

0.5 (GIWW mile 6.2 East of Harvey Lock), to remain closed to navigation from 6:30 a.m. until 5:45 p.m. on Tuesday, December 5, 2006.

The bascule bridge has a vertical clearance of 1 foot above high water in the closed-to-navigation position. Navigation on the waterway consists mainly of tugs with tows and some ships. The bridge normally opens to pass navigation an average of eight times during the deviation period. In accordance with 33 CFR 117.458(a), the draw of the bridge shall open on signal; except that, from 6:30 a.m. to 8:30 a.m. and from 3:30 p.m. to 5:45 p.m., Monday through Friday, except federal holidays, the draw need not open for the passage of vessels. The draw shall open at any time for a vessel in distress. Normally, the draw is required to open at any time for a vessel in distress. However, the bridge will not be able to open for emergencies during the closure period. An alternate route is available to mariners by proceeding down the Mississippi River to Venice, Louisiana, crossing the Breton Sound and proceeding up the Mississippi River Gulf Outlet.

The Coast Guard has coordinated the closure with waterway users, industry, and other Coast Guard units. It has been determined that this closure will not have a significant effect on vessel traffic.

In accordance with 33 CFR 117.35(c), this work will be performed with all due speed in order to return the bridge to normal operation as soon as possible. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: November 13, 2006.

Marcus Redford,
Bridge Administrator.

[FR Doc. E6-20485 Filed 12-4-06; 8:45 am]

BILLING CODE 4910-15-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[CGD08-06-041]

Drawbridge Operating Regulations; Berwick Bay, (Atchafalaya River) Morgan City, LA

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, Eighth Coast Guard District, has issued a temporary deviation from the regulation

governing the operation of the BNSF Railway Company Vertical Lift Span Bridge across Berwick Bay, mile 0.4, (Atchafalaya River, mile 17.5) at Morgan City, St. Mary Parish, Louisiana. This deviation provides for the bridge to remain closed to navigation for 12 consecutive hours to conduct scheduled maintenance to the drawbridge.

DATES: This deviation is effective from 8 a.m. until 8 p.m. on Wednesday, December 13, 2006.

ADDRESSES: Materials referred to in this document are available for inspection or copying at the office of the Eighth Coast Guard District, Bridge Administration Branch, Hale Boggs Federal Building, Room 1313, 500 Poydras Street, New Orleans, Louisiana 70130-3310 between 7 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (504) 671-2128. The Bridge Administration Branch maintains the public docket for this temporary deviation.

FOR FURTHER INFORMATION CONTACT: David Frank, Bridge Administration Branch, telephone (504) 671-2128

SUPPLEMENTARY INFORMATION: The BNSF Railway Company has requested a temporary deviation in order to replace the railroad signal circuits of the BNSF Railway Railroad Vertical Lift Span Bridge across Berwick Bay, mile 0.4 (Atchafalaya River, mile 17.5) at Morgan City, St. Mary Parish, Louisiana. Replacement of the signal circuits is necessary to turn the lining of signals across the bridge into a fully automatic operation so that the bridge will be in full compliance with requirements of the Federal Railroad Administration. This temporary deviation will allow the bridge to remain in the closed-to-navigation position from 8 a.m. until 8 p.m. on Wednesday, December 13, 2006. There may be times, during the closure period, when the draw will not be able to open for emergencies.

The bridge provides 4 feet of vertical clearance in the closed-to-navigation position. Thus, most vessels will not be able to transit through the bridge site when the bridge is closed. Navigation on the waterway consists of tugs with tows, fishing vessels and recreational craft including sailboats and powerboats. Due to prior experience, as well as coordination with waterway users, it has been determined that this closure will not have a significant effect on these vessels.

In accordance with 33 CFR 117.35(c), this work will be performed with all due speed in order to return the bridge to normal operation as soon as possible. This deviation from the operating

regulations is authorized under 33 CFR 117.35.

Dated: November 16, 2006.

Marcus Redford,
Bridge Administrator.

BILLING CODE 4910-15-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 70

[EPA-R07-OAR-2006-0900; FRL-8250-7]

Approval and Promulgation of Implementation Plans and Operating Permits Program; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is taking direct final action to approve the State Implementation Plan (SIP) and operating permits program revision submitted by the state of Missouri to update the ambient air quality standards, sampling methods, definitions, and common reference methods and tables. The update also includes references to implement the 8-hour ozone and PM_{2.5} National Ambient Air Quality Standards that were finalized on July 18, 1997.

DATES: This direct final rule will be effective February 5, 2007, without further notice, unless EPA receives adverse comment by January 4, 2007. If adverse comment is received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R07-OAR-2006-0900, by one of the following methods:

1. <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.
2. E-mail: algoe-eakin.amy@epa.gov.
3. Mail: Amy Algae-Eakin, Environmental Protection Agency, Air Planning and Development Branch, 901 North 5th Street, Kansas City, Kansas 66101.
4. Hand Delivery or Courier. Deliver your comments to Amy Algae-Eakin, Environmental Protection Agency, Air Planning and Development Branch, 901 North 5th Street, Kansas City, Kansas 66101.

Instructions: Direct your comments to Docket ID No. EPA-R07-OAR-2006-0900. EPA's policy is that all comments received will be included in the public

docket without change and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through <http://www.regulations.gov> or e-mail information that you consider to be CBI or otherwise protected. The <http://www.regulations.gov> Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through <http://www.regulations.gov>, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the electronic docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in <http://www.regulations.gov> or in hard copy at the Environmental Protection Agency, Air Planning and Development Branch, 901 North 5th Street, Kansas City, Kansas 66101. The Regional Office's official hours of business are Monday through Friday, 8 a.m. to 4:30 p.m., excluding Federal holidays. The interested persons wanting to examine these documents should make an appointment with the office at least 24 hours in advance.

FOR FURTHER INFORMATION CONTACT: Amy Algoe-Eakin at (913) 551-7942, or by e-mail at algoe-eakin.amy@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean

EPA. This section provides additional information by addressing the following questions:

- What is a SIP?
- What is the Federal approval process for a SIP?
- What does Federal approval of a state regulation mean to me?
- What is the Part 70 operating permit program and approval process?
- What is being addressed in this document?
- Have the requirements for approval of a SIP revision and operating permit program revision been met?
- What action is EPA taking?

What is a SIP?

Section 110 of the Clean Air Act (CAA) requires states to develop air pollution regulations and control strategies to ensure that state air quality meets the national ambient air quality standards (NAAQS) established by EPA. These ambient standards are established under section 109 of the CAA, and they currently address six criteria pollutants. These pollutants are: Carbon monoxide, nitrogen dioxide, ozone, lead, particulate matter, and sulfur dioxide.

Each state must submit these regulations and control strategies to us for approval and incorporation into the Federally-enforceable SIP.

Each Federally-approved SIP protects air quality primarily by addressing air pollution at its point of origin. These SIPs can be extensive, containing state regulations or other enforceable documents and supporting information such as emission inventories, monitoring networks, and modeling demonstrations.

What is the Federal approval process for a SIP?

In order for state regulations to be incorporated into the Federally-enforceable SIP, states must formally adopt the regulations and control strategies consistent with state and Federal requirements. This process generally includes a public notice, public hearing, public comment period, and a formal adoption by a state-authorized rulemaking body.

Once a state rule, regulation, or control strategy is adopted, the state submits it to us for inclusion into the SIP. We must provide public notice and seek additional public comment regarding the proposed Federal action on the state submission. If adverse comments are received, they must be addressed prior to any final Federal action by us.

All state regulations and supporting information approved by EPA under section 110 of the CAA are incorporated into the Federally-approved SIP. Records of such SIP actions are

maintained in the Code of Federal Regulations (CFR) at title 40, part 52, entitled "Approval and Promulgation of Implementation Plans." The actual state regulations which are approved are not reproduced in their entirety in the CFR outright but are "incorporated by reference," which means that we have approved a given state regulation with a specific effective date.

What does Federal approval of a state regulation mean to me?

Enforcement of the state regulation before and after it is incorporated into the Federally-approved SIP is primarily a state responsibility. However, after the regulation is Federally approved, we are authorized to take enforcement action against violators. Citizens are also offered legal recourse to address violations as described in section 304 of the CAA.

What is the Part 70 operating permits program and approval process?

The CAA requires all states to develop operating permits programs that meet certain Federal criteria. The purpose of the program is to consolidate all applicable CAA requirements into a single permit document issued to a source subject to the permit program. The process for EPA approval of a Part 70 program or program revision is similar to the process for approval of a SIP. Permits issued under an EPA-approved permit program are enforceable by EPA and the state.

What is being addressed in this document?

EPA is approving a revision to the SIP and Part 70 permits program for the state of Missouri that was state effective on February 28, 2006. The revisions include the 8-hour ozone and PM_{2.5} NAAQS that were finalized by EPA on July 18, 1997.

The revision to 10 CSR 10-6.010 (Ambient Air Quality Standards) updates the ambient air quality standards table to include the Federal revision to the NAAQS, and reformatted the columns for clarity. It should be noted that, unlike many other requirements in the Missouri SIP, the NAAQS are not requirements imposed directly on sources under the CAA (although states may impose such requirements directly on sources under state law). Sources must comply with emissions limitations and standards under the CAA and the SIP, but the NAAQS are not emissions limitations and standards under the CAA. However, because the Missouri rules establish other requirements, applicable to sources, designed to protect the NAAQS

(*e.g.*, the requirement that a source may not obtain certain permits if it would cause or contribute to a violation of the NAAQS), EPA has included Missouri's adoption of the NAAQS in the SIP to assist in implementation of the NAAQS.

Chapter 10 CSR 10-6.020 (Definitions and Common Reference Tables) revises the definitions for insignificant activity, particulate matter, and adds definitions for PM_{2.5}. Five compounds were added to the volatile organic compounds definition and minor changes were made to the table listing hazardous air pollutants (table 3), and the related footnotes. In order to maintain formatting consistent with other rules, the state added sections (4) and (5) to state that reporting and record keeping, and test methods are not applicable to 10 CSR 10-6.020. It should be noted that revisions made to 10 CSR 10-6.020, and specifically the clarification of the definition of "insignificant activity" also apply to Missouri's operating permits program.

The revisions to 10 CSR 10-6.030 (Sampling Methods for Air Pollution sources) add EPA's Conditional Test Method 039 to determine the total PM₁₀ and PM_{2.5} fraction of filterable particulate matter including condensibles. Two paragraphs that discussed PM_{2.5} emissions in stack gases were combined for clarity and readability.

Revisions to 10 CSR 10-6.040 (Reference Methods) add references to appendices included in the Federal regulations that specify test methods for PM_{2.5}.

Minor revisions to each of the rules were made to correct spelling, to include the most recent date of the Federal regulations, and to improve the overall readability.

Have the requirements for approval of a SIP revision and operating permit program revision been met?

The state submittal has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submittal also satisfied the completeness criteria of 40 CFR part 51, appendix V. In addition, as explained above and in more detail in the technical support document which is part of this docket, the revision meets the substantive SIP requirements of the CAA. Finally, the submittal meets the substantive requirements of Title V of the 1990 CAA Amendments and 40 CFR Part 70.

What action is EPA taking?

EPA is approving a revision to the SIP for the state of Missouri to update the ambient air quality standards,

sampling methods, definitions, and common reference methods and tables to include the 8-hour ozone and PM_{2.5} NAAQS that were finalized on July 18, 1997. EPA is also approving the revisions to the state's definitions rule as a revision to the Part 70 operating program. We are processing this action as a direct final action because the revisions make routine changes to the existing SIP which are noncontroversial. Therefore, we do not anticipate any adverse comments. Please note that if EPA receives adverse comment on part of this rule and if that part can be severed from the remainder of the rule, EPA may adopt as final those parts of the rule that are not the subject of an adverse comment.

Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255,

August 10, 1999). This action merely approves a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the CAA. This rule also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing state submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a state submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a state submission, to use VCS in place of a state submission that otherwise satisfies the provisions of the CAA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 5, 2007. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)
