AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. National Emission Standards for Hazardous Air Pollutants: General Provisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA is proposing amendments to the General Provisions to the national emission standards for hazardous air pollutants (NESHAP). The proposed amendments would replace the policy described in the May 16, 1995 EPA memorandum entitled, "Potential to Emit for MACT Standards—Guidance on Timing Issues," from John Seitz, Director, Office of Air Quality Planning and Standards (OAQPS), to EPA Regional Air Division Directors. The proposed amendments provide that a major source may become an area source at any time by limiting its potential to emit hazardous air pollutants (HAP) to below the major source thresholds of 10 tons per year (tpy) of any single HAP or 25 tpy of any combination of HAP. Thus, under the proposed amendments, a major source can become an area source at any time, including after the first substantive compliance date of an applicable MACT standard so long as it limits its potential to emit to below the major source thresholds. We are also proposing to revise tables in numerous MACT standards that specify the applicability of General Provisions requirements to account for the regulatory provisions we are proposing to add through this notice.
