

Respondents/Affected Entities: Owners or operators of iron and steel foundries.

Estimated Number of Respondents: 98.

Frequency of Response: Initially, on occasion, and semiannually.

Estimated Total Annual Hour Burden: 29,747 hours.

Estimated Costs: \$2,919,524, which includes \$0 annualized Capital Startup costs, \$400,060 annualized Operating & Maintenance Costs (O&M), and \$2,519,464 annualized Labor Costs.

Changes in the Estimates: The increase in burden of 7,422 hours from the most recently approved ICR is due primarily to the inclusion of burden associated with existing sources commencing to conduct periodic scrap inspections and submitting periodic compliance reports. The burden associated with these activities has offset any burden associated with sources complying with the initial rule requirements (i.e., install the required emissions control and monitoring equipment, conduct initial performance tests, prepare the required written plans, and provide the one-time notifications), which was the basis for the burden calculation in the previous ICR.

The increase of \$127,460 in the total annualized cost is primarily due to an increase on the burden associated with operations and maintenance (O&M) of monitors. The O&M costs in the renewal of this ICR renewal has offset the capital costs associated with installation of the necessary monitoring equipment, which was the basis of the total annualized cost calculation in the previous ICR.
