SUPPLEMENTARY INFORMATION:

I. Abstract

The regional or community economic analysis of proposed fishery management policies is required by the Magnuson-Stevens Fishery Conservation and Management Act (MSA), National Environmental Policy Act (NEPA), and Executive Order 12866, among others. To satisfy these mandates and inform policymakers and the public of the likely regional economic impacts associated with fishery management policies, appropriate economic models and the data to implement these models are needed.

Much of the data required for regional economic analysis associated with Gulf

Coast Alaska fisheries are either unavailable or unreliable. The accurate fishery-level data on employment, labor income, and expenditures in the Gulf Coast Alaska fishery and related industries are not currently available but are needed to estimate the effects of fisheries on the economy of Gulf Coast Alaska. In this survey effort, data on these important regional economic variables will be collected and used to develop models that will provide more reliable estimates and significantly improve policy-makers' ability to assess policy effects on fishery-dependent communities in Gulf Coast Alaska. The survey will be a one-time survey.

Mail surveys will be used to collect data on employment and labor income from a random sample of 530 vessel owners whose boats delivered fish to Gulf Coast Alaska processors. In-person interviews and telephone calls (130) with businesses involved in the fishery and related industries will be used to obtain (a) Vessel expenditure/cost data; (b) regional economic data for non-fishery industries; and (c) regional economic data for the fish processing sector.

II. Method of Collection

Mail surveys, in-person interviews, and telephone surveys will be used as described above.
