

**ICR status:** This ICR is currently scheduled to expire on October 31, 2007. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** EPA's asbestos worker protection rule is designed to provide occupational exposure protection to state and local government employees who are engaged in asbestos abatement activities in states that do not have state plans approved by OSHA. The rule provides protection for public employees not covered by the OSHA standard from the adverse health effects associated with occupational exposure to asbestos. Specifically, the rule requires state and local governments to monitor employee exposure to asbestos, take action to reduce exposure to asbestos, monitor employee health, and train employees about asbestos hazards.

The rule includes a number of information reporting and recordkeeping requirements. State and local government agencies are required to provide employees with information about exposures to asbestos and the associated health effects. The rule also requires state and local governments to notify EPA before commencing any asbestos abatement project. State and local governments must maintain medical surveillance and monitoring records and training records on their employees, must establish a set of written procedures for respirator programs and must maintain procedures and records of respirator fit tests. EPA will use the information to monitor compliance with the asbestos worker protection rule. This request addresses these reporting and recordkeeping requirements.

Responses to the collection of information are mandatory (see 40 CFR part 763, subpart G). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

**Burden statement:** The annual public reporting and recordkeeping burden for this collection of information is

estimated to average 15.95 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized here:

*Estimated total number of potential respondents:* 25,312.

*Frequency of response:* On occasion; includes third-party notification.

*Estimated total average number of responses for each respondent:* 50.

*Estimated total annual burden hours:* 403,751 hours.

*Estimated total annual costs:* \$14,994,566. This includes an estimated burden cost of \$14,994,566 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

#### IV. Are There Changes in the Estimates from the Last Approval?

There is a decrease of 8,492 hours (from 412,243 hours to 403,751 hours) in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease principally reflects EPA's correction of the training burden for Class I and Class II competent persons that results from correctly annualizing the 40-hour training over five years rather than over a three-year period. While some changes were made in the calculations of the numbers of initial and periodic medical questionnaires that construction employees and supervisors complete, the net result of those changes has a very slight impact on the total annual burden hour estimate. This change is an adjustment.

#### V. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR

1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
