SUPPLEMENTARY INFORMATION:**I. Background**

The Occupational Employment Statistics (OES) survey is a Federal/State establishment survey of wage and salary workers designed to produce data on current occupational employment and wages. OES survey data assist in the development of employment and training programs established by the 1998 Workforce Investment Act (WIA), and the Perkins Vocational Education Act of 1998.

The OES program operates a periodic mail survey of a sample of non-farm establishments conducted by all fifty States, Guam, Puerto Rico, the District of Columbia, and the Virgin Islands. Over three-year periods, data on occupational employment and wages are collected by industry at the four- and five-digit North American Industry Classification System (NAICS) levels. The Department of Labor uses OES data in the administration of the Foreign Labor Certification process under the Immigration Act of 1990.

II. Current Action

Office of Management and Budget clearance is being sought for the Occupational Employment Statistics (OES) program. Occupational employment data obtained by the OES survey are used to develop information regarding current and projected employment needs and job opportunities. These data assist in the development of State vocational education plans. OES wage data provide a significant source of information to support a number of different Federal, State, and local efforts.

After being rigorously tested in six volunteer States, email collection has been implemented successfully in all fifty States. Currently, six percent of establishments submit data by email. These six percent of establishments account for twenty six percent of collected employment for the November 2005 panel.
