therefore, a RUCA level is not available for it.

ADDENDUM J.—LIST OF CPT 1/
HCPCS CODES USED TO DESCRIBE
CERTAIN DESIGNATED HEALTH
SERVICE CATEGORIES² UNDER SEC-
TION 1877 OF THE SOCIAL SECURITY
ACT

[Effective date January 1, 2007]

CLINICAL LABORATORY SERVICES

INCLUDE CPT codes for all clinical laboratory services in the 80000 series, except EXCLUDE CPT codes for the following blood component collection services:

| | |
|---|------------------------------|
| 86890 | Autologous blood process |
| 86891 | Autologous blood, op salvage |
| 86927 | Plasma, fresh frozen |
| 86930 | Frozen blood prep |
| 86931 | Frozen blood thaw |
| 86932 | Frozen blood freeze/thaw |
| 86945 | Blood product/irradiation |
| 86950 | Leukocyte transfusion |
| 86960 | Vol reduction of blood/prod |
| 86965 | Pooling blood platelets |
| 86985 | Split blood or products |
| INCLUDE the following CPT and HCPCS level 2 codes for other clinical laboratory services: | |
| 0026T | Measure remnant lipoproteins |
| 0030T | Antiprothrombin antibody |
| 0041T | Detect ur infect agnt w/cpas |
| 0043T | Co expired gas analysis |
| 0058T | Cryopreservation, ovary tiss |
| 0059T | Cryopreservation, oocyte |
| 0064T | Spectroscop eval expired gas |
| 0085T | Breath test heart reject |
| 0087T | Sperm eval hyaluronan |
| 0103T | Holotranscobalamin |
| 0104T | At rest cardio gas rebreath |
| 0111T | RBC membranes fatty acids |
| 0140T | Exhaled breath condensate ph |
| 36415 | Routine venipuncture |
| 78110 | Plasma volume, single |
| 78111 | Plasma volume, multiple |
| 78120 | Red cell mass, single |
| 78121 | Red cell mass, multiple |
| 78122 | Blood volume |
| 78130 | Red cell survival study |
| 78191 | Platelet survival |
| 78270 | Vit B-12 absorption exam |
| 78271 | Vit B-12 absrp exam, int fac |
| 78272 | Vit B-12 absorp, combined |
| 78725 | Kidney function study |
| 78267 | Breath tst attain/anal c-14 |
| 78268 | Breath test analysis c-14 |
| G0027 | Semen analysis |
| G0103 | Psa, total screening |
| G0123 | Screen cerv/vag thin layer |
| G0124 | Screen c/v thin layer by MD |
| G0141 | Scr c/v cyto,autosys and md |
| G0143 | Scr c/v cyto,thinlayer,rescr |
| G0144 | Scr c/v cyto,thinlayer,rescr |
| G0145 | Scr c/v cyto,thinlayer,rescr |
| G0147 | Scr c/v cyto, automated sys |
| G0148 | Scr c/v cyto, autosys, rescr |
| G0306 | CBC/diffwbc w/o platelet |

| Q0114 | | Fern test |
| Q0115 | | Post-coital mucous exam |
| PHYSICAL THERAPY, OCCUPATIONAL THER- APY, AND SPEECH-LANGUAGE PATHOLOGY | | |
| INCLUDE the following CPT and HCPCS codes for physical therapy/occupational therapy/speech-lan- guage pathology services: | | |
| 0019T | | Extracorp shock wv tx,ms nos |
| 0029T | | Magnetic tx for incontinence |
| 64550 | | Apply neurostimulator |
| 90901 | | Biofeedback train, any meth |
| 90911 | | Biofeedback peri/uro/rectal |
| 92506 | | Speech/hearing evaluation |
| 92507 | | Speech/hearing therapy |
| 92508 | | Speech/hearing therapy |
| 92526 | | Oral function therapy |
| 92597 | | Oral speech device eval |
| 92607 | | Ex for speech device rx, 1hr |
| 92608 | | Ex for speech device rx addl |
| 92609 | | Use of speech device service |
| 92610 | | Evaluate swallowing function |
| 92611 | | Motion fluoroscopy/swallow |
| 92612 | | Endoscopy swallow tst (fees) |
| 92614 | | Laryngoscopic sensory test |
| 92616 | | Fees w/laryngeal sense test |
| 93797 | | Cardiac rehab |
| 93798 | | Cardiac rehab/monitor |
| 94667 | | Chest wall manipulation |
| 94668 | | Chest wall manipulation |
| 95831 | | Limb muscle testing, manual |
| 95832 | | Hand muscle testing, manual |
| 95833 | | Body muscle testing, manual |
| 95834 | | Body muscle testing, manual |
| 95851 | | Range of motion measure- ments |
| 95852 | | Range of motion measure- ments |
| 96000 | | Motion analysis, video/3d |
| 96001 | | Motion test w/ft press meas |
| 96002 | | Dynamic surface emg |
| 96003 | | Dynamic fine wire emg |
| 96105 | | Assessment of aphasia |
| 96110 | | Developmental test, lim |
| 96111 | | Developmental test, extend |
| 97001 | | Pt evaluation |
| 97002 | | Pt re-evaluation |
| 97003 | | Ot evaluation |
| 97004 | | Ot re-evaluation |
| 97010 | | Hot or cold packs therapy |
| 97012 | | Mechanical traction therapy |
| 97016 | | Vasopneumatic device therapy |
| 97018 | | Paraffin bath therapy |
| 97022 | | Whirlpool therapy |
| 97024 | | Diathermy eg, microwave |
| 97026 | | Infrared therapy |
| 97028 | | Ultraviolet therapy |
| 97032 | | Electrical stimulation |
| 97033 | | Electric current therapy |
| 97034 | | Contrast bath therapy |
| 97035 | | Ultrasound therapy |

Part III

Department of Transportation

Federal Aviation Administration

**14 CFR Part 145
Repair Stations; Proposed Rule**

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 145**

[Docket No. FAA-2006-26408]

RIN 2120-A153

Repair Stations**AGENCY:** Federal Aviation Administration (FAA), DOT.**ACTION:** Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to amend the regulations for repair stations by revising the system of ratings and requiring repair stations to establish a quality program. The FAA also proposes additional changes critical to maintaining safety. These include requiring a repair station to maintain a capability list, designating a chief inspector, and having permanent housing for its facilities, equipment, materials, and personnel. In addition, this proposal also specifies those instances when the FAA may deny a repair station certificate. The proposal looks at the particular cases where a previously held certificate has been revoked. Lastly, the FAA proposes to clarify recent revisions to the repair station regulations. This action is necessary to reflect changes in aviation technology and repair station business practices.

DATES: Send your comments on or before March 1, 2007.**ADDRESSES:** You may send comments identified by Docket Number FAA-2006-26408 using any of the following methods:

- *DOT Docket Web site:* Go to <http://dms.dot.gov> and follow the instructions for sending your comments electronically.

- *Government-wide rulemaking Web site:* Go to <http://www.regulations.gov> and follow the instructions for sending your comments electronically.

- *Mail:* Docket Management Facility; U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590-001.

- *Fax:* 1-202-493-2251.

- *Hand Delivery:* Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For more information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

Privacy: We will post all comments we receive, without change, to <http://dms.dot.gov>, including any personal information you provide. For more information, see the Privacy Act discussion in the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: To read background documents or comments received, go to <http://dms.dot.gov> at any time or to Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: George W. Bean, General Aviation and Repair Station Branch, AFS-340, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-3109; facsimile (202) 267-5115, e-mail George.W.Bean@faa.gov.

SUPPLEMENTARY INFORMATION:**Comments Invited**

The FAA invites interested persons to take part in this rulemaking by sending written comments, data, or views. We also invite comments about the economic, environmental, energy, or federalism impacts that might result from adopting the proposals in this document. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. We ask that you send us two copies of written comments.

We will file in the docket all comments we receive, as well as a report summarizing each substantive public contact with FAA personnel about this proposed rulemaking. The docket is available for public inspection before and after the comment closing date. If you wish to review the docket in person, go to the address in the **ADDRESSES** section of this preamble between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also review the docket using the Internet at the web address in the **ADDRESSES** section.

Privacy Act: Using the search function of our docket Web site, anyone can find and read the comments received into any of our dockets, including the name of the individual sending the comment (or signing the comment on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477-78) or you may visit <http://dms.dot.gov>.

Before acting on this proposal, we will consider all comments we receive

by the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change this proposal because of the comments we receive.

If you want the FAA to acknowledge receipt of your comments on this proposal, include with your comments a pre-addressed, stamped postcard on which the docket number appears. We will stamp the date on the postcard and mail it to you.

Proprietary or Confidential Business Information

Do not file in the docket information that you consider to be proprietary or confidential business information. Send or deliver this information directly to the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this document. You must mark the information that you consider proprietary or confidential. If you send the information on a disk or CD ROM, mark the outside of the disk or CD ROM and also identify electronically within the disk or CD ROM the specific information that is proprietary or confidential.

Under 14 CFR 11.35(b), when we are aware of proprietary information filed with a comment, we do not place it in the docket. We hold it in a separate file to which the public does not have access, and place a note in the docket that we have received it. If we receive a request to examine or copy this information, we treat it as any other request under the Freedom of Information Act (5 U.S.C. 552). We process such a request under the DOT procedures found in 49 CFR part 7.

Availability of Rulemaking Documents

You can get an electronic copy using the Internet by:

- (1) Searching the Department of Transportation's electronic Docket Management System (DMS) Web page (<http://dms.dot.gov/search>);

- (2) Visiting the Office of Rulemaking's Web page at <http://www.faa.gov/avr/arm/index.cfm>; or

- (3) Accessing the Government Printing Office's Web page at <http://www.gpoaccess.gov/fr/index.html>.

You can also get a copy by sending a request to the Federal Aviation Administration, Office of Rulemaking, ARM-1, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-9680. Make sure to identify the docket number, notice number, or amendment number of this rulemaking.

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in title 49, subtitle VII, part A, subpart III, section 44701, General requirements, and Section 44707, Examining and rating air agencies. Under section 44701, the FAA may prescribe regulations and standards in the interest of safety for inspecting, servicing, and overhauling aircraft, aircraft engines, propellers, and appliances. It may also prescribe equipment and facilities for, and the timing and manner of, inspecting, servicing, and overhauling. Under section 44707, the FAA may examine and rate repair stations.

This regulation is within the scope of section 44701 since it establishes new regulations for a repair station to establish a quality program, requires a repair station to maintain a capability list, designate a chief inspector, and have permanent housing for all its facilities, equipment, materials, and personnel. This regulation is within the scope of section 44707 since it revises the system of ratings for repair stations and specifies those instances when the FAA may deny the issuance of a repair station certificate, especially when a previously held certificate has been revoked.

Background

In 1975, industry participants in the FAA's First Biennial Operations Review recommended that the agency revise Title 14, Code of Federal Regulations (CFR) part 145, Repair Stations. The FAA subsequently adopted minor amendments to part 145; however, the FAA did not make any major revisions until November 22, 1988 (Amendment No. 145-21, 53 FR 47376). In that amendment, the FAA expanded the scope of work that U.S.-certificated repair stations located outside the United States may perform. It also allowed certain repair stations to contract maintenance functions to noncertificated entities under specific conditions.

The FAA held four public meetings in 1989 as part of a regulatory review of 14 CFR part 43, Maintenance, Preventive Maintenance, Rebuilding, and Alteration, 14 CFR part 65, Certification: Airmen Other than Flight Crewmembers, subpart E, Repairmen,

and 14 CFR part 145. These meetings provided a forum for the public to comment on possible revisions to the rules governing repair stations. More than 500 representatives of repair stations, airlines, unions, manufacturers, foreign governments, industry organizations, and individuals attended the meetings.

The goal of the meetings was to gather enough factual information from the public to decide whether the FAA should revise the repair station regulations, and if so, to determine what revisions the FAA should make. To prepare for the meetings, the FAA identified several areas of the repair station rules that might need revision. These areas were:

- Organization and format;
- Ratings and classes;
- Operations and inspection procedures;
- Manufacturers' maintenance facilities;
- Contracting of maintenance by repair stations;
- Repair station privileges;
- Facility, housing, and equipment requirements;
- Recordkeeping and report requirements; and
- Management, inspection personnel, and repairmen qualifications.

Participants discussed these issues at the FAA public meetings and sent written comments to Docket No. 25965, which the FAA set up for the regulatory review. Responses from participants at the meetings and comments received in the docket showed a need to revise and update repair station regulations.

After considering the comments and data collected, the FAA issued Notice of Proposed Rulemaking No. 99-09, "Part 145 Review: Repair Stations" (64 FR 33142, June 21, 1999). On July 30, 2001, the FAA issued "Repair Stations; Final rule with request for comments and direct final rule with request for comments" (66 FR 41088, August 6, 2001). The FAA requested comments on removing appendix A from part 145, which the FAA had not proposed originally, and on the paperwork burden. In that final rule, the FAA:

- Reorganized and clarified certain subparts and sections of part 145;
- Removed limited ratings for manufacturers' maintenance facilities;
- Changed repair station housing and equipment requirements;
- Included rules for exchanging equipment among satellite repair stations and for leasing equipment;
- Required repair stations to develop a repair station manual that prescribes its operating procedures;
- Required repair stations to develop a quality control manual that is similar

to the previously required inspection procedures manual;

- Provided for the operation of satellite repair stations;
- Expanded the scope of contract maintenance; and
- Required repair stations to develop a training program.

Although the FAA proposed a new system of ratings and classes in Notice No. 99-09, the FAA kept the existing system in the final rule.

The FAA received a significant number of comments opposing the proposal. Commenters agreed the repair station industry needs new ratings, however, they opposed the FAA's proposed system of ratings and classes. Therefore, the FAA decided to seek advice and recommendations from the affected aviation community before developing new rules for ratings and classes.

Also, the final rule did not include a quality assurance program, as proposed originally. Again, the FAA decided to seek advice and recommendations from the affected aviation community before developing new rules for quality assurance. The FAA also elected to use an established Federal advisory committee to gather information regarding ratings and quality assurance.

On October 15, 2001, FAA tasked the Aviation Rulemaking Advisory Committee (ARAC) to address ratings and quality assurance for repair stations. (66, FR 53281, October 19, 2001) The FAA asked ARAC to recommend a system of ratings for repair stations that would mitigate problems associated with the existing system and allow for growth of the aviation industry. Also, the FAA tasked ARAC to recommend a quality assurance program that would reflect industry requirements and account for the varying scope of repair station operations. Specifically, under the ratings task, the FAA tasked ARAC to:

- Review the existing system of ratings and classes contained in the current part 145 and in any other documents issued by the FAA pertaining to aeronautical repair stations.
- Review comments submitted to the FAA in response to the public meetings held in 1989 and the system of ratings proposed in June 1999 in Notice No. 99-09.
- Review challenges reported by Aviation Safety Inspectors (ASIs) under the existing system of ratings.
- Identify the challenges that aeronautical repair stations encounter under the existing system of ratings and classes, including those pertaining to:

- Current business practices that are not regulated that may require some form of control;
- Provisions in the current regulation that prevent repair stations from performing desired business practices; and
- Enforcement problems associated with the current regulations.
 - Draft a Technical Report that:
- Presents a review of the existing system of ratings and classes;
- Identifies various choices for rating systems;
- Identifies the advantages and disadvantages of each option;
- Provides economic information for each of the alternative rating systems; and
- Recommends a preferred system of ratings.

Under the quality assurance task, the FAA tasked ARAC to:

- Review the discussion about quality assurance in the June 1999 Notice of Proposed Rulemaking (Notice No. 99–09).

- Review comments relating to quality assurance submitted to the FAA in response to the public meetings held in 1989 and the quality assurance program requirements proposed in Notice No. 99–09.

- Review current industry practices relating to quality assurance issues to:

- Identify quality assurance systems currently used by some repair stations; and
- Analyze the elements of the systems used by the aviation industry.
 - Develop a Technical Report that:
- Presents a review of regulatory requirements that comprise a quality assurance program;
- Identifies various options for regulating quality assurance programs;
- Identifies the advantages and disadvantages of each option;
- Provides information on the economic impacts of applying a quality assurance system to various segments of the repair station industry; and
- Recommends a preferred quality assurance program or system.

ARAC sent its technical reports and recommendations to the FAA on August 13, 2002. The technical reports and recommendations contain details about each of the various options. Information on ARAC is available on the ARAC Web site: <http://www.faa.gov/avr/arm/arac>.

Action

In this rulemaking action, the FAA proposes a new rating system for repair stations and proposes requirements for

a quality system. The FAA bases this proposed rule on the public meetings held in 1989, comments to Docket No. 25965, comments to Notice No. 99–09, and recommendations from ARAC. The FAA also proposes additional changes critical to maintaining safety. These include: requiring a repair station to maintain a capability list; designating a chief inspector; and having permanent housing for all its facilities, equipment, materials, and personnel. In addition, the proposal also specifies those instances when the FAA may deny a repair station certificate. The proposal looks at the particular cases where a previously held certificate has been revoked. Lastly, the FAA proposes several minor amendments to the July 30, 2001 final rule. These amendments are necessary to clarify the rule.

Section-by-Section Analysis

Subpart B—Certification

Section 145.51 Application for Certificate

The FAA proposes to add a provision to the application procedures that would require an applicant for a repair station certificate to provide the FAA with a letter explaining how the applicant intends to comply with the requirements of part 145. Under long-standing FAA policy and practice, repair station certificate applicants have provided this letter that the FAA refers to as a “Letter of Compliance.” Since the letter is an essential part of the application process, the FAA finds it appropriate to include a requirement to provide the letter in the regulations for application for a repair station certificate.

The FAA proposes an editorial change to current § 145.51(a)(2) (proposed § 145.51(a)(3)) to make the wording consistent with proposed § 145.211(d). It would refer to a “quality system manual” rather than a “quality control manual.”

The FAA proposes adding the words “manufacturer” and “category” to proposed § 145.51(a)(4) to ensure consistency with the capability list requirements found in § 145.215.

The FAA proposes to clarify the text of § 145.51(b) by removing the ambiguity in the relieving provision concerning the availability of the equipment at the time of certification. This ambiguity results from the phrase specifying that the equipment requirement of the paragraph could be met “if the applicant has a contract acceptable to the FAA with another person to make the equipment available to the applicant at the time of

certification. * * * ” The FAA believes that the phrase lacks clarity and could be subject to arbitrary application in individual cases; i.e., one inspector might require the contract to be executed and all the equipment brought to the premises for a pre-certification inspection, while another inspector might only review the contract for the specified items. In the first example, the equipment could be returned to the supplier the next day, and not be returned to the repair station until the relevant work is being performed, as required by § 145.109(a).

Consistent with the requirement in § 145.109(a), and as noted by some of the commenters to the proposal in Notice No. 99–09, it is important that the equipment be in place when the work is being performed. That is the safety basis for the equipment requirement. If, at the time of initial certification or rating approval, an applicant has a contract acceptable to the FAA to make the equipment available when the relevant work is being performed, the FAA will be able to determine that the repair station has assessed its relevant needs, and that it has the means to obtain the pertinent equipment, tools, and test apparatus when necessary. The applicant, of course, retains the option to have the equipment, tools, and test apparatus in place during the certification process. The requirement remains in § 145.109(a) that those items be on the premises and under the repair station’s control whenever the work is being performed.

Additionally, the FAA notes that the text of existing § 145.109(a) contains a requirement to have “tools,” in addition to equipment and materials, whereas existing § 145.51(b) does not refer to tools. Section 145.109(a) currently requires a repair station to “have the equipment, tools, and materials necessary to perform the maintenance, preventive maintenance, or alterations. * * * ” [and that] The equipment, tools, and materials must be located on the premises and under the repair station’s control when the work is being done.” The FAA did not include the term “tools” in § 145.51(b) because of possible uncertainty as to what tools should be required for an applicant to have on site or under contract at the time of certification. We did not believe that an applicant, in order to obtain a repair station certificate, should be required to have on site at the time of initial certification or rating approval all the particular hand tools, etc., that an individual repairman or mechanic might possess. The term “equipment” in § 145.51(b) was meant to include items the FAA would consider to be “tools”

of the repair station. For example, a repair station's equipment might include items such as machines, jigs, fixtures, basic shop tools and associated tooling, necessary for the repair station to perform the work for which it is rated, as reflected on its proposed operations specifications and capability list.

We propose to clarify the scope of the kinds of items a repair station must have for initially obtaining certification by adding both *tools* and *test apparatus* to the list of items a repair station must have either on site or under contract. While the term *equipment* could be interpreted to include many examples of each, i.e., basic shop tools and test equipment, adding the term "tools" to the regulation would ensure that an applicant for a repair station certificate also includes on site, or in the contract, certain tools necessary for the rating sought that individual mechanics or repairmen might not possess. For example, this might include tools that are of a specialized nature for the rating or other tools that might be too large or expensive, or of a limited specialized nature. For the same reasons, and for consistency with the requirements in 14 CFR § 43.13(a), we propose to add "test apparatus" to the list of items a repair station must have in place for inspection or under contract at the time of initial certification or rating approval.

The FAA also proposes to remove the modifier "technical" from the term "data" for consistency with the other sections of the rule that use the term "data."

The FAA proposes to add a new paragraph (e) to § 145.51 to detail conditions under which a person may not apply for a repair station certificate. Unless otherwise authorized by the FAA, the following persons could not apply for a repair station certificate (nor would the FAA accept such an application) for one year from the date a previously revoked certificate was surrendered pursuant to the FAA's order of revocation:

- Any person who held a repair stations certificate that was revoked; and
- Any person who had a substantial ownership interest or substantial control over the operations of a repair station that has had its certificate revoked and who materially contributed to the circumstances causing the revocation.

The proposed rule would specify that the one-year period would begin to run on the date the certificate is surrendered to the FAA pursuant to the order of revocation. This proposed paragraph parallels § 61.13(d)(2), which pertains to pilots being able to reapply for a

certificate following revocation. Under the proposed text, a person whose certificate has been revoked needs prior authorization only if the person wishes to apply before the one-year term is up. The FAA revokes repair station certificates only for serious infractions of the regulations. The FAA believes that imposing a waiting period would serve as an additional deterrent against serious violations of the repair station regulations, thereby enhancing safety in the repair station industry.

Section 145.53 Issuance of certificate

Section 145.53 identifies who is entitled to a repair station certificate and appropriate ratings. Specifically, the section states that a person who meets the requirements of part 145 is entitled to a repair station certificate and appropriate ratings. Section 145.53(b) states, "if the person is located in a country with which the United States has a bilateral aviation safety agreement, the FAA may find that the person meets the requirements of this part based on certification from the civil aviation authority of that country." The FAA proposes to amend § 145.53(b) to state that the FAA may also base such finding on certification from an authority acceptable to the FAA.

This change permits the Administrator to base such a finding on a recommendation from a civil aviation authority that may not necessarily be the civil aviation authority of the country in which the repair station is located. Recent changes in Europe, for example, have led to the European Union forming the European Aviation Safety Agency (EASA). This new agency will carry out certain civil aviation safety functions for the European Community. The FAA must consider that over a period of time the United States may enter into aircraft maintenance agreements under which the FAA may base its actions on a certification made by a civil aviation authority other than a national aviation authority. Therefore, the proposal would revise the current regulation to allow for these different types of agreements. The FAA has determined that the change has no additional technical or economic impact on the regulation.

Also, the FAA proposes to add a new paragraph to § 145.53 identifying reasons the FAA may use to deny the issuance of a repair station certificate. The FAA proposes to deny a person a repair station certificate if:

- The applicant does not meet the eligibility requirements for the certificate sought, or does not complete the certification process.

- The applicant previously held a repair station certificate that was revoked.

- The applicant intends to fill or fills a key management position, (for example, accountable manager or chief inspector), with an individual who exercised control over or who held the same or a similar position with a repair station whose certificate was revoked, or was in the process of being revoked. That individual must have materially contributed to the circumstances causing the revocation or revocation process.

- The applicant held a key management position with a repair station certificate holder whose certificate was revoked, or was in the process of being revoked. The applicant must have materially contributed to the circumstances causing the revocation or causing the revocation process.

- An individual who will have control over or substantial ownership interest in the applicant had the same or similar control or interest in a repair station whose certificate was revoked, or is in the process of being revoked. That individual must have materially contributed to the circumstances causing revocation or causing the revocation process.

The last four criteria for denial are necessary because the FAA is aware of recent instances where persons whose repair station certificates were revoked continued to operate by obtaining new repair station certificates shortly after the revocation process. In a similar situation, a key management official with decision-making authority (chief inspector) from a repair station that lost its certificate for serious maintenance-related safety violations applied for and received a new repair station certificate. That individual also became the chief inspector at the newly certificated repair station. While under the chief inspector's direction, employees of the newly certificated station performed improper maintenance on a number of propellers, one of which came apart in flight causing a fatal accident.

As a result of this incident, the National Transportation Safety Board (NTSB), in a Safety Recommendation dated February 9, 2004 (A-04-01 and A-04-02), expressed concern that the FAA did not have a mechanism for preventing individuals who were associated with a previously revoked repair station, such as the owner described above, from continuing to operate through a new repair station. The NTSB made a number of observations.

The FAA has such a mechanism in place for air carriers and other commercial operators.

14 CFR § 119.39(b) allows the FAA to deny an application for a Part 121 or 135 air carrier or operating certificate. This can occur if the applicant previously held a certificate that was revoked or if a person who exercised control over (or held a key management position in) a previously revoked operator will be exercising control over (or hold a key management position in) the new operator.

The Part 119 rule allows the FAA to deny certification to an applicant who is substantially owned by (or intends to fill a key management position with) an individual who had a similar interest in a certificate holder whose certificate

was (or is being) revoked when that individual materially contributed to the circumstances causing the revocation.

The NTSB, pointing out the safety concerns offered by the FAA when it issued the above-described rules for air carriers and commercial operators, believed the same reasoning should apply equally to Part 145 certificate holders. The FAA agrees. The proposed language is consistent with other revocations that the FAA imposes. The changes that we propose are based to a large extent on the language contained in § 119.39(b). In 1978, when the predecessor regulation to § 119.39(b) was published, the FAA stated:

Noncompliance data is a significant factor to consider with an application for an ATCO [air taxi/commercial operator] operating

certificate. Similar information has been helpful in evaluating air carrier applicants and the persons they propose for management positions. The FAA revokes an operating certificate only for a very serious infraction of the regulations. If a person contributes materially to that infraction, the fact should be considered as a factor in evaluating the new application. This does not mean the approval of the application or employment position will be automatically withheld, but that each situation will be carefully evaluated on its merits. (43 FR 46762, Oct. 10, 1978)

Section 145.59 Ratings

The FAA proposes to revise the ratings and classes that may be issued to certificated repair stations. A comparison of the proposed ratings with the current ratings follows.

| Current Rating | Proposed Rating |
|---|---|
| Airframe Rating | Aircraft Rating |
| Class 1: Composite construction of small aircraft Class 2: Composite construction of large aircraft Class 3: All-metal construction of small aircraft Class 4: All-metal construction of large aircraft | The Aircraft rating, which the FAA did not divide into classes, would replace the Airframe rating and its associated classes. The FAA proposes to expand the current Airframe rating to include all articles except those for which a Powerplant, Propeller, or Avionics rating is required. |
| Powerplant Rating | Powerplant Rating |
| Class 1: Reciprocating engines of 400 horsepower or less Class 2: Reciprocating engines of more than 400 horsepower Class 3: Turbine engines | Class 1: Reciprocating engines. Class 2: Turbine engines. Class 3: Auxiliary power units (APU). |
| Propeller Rating | Propeller Rating |
| Class 1: All fixed-pitch and ground-adjustable propellers of wood, metal, or composite construction. Class 2: All other propellers, by make. | This proposed Propeller rating no longer includes classes. This rating would not include the main and auxiliary rotors (airframe articles) or rotating airfoils of aircraft engines (powerplant articles). This rating would allow a repair station to remove and replace articles attached to the propeller and to remove and reinstall the propeller. Also, the rating would allow a repair station to remove, replace, install, and test the propeller. |
| Radio Rating | Avionics Rating |
| Class 1: Communication equipment Class 2: Navigational equipment. Class 3: Radar equipment. | The Avionics rating would combine the Radio, Instrument, and parts of the Accessory ratings into a single rating. The proposed Avionics rating would group together items that operate electrically or electronically and that require a unique set of skills not associated with other ratings. In addition, this rating would allow repair stations to perform maintenance on in-flight entertainment units or other electronic units, as specified in their operations specifications. |
| Instrument Rating | |
| Class 1: Mechanical. Class 2: Electrical. Class 3: Gyroscopic. Class 4: Electronic. | |
| Accessory Rating | Component Rating |
| Class 1: Mechanical accessories that depend on friction, hydraulics, mechanical linkage, or pneumatic pressure for operation. Class 2: Electrical accessories that depend on electrical energy for their operation. Class 3: Electronic accessories that depend on an electron tube, transistor, or similar device. | The Component rating would allow a repair station to perform maintenance, preventive maintenance, and alterations on individual component parts that are not installed on or in aircraft, powerplant, propeller, or avionics equipment. The Component rating would include any item that is not a complete aircraft, powerplant, propeller, or avionics article. |

| Current Rating | Proposed Rating |
|---|---|
| Limited Rating (§ 145.61) | Limitations to a Rating (§ 145.61) |
| For airframes; engines; propellers; instruments; radio equipment; accessories; landing gear; components; floats; nondestructive inspection, testing, and processing; emergency equipment; rotor blades by make and model; aircraft fabric work; and other purposes. | In response to industry and ARAC recommendations, the FAA would no longer issue limited ratings. Instead, the FAA would issue limitations to the rating of a certificated repair station governing maintenance or alterations on a particular type of aircraft, powerplant, propeller, avionics, or component part thereof for which part 43 applies. |
| Limited Rating for Specialized Service (§ 145.61) | Specialized Service Rating (§ 145.63) |
| For example, landing gear components; nondestructive inspection, testing, and processing; emergency equipment; aircraft fabric work; and any other specialized service the FAA finds appropriate for this rating. | The proposed Specialized Service rating is substantially the same as the existing Limited Specialized Service rating. The FAA would issue the Specialized Service rating to a repair station that performs only specific processes associated with the maintenance, preventive maintenance, and alterations of an aviation article. |

Aircraft Rating

Currently, the FAA may issue a repair station an Airframe rating with any of four class ratings: Classes 1, 2, 3, and 4. These classes are based on aircraft weight (large or small as defined in 14 CFR § 1.1) and construction (composite or all-metal). The FAA finds that issuing ratings for aircraft based on their construction is no longer appropriate because modern aircraft are no longer built of either all composite material or all metal. Further, the FAA finds that classifying aircraft by weight is no longer appropriate. The FAA proposes to remove the Airframe rating and its associated class ratings and establish an Aircraft rating without classes.

In its technical report, ARAC noted that in 1962, most aircraft had a dope and fabric or wood construction. The aviation industry commonly referred to aircraft made from a combination of wood, fabric, and metal materials as aircraft with a "composite" construction. ARAC noted that a better description of the term "composite" may have been "not-all metal." The term "composite material" also refers to carbon-carbon compounds and advanced polymers.

Many modern aircraft have an airframe made of both metal and composite materials. The airframe is metal while certain portions, such as control surfaces and fairings, are composite materials. This causes confusion among FAA inspectors and the aviation industry over how much of an airframe must be of composite or metal construction for various class ratings within the Airframe category.

Since defining "composite" is difficult and the current classes are no longer suitable for the repair station industry, the FAA has tentatively determined that a better approach is to adopt general ratings. ARAC found that a repair station rating based solely on the type or variety of material in aircraft

construction is unduly restrictive. These factors no longer determine the scope of work repair stations are able to perform under the Airframe rating. ARAC found that airframe maintenance capabilities do not depend on the materials used in aircraft construction.

Further, ARAC found that classification of ratings by weight is no longer appropriate. Historically, the FAA and the aviation industry used the weight classification of small and large aircraft to distinguish aircraft used in commercial air carrier service from general aviation aircraft. Commercial operations normally used aircraft over 12,500 pounds while general aviation typically used smaller aircraft. This distinction also reflected the relative complexity of the aircraft. Today, however, aircraft weight does not reflect the complexity or intended use of an aircraft.

The Aircraft rating, which is not divided into classes, would replace the Airframe rating and its associated classes. Under the Aircraft rating, a repair station could perform maintenance, preventive maintenance, and alterations on the complete aircraft, except those articles for which a Powerplant, Propeller, or Avionics rating is required. Replacing the current Airframe rating with an Aircraft rating would allow for inclusion of future technological advancements in aircraft construction. The Aircraft rating would allow the repair station to work on the aircraft electrical distribution system external to avionics units. In addition, a repair station could remove, replace, install, and test any powerplant, propeller, or avionics equipment to perform its rated work on the complete aircraft and approve it for return to service if the repair station has the capabilities.

At the time of application, the FAA would require an applicant for an Aircraft rating to identify the manufacturer, type, make, model, or

series of aircraft on which the repair station intends to perform maintenance, preventive maintenance and alterations. The repair station must list the aircraft on its capability list, which would be required by § 145.215. The FAA would require the repair station to demonstrate that it has on its premises and under its control the necessary housing, facilities, equipment, tools, test apparatus, trained personnel, and data to perform the maintenance, preventive maintenance, and alterations on the aircraft listed.

After the FAA certifies a repair station, the repair station could add additional capabilities as needed. The repair station could change its capability list after performing a self-evaluation that is part of the repair station's quality system. This internal review would ensure that the FAA could evaluate the work being performed under the rating and confirm that a repair station has the capabilities to perform the specified maintenance, preventive maintenance, and alterations.

It is not the FAA's intent to allow a repair station to change its ratings simply by performing the self-evaluation. The self-evaluation is used to add capabilities to its capability list that are within the scope of its rating. Aircraft-rated repair stations would be required to list the type, make, model, or series of aircraft on its capability list. The Aircraft rating, along with the types of aircraft the repair station may maintain, constitutes its rating. An Aircraft-rated repair station could not add different aircraft types to its capability list by performing the self-evaluation. For example, if its operations specifications authorize the repair station to maintain B-737 aircraft types, and it was currently maintaining only B-737-100-500 models, it could perform the self-evaluation to add other B-737 models to its capability list, but it could not add B-757 aircraft.

The word "aircraft type" when used in the text associated with an Aircraft rating is defined in 14 CFR part 1 and means those aircraft that are similar in design. Examples include: DC-7 and DC-7C; 1049G and 1049H; and F27 and F27F.

Powerplant Rating

The current Powerplant rating has three classes: Class 1: Reciprocating engines of 400 horsepower or less, Class 2: Reciprocating engines of more than 400 horsepower, and Class 3: Turbine engines.

When the FAA established the current Powerplant ratings, reciprocating radial engines that produced more than 400 horsepower powered nearly all large aircraft. In its report, ARAC noted that these engines differed substantially from the horizontally opposed reciprocating engines with less than 400 horsepower that manufacturers used to power general aviation aircraft. Distinguishing powerplant classes by horsepower was helpful considering the engines in use at that time. Today, however, it is possible for small horizontally opposed reciprocating engines to produce more than 400 horsepower. Further, most modern transport category aircraft have turbine engines, and manufacturers no longer produce high horsepower radial engines. ARAC determined, therefore, that separate classes for reciprocating engines are no longer useful.

When the FAA established the current Powerplant rating, manufacturers were just beginning to use turbine engines on civil aircraft. Therefore, the FAA found it appropriate to establish a class for turbine engines.

Unlike the other ratings, the FAA would retain classes for the Powerplant rating. The Powerplant rating still has natural and permanent divisions between reciprocating, turbine, and APU engines. Engines do not cross the boundaries between these classes. This would not be true for the other ratings, especially the Aircraft rating.

Under the proposed rating system, a repair station holding a new Powerplant rating may perform maintenance, preventive maintenance, and alterations of the powerplant and all components necessary for the powerplant to work properly. The proposed Powerplant rating includes aircraft engines, as defined in 14 CFR 1.1, and auxiliary power units.

An Auxiliary Power Unit (APU) refers to any gas turbine-powered unit delivering rotating shaft power or compressed air, or both, that is not intended for the propelling of an aircraft. APUs often drive aircraft generators and air-conditioning packs.

In some cases APUs also can be used as an additional source of energy to start the primary aircraft engines. The design configurations of some aircraft rely on an APU for provisional back-up electrical power in flight in the event of a failure of the primary power sources. The APU has been included in the Powerplant rating due to its similarity to an aircraft turbine engine.

The proposed rating, therefore, would still have 3 classes. However, the classes would be organized as follows:

- Class 1: Reciprocating engines, combining current Classes 1 and 2;
- Class 2: Turbine engines, encompassing current Class 3; and
- Class 3: Auxiliary power units (APU).

This rating, like the Aircraft rating, would allow repair stations to remove and replace propellers and powerplant components, as needed, and to perform powerplant maintenance, preventive maintenance, and alterations. Powerplant-rated repair stations also could remove and replace nacelles and fairings because most engine work cannot be performed unless the repair station removes these items. However, this rating would not allow the repair station to remove or replace engines. To perform this function, the repair station would, at a minimum, have to hold an Aircraft rating with a limitation to remove and replace engines. Also, this rating would not allow a repair station to perform maintenance, preventive maintenance, and alterations on the aircraft or propeller.

An application for the Powerplant rating must include a list of the make, model, or series of all powerplant articles that the repair station intends to maintain. The repair station must list these articles on its capability list. The repair station may add different makes and models of engines within its class rating to its capability list by following the self-evaluation procedures of the repair station's quality system. The FAA does not intend that a repair station alter its rating by adding powerplants outside the scope of the powerplant class the repair station is rated to maintain. This means a Class 1-rated repair station cannot add a Class 2 powerplant simply by performing a self-evaluation. This would be considered a change of rating, and must be handled through the certification process.

Propeller Rating

Under the current regulations, a repair station holding a Class 1 Propeller rating may perform maintenance, preventive maintenance, and alterations on all fixed-pitch and ground-adjustable propellers of wood, metal, or composite construction. A repair station holding a

Class 2 Propeller rating may perform maintenance, preventive maintenance, and alterations on all other propellers by make.

In its report, ARAC noted that this distinction is based on the different levels of complexity between a propeller with no moving parts and a propeller with a mechanical system that controls the pitch of the propeller while operating. ARAC also noted that aircraft with small reciprocating engines generally have fixed pitch propellers, while aircraft with high horsepower engines have variable pitch propellers. ARAC found that, although varying levels of complexity exist for propellers, most repair stations performing maintenance on propellers hold both class ratings. Therefore, ARAC recommended that the FAA eliminate class ratings that distinguish the types of propellers.

The proposed Propeller rating would allow a repair station to perform maintenance, preventive maintenance, and alterations on propellers. This rating does not include the main and auxiliary rotors (airframe articles) or rotating airfoils of aircraft engines (powerplant articles). This rating would allow a repair station to remove and replace control components attached to the propeller. Also, the rating would allow a repair station to remove, replace, install, and test the propeller. However, it would not allow a repair station to perform installations that would constitute a major alteration to an aircraft or aircraft engine.

An applicant for a Propeller rating must list the make, model, or series of propellers to be included on its capability list. The repair station could add makes or models of propellers to its capability list by following the self-evaluation procedures of the repair station's quality system. Although a repair station holding a Propeller rating could remove and install the propeller on an aircraft engine, it could not perform any maintenance, preventive maintenance, or alterations on the aircraft, aircraft engine, or airframe. For example, a repair station that intends to install propellers of a different make and model using a supplemental type certificate (STC) would be required to hold a Propeller rating and would need an Aircraft rating, with the necessary limitation.

Avionics and Component Ratings

The proposed Avionics and Component ratings present different challenges to the rating system because of the sheer volume of articles that can be addressed by the ratings, the variety of these articles, and the number of

manufacturers of similar articles. Providing only the make, model, or series of these articles may not provide the necessary information to determine what requirements the repair station must meet in order to be eligible for a rating. As a result, the FAA must include a requirement for the name of the manufacturer of the articles to be included in the capability list. Also, the FAA proposes a requirement that the capability list for a repair station certificated to maintain avionics or component articles be separated by categories to make it easier for both the repair station's customers and the FAA to ascertain the capabilities of the repair station.

The inclusion of the manufacturer on the capability list is necessary because, unlike the aircraft or powerplant manufacturers, there are several manufacturers who produce similar articles, such as radios, integrated electronic units, pumps, and actuators. Because the rule requires repair stations to use the data, tools, and equipment recommended by the manufacturer, these items will differ between manufacturers even though the articles may be similar in design. Also, since repair stations will be performing self-evaluations to add items to their capability lists, not identifying the different items required for articles produced by different manufacturers could make it difficult for a repair station to determine if it has the capability to maintain articles from various manufacturers.

Identifying the manufacturer would assist the FAA in separating the capability list into categories. The category headings can be broad to encompass several similar articles, but should be detailed enough so that a cursory review can determine the types of articles maintained by the repair station. Examples of categories may include: radios, instruments, integrated modules, hydraulic pumps, fuel pumps, hydraulic actuators, brakes, integrated entertainment systems, cargo loading units/pallets, or cargo floor tracks and locks. Under these categories, the repair station would list each article by manufacturer, make, model, or series.

Avionics Rating

The Avionics rating would combine the current Radio, Instrument, and parts of the Accessory ratings into a single rating. This rating would include all articles used for aircraft communication, navigation, and operation that operate electrically or electronically.

The proposed Avionics rating groups together items that operate electrically or electronically and that require a

unique set of skills not associated with other ratings. In addition, this rating would allow repair stations to perform work on in-flight entertainment units or other electronic units. The current rating and classification system does not have a rating or class that clearly includes in-flight entertainment electronics. In its report, ARAC stated that although the aviation industry typically does not consider these devices as avionics equipment, the FAA should include them with other electronic devices that require similar skills to maintain.

The current Radio rating consists of three classes: Class 1: Communication equipment, Class 2: Navigation equipment, and Class 3: Radar equipment. In its report, ARAC indicated that technological advances in avionics have led to much controversy over this categorization of equipment. ARAC noted that modern avionics equipment typically integrates communication and navigation functions into a single avionics appliance. Radar and radio equipment that operate using pulse technology also serve communication and navigation functions. Therefore, repair stations performing work on avionics equipment often hold a Radio rating with all three of the classes.

The current Instrument rating consists of four classes: Class 1: Mechanical, Class 2: Electrical, Class 3: Gyroscopic, and Class 4: Electronic. The FAA established these classes based on the technology available at the time. However, ARAC notes that today, most instruments operate using a combination of these principles. Therefore, class distinctions are no longer appropriate.

The current Accessory rating has three classes. Class 1: Mechanical includes accessories that depend on friction, hydraulics, mechanical linkage, or pneumatic pressure for operation. Class 2: Electrical includes accessories that depend on electrical energy for their operation and generators. Class 3: Electronic includes accessories that depend on the use of an electron tube, transistor, or similar devices. Similar to the Instrument rating, the classes for the Accessory rating identify the article's principle of operation. Many articles maintained under this rating use a combination of principles, thus requiring repair stations to hold all the class ratings for an Accessory rating.

The proposed Avionics rating would allow a repair station with the required capabilities to remove and reinstall access panels, brackets, or clamps in accordance with the manufacturer's instructions on aircraft, powerplants, or

propellers, as needed, to gain access to avionics equipment or instruments. The repair station also could remove, replace, install, and test the avionics equipment on an aircraft, provided the repair station does not alter the aircraft. An Avionics-rated repair station would not be authorized to remove articles that it was not rated to reinstall. To perform a major or minor alteration to an aircraft, powerplant, or propeller, a repair station would be required to hold the appropriate additional ratings.

As with the Aircraft, Powerplant, and Propeller ratings, a repair station with an Avionics rating would have to identify on its capability list the articles that it intends to maintain. Unlike the other ratings, in addition to identifying the article by make or model and series, the Avionics-rated repair station must also include the manufacturer and the category of the article, such as communication, navigation, pulsed (radar), mechanical, electric, gyroscopic, or electronic.

Component Rating

The Component rating would allow a repair station to perform maintenance, preventive maintenance, and alterations on individual uninstalled component parts that are included on or in aircraft, powerplant, propeller, or avionics equipment. The Component rating would include any item that is not a complete aircraft, powerplant, propeller, or avionics article. However, a Component-rated repair station must have a limitation to an Aircraft, Powerplant, or Propeller rating to remove and install articles. A repair station with an Aircraft, Powerplant, Propeller, or Avionics rating would not need a Component rating to work on items associated with its respective rating and capabilities. For example, an Aircraft or Powerplant-rated repair station would not need a Component rating to perform work on an airfoil surface, engine case, or other parts of the aircraft or powerplant, as applicable.

The capability list for this rating must provide enough detail to ensure that a repair station has the appropriate housing, facilities, equipment, tools, test apparatus, training, personnel, and data at certification and when the work is being performed. The FAA agrees with ARAC's recommendation that a repair station list the general part nomenclature of an item, and that it is unnecessary to list articles by part number. The capability list would have to identify each component by manufacturer, make, model, or other nomenclature as designated by the manufacturer.

Section 145.61 Limitations to Ratings

In response to industry and ARAC recommendations, the FAA would no longer issue limited ratings. Instead, the FAA would issue limitations to the rating of a certificated repair station governing maintenance, preventive maintenance, or alterations on a particular type of aircraft, powerplant, propeller, avionics unit, or component part thereof. Currently, the rule allows for limited ratings based on the repair station performing maintenance, preventive maintenance, or alterations on particular makes or models of aircraft, powerplants, or propellers. However, as the repair industry has become more specialized, the concept of limited ratings had to be stretched to apply to repair stations performing only certain maintenance, preventive maintenance, or alteration functions on one or several makes/models of articles. Eliminating limited ratings would allow more flexibility in determining what rating an applicant or a repair station should obtain. For example, if a repair station intends to perform only a specific maintenance, preventive maintenance, or alteration function, such as interior configuration work or aircraft painting, the FAA would issue the repair station an Aircraft rating and list that function as a limitation on the repair station's operations specifications. The repair station's operations specifications would specify the rating to which the limitation applies and the limitation to that rating in sufficient detail to describe the maintenance capabilities of the repair station.

Section 145.63 Specialized Service Rating

Currently, the FAA issues limited ratings to repair stations to perform maintenance, preventive maintenance, and alterations to airframes, engines, propellers, instruments, radio equipment, accessories, landing gear components, emergency equipment, rotor blades, and floats, and to perform specialized services.

The proposed Specialized Service rating is substantially the same as the existing Limited Specialized Service rating. The Specialized Service rating would allow a repair station to perform a specific process associated with the maintenance, preventive maintenance, or alteration of an article; this work might not constitute a complete repair sufficient to approve an article for return to service. The repair station's operations specifications would contain the specification used in performing that specialized service. The

specification could be a military-, industry-, or applicant-developed specification that was approved by the FAA. Examples of specialized services would include, but not be limited to, non-destructive testing or inspection, welding, heat treating, plating, and plasma spraying.

There are three situations in which the FAA would issue a Specialized Service rating. The FAA would issue this rating to a repair station that:

- Performs only a specific process;
- Has in-house capabilities to perform the specific process but the work being requested is not within the scope of its rating; or
- Performs a function not found in the manufacturer's data.

If specialized service tasks are contained within a repair station's data for existing ratings, the repair station would not require an additional rating to perform that service. For example, if an Aircraft-rated repair station wants to perform plating on a propeller part, it would need a Specialized Service rating to perform the operation on the propeller part. If, however, a Powerplant-rated repair station has the in-house capability to perform x-ray inspections, it would not need to have a Specialized Service rating to perform that same maintenance for another repair station on powerplant articles for which it is already rated.

The Specialized Service rating would require the repair station to have the housing, facilities, equipment, tools, test apparatus, trained personnel, and data to perform the process on an aviation article. The process specification on the operations specifications would set forth the minimum standards for performing the generic process (specialized service). For example, the process specification would include an explanation of the housing, facilities, equipment, tools, test apparatus, trained personnel, and data necessary to perform the overall process. The applicable manufacturer's maintenance manual, air carrier manual, or other data acceptable to or approved by the FAA would define the specific parameters associated with performing the process on the particular aviation article.

Section 145.101 General

The current section states that a certificated repair station must provide housing, facilities, equipment, materials, and data that meets the applicable requirements for the issuance of the certificate and rating the repair station holds. The FAA proposes to revise this section specifically to require repair stations to provide tools and test

apparatus as already required in § 145.109 of this part.

Section 145.103 Housing and Facilities

Paragraph (a)(1) of this section requires each certificated repair station to provide housing for the facilities, equipment, materials, and personnel consistent with its ratings. The FAA proposes to revise this section to require "permanent" housing. It has long been FAA policy that repair stations, unlike other certificate holders, have a permanent fixed location from which to operate. The proposed rule would not prohibit these certificate holders from having mobile capabilities. It would, however, reinforce the need for repair stations to provide adequate assurance that work is performed in the best of environments and to the best of standards. This means protection of workers from unfavorable weather conditions so that their performance and the airworthiness of the articles they are maintaining is not adversely affected by those weather conditions. Repair stations would be required to provide suitable housing to protect the articles being maintained from contamination, foreign object debris, or conditions that may promote corrosion or other deteriorating conditions.

Further, the FAA is proposing to add new paragraph (d) to allow a repair station to use multiple fixed locations in performing maintenance, preventive maintenance, and alterations under its repair station certificate if the locations are within close proximity to the principal base of operations. These locations should be able to be reached in a reasonable amount of travel time so that FAA inspectors could provide the same level of surveillance at each fixed location. Such fixed locations should be located within the same geographic boundary of the FAA office with oversight responsibility for the repair station. Any fixed location outside of the geographic boundary of the FAA office with oversight responsibilities must either be certificated as a satellite repair station and meet the requirements of § 145.107, or it must obtain its own repair station certificate under the provisions of § 145.51 and § 145.53. Repair stations would be required to obtain a certificate for each fixed location outside of such boundaries as a satellite or stand-alone repair station.

Section 145.107 Satellite Repair Stations

The FAA proposes to change paragraph (a) of this section to clarify the requirements for a satellite repair station. The FAA also proposes to remove the restriction that a satellite

repair station may not hold a rating not held by the certificated repair station with managerial control. The FAA would not impose additional restrictions on satellite repair stations that do not apply to other repair stations.

Additionally, the FAA proposes to add a new paragraph stating that a satellite repair station may use the same repair station and quality system manuals as the repair station with managerial control. If a satellite repair station intends to use these manuals, it would have to identify any specific processes or procedures unique to the satellite repair station in appendices or sections of the manuals.

Finally, the FAA proposes to change paragraph (b) to state that inspection personnel may be away from the premises, but must be readily available. This language eliminates the need to specify that personnel be available by telephone, radio, or other electronic means. They would have to be readily available regardless of the means of communication.

Section 145.109 Equipment, Tools, Test Apparatus, Materials, and Data Requirements

The FAA proposes to amend this section to add the word “tools” to the heading to make it consistent with the requirement currently in the text of the section and to meet the agency’s intent. The text of existing § 145.109(a) requires that each repair station have on the premises and under its control the equipment, *tools*, and materials necessary to perform the requisite work when it is being performed. The requirement in this section to have on site the equipment and tools “necessary to perform the maintenance, preventive maintenance, or alterations * * *” may in some instances be more comprehensive than the requirement in § 145.51(b) for those items at the time of initial certification or rating approval. As explained previously in this preamble, an applicant for a repair station certificate does not have to have on site or under contract at the time of initial certification or rating approval all of the individual hand tools that its employees may possess and need when they are performing the work of the repair station.

We propose to add *test apparatus* to the list of items that a repair station must have on the premises and under its control when it is performing work for the reasons previously stated in the § 145.51(b) discussion. This would remove potential uncertainty surrounding whether a necessary piece of test apparatus was considered to be

“equipment” or “tools” or neither. In addition, including *test apparatus* would be consistent with the requirements in 14 CFR § 43.13(a). Accordingly, we are revising the section heading to include test apparatus.

Finally, we also propose to amend the text of § 145.109(a) for clarification and ease of understanding.

Section 145.151 Personnel Requirements

The FAA proposes to add the requirement that repair stations designate a chief inspector. Although this position was not previously required, prior to the 2001 amendments, former § 145.43 required each repair station to have and maintain a roster listing, among other personnel, its “inspection personnel, including the names of the chief inspector.” Many repair stations already have or have previously had a chief inspector as part of their staff. The FAA has received numerous requests to add the chief inspector requirement to this rule. This position is considered a critical function and is necessary to ensure the airworthiness of the articles a repair station maintains. There needs to be a technical person with the responsibility for regulatory compliance as well as the quality control duties. This person may be required to make critical decisions or countermand an errant finding from a quality control inspector. The quality of a product is directly related to the safety of the product. Part 121 of 14 CFR requires air carriers to have a chief inspector. This rulemaking will help to harmonize parts 121 and 145.

Section 145.155 Inspection Personnel Requirements

The FAA proposes to amend this section to set forth the experience requirements for the chief inspector position. Specifically, the FAA proposes to require the chief inspector of a repair station located within the United States be certificated under part 65. The FAA also proposes to add experience requirements for the chief inspector. Any person designated as a chief inspector for a repair station located either within or outside the United States must have at least 3 years of experience using the various types of inspection equipment and techniques appropriate for any article to be inspected. This includes the procedures, practices, inspection methods, materials tools, machine tools, and equipment generally used in the maintenance and alteration of articles for which the repair station is rated.

Currently, before mechanics can obtain an inspection authorization, they

must exercise the privileges of their certificate for a minimum of 3 years to demonstrate the competency needed to make judgment calls necessary to sign off on certain aircraft inspections. The FAA believes a chief inspector should meet similar criteria since the types of decisions that a mechanic with an inspection authorization and a chief inspector make are frequently similar and often just as critical.

The FAA proposes changes to § 145.155(a)(2) to ensure consistency with proposed § 145.155(d) by specifying that an inspector must be proficient in the use of “inspection equipment and techniques” rather than the more restrictive “inspection equipment and visual inspection aids.”

Section 145.161 Records of Management, Supervisory, and Inspection Personnel

The FAA proposes to amend this section to reflect proposed changes to § 145.151 that require repair stations to designate a chief inspector. The proposed amendment would require that repair stations include the name of the chief inspector in the roster of inspection personnel required in paragraph (a)(2) of this section.

In addition, the FAA proposes to remove the requirement to include the total years of experience in the summaries of employment required in current paragraph (a)(4)(ii) of this section. Current paragraphs (a)(4)(iii) and (iv) already require past relevant employment experience as well as the scope of present employment. The current separate requirement to maintain a record of total years of experience of an individual is therefore redundant. Additionally, proposed paragraph (a)(4)(ii) includes a requirement to list past relevant employment with “position, and type of maintenance performed.” It was necessary to include the word “position” since some management personnel may not have performed maintenance.

Section 145.203 Work Performed at Another Location

After redesignating the introductory text of the section, the FAA proposes adding a new paragraph that would require a repair station to obtain approval in writing prior to conducting any maintenance, preventive maintenance, and alterations outside of its domicile country. The current rule authorizing work to be performed at another location does not include specific provisions for a repair station to perform work under its certificate at a location outside the geographic borders

of the country where the repair station is located or domiciled. The proposal would require the repair station to obtain authorization to perform the work from the country in which the work is to be performed. It would also require the repair station to submit evidence of that authorization and a description of the procedures to be used to the FAA.

FAA policy currently allows an Aircraft-rated repair station located outside the United States that is also an operator holding an FAA Letter of Authorization per 14 CFR § 129.14, to qualify for geographic authorization under its Aircraft rating. This authorization ensures that U.S.-registered aircraft are maintained in accordance with a program approved by the FAA. The proposal would standardize the practice used to permit repair stations to perform work outside the country in which they are domiciled.

Section 145.205 Maintenance, Preventive Maintenance, and Alterations Performed for Certificate Holders Operating Under Parts 121, 125, or 135, or for Foreign Air Carriers or Foreign Persons Operating U.S.-Registered Aircraft in Common Carriage Under Part 129

The FAA proposes to clarify the requirements of the current section. Specifically, the FAA would add a requirement clarifying that certificated repair stations performing maintenance, preventive maintenance, and alterations for an air carrier or commercial operator conducting operations under parts 121 or 135, a certificate holder conducting operations under part 125, or a foreign air carrier or foreign person operating U.S.-registered aircraft under part 129 must comply with the applicable parts of this chapter. The FAA would also add the wording, "appropriately rated," to § 145.205(d) to ensure that a repair station would not perform line maintenance on articles that are outside the scope of its repair station certificate and ratings.

Section 145.211 Quality System

The FAA proposes to expand the quality control system requirements in existing § 145.211 to include elements of a more complete quality system for repair stations. While the FAA would keep the existing quality control elements, this proposal would add requirements for additional management oversight and follow-up. The FAA would also add a requirement for a repair station to establish an internal evaluation program. The FAA believes that if repair stations conduct

periodic internal evaluations of their processes and procedures, they could discover problem areas and take corrective actions before improper maintenance, preventive maintenance, or alterations are performed. Aviation safety would be enhanced accordingly.

Existing § 145.211 requires a final inspection of maintained articles. However, if the underlying benchmark processes or procedures against which the articles are being evaluated are flawed, defective articles can be and sometimes are approved for return to service. Such defective articles installed on aircraft have resulted in accidents involving damage to or loss of aircraft, and personal injuries and loss of life. At a minimum, these errors are costly and require the parts to be reworked or scrapped.

Under the proposed quality system requirements, a repair station would conduct internal evaluations of its operations and establish a management review and follow-up system. These two elements represent a significant part of the expansion the FAA would require of the existing quality control system.

The addition of an internal evaluation requirement would help ensure that repair stations' manuals comply with FAA regulations and that their operations conform to their manuals. In addition, a meaningful internal evaluation should identify deficiencies and generate an action plan to correct the deficiencies. Internal evaluations would also provide the information required by management to answer the following questions:

- Are our ongoing evaluations identifying and eliminating problems?
- Are our processes effective?

Management review and follow-up evaluations would determine the effectiveness of the internal evaluations. Management review and follow-up enhance the internal evaluation by—

- Analyzing the action plans to ensure compliance with regulations and good repair station practices;
- Conducting reviews to determine the extent to which the action plans are correcting problems identified by ongoing internal evaluations;
- Reviewing the over-all results of the internal evaluations to see if the ongoing evaluations are identifying and correcting deficiencies before the deficiencies result in product returns.

Below are two examples of FAA programs and procedures designed to identify and address problems that can occur. The illustrations are intended to show how a quality system with active management oversight and follow-up could prevent or limit the severity of

these problems brought about in maintenance systems.

The FAA's system of Airworthiness Directives (ADs) is the source of examples of defects that could lead to unsafe conditions. An AD is issued for a particular product when the FAA finds that an unsafe condition exists in that product and that the same unsafe condition is likely to exist or develop in other products of the same type design. Most ADs are issued to correct a design or a maintenance/inspection program deficiency. Sometimes, however, they are issued to correct an improper repair of a product if the improper repair was performed, or was likely to have been performed, on multiple units of the same product. An AD describes the unsafe condition and prescribes the actions required to correct it. Each AD specifies the models of the affected product to which it applies. ADs are legally enforceable rules. As such they are published in the **Federal Register** as amendments to 14 CFR 39.13. Below is an example of a corrective action taken through the FAA's AD program.

In 1998, the FAA issued an AD directed at specific reciprocating engines with crankshafts that had been repaired by a particular repair station. The FAA's data indicated that deficient process controls existed at the repair station during a particular time period causing the improper repairs. The improper repairs resulted in heat check cracking of the nitrided bearing surfaces that led to crankshaft failure due to cracking. The AD required inspections for potentially affected engines to determine applicability, an additional inspection and dimensional check of the crankshaft journals of the affected engines, and, if necessary, rework or removal from service of the affected crankshafts and replacement with serviceable parts. These actions were necessary to prevent crankshaft failure due to cracking that, in turn, could lead to in-flight engine failure and a possible forced landing.

The FAA estimated the total cost of complying with the AD to be over \$3 million. The FAA estimated that 10,000 engines would require at least the removal of the spinner, at a total cost of \$600,000, to determine whether an unsafe condition existed. The remainder of the cost was for the necessary rework on the estimated 291 engines that had been returned to service with defective crankshafts repaired by the repair station.

The FAA found that deficient process controls existed at the repair station. If a quality system had been in place, the internal evaluation could have revealed the deficient process controls. The

improper repair process could have been corrected immediately. The cost savings to U.S. operators would have been significant, and the FAA also could have avoided the costs associated with processing the AD.

Sometimes, as in the examples above, parts maintained by a repair station are approved for return to service after passing a final inspection even though they are not airworthy. This could be due either to a hidden defect or to a faulty inspection procedure. It is important to prevent these types of situations from developing. Early detection and prevention can be accomplished with a quality system in place at each repair station. Important additions to the quality system, as proposed in this notice, would include requirements that a repair station conduct periodic internal evaluations of its operations. This internal evaluation would ensure that the repair station's manuals and procedures comply with applicable regulatory requirements. It would also ensure that procedures are in place for conducting follow-up evaluations to ensure that corrective actions bring any deficiencies into compliance. The quality system requirement would include:

- A reporting system to record and maintain completed evaluations and corrective and preventive action plans,
- A schedule for conducting annual quality system evaluations,
- Corrective action procedures to ensure any deficiencies are corrected,
- Procedures for conducting follow-up evaluations to ensure corrective action(s) bring any deficiencies into compliance,
- Procedures for qualifying, training, and authorizing persons to perform internal evaluations, and
- Procedures for revising the internal evaluation system as necessary.

The internal evaluation would identify where additional quality standards are needed and validate the adequacy of existing standards and procedures. It also would help ensure that the procedures are being followed and achieve the desired results. Management review and follow-up would help ensure that all findings and discrepancies found during the internal evaluations are corrected in a timely manner and that they are effectively prevented from recurring. With the proposed comprehensive quality system, a repair station could demonstrate that it is achieving quality performance that means fewer errors, fewer delays, and improved productivity.

The FAA notes that a repair station could divide the internal evaluation into

sections, provided the entire repair station operation is evaluated within the applicable interval. For example, if a repair station's quality system requires an internal evaluation of its operations once every year, the repair station could evaluate different divisions of its operations separately, provided it evaluates its entire operation within the 1-year timeframe.

Quality systems with internal evaluations and management follow-up, such as the FAA is proposing here, have benefited manufacturers and service organizations that have adopted them. While initial costs are associated with adopting a quality system, organizations have realized long-term benefits. Such benefits have been in the form of reduced errors and delays that resulted in increased productivity. Requiring repair stations to adopt the additional quality system elements would increase their productivity, reduce errors and delays, and ultimately reduce the number of aircraft accidents and incidents.

As with other regulatory requirements in this part, the expanded quality system could be tailored to meet the needs of individual repair stations. If a large complex repair station requires a comprehensive quality system including full-time auditors and an auditing schedule, the proposed requirements provide the flexibility for such individually-developed systems. If, however, a small repair station with few ratings or limited capabilities requires only internal management review of its procedures to verify compliance with the regulations, it will have the flexibility to do so. Whether an internal evaluation is done by a professional team or by a repair station manager, the goals are the same: to—

- Ensure the repair station's procedures and data comply with applicable regulatory requirements,
- Ensure the procedures are still effective and appropriate for the work performed,
- Ensure the procedures are being followed, and
- Verify that the desired level of quality is achieved.

The FAA would further complement the proposed quality system by including a requirement that all repair stations maintain a suspected unapproved parts (SUP) program acceptable to the FAA. The FAA has a program to track SUP. Within the SUP program's parts reporting database, the FAA tracks parts that have been approved for return to service but that were subsequently found not to have been maintained in accordance with the current manufacturer's instructions or

other data approved by the FAA. In a search of the SUP program database, the FAA found that from October 1998 to May 2004, there were 238 cases involving repair stations and suspect parts. Of those cases, 219 involved parts that had not been maintained in accordance with the current manufacturer's instructions or other data approved by the FAA. Had these parts not been found and replaced by correctly maintained parts, those 219 cases of unapproved parts potentially could have resulted in accidents or incidents. It is likely that the more comprehensive quality system proposed here could have resulted in finding and correcting the underlying deficiencies before the parts were approved for return to service. Currently there is no rule requiring repair stations to participate in FAA's SUP program.

The FAA's existing SUP program was established in 1993 to coordinate the agency's efforts to minimize safety risks posed by the entry of "unapproved" aircraft parts into the U.S. aviation inventory and their installation on aircraft. The program, established by FAA Order 8120.10: (Suspected Unapproved Part Program, September 23, 1993), provides for the reporting and investigating of suspected unapproved parts. The SUP office was created in 1995. FAA published guidance for this program in AC 21-29, Detecting and Reporting Suspected Unapproved Parts. As a result, most repair stations already maintain a SUP program. FAA proposes to formalize this current practice by incorporating it into the rule.

As a matter of practice, the proposed additional quality elements are already being done by some repair stations. Most repair stations have incorporated a SUP program in accordance with current guidance for part 145 repair stations. Repair stations already implementing these features would incur no new costs. The FAA proposes to formalize a number of existing practices by making them part of the rule.

Section 145.215 Capability List

Under the current rule, a certificated repair station with a Limited rating may perform maintenance, preventive maintenance, and alterations on an article if the article is listed on its current capability list acceptable to the FAA or on the repair station's operations specifications. Under the provisions of the current rule, use of a capability list is optional since repair stations can also maintain their capabilities on their operations specifications. However, the FAA finds that a mandatory capability list is

necessary to maintain safety under the system of ratings proposed in this notice. The capability list would now be referenced on the operations specifications under the applicable rating.

The proposed rating system would not provide a separation between articles, such as large vs. small aircraft, or communication vs. navigation equipment. In addition, the proposed rating system would be more general, and new technologies could be encompassed under the rating system without requiring an amendment to the rule. It is imperative to maintain a document that identifies the actual capabilities of a repair station. To accomplish this, all FAA-certificated repair stations would be required to maintain a capability list. The FAA further proposes that capability list revisions be available to the FAA within 30 business days of the revision.

Further, FAA proposes to redesignate paragraphs (c) and (d) as (d) and (e) respectively and insert a new paragraph (c) to require the capability list for Avionics- and Component-rated repair stations be organized by category of article and identify the manufacturer. The inclusion of the manufacturer on these capability lists is necessary because, unlike the aircraft or powerplant manufacturers, there are several manufacturers who produce similar articles, such as radios, integrated electronic units, pumps, and actuators. Because the rule requires repair stations to use the data, tools, test apparatus, and equipment recommended by the manufacturer, it is easy for these items to differ among manufacturers even though the articles may be similar in design. Also, since repair stations will be performing self-evaluations to add items to their capability lists, not identifying the different data, tools, test apparatus, and equipment among manufacturers could make it difficult for a repair station to determine if it indeed has the capability to maintain articles from various manufacturers.

The FAA would also amend current requirements for a repair station to perform a self-evaluation by prohibiting a repair station with an Aircraft or Powerplant rating from performing a self evaluation to add a different type of aircraft or powerplant to their ratings, respectively. The FAA did not intend for a repair station to make such a change to its ratings through the self evaluation process.

Section 145.217 Contract Maintenance

The FAA proposes revisions to this section to provide clarification of

contract maintenance. The proposal would revise the current rule by removing the requirement in current paragraph (a)(1) that maintenance functions contracted to all outside sources be approved by the FAA. Only a maintenance function contracted to an outside source not certificated under part 145 would have to be approved. A repair station contracting a maintenance function to a repair station certificated under part 145 would not have to comply with the proposed requirements of paragraph (b).

Section 145.223 FAA Inspections

Section 145.223 would be revised to prohibit a repair station from contracting for the performance of a maintenance function on an article with a non-FAA-certificated maintenance provider under the terms of an aviation safety agreement unless the contract specified that the FAA has the right to inspect and observe the performance of work. If the article is subject to the airworthiness regulations of another civil aviation authority the contract must specify that the FAA may inspect and observe the work on behalf of that civil aviation authority. A repair station would be prohibited from approving the article for return to service after the performance of the work unless these provisions were met.

Paperwork Reduction Act

Under the procedures established by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)), a person is not required to respond to a collection of information by a Federal agency unless the collection displays a valid OMB control number. This proposed rule contains a "collection of information" as that term is defined by OMB at 5 CFR part 1320. As a result, the FAA proposes to review the currently approved collection of information (*OMB Control Number: 2120-0682*).

Agency: Federal Aviation Administration (FAA).

Title: Part 145—Repair Stations.

Type of Request: Revision of Currently Approved Collection of Information.

OMB Control Number: 2120-0682.

Form Number: This collection of information will not use any standard forms.

Requested Expiration Date of Clearance: At present Control Number 2120-0682 is scheduled to expire on February 28, 2009. The FAA does not anticipate asking for an extension of this collection.

Summary of the Collection Information

In the "Paperwork Reduction Act" section of the August 6, 2001 Repair Station Final Rule (66 FR 41112), the FAA discussed the consequences of its proposed collection of information. Comments were invited on this proposal. As a result of this proposed rule, the FAA would amend its description of information in the 2001 final rule as follows. The final rule estimated the burden hours for a repair station's quality control manual and capability list requirements. The paperwork burden in the proposed rule was anticipated in the hours estimated in the 2001 final rule. This proposed rule would require repair stations to develop an internal evaluation program and a reporting system to record and maintain completed evaluations and corrective action plans. The FAA estimates that a small repair station would require 300 man-hours initially to establish a quality system. A large repair station would require 3 man-years initially. We estimate that the burden for developing the quality evaluation and reporting program would be less than that required to develop the entire quality system. Most of the paperwork involved is already part of the overall quality system. Furthermore, there is not requirement that any of the quality system reports be submitted to the FAA. The reporting and retention of evaluation and corrective action plans may be recorded and maintained electronically or in a format chosen by the individual repair station.

The FAA estimates that the administrative burden to repair stations to prepare a capability list would require 4 hours of maintenance management time plus 4 hours of administrative support personnel time for small repair stations and corresponding times of 8 hours for large repair stations.

International Compatibility

In keeping with U.S. obligations under the Convention on International Civil Aviation, it is FAA policy to comply with International Civil Aviation Organization (ICAO) Standards and Recommended Practices to the maximum extent practicable. The FAA has reviewed the corresponding ICAO Standards and Recommended Practices and has identified no differences with these regulations.

Economic Assessment

Proposed changes to Federal regulations must undergo several economic analyses. First, Executive Order 12866 directs each Federal agency

to propose or adopt a regulation only upon a reasoned determination that the benefits of the intended regulation justify its costs. Second, the Regulatory Flexibility Act of 1980 requires agencies to analyze the economic impact of regulatory changes on small entities. Third, the Trade Agreements Act (19 U.S.C. §§ 2531–2533) prohibits agencies from setting standards that create unnecessary obstacles to the foreign commerce of the United States. In developing U.S. standards, this Trade Act also requires agencies to consider international standards and, where appropriate, use them as the basis of U.S. standards. Fourth, the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of \$100 million or more annually (adjusted for inflation.)

In conducting these analyses, FAA has determined this rule (1) would create a safer flying environment and is a “significant regulatory action” as defined in section 3(f)(4) of Executive Order 12866 and is “significant” as defined in DOT’s Regulatory Policies and Procedures; (2) will not have a

significant economic impact on a substantial number of small entities; (3) will not affect international trade; and (4) does not impose an unfunded mandate on state, local, or tribal governments, or on the private sector. These analyses, available in the docket, are summarized below.

Total Costs and Benefits of This Rulemaking

The estimated quantifiable net cost of this proposed rule for the period 2004–2013 is \$144.8 million (\$108.8 million, discounted) over 10 years. The cost to a small repair station that currently does not have a quality system is estimated at \$34,500 (\$25,600 discounted) over 10 years. The cost to the approximately half of the small repair stations that already have quality systems would be minimal.

This proposal would require repair stations to conduct periodic internal evaluations that could discover problem areas and to take corrective actions before improper maintenance, preventive maintenance, or alterations are done. Such actions would result in both quantifiable and non-quantifiable benefits. If the rule prevents all the accidents or incidents that may be associated with repair station failure to take corrective actions, the potential benefits of the rule (based on the related

accident or incident history) could be as much as \$164.7 million (\$119.3 million, discounted) over 10 years. However, the FAA does not claim adoption of the proposed rule would result in the elimination of all repair station related accidents or incidents.

Who Is Potentially Affected by This Rulemaking

All certificated repair stations would have to develop and follow a quality system and capability list. The FAA would issue new certificates to all repair stations to implement the proposed new rating system.

Our Cost Assumptions and Sources of Information

- Discount rate—7%
- Period of analysis—2004–2013
- Monetary values expressed in 2003 dollars
- Value of:
 - fatality avoided—\$3 million
 - serious injury avoided—\$580,700
 - minor injury avoided—\$42,900

Alternatives We Considered

New rating systems and a quality assurance program had been proposed in NPRM No. 99-09. The 2001 Final Rule did not include either proposal since the FAA received a significant number of comments opposing the proposals. FAA tasked ARAC to address these two issues. ARAC, after reviewing various alternatives, sent its technical reports and recommendations to FAA. The FAA is making this proposal based on recommendations from ARAC, and comments received from the public.

Benefits of This Rulemaking

The additional management oversight and follow-up required by this proposed rule has potential benefits. These potential benefits include fostering an operating environment of constant awareness of potential sources of failure in repair processes and correction of deficient process controls. This awareness and corrective action could preclude in-flight failures and the possibility of accidents.

An analysis of National Transportation Safety Board (NTSB) data from July 1997 through June 2003 indicated there were 1,762 accidents coded by the NTSB in the "narrative" or "probable cause" sections containing the word "maintenance." The FAA determined that of these 1,762 accidents, there were 58 over the six-year period that can be interpreted to mean a repair station accomplished the maintenance that may have caused or contributed to the accident. These 58 accidents resulted in a total of 19 fatalities, 17 serious injuries, and 27 minor injuries. 43 aircraft sustained substantial damage and 15 aircraft were destroyed. The average was used to estimate the potential values. In total, the FAA calculates the potential value of preventing all accidents that can be interpreted to mean a repair station accomplished the maintenance could be as high as \$146.3 million, or \$102.8 million discounted, over 10 years.

Preventing Airworthiness Directives (ADs) that are issued to correct improper maintenance done on aircraft parts is another area where a quality system would be of benefit. Some ADs are issued to correct an improper repair

of a product if the improper repair was performed, or was likely to have been performed, on multiple units of the same product. The FAA reviewed four AD cases attributable to repair station related quality problems that may have been prevented by a quality system. The total estimated cost to U.S. operators of these ADs is \$18.4 million or \$16.5 million, discounted. More importantly, if a quality system had been in place, internal evaluations could have revealed the deficient process controls. The improper repair process could have been corrected immediately and prevented possible in-flight mechanical failures and the resulting consequences.

The potential discounted quantitative benefits of the rule could be as high as \$119.3 million, if the rule were 100 percent effective in eliminating accidents that can be interpreted to mean a repair station accomplished the maintenance (at \$102.8 million) and preventing AD cases attributable to repair station related quality problems (estimated to cost U.S. operators \$16.5 million). However, it is unreasonable to assume the rule would eliminate all accidents or incidents that may be associated with repair station activity. Also, the FAA cannot determine at this time what portion of those accidents or incidents would be eliminated as a result of this rulemaking. Therefore, the FAA cannot quantify the benefits of this rulemaking.

There would also be unquantified benefits. The proposed rating system and capability list would allow repair stations to incorporate future technological advancements in the aviation industry on its capability list as provided by § 145.215. Additionally, it would provide the FAA with the tools necessary for uniform interpretation and enforcement of the requirements. Experience in other industries has shown that the establishment of a quality system could lead to cost savings and reductions in errors and customer complaints.

Costs of This Rulemaking

From 2004 to 2013, the total cost of the proposed rule would be approximately \$145.0 million before cost-savings of \$0.2 million giving a net cost of \$144.8 million (\$108.8 million, discounted). The repair station industry would incur net costs of \$136.6 million (\$101.2 million, discounted) and the FAA would incur costs of \$8.2 million (\$7.6 million, discounted). The costs associated with the quality assurance program account for over 90 percent of the total costs of the proposed rule.

Regulatory Flexibility Determination

Agencies must perform a review to determine whether a proposed or final rule will have a significant economic impact on a substantial number of small entities. If the agency determines that it will, the agency must prepare a regulatory flexibility analysis as described in the Regulatory Flexibility Act.

In many cases, the Small Business Administration suggests that "small" represents the impacted entities based on annual revenue. For this proposed rule, a small entity is defined as "Other Support Activities for Air Transportation" (North American Industrial Classification System 488190) with revenues of \$6 million or less. Revenue data compiled by Dun and Bradstreet indicates that some 2,354-repair stations have revenues of \$6 million or less and that the average revenue per small entity is \$1,272,500. The initial cost per small repair station to implement the quality system is estimated at \$8,700 and this cost would not be incurred by approximately half of the small repair stations that already have voluntarily implemented quality systems. However, these repair stations would incur some additional minimal costs to comply with the proposed requirement. In addition, a small repair station would incur administrative costs of \$490 to comply with the rating system and the capability list requirements. The \$490 consists of \$325 for rating system costs, and \$165 to prepare a capability list. The total initial cost for a small repair station without a quality system is \$9,200 (\$8,700 + \$490) or approximately seven-tenths of one percent of the average small repair station's annual revenue. The annual cost for a small repair station to maintain the quality system is estimated at \$2,900. The FAA does not find the costs associated with this proposal to be a significant burden.

The FAA certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities. The FAA seeks public comments regarding this finding and requests that all comments be accompanied with detailed supporting data.

Trade Impact Assessment

The Trade Agreements Act of 1979 prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary

obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

The proposed rule is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States. Furthermore, the proposed rule is consistent with the terms of several trade agreements to which the United States is a signatory, such as the Trade Agreements Act of 1979 (19 U.S.C. 2501 et seq.), incorporating the Agreement on Trade in Civil Aircraft (31 U.S.T. 619) and the Agreement on Technical Barriers to Trade (Standards) (19 U.S.C. 2531), as well as the General Agreement on Trade in Services (19 U.S.C. 3511). The proposed revision to part 145 is also consistent with 49 U.S.C. 40415, formerly 1102(a) of the Federal Aviation Act of 1958, as amended, which requires the FAA to exercise and perform its powers and duties consistently with any obligation assumed by the United States in any agreement that may be in force between the United States and any foreign country or countries.

Unfunded Mandates Assessment

The Unfunded Mandates Reform Act of 1995 (the Act) is intended, among other things, to curb the practice of imposing unfunded Federal mandates on State, local, and tribal governments. Title II of the Act requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in an expenditure of \$100 million or more (adjusted annually for inflation) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector; such a mandate is deemed to be a "significant regulatory action." The FAA currently uses an inflation-adjusted valued of \$120.7 million in lieu of \$100 million.

This proposed rule does not contain such a mandate. The requirements of Title II of the Act, therefore, do not apply.

Executive Order 3132, Federalism

The FAA has analyzed this proposed rule under the principles and criteria of Executive Order 13132, Federalism. We determined that this action will not have a substantial direct effect on the States, or the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government, and therefore does not have federalism implications.

Environmental Analysis

FAA Order 1050.1E identifies FAA actions that are categorically excluded from preparation of an environmental assessment or environmental impact statement under the National Environmental Policy Act in the absence of extraordinary circumstances. The FAA has determined this proposed rulemaking action qualifies for the categorical exclusion identified in paragraph 312(d) and involves no extraordinary circumstances.

Energy Impact

The energy impact of the notice has been assessed in accordance with the Energy Policy and Conservation Act (EPCA) Public Law 94-163, as amended (42 U.S.C. 6362) and FAA Order 1053.1. We have determined that the proposed rule is not a major regulatory action under the provisions of the EPCA.

List of Subjects in 14 CFR Part 145

Air carriers, Air transportation, Aircraft, Aviation safety, Recordkeeping and reporting, Safety.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 145 of Chapter I of Title 14, Code of Federal Regulations as follows:

PART 145—REPAIR STATIONS

1. The authority citation for part 145 is revised to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701-44702, 44707, 44709, 44717.

2. Revise § 145.51(a) and (b) and add new paragraph (e) to read as follows:

§ 145.51 Application for certificate.

(a) An application for a repair station certificate and rating must be made in a format acceptable to the FAA and include the following:

(1) A Letter of Compliance detailing how the applicant will comply with this chapter;

(2) A repair station manual acceptable to the FAA as required by § 145.207;

(3) A quality system manual acceptable to the FAA as required by § 145.211(d);

(4) A list by manufacturer, type, make, model, or category, as appropriate, of each article for which the application is made;

(5) An organizational chart of the repair station and the names and titles of managing and supervisory personnel;

(6) A description of the housing and facilities, including the physical address, in accordance with § 145.103;

(7) A list of the maintenance functions, for approval by the FAA, to be performed for the repair station under contract by another person in accordance with § 145.217; and

(8) A training program for approval by the FAA in accordance with § 145.163.

(b) The equipment, tools, test apparatus, personnel, data, housing, and facilities required for the certificate and rating, or for an additional rating, must be in place for inspection at the time of certification or rating approval by the FAA. However, the requirement to have the equipment, tools, and test apparatus in place at the time of initial certification or rating approval may be met if the applicant has a contract acceptable to the FAA with another person to make the equipment, tools, and test apparatus available to the repair station at any time it is necessary when the relevant work is being performed.

* * * * *

(e) Unless otherwise authorized by the FAA, neither the holder of a repair station certificate that has been revoked, nor any person who had a substantial ownership interest or substantial control over the operations of a repair station that has had its certificate revoked and who materially contributed to the circumstances causing the revocation, may apply for a repair station certificate until one year after the date the certificate is surrendered to the FAA pursuant to the order of revocation.

3. Revise § 145.53 to read as follows:

§ 145.53 Issuance of certificate.

(a) Except as provided in paragraph (c) of this section, a person who meets the requirements of this part is entitled to a repair station certificate with appropriate ratings prescribing such operations specifications and limitations as are necessary in the interest of safety.

(b) If the person is located in a country with which the United States has a bilateral aviation safety agreement, the FAA may find that the person meets the requirements of this part based on a certification from the civil aviation authority of that country or an authority acceptable to the FAA. This certification must be made in accordance with implementation procedures signed by the Administrator or the Administrator's designee.

(c) An application for a repair station certificate may be denied if the FAA finds that:

(1) The applicant does not meet the eligibility requirements for the certificate sought, or does not complete the certification process;

(2) The applicant previously held a repair station certificate that was revoked;

(3) The applicant intends to fill or fills a key management position, including the position of accountable manager or chief inspector, with an individual who exercised control over or who held the same or a similar position with a repair station whose certificate was revoked, or was in the process of being revoked, and that individual materially contributed to the circumstances causing the revocation or causing the revocation process;

(4) The applicant held a key management position, including the position of accountable manager or chief inspector, with a repair station whose certificate was revoked, or was in the process of being revoked, and the applicant materially contributed to the circumstances causing the revocation or causing the revocation process; or

(5) An individual who will have control over or substantial ownership interest in the applicant had the same or similar control or interest in a repair station whose certificate was revoked, or was in the process of being revoked, and that individual materially contributed to the circumstances causing revocation or causing the revocation process.

4. Revise § 145.59 to read as follows:

§ 145.59 Ratings.

The following ratings are issued under this subpart:

(a) *Aircraft rating.* (1) A certificated repair station with an Aircraft rating listed on its operations specifications may perform maintenance, preventive maintenance, and alterations on complete aircraft that are listed on the repair station's capability list required by § 145.215.

(2) A certificated repair station with an Aircraft rating may not perform maintenance, preventive maintenance, and alterations on those articles for which a Powerplant, Propeller, or Avionics rating is required, unless the repair station possesses the appropriate rating.

(3) A certificated repair station with an Aircraft rating is not required to obtain a separate Component rating to maintain articles associated with its rating and capabilities.

(b) *Powerplant rating.* (1) A certificated repair station with a Powerplant rating listed on its operations specifications may perform maintenance, preventive maintenance, and alterations on a powerplant listed on the repair station's capability list required by § 145.215 under the following class ratings:

(i) Class 1: Reciprocating engines.

(ii) Class 2: Turbine engines.

(iii) Class 3: Auxiliary Power Units (APU).

(2) A certificated repair station with a Powerplant rating may not perform maintenance, preventive maintenance, and alterations on those articles associated with another rating, unless the repair station possesses the appropriate rating.

(3) A certificated repair station with a Powerplant rating is not required to obtain a separate Component rating to maintain articles associated with its rating and capabilities.

(c) *Propeller rating.* (1) A certificated repair station with a Propeller rating listed on its operations specifications may perform maintenance, preventive maintenance, and alterations on propellers that are listed on the repair station's capability list required by § 145.215, including individual component parts that are installed on or in those propellers.

(2) A certificated repair station with a Propeller rating may not perform maintenance, preventive maintenance, and alterations on those articles associated with another rating, unless the repair station possesses the appropriate rating.

(3) A certificated repair station with a Propeller rating is not required to obtain a separate Component rating to maintain articles associated with its rating and capabilities.

(d) *Avionics rating.* (1) A certificated repair station with an Avionics rating listed on its operations specifications may perform maintenance, preventive maintenance, and alterations on aircraft electrical and electronic systems and components, instruments, radios, integrated modular systems, in-flight entertainment units, or other electrical and electronic articles that are listed on the repair station's capability list required by § 145.215.

(2) A certificated repair station with an Avionics rating may remove and reinstall access panels, brackets, or clamps in accordance with the applicable maintenance instructions on aircraft, powerplants, or propellers, as needed, to gain access to those articles authorized in § 145.59 (d)(1).

(3) A certificated repair station with an Avionics rating may remove, replace, install, and test the avionics equipment on an aircraft.

(4) A certificated repair station with an Avionics rating must have a limitation in accordance with § 145.61 to an Aircraft, Powerplant, or Propeller rating to perform a major or minor alteration.

(e) *Component rating.* (1) A certificated repair station with a

Component rating listed on its operations specifications may perform maintenance, preventive maintenance, and alterations on articles listed on the repair station's capability list required by § 145.215 that are not installed on an aircraft, powerplant, propeller, or avionics article.

(2) A certificated repair station with a Component rating must have a limitation in accordance with § 145.61 to an Aircraft, Powerplant, or Propeller rating to remove or install articles on those products.

5. Revise § 145.61 to read as follows:

§ 145.61 Limitations to ratings.

(a) The FAA may issue limitations to the ratings of a certificated repair station that maintains or alters only a particular type of aircraft, powerplant, propeller, avionics, component, or part thereof, that is listed on the repair station's capability list required by § 145.215. A limitation to a rating may be issued for a:

(1) Specific make and model aircraft, powerplant, or propeller.

(2) Constituent part of any part.

(3) Specific maintenance function or process.

(b) The repair station's operations specifications must identify the rating in § 145.59 to which the limitation applies and the limitation to that rating must describe the maintenance capabilities of the repair station in sufficient detail.

6. Add § 145.63 to read as follows:

§ 145.63 Specialized Service ratings.

(a) The FAA may issue a Specialized Service rating to a certificated repair station that:

(1) Performs a specialized maintenance function that requires equipment and skills not ordinarily performed under another repair station rating;

(2) Performs a maintenance function on articles not covered by its rating; or

(3) Performs a maintenance function that is not described in the manufacturer's data.

(b) A specialized maintenance function must be performed in accordance with an FAA-approved process specification.

(c) The repair station's operations specifications must contain the specification used to perform the specialized service. The specification may be:

(1) A current industry or military specification approved by the FAA.

(2) A specification developed by the applicant and approved by the FAA.

(d) A certificated repair station may, under its Specialized Service rating, perform only the specialized services

that are listed on the repair station's capability list required by § 145.215.

7. Revise § 145.101 to read as follows:

§ 145.101 General.

A certificated repair station must provide housing, facilities, equipment, tools, materials, and data that meet the applicable requirements for the issuance of the certificate and any rating the repair station holds.

8. Revise § 145.103(a)(1), (b), and (c) and add new paragraph (d) to read as follows:

§ 145.103 Housing and facilities requirements.

(a) * * *

(1) Permanent housing for the facilities, equipment, materials, and personnel consistent with its ratings.

* * * * *

(b) A certificated repair station with an Aircraft rating must provide suitable permanent housing to enclose the largest type and model of aircraft listed on its capability list.

(c) A certificated repair station may perform maintenance, preventive maintenance, and alterations on articles outside of its permanent housing if it provides suitable facilities that are acceptable to the FAA and meet the requirements of § 145.103(a) and part 43 of this chapter.

(d) A certificated repair station may apply to use additional fixed locations within close proximity to the certificated repair station and to each other to perform the maintenance, preventative maintenance, alterations, for which it is rated.

(1) The repair station's request must be approved by the FAA before exercising the privileges of its certificate and ratings at each additional fixed location.

(2) Any fixed location outside of the geographic boundary of the FAA office with oversight responsibility for the repair station must either be certificated as a satellite repair station and meet the requirements of § 145.107, or must obtain its own repair station certificate under the provisions of § 145.51 and § 145.53.

9. Revise § 145.107(a) and (b) to read as follows:

§ 145.107 Satellite repair stations.

(a) A certificated repair station under the managerial control of another certificated repair station may operate as a satellite repair station with its own certificate issued by the FAA. A satellite repair station:

(1) Must meet the requirements for each rating it holds;

(2) Must submit a repair station manual acceptable to the FAA;

(3) Must submit a quality system manual acceptable to the FAA; and

(4) May submit the same repair station and quality system manuals as the repair station that exercises managerial control over the satellite repair station. The manuals must identify any specific processes or procedures unique to the satellite repair station in appendices or additional sections.

(b) Unless the FAA indicates otherwise, personnel and equipment from the certificated repair station with managerial control and each satellite repair station may be shared. However, inspection personnel must be designated for each satellite repair station and be available at the satellite repair station any time a determination of airworthiness or an approval for return to service is made. In other circumstances, inspection personnel may be away from the premises but must be readily available.

* * * * *

10. Revise § 145.109, section heading, paragraph (a), and paragraph (d) introductory text to read as follows:

§ 145.109 Equipment, tools, test apparatus, materials, and data requirements.

(a) Except as otherwise prescribed by the FAA, when a repair station is performing work under its repair station certificate and operations specifications, the repair station must have on the premises and under its control the equipment, tools, test apparatus, and materials necessary to perform the maintenance, preventive maintenance, or alterations in accordance with part 43.

* * * * *

(d) A certificated repair station must maintain, in a format acceptable to the FAA, the documents and data required for the performance of maintenance, preventive maintenance, and alterations under its repair station certificate and operations specifications in accordance with part 43. The following documents and data must be current, available, and accessible when the relevant work is accomplished:

* * * * *

11. Revise § 145.151 to read as follows:

§ 145.151 Personnel requirements.

Each certificated repair station must:

(a) Designate a repair station employee as the accountable manager;

(b) Designate a repair station employee as the chief inspector;

(c) Provide qualified personnel to plan, supervise, perform, and approve for return to service the maintenance, preventive maintenance, and alterations

performed under the repair station certificate and operations specifications;

(d) Ensure it has a sufficient number of employees with the training, knowledge, and experience in the performance of maintenance, preventive maintenance, and alterations authorized by the repair station certificate and operations specifications to ensure all maintenance is performed in accordance with part 43; and

(e) Determine the abilities of its noncertified employees performing maintenance, preventive maintenance, and alterations based on training, knowledge, experience, or practical tests.

12. Revise § 145.155 (a)(2) and add new paragraphs (c) and (d) to read as follows:

§ 145.155 Inspection personnel requirements.

(a) * * *

(1) * * *

(2) Proficient in using the various types of inspection equipment and techniques appropriate for the article being inspected.

* * * * *

(c) The chief inspector of a repair station located within the United States must be certificated under part 65.

(d) Personnel designated as chief inspectors for certificated repair stations within and outside the United States must have at least three years experience using the various types of inspection equipment and techniques appropriate for the article being inspected.

13. Revise § 145.161(a)(2) and (a)(4)(i), (ii), (iii), and (iv) and remove paragraph (a)(4)(v) to read as follows:

§ 145.161 Records of management, supervisory, and inspection personnel.

(a) * * *

(2) A roster with the names of all inspection personnel, including the chief inspector;

* * * * *

(4) * * *

(i) Present title.

(ii) Past relevant employment with names of employers, periods of employment, positions, and types of maintenance performed.

(iii) Scope of present employment.

(iv) The type of mechanic or repairman certificate held and the ratings on that certificate, if applicable.

* * * * *

14. Amend § 145.203 by redesignating the introductory text as paragraph (a), redesignating paragraphs (a) and (b) as paragraphs (a)(1) and (a)(2) respectively, and adding new paragraph (b) to read as follows:

§ 145.203 Work performed at another location.

* * * * *

(b) A certificated repair station may not perform maintenance, preventive maintenance, or alterations outside its domicile country unless:

(1) The repair station obtains authorization from the country where the work is to be performed;

(2) The repair station submits a request to the FAA accompanied by:

(i) A description of the procedures that will be used to ensure that repair station personnel adhere to the procedures identified in its manual;

(ii) Evidence of authorization to perform the work from the country where that work is to be performed.

(3) The performance of that work has been approved in writing by the FAA prior to its commencement.

15. Revise § 145.205(a), (b), (c), and (d) introductory text to read as follows:

§ 145.205 Maintenance, preventive maintenance, and alterations performed for certificate holders operating under parts 121, 125, or 135, or for foreign air carriers or foreign persons operating U.S.-registered aircraft in common carriage under part 129.

(a) A certificated repair station that performs maintenance, preventive maintenance, or alterations for an air carrier or commercial operator that has a continuous airworthiness maintenance program under part 121 or part 135 must comply with the applicable parts of this chapter and follow the air carrier or commercial operator's program and applicable sections of its maintenance manual.

(b) A certificated repair station that performs inspections for a certificate holder conducting operations under part 125 must comply with the applicable parts of this chapter and follow the operator's FAA-approved inspection program.

(c) A certificated repair station that performs maintenance, preventive maintenance, or alterations for a foreign air carrier or foreign person operating a U.S.-registered aircraft under part 129 must comply with the applicable parts of this chapter and follow the operator's FAA-approved maintenance program.

(d) Notwithstanding the housing requirement of § 145.103(b), the FAA may grant approval for an appropriately-rated repair station to perform line maintenance for an air carrier or commercial operator conducting operations under part 121 or part 135, or a foreign air carrier or foreign person operating a U.S.-registered aircraft in common carriage under part 129, on any aircraft operated by that air carrier,

commercial operator, or person, provided:

* * * * *

16. Revise § 145.211 to read as follows:

§ 145.211 Quality system.

(a) A certificated repair station must establish and maintain a quality system acceptable to the FAA that ensures—

(1) The maintenance, preventive maintenance, and alterations performed by the repair station and its contractors result in articles that are airworthy with respect to the work performed—

(2) The repair station's procedures are complied with and are appropriate for the ratings it holds and the complexity and scope of the maintenance accomplished; and

(3) The repair station remains in compliance with the applicable regulations of this chapter.

(b) The quality system must include the following elements:

(1) An inspection system and procedures for

(i) Inspecting incoming raw materials and articles to ensure acceptable quality;

(ii) Performing preliminary inspection of all articles that are maintained;

(iii) Inspecting all articles that have been involved in an accident or incident for hidden damage before maintenance, preventive maintenance, or alteration is performed; and

(iv) Performing final inspection and approval for return to service of maintained articles.

(2) An internal evaluation program to ensure the repair station's manuals and procedures comply with the requirements of this part.

(3) A reporting system to record and maintain completed evaluations and corrective action plans.

(4) A schedule for conducting annual quality system evaluations.

(5) A corrective action procedure to ensure any deficiencies are corrected.

(6) Procedures for conducting follow-up evaluations to ensure corrective action(s) bring any deficiencies into compliance.

(7) Procedures for qualifying, training, and authorizing persons to perform quality system internal evaluations.

(8) Procedures for revising the repair station's internal evaluation system as its ratings or capabilities change and for notifying the FAA certificate holding district office of revisions to its quality system.

(9) Procedures for establishing and maintaining proficiency of inspection personnel.

(10) Procedures for establishing and maintaining current data for maintaining articles.

(11) Procedures for establishing and maintaining a suspected unapproved parts program.

(12) Procedures for qualifying and surveilling noncertificated persons who perform maintenance, preventive maintenance, or alterations for the repair station.

(13) Procedures for calibrating measuring and test equipment used in maintaining articles, including the intervals at which the equipment will be calibrated.

(c) A certificated repair station must make its quality system evaluations and its corrective action plans available for inspection by the FAA.

(d) A certificated repair station must prepare and keep current a quality system manual in a format acceptable to the FAA that includes the following:

(1) A description of the elements defined in § 145.211(b).

(2) References, where applicable, to the manufacturer's or other applicable inspection standards for a particular article, including reference to any data specified in those standards.

(3) A sample of the inspection and maintenance forms and instructions for completing such forms or a reference to a separate forms manual.

(4) Procedures for revising the quality system manual required under this section.

(5) Procedures for notifying its certificate holding district office of revisions to its quality system manual.

(e) Repair station personnel must follow the quality system manual when performing maintenance, preventive maintenance, and alterations under the repair station certificate and operations specifications.

17. Revise § 145.215 to read as follows:

§ 145.215 Capability list.

(a) Each certificated repair station must establish and maintain a capability list acceptable to the FAA that includes all the articles for which it is rated to perform maintenance, preventive maintenance, and alterations.

(b) The capability list for each certificated repair station must identify each article by manufacturer and the type, make, model, category, or other nomenclature designated by the article's manufacturer and be available in a format acceptable to the FAA.

(c) The capability list for a certificated repair station with an Avionics or Component rating must also be organized by category of article.

(d) An article may be listed on the capability list only if the article is within the scope of the ratings of the repair station's certificate, and only after

the repair station has performed a self-evaluation in accordance with the procedures described in its repair station manual.

(1) The repair station must perform this self-evaluation to determine that the repair station has the housing, facilities, equipment, tools, test apparatus, material, data, processes, and trained personnel in place to perform the work on the article in accordance with part 145.

(i) A repair station with an aircraft rating may not perform a self-evaluation to add a different type of aircraft to its Aircraft rating.

(ii) A repair station with a Powerplant rating may not perform a self-evaluation to add a different class powerplant to its Powerplant rating.

(2) The repair station must retain the documentation of the self-evaluation and ensure that completed self-evaluations are available to the FAA.

(e) Within 30 business days of listing an additional article on its capability list, the repair station must provide its FAA certificate holding district office with a copy of the revised capability list in accordance with the procedures described in its repair station manual.

18. Revise § 145.217(a) and (b) and add new paragraph (d) to read as follows:

§ 145.217 Contract maintenance.

(a) A certificated repair station may contract a maintenance function

pertaining to an article to an outside source provided the repair station maintains and makes available to its certificate holding district office, in a format acceptable to the FAA:

(1) The maintenance functions contracted to each outside facility; and

(2) The name of each outside facility to which the repair station contracts maintenance functions and the type of certificate and ratings, if any, held by each facility.

(b) A certificated repair station may contract a maintenance function pertaining to an article to a person not certificated under part 145 provided:

(1) The FAA approves the maintenance function;

(2) The noncertificated person follows a quality system equivalent to the system followed by the certificated repair station;

(3) The certificated repair station remains directly in charge of the maintenance performed by the noncertificated person; and

(4) The certificated repair station verifies, by test and/or inspection, that the maintenance, preventive maintenance, and alterations have been performed satisfactorily by the noncertificated person and that the article is airworthy before approving it for return to service.

* * * * *

(d) A certificated repair station may not contract any maintenance functions

for which it is not rated to a noncertificated person.

19. Amend § 145.223 by revising paragraph (c) and adding new paragraph (d) to read as follows:

§ 145.223 FAA inspections.

* * * * *

(c) A certificated repair station may not contract for the performance of a maintenance function on an article with a noncertificated person when the maintenance function is to be performed under the terms of an aviation safety agreement and the article is subject to the airworthiness regulation of another civil aviation authority unless the contract with the noncertificated person specifies that the FAA may inspect and observe the performance of the work on behalf of that civil aviation authority.

(d) A certificated repair station may not approve any article for return to service on which a maintenance function was performed by a noncertificated person if the noncertificated person does not permit the FAA to inspect and observe the performance of the work as described in paragraphs (b) and (c) of this section.

Issued in Washington, DC on November 27, 2006.

James Ballough,

Director, Flight Standards Service.

Last List November 22, 2006

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, go to <http://listserv.gsa.gov/archives/publaws-l.html>

Note: This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

TABLE OF EFFECTIVE DATES AND TIME PERIODS—DECEMBER 2006

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these

dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

| DATE OF FR PUBLICATION | 15 DAYS AFTER PUBLICATION | 30 DAYS AFTER PUBLICATION | 45 DAYS AFTER PUBLICATION | 60 DAYS AFTER PUBLICATION | 90 DAYS AFTER PUBLICATION |
|------------------------|---------------------------|---------------------------|---------------------------|---------------------------|---------------------------|
| Dec 1 | Dec 18 | Jan 2 | Jan 16 | Jan 30 | Mar 1 |
| Dec 4 | Dec 19 | Jan 3 | Jan 18 | Feb 2 | Mar 5 |
| Dec 5 | Dec 20 | Jan 4 | Jan 19 | Feb 5 | Mar 5 |
| Dec 6 | Dec 21 | Jan 5 | Jan 22 | Feb 5 | Mar 6 |
| Dec 7 | Dec 22 | Jan 8 | Jan 22 | Feb 5 | Mar 7 |
| Dec 8 | Dec 26 | Jan 8 | Jan 22 | Feb 6 | Mar 8 |
| Dec 11 | Dec 26 | Jan 10 | Jan 25 | Feb 9 | Mar 12 |
| Dec 12 | Dec 27 | Jan 11 | Jan 26 | Feb 12 | Mar 12 |
| Dec 13 | Dec 28 | Jan 12 | Jan 29 | Feb 12 | Mar 13 |
| Dec 14 | Dec 29 | Jan 16 | Jan 29 | Feb 12 | Mar 14 |
| Dec 15 | Jan 2 | Jan 16 | Jan 29 | Feb 13 | Mar 15 |
| Dec 18 | Jan 2 | Jan 17 | Feb 1 | Feb 16 | Mar 19 |
| Dec 19 | Jan 3 | Jan 18 | Feb 2 | Feb 20 | Mar 19 |
| Dec 20 | Jan 4 | Jan 19 | Feb 5 | Feb 20 | Mar 20 |
| Dec 21 | Jan 5 | Jan 22 | Feb 5 | Feb 20 | Mar 21 |
| Dec 22 | Jan 8 | Jan 22 | Feb 5 | Feb 20 | Mar 22 |
| Dec 26 | Jan 10 | Jan 25 | Feb 9 | Feb 26 | Mar 26 |
| Dec 27 | Jan 11 | Jan 26 | Feb 12 | Feb 26 | Mar 27 |
| Dec 28 | Jan 12 | Jan 29 | Feb 12 | Feb 26 | Mar 28 |
| Dec 29 | Jan 16 | Jan 29 | Feb 12 | Feb 27 | Mar 29 |
