

TA-W-60,366; Jones Apparel Group, NY Better Apparel Production, New York, NY.

TA-W-60,159; Brown International Corporation, Covina, CA.

The investigation revealed that the predominate cause of worker separations is unrelated to criteria (a)(2)(A)(I.C.) (increased imports) and (a)(2)(B)(II.C.) (shift in production to a foreign country under a free trade agreement or a beneficiary country under a preferential trade agreement, or there has been or is likely to be an increase in imports).

None.

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-60,265; Physical Rehab Works, Working Onsite at Maytag Corp., Herrin, IL.

TA-W-60,265A; Executive Security Specialists, Working Onsite at Maytag Corp., Herrin, IL.

TA-W-60,272; Elder Manufacturing Co., Dexter Facility, Dexter, MO.

The investigation revealed that criteria of Section 222(b)(2) has not been met. The workers' firm (or subdivision) is not a supplier to or a downstream producer for a firm whose workers were certified eligible to apply for TAA.

None.

I hereby certify that the aforementioned determinations were issued during the period of November 20 through November 24, 2006. Copies of these determinations are available for inspection in Room C-5311, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: November 30, 2006.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-60,429]

Xyron Inc., Garden Grove, CA; Notice of Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, as amended, an investigation was initiated on November 14, 2006, in response to a petition filed on behalf of workers of Xyron Inc., Garden Grove, California. The workers produced adhesive coated liners.

This petitioning group of workers is covered by an earlier petition (TA-W-60,355) filed on November 2, 2006, that is the subject of an ongoing investigation for which a determination has not yet been issued. Accordingly, further investigation in this case would serve no purpose and this investigation has been terminated.

Dated: November 29, 2006.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Approval for Missouri for Avoidance of 2006 Credit Reduction Under the Federal Unemployment Tax Act

Sections 3302(c)(2) and 3302(d)(3) of the Federal Unemployment Tax Act (FUTA) provide that employers in a state that has an outstanding balance of advances under Title XII of the Social Security Act on January 1 of two or more consecutive years are subject to a reduction in credits otherwise available against the FUTA tax for a calendar year, if a balance of advances remains on November 10 of that year. Because the account of Missouri in the Unemployment Trust Fund had a balance of advances on January 1 of 2004, 2005, and 2006, and still had a balance of advances on November 10, 2006, Missouri employers were potentially liable for a reduction in their FUTA offset credit for 2006.

Section 3302(g) of FUTA provides that a state may avoid credit reduction for a year by meeting certain criteria. Missouri applied for avoidance of the 2006 credit reduction under this section. Pursuant to delegation of authority to me under Secretary's Order 4-75, I have determined that Missouri meets all of the criteria of section 3302(g) and thus qualifies for credit reduction avoidance. Therefore, Missouri employers will have no reduction in FUTA offset credit for calendar year 2006.

Dated: November 24, 2006.

Emily Stover DeRocco,

Assistant Secretary for Employment and Training.

BILLING CODE 4510-30-P

NATIONAL NANOTECHNOLOGY COORDINATION OFFICE

Nanoscale Science, Engineering and Technology Subcommittee, National Science and Technology Council, Committee on Technology; Research Needs and Priorities Related to the Environmental, Health, and Safety Aspects of Engineered Nanoscale Materials: Public Meeting

ACTION: Notice of public meeting.

SUMMARY: The National Nanotechnology Coordination Office (NNCO), on behalf of the Nanoscale Science, Engineering, and Technology (NSET) Subcommittee of the Committee on Technology, National Science and Technology Council (NSTC), will hold a public meeting on January 4, 2007, to receive input on research needs related to the environmental, health, and safety aspects of engineered nanoscale materials (hereafter referred to as nanomaterials). Specifically, the NSET Subcommittee is seeking comment on the research needs and prioritization criteria for the research identified in the NSET Subcommittee document Environmental, Health, and Safety Research Needs for Engineered Nanoscale Materials, which was released on September 15, 2006.

Date and Address: The public meeting will be held on Thursday, January 4, 2007, beginning at 8:30 a.m. at the FDIC Training Center, 3501 North Fairfax Drive, Arlington, VA 22226. A schedule will be published prior to the meeting. Directions to the facility are available on the registration web page (see below).

Registration: Persons interested in attending the meeting may register at http://www.nano.gov/public_ehs.html prior to the meeting. Due to space limitations, early registration is suggested. On-site registration will be available on a first-come basis, space permitting.

Persons interested in presenting comments at the meeting also should register at http://www.nano.gov/public_ehs.html and should do so no later than Wednesday, December 20, 2006.

Written or electronic comments may be submitted on the same web page until January 31, 2007.

Information on this meeting also will be posted on <http://www.nano.gov>.

FOR FURTHER INFORMATION, CONTACT: For information regarding this Notice, please contact Cate Alexander Brennan, National Nanotechnology Coordination Office. Telephone: (703) 292-4399. E-mail: calexand@nnco.nano.gov.

SUPPLEMENTARY INFORMATION: The Nanoscale Science, Engineering, and Technology (NSET) Subcommittee coordinates planning, budgeting, and program implementation and review to ensure a balanced and comprehensive National Nanotechnology Initiative (NNI). The NSET Subcommittee is composed of representatives from agencies participating in the NNI. The NNCO provides technical and administrative support to the NSET Subcommittee in its work.

On September 15, 2006, the NSET Subcommittee released a document identifying environmental, health, and safety research and information needs related to understanding and management of potential risks of nanomaterials. The document was created by the Nanotechnology Environmental and Health Implications (NEHI) Working Group of the NSET Subcommittee, which is composed of scientists and other agency representatives. The document also reflects expert input from industry liaison groups and other research needs-identification efforts.

This foundational document will be used by the NSET Subcommittee and the Federal agencies participating in the NNI as they set research priorities for Government-funded research programs.

The meeting is an opportunity for public participation in the prioritization of research related to environmental, health, and safety aspects of nanomaterials. Specific comment on research needs and prioritization criteria in the Environmental, Health, and Safety Research Needs for Engineered Nanoscale Materials document and input regarding the criteria for evaluating research priorities is welcome. (To read the document, see http://www.nano.gov/NNI_EHS_research_needs.pdf.)

The public meeting will be chaired by leadership of the NEHI Working Group, the NSET Subcommittee, and the NNCO.

For more information on the National Nanotechnology Initiative and its various working entities, please visit www.nano.gov.

How Can You Participate?

You can participate through oral presentation at the meeting or through written electronic material submitted to the NNCO at http://www.nano.gov/public_ehs.html. The meeting is open to the public, up to the limit set by facility fire codes. Pre-registration is required for participation (see above).

How Will the Meeting Day Be Structured?

Due to significant interest in and the breadth of this subject, our plan is to organize the public meeting around subject areas, including research prioritization criteria and the five research areas identified in the Environmental, Health, and Safety Research Needs for Engineered Nanoscale Materials document: Instrumentation, Metrology, and Analytical Methods; Nanomaterials and Human Health; Nanomaterials and the Environment; Health and Environmental Surveillance; and Risk Management Methods. Speakers are requested to indicate which research area you wish to speak to; if you will direct your comments to topics outside of those identified above, please indicate that as well, so that you can be scheduled accordingly.

In addition to indicating the topical area of your presentation, please also provide a short description of the content you intend to cover. The final organization of the meeting may change depending on the nature of the requests for presentations that are received. The speaker schedule will be distributed before the meeting.

How Will Public Input Be Used?

All comments and recommendations made at the meeting or in written submissions will be considered by the NEHI Working Group as it proceeds with prioritizing the research needs. Input from multiple stakeholders with various interests will be valuable to the NNI, especially with regard to strategic and interim goals for filling the EHS information needs gaps for nanomaterials. The NSET Subcommittee and NNI member agencies plan to make the priority-setting process a dynamic, open, and transparent process.

Mihail Roco,

Senior Advisor, Nanoscale Science, Engineering, and Technology Subcommittee of the National Science and Technology Council Committee on Technology.

BILLING CODE 3170-WF-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-400]; [License Nos. Npf-63]

Carolina Power & Light Company; Receipt of Request for Action Under 10 Cfr 2.206

Notice is hereby given that by petition dated September 20, 2006, and its

supplements dated October 23, and October 30, 2006, Mr. John D. Runkle (attorney for the petitioners) has requested that the U.S. Nuclear Regulatory Commission (NRC) take action with regard to Shearon Harris Nuclear Power Plant (SHNPP). The petitioners request that NRC take enforcement action in the form of an Order that would revoke SHNPP's Operating License or impose maximum fines for each violation for each day the plant has been in violation of fire protection regulations.

As the basis for this request, the petitioners discuss several fire safety violations at SHNPP which could affect the safe operation of the plant and safe shutdown of the plant in emergency situations. The petitioners' concerns focus on faulty fire barriers, reliance on indefinite compensatory measures, the risk associated with the noncompliances, and the NRC's enforcement discretion policy. The petitioners have also requested open and public proceedings with the NRC; the licensee, Carolina Power & Light, now doing business as Progress Energy; and external stakeholders in the vicinity of the SHNPP.

The request is being treated pursuant to Title 10 of the Code of Federal Regulations Section 2.206 (10 CFR 2.206) of the Commission's regulations. As provided by 10 CFR 2.206, the agency will take appropriate action on this petition within a reasonable time. A copy of the petition is available for inspection at the Commission's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209 or 301-415-4737, or by e-mail to pdr@nrc.gov.

For Nuclear Regulatory Commission.

Dated at Rockville, Maryland, this 4th day of December 2006.

J.E. Dyer,

Director, Office of Nuclear Reactor Regulation.
