Any questions regarding this application may be directed to J. Kyle Stephens, Director of Certificates, Gulf South Pipeline Company, LP, 20 East Greenway Plaza, Houston, Texas 77046, or at (713) 544-7309 (telephone); (713) 544-3540 (fax); or by e-mail: kyle.stephens@gulfsouthpl.com.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties.

However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a) (1) (iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Mandatory Reliability Standards for the Bulk-Power System; Notice of Filing

December 8, 2006.

On December 1, 2006, the North American Electric Reliability Council, on behalf of its affiliate, the North American Electric Reliability Corporation (collectively NERC), made an informational filing with the Commission entitled "NERC's Reliability Standards Development Plan: 2007-2009" (Work Plan).¹ NERC states that the Work Plan has been submitted to inform the Commission of NERC's program to improve the Reliability Standards that currently are the subject of the Commission's Notice of Proposed Rulemaking (NOPR) issued in this docket on October 20, 2006. NERC states that a portion of the Work Plan also fulfills the commitment made in its April 2006 ERO certification application to provide the Commission with a plan to address the "fill-in-the-blank" regional reliability standards. Finally, the informational filing contains a status report on the violation risk factors that NERC plans to assign to each requirement in NERC's Reliability Standards to help delineate the relative risks associated with the violation of each requirement of a Reliability Standard.

The Commission stated in its October 20, 2006 NOPR that it is important that

¹ The Commission certified NERC Corporation as the Electric Reliability Organization (ERO) pursuant to Section 215 of the Federal Power Act in an order issued July 20, 2006, in Docket No. RR06-1-000.

the ERO develop a detailed, comprehensive work plan to address all of the modifications that are directed pursuant to a final rule issued in this docket. The Commission believes that the Work Plan could be useful for determining such prioritization and would therefore be informative for the final rule. The Commission also believes that industry comment on the Work Plan would assist in developing an appropriate prioritization plan.

The Commission therefore seeks public comment on the Work Plan, with comments due by the January 3, 2007 to coincide with the date for filing comments on the October 20, 2006 NOPR.
