BILLING CODE 4910-R4-M

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2006-26321]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA).

ACTION: Notice of applications for exemption from the diabetes standard; request for comments.

SUMMARY: FMCSA announces receipt of applications from 66 individuals for exemptions from the prohibition against persons with insulin-treated diabetes mellitus (ITDM) operating commercial motor vehicles (CMVs) in interstate commerce. If granted, the exemptions would enable these individuals with ITDM to operate commercial motor vehicles in interstate commerce.

DATES: Comments must be received on or before January 12, 2007.

ADDRESSES: You may submit comments identified by Department of Transportation (DOT) Docket Management System (DMS) Docket Number FMCSA-2006-26321 using any of the following methods:

- Web site: <http://dmses.dot.gov>.

Follow the instructions for submitting comments on the DOT electronic docket site.

- Fax: 1-202-493-2251.

• Mail: Docket Management Facility; U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590-0001.

• Hand Delivery: Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

• Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

All submissions must include the Agency name and docket number for this Notice. Note that all comments received will be posted without change to <http://dms.dot.gov>, including any personal information provided. Please

see the Privacy Act heading under Regulatory Notices. To read background documents or comments received, go to <http://dms.dot.gov> or to Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC between 9 a.m. and 5 p.m. Monday through Friday, except Federal holidays.

Docket: For access to the docket to read background documents or comments received, go to <http://dms.dot.gov> at any time or Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The DMS is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review the DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477; Apr. 11, 2000). This information is also available at <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT: Dr. Mary D. Gunnels, Chief, Physical Qualifications Division, (202) 366-4001, maggi.gunnels@dot.gov, FMCSA, Department of Transportation, 400 Seventh Street, SW., Room 8301, Washington, DC 20590-0001. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption for a 2-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption." The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 66 individuals listed in this Notice have recently requested an exemption from the diabetes prohibition in 49 CFR 391.41(b)(3), which applies to drivers of CMVs in interstate commerce. Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the

exemption will achieve the required level of safety mandated by the statute.

Qualifications of Applicants

Louis T. Aceto

Mr. Aceto, age 59, has had ITDM since 2003. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Aceto meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class C operator's license from Pennsylvania.

James D. Barton

Mr. Barton, 64, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Barton meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from North Carolina.

Lawrence H. Behrens

Mr. Behrens, 53, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Behrens meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2005 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Illinois.

Joel L. Bogenrief

Mr. Bogenrief, 28, has had ITDM since 1993. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Bogenrief meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class B CDL from Iowa.

Timothy W. Brogan

Mr. Brogan, 22, has had ITDM since 1991. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Brogan meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from California.

Eddy B. Brown

Mr. Brown, 48, has had ITDM since 2006. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Brown meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from North Carolina.

Kenneth E. Buck

Mr. Buck, 58, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the

assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Buck meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Vermont.

Carolynnda Cain

Ms. Cain, 53, has had ITDM since 2004. Her endocrinologist examined her in 2006 and certified that she has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of her diabetes using insulin, and is able to drive a CMV safely. Ms. Cain meets the requirements of the vision standard at 49 CFR 391.41(b)(10). Her ophthalmologist examined her in 2006 and certified that she does not have diabetic retinopathy. She holds a Class B CDL from Indiana.

Roy B. Carter

Mr. Carter, 41, has had ITDM since 1983. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Carter meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class C operator's license from Georgia.

Bradley D. Case

Mr. Case, 51, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV

safely. Mr. Case meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Indiana.

Jonathan M. Cleek

Mr. Cleek, 24, has had ITDM since 2001. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Cleek meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from West Virginia.

David D. Collart

Mr. Collart, 42, has had ITDM since 1990. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Collart meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds an operator's license from Washington.

Donald L. Cowan

Mr. Cowan, 38, has had ITDM since 1999. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Cowan meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy.

He holds a Class D operator's license from Ohio.

Michael J. Drake

Mr. Drake, 51, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Drake meets the requirements of the vision standard at 49 CFR 91.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Ohio.

Thomas D. Dyke

Mr. Dyke, 62, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Dyke meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Kansas.

Glenn D. Folkers

Mr. Folkers, 40, has had ITDM since 2000. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Folkers meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Nevada.

Anthony L. Gentry

Mr. Gentry, 35, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the

assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gentry meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Nebraska.

Howard L. Gocke

Mr. Gocke, 58, has had ITDM since 2002. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gocke meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Washington.

James S. Goldman

Mr. Goldman, 57, has had ITDM since 2000. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Goldman meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Pennsylvania.

Carol D. Hardin

Ms. Hardin, 57, has had ITDM since 2000. Her endocrinologist examined her in 2006 and certified that she has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of her diabetes using insulin, and is able to drive a CMV

safely. Ms. Hardin meets the requirements of the vision standard at 49 CFR 391.41(b)(10). Her optometrist examined her in 2005 and certified that she does not have diabetic retinopathy. She holds a Class B CDL from Mississippi.

Jerry Hardy

Mr. Hardy, 54, has had ITDM since 1992. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hardy meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Illinois.

Michael T. Hartley

Mr. Hartley, 50, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hartley meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Kentucky.

David A. Heider

Mr. Heider, 44, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Heider meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy.

He holds a Class A CDL from Wisconsin.

John A. Helm

Mr. Helm, 48, has had ITDM since 1991. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Helm meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B operator's license from Illinois.

John A. Herbert

Mr. Herbert, 51, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Herbert meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New Jersey.

Lester H. Hughes

Mr. Hughes, 46, has had ITDM since 1996. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hughes meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Virginia.

Gayle E. Jones

Mr. Jones, 29, has had ITDM since 2003. His endocrinologist examined him

in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Jones meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Iowa.

Gerald P. Kargus

Mr. Kargus, 53, has had ITDM since 1983. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Kargus meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Wisconsin.

Christopher A. Knott

Mr. Knott, 45, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Knott meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Norman L. Krietemeyer

Mr. Krietemeyer, 60, has had ITDM since 1995. His endocrinologist examined him in 2005 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring;

and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Krietemeyer meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class B CDL from Indiana.

Jerome A. Krupka

Mr. Krupka, 62, has had ITDM since 2006. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Krupka meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class B CDL from Wisconsin.

James A. Kunkel

Mr. Kunkel, 31, has had ITDM since 2003. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Kunkel meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Mark W. Lavorini

Mr. Lavorini, 35, has had ITDM since 1978. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Lavorini meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006

and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class C operator's license from Pennsylvania.

Jeffrey C. Link

Mr. Link, 23, has had ITDM since 2002. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Link meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from South Carolina.

Londell W. Luther

Mr. Luther, 27, has had ITDM since 1990. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Luther meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class C operator's license from Maryland.

Harry E. Marsh

Mr. Marsh, 59, has had ITDM since 2006. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Marsh meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Ohio.

Mr. McMasters, 49, has had ITDM since 1974. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. McMasters meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Indiana.

George R. McMullen

Mr. McMullen, 65, has had ITDM since 1996. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. McMullen meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

James B. Morris

Mr. Morris, 62, has had ITDM since 1993. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Morris meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from Georgia.

Bradley S. Mowdy

Mr. Mowdy, 48, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or

resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Mowdy meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from California.

James R. Murphy

Mr. Murphy, 61, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Murphy meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Colorado.

Ronald W. Nelson

Mr. Nelson, 52, has had ITDM since 1997. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Nelson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Vincent A. Palumbo

Mr. Palumbo, 52, has had ITDM since 1994. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Palumbo meets the

requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2005 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class D operator's license from New York.

Kent E. Pelkey

Mr. Pelkey, 42, has had ITDM since 1979. His endocrinologist examined him in 2005 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Pelkey meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2005 and certified that he has stable proliferative diabetic retinopathy. He holds a Class A CDL from Maine.

Keith E. Peterson

Mr. Peterson, 36, has had ITDM since 2006. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Peterson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from North Dakota.

Victor C. Port

Mr. Port, 45, has had ITDM since 1974. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Port meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from North Dakota.

Lee F. Powell

Mr. Powell, 60, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Powell meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Massachusetts.

Allen W. Quon

Mr. Quon, 44, has had ITDM since 2006. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Quon meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Maryland.

Armand O. Rondeau

Mr. Rondeau, 65, has had ITDM since 2004. His endocrinologist examined him in 2005 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Rondeau meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2005 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class B CDL from Massachusetts.

Carl J. Satariano

Mr. Satariano, 59, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the

assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Satariano meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from California.

Randall W. Skaggs

Mr. Skaggs, 47, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Skaggs meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Kentucky.

Louis L. Sorenson

Mr. Sorenson, 48, has had ITDM since 1996. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Sorenson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Minnesota.

James L. Spencer

Mr. Spencer, 53, has had ITDM since 1973. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Spencer meets the

requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class D operator's license from Delaware.

Ronald D. Stewart

Mr. Stewart, 51, has had ITDM since 1999. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Stewart meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Tennessee.

Andy L. Strommenger

Mr. Strommenger, 29, has had ITDM since 1987. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Strommenger meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Colorado.

Richard J. Symonies, Sr.

Mr. Symonies, 59, has had ITDM since 1993. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Symonies meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Douglas K. Thompson

Mr. Thompson, 38, has had ITDM since 1999. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Thompson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a class O operator's license from Michigan.

Richard L. Thompson

Mr. Thompson, 54, has had ITDM since 1984. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Thompson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from North Dakota.

James L. Tjon

Mr. Tjon, 52, has had ITDM since 1968. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Tjon meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Lowell T. Tucker

Mr. Tucker, 69, has had ITDM since 2000. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the

assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Tucker meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Kansas.

Shawn P. Wathley

Mr. Wathley, 40, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wathley meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Connecticut.

John P. Westbay

Mr. Westbay, 48, has had ITDM since 1987. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Westbay meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from New York.

John M. White

Mr. White, 50, has had ITDM since 1981. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV

safely. Mr. White meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class O operator's license from Nebraska, which allows him drive any non-commercial vehicle except a motorcycle.

Jeffrey M. Wood

Mr. Wood, 50, has had ITDM since 2000. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wood meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Illinois.

Christopher T. Worsley

Mr. Worsley, 29, has had ITDM since 2002. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Worsley meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Massachusetts.

Fredrick J. Young

Mr. Young, 37, has had ITDM since 2005. His endocrinologist examined him in 2005 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Young meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist

examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Virginia.

Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315, FMCSA requests public comment from all interested persons on the exemption petitions described in this Notice. We will consider all comments received before the close of business on the closing date indicated earlier in the Notice.

FMCSA notes that Section 4129 of the Safe, Accountable, Flexible and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) requires the Secretary to revise its diabetes exemption program established on September 3, 2003 (68 FR 52441).¹ The revision must provide for individual assessment of drivers with diabetes mellitus, and be consistent with the criteria described in section 4018 of the Transportation Equity Act for the 21st Century (49 U.S.C. 31305).

Section 4129 requires: (1) The elimination of the requirement for three years of experience operating CMVs while being treated with insulin; and (2) the establishment of a specified minimum period of insulin use to demonstrate stable control of diabetes before being allowed to operate a CMV.

In response to section 4129, FMCSA made immediate revisions to the diabetes exemption program established by the September 3, 2003 Notice. FMCSA discontinued use of the 3-year driving experience and fulfilled the requirements of section 4129 while continuing to ensure that operation of CMVs by drivers with ITDM will achieve the requisite level of safety required of all exemptions granted under 49 U.S.C. 31136(e).

Section 4129(d) also directed FMCSA to ensure that drivers of CMVs with ITDM are not held to a higher standard than other drivers, with the exception of limited operating, monitoring and medical requirements that are deemed medically necessary. FMCSA concluded that all of the operating, monitoring and medical requirements set out in the September 3, 2003 Notice, except as modified, were in compliance with section 4129(d). Therefore, all of the requirements set out in the September 3, 2003 Notice, except as modified in the Notice in the **Federal Register** on November 8, 2005 (70 FR 67777), remain in effect.

¹ Section 4129(a) refers to the 2003 Notice as a "final rule." However, the 2003 Notice did not issue a "final rule," but did establish the procedures and standards for issuing exemptions for drivers with ITDM.

Issued on: December 5, 2006.

Rose A. McMurry,

Associate Administrator, Policy and Program Development.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2006-26280; Notice 1]

The Braun Corporation, Receipt of Petition for Decision of Inconsequential Noncompliance

The Braun Corporation (Braun) has determined that certain wheelchair lifts it produced in 2005 through 2006 do not comply with S6.4.9 of 49 CFR 571.403, Federal Motor Vehicle Safety Standard (FMVSS) No. 403, "Platform lift systems for motor vehicles." Braun has filed an appropriate report pursuant to 49 CFR Part 573, "Defect and Noncompliance Reports."

Pursuant to 49 U.S.C. 30118(d) and 30120(h), Braun has petitioned for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of Braun's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Affected are a total of approximately 15,992 model NL, NCL, and NVL wheelchair lifts produced between April 1, 2005 and July 19, 2006. S6.4.9.7 of FMVSS No. 403 requires:

When tested in accordance with S7.12.1, each handrail must withstand 445 N (100 pounds force) applied at any point and in any direction on the handrail without more than 22 mm (1 inch) of displacement relative to the platform surface. After removal of the load, the handrail must exhibit no permanent deformation.

In addition, S6.4.9.9 of FMVSS No. 403 requires:

When tested in accordance with S7.12.2, each handrail must withstand 1,112 N (250 lbf) applied at any point and in any direction on the handrail without sustaining any failure, such as cracking, separation, fracture, or more than 100 mm (4 inches) of displacement of any point on the handrails relative to the platform surface.

The noncompliant lifts do not meet the displacement requirements of S6.4.9.7 and S6.4.9.9.

Braun believes that the noncompliance is inconsequential to
