

Respondents/Affected Entities: Owners or operators of iron and steel foundries.

Estimated Number of Respondents: 98.

Frequency of Response: Initially, on occasion, and semiannually.

Estimated Total Annual Hour Burden: 29,747 hours.

Estimated Costs: \$2,919,524, which includes \$0 annualized Capital Startup costs, \$400,060 annualized Operating & Maintenance Costs (O&M), and \$2,519,464 annualized Labor Costs.

Changes in the Estimates: The increase in burden of 7,422 hours from the most recently approved ICR is due primarily to the inclusion of burden associated with existing sources commencing to conduct periodic scrap inspections and submitting periodic compliance reports. The burden associated with these activities has offset any burden associated with sources complying with the initial rule requirements (i.e., install the required emissions control and monitoring equipment, conduct initial performance tests, prepare the required written plans, and provide the one-time notifications), which was the basis for the burden calculation in the previous ICR.

The increase of \$127,460 in the total annualized cost is primarily due to an increase on the burden associated with operations and maintenance (O&M) of monitors. The O&M costs in the renewal of this ICR renewal has offset the capital costs associated with installation of the necessary monitoring equipment, which was the basis of the total annualized cost calculation in the previous ICR.

Child-Specific Exposure Factors Handbook

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Re-opening of Public Comment Period.

SUMMARY: EPA is re-opening the public comment period for the draft document titled, "Child-Specific Exposure Factors Handbook" (EPA/600/R-06/096A). The document was prepared by the National Center for Environmental Assessment within EPA's Office of Research and Development.

On October 6, 2006, EPA published a **Federal Register** notice (71 FR 59107) announcing a 60-day public comment period that ended December 5, 2006. EPA is re-opening the public comment period for an additional 30 days in response to requests to extend the comment period.

The Child-Specific Exposure Factors Handbook provides a summary of statistical data on various exposure factors used in assessing children's exposures. This Handbook serves as a resource for exposure assessors for calculating children's exposures. These factors include: drinking water consumption, soil ingestion and mouthing behavior, inhalation rates, dermal factors including skin surface area and soil adherence factors, consumption of retail and home-grown foods, breast milk intake, and activity pattern data. An interim final version of this handbook was published in 2002. The updated version provides analysis of exposure factors data using the age groups for children as recommended in the EPA document entitled, "Guidance on Selecting Age Groups for Monitoring and Assessing Childhood Exposures to Environmental Contaminants" (EPA/630/P-03/003F) (Available on line at <http://cfpub.epa.gov/ncea/cfm/recordisplay.cfm?deid=146583>).

As previously stated in 71 FR 59107, EPA is releasing the draft "Child-Specific Exposure Factors Handbook" solely for the purpose of pre-dissemination peer review under applicable information quality guidelines. This document has not been formally disseminated by EPA. It does not represent and should not be construed to represent any Agency policy or determination. EPA will consider any public comments submitted in accordance with this notice when revising the document.

DATES: The 30-day public comment period begins January 22, 2007, and ends February 21, 2007. Technical comments should be in writing and must be received by EPA by February 21, 2007.

ADDRESSES: The draft, "Child-Specific Exposure Factors Handbook," is available primarily via the Internet on the National Center for Environmental Assessment's home page under the Recent Additions and the Data and Publications menus at <http://www.epa.gov/ncea>.
