II. What Guidance Does this PR Notice Provide?

The EPA is concerned that sanitizer, disinfectant and other antimicrobial products are being used to treat surfaces of HVAC&R systems, including but not limited to use as a part of an air duct cleaning program. When initially registered, these products were approved for use on hard surfaces such as countertops, but air ducts were not intended to be included in the broad hard surface category. EPA is concerned that data demonstrating efficacy when used in air ducts have not been submitted for review by the Agency. Moreover, use of these products in HVAC&R systems such as air ducts pose potential human exposure and health risks to applicators and building occupants which have not been assessed by the Agency.

This draft PR Notice provides guidance which, once final, the Agency would provide to registrants concerning labeling language that EPA believes would address its current concerns for sanitizer, disinfectant and other antimicrobial products whose labels bear directions for use on, or incorporation within, hard, non-porous surfaces, but which have not been specifically approved for use in

HVAC&R systems. The PR Notice describes an Agency approach that registrants of products subject to this Notice should add a "Do Not Use" statement to the labeling of such products. Supporting documents for this draft PR Notice are contained in the docket.

EPA originally published this document for comment in the **Federal Register** on September 22, 2006 (71 FR 55471). The public comment period ended on November 21, 2006. EPA received a request from The Chlorine Institute to extend the comment period. The Chlorine Institute has requested that the Agency provide additional information which was utilized in support of the draft guidance. They have requested additional time to evaluate this information. EPA agrees to reopen the comment period for an additional 60 days.

III. Do PR Notices Contain Binding Requirements?

The PR Notice discussed in this notice is intended to provide guidance to EPA personnel and decision makers and to pesticide registrants. While the requirements in the statutes and Agency regulations are binding on EPA and the applicants, this PR Notice is not binding on either EPA or pesticide registrants, and EPA may depart from the guidance where circumstances warrant and without prior notice. Likewise, pesticide registrants may assert that the guidance is not appropriate generally or not applicable to a specific pesticide or situation.
